Narratives

Mitigation Needs Assessment:

The methodology for determining risk-based mitigation needs for the citizens of Puerto Rico considers several interrelated factors and characteristics of the Puerto Rico system. Using the lifeline construct, PRDOH has identified the greatest needs within each of the critical and secondary lifelines by evaluating contributors and mitigators of instability in four key pillars: (1) local planning and regulations, (2) structure and infrastructure improvement needs, (3) natural systems protection, and (4) education and awareness.

Through the Hazard and Risk Analyses and the analysis of lifeline assets and stakeholder input, PRDOH has identified both contributors to instability, as well as existing and potential mitigators of instability in a disaster event. Instability is the tendency to be highly impacted by a disturbance or hazardous event. The goal of mitigation is to reduce instability and move Puerto Rico into a more resilient state.

True mitigation reduces risk to people, lifelines, buildings, infrastructure, ecosystems, and cultural, historic, and natural resources. Mitigation promotes the reduction in risks to critical infrastructure by evaluating potential threats, encouraging resiliency in infrastructure, and planning for redundancy in lifeline services. Each lifeline depends on multiple infrastructure sectors, businesses, and supply chains to function.

PRDOH has determined that infrastructure within each of the seven (7) lifelines could benefit from modernization and investment in retrofits to meet requirements of the latest International Building Code 2018 requirements adopted by the Government of Puerto Rico in November 2018.

New construction that incorporates self-sustaining systems lessens the dependence on fragile centralized systems, thereby promoting resilience. Built-in redundancy and utilization of green infrastructure is key. Improved coordination and governance between institutions, regional problem-solving collaboration, and systems that improve digital data collection, sharing and dissemination are essential in this endeavor.

Proposed Use of Funds:

Nestled in the Caribbean more than 1,000 miles from the nearest shore of the contiguous United States (US), Puerto Rico, a US territory since the year 1898, is home to roughly 3 million Americans. The natural gifts of this archipelago are plentiful—the National Park System's only tropical rain forest is here, as are several bays filled with bioluminescent sea life, but the nature in Puerto Rico can also be fierce. Its people have had to endure and recover from a long history of hurricanes, earthquakes, landslides and other natural disasters, the most devastating of these being Hurricanes Irma and María, which hit the Island just weeks apart, in 2017. These events were declared the worst natural disaster in US history and left millions without power, without the ability to communicate, and many without food, water, or homes.

The geographic realities of living on a Caribbean Island, only 3,400 square miles in size that shares no state borders and is separated from its mainland country by more than 1,000 miles of open sea, require a mitigation-focused and collaborative approach to federally-backed investment in housing, infrastructure, and economic recovery, which must result in a demonstrable reduction in risk for the Island.

As the recovery needs in Puerto Rico increase with each disaster, the need for mitigation is ever present. The Government of Puerto Rico has been allocated \$8.285 billion in Community Development Block Grant - Mitigation (CDBG-MIT) funding for long-term planning and risk mitigation activities.

CDBG-MIT Programs in this Action Plan are structured to align with best practice mitigation guidance and current capital investments planned for the Island. PRDOH has identified four (4) unifying strategies built into the Mitigation programs to align with the coordination of mitigation projects and leverage requirements found at Federal Register Vol. 84, No. 169 (August 30, 2019), 84 FR 45847. These unifying strategies are woven into program design and incentivized through evaluation criteria and supported by the development of capacity-building tools, including the Risk Assessment evaluation tool released during stakeholder engagement. These strategies include:

- Capacity Building: Make central the importance of continued planning, transparency of information and data sharing critical to emergency response and resilience and increase the planning and implementation capacity for entities and citizens. A key component of increased capacity is also tied to the adoption of policies and procedures that reflect municipal and regional priorities with long-lasting effects on community risk reduction.
- Community and Regional Investment: Reduce the conditions of risk through community and regional level projects that identify transformative mitigation opportunities that serve the needs of vulnerable communities and reduce the displacement of individuals.
- Lifeline Stability and Strengthening: Strengthen the critical lifelines through prioritizing infrastructure improvements that avoid or reduce disruption of critical services while promoting sustainability.
- Alignment of Capital Investments: Alignment of CDBG-MIT programs and projects with other planned federal, state, regional, or local capital improvements.

Overall Progress Narrative:

The CDBG-MIT grant continued making progress towards increasing resilience to disasters and reducing long-term risk. Infrastructure received 270 Competitive applications, 202 were deemed Eligible, 62 Ineligible, and 6 were Withdrawn from the Competition. Preliminary Eligibility and Selection Notices were issued on March 26, 2024. Regarding Strategic projects, the PRASA San Lorenzo Potable Water Supply project and the PRPA Army Terminal Pier project were awarded SRAs. Regarding the ASEM Trauma Center project, the Strategic Project Preliminary Eligibility Report was approved on February 23rd and a Reservation of Funds Notice was issued to ASEM on March 19th. The SF-MIT program has created 2,082 applications, and 1,036 applicants received a formal notification of their eligibility status, affirming their eligibility to access crucial mitigation resources. SIH executed contracts with 15 residential developers, cementing collaborative efforts to construct single-family homes earmarked for applicants equipped with relocation vouchers. MSC executed an Agreement with a Subrecipient to oversee and manage program activities and to conduct community outreach and engagement, for 2 communities. CEWRI-IP has received 1,090 applications, 270 awards have been executed, and 70 installations completed. Community Installations program has completed over 850 surveys throughout all Community Groups. HERI program has executed 2,471 awards.

Activity Description:

The Single-Family Housing Mitigation Program is available to eU households in Puerto Rico that face risk as calculated in the Puerto Rico Risk Assessment. Due to limited resources, however, PRDOH has designed this Program to prioritize mitigation assistance to those households with an immediate threat that are uninhabitable due to damages from recent disasters or hazardous events, are under immediate threat due to damage from recent events, are certified as a Substantially Damaged property under local regulations, and/or are located in a high-risk area in Puerto Rico. As funding allows, PRDOH will continue to develop targeted strategies to identify and assist households with the greatest risks. The Single-Family Housing Mitigation Program has been designed to prioritize mitigation solutions according to the property conditions, location and risk level for homeowners categorized under the beneficiaries' classifications, interested in repairs, rehabilitation, voluntary relocation, or elevation as means to reduce the risk of loss of life and property. This Program offers individual flood and landslide-threatened homeowners the option to investigate the feasibility of elevation of their home, the feasibility of reinforcing the property foundation, or the alternative option for voluntary relocation. The Single-Family Housing Mitigation Program also includes the installation of solar and water resilience systems as part of mitigation activities.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH) achieved significant milestones

within the Single-Family Housing Mitigation Program (SF MIT or SFM), demonstrating a steadfast commitment to bolstering resilience and safeguarding vulnerable communities.

A primary focus of the SFM Program during this period was outreach by engaging with potential applicants residing in floodways or high-risk floodplains. Recognizing the criticality of these areas, PRDOH targeted its efforts toward households facing heightened exposure to flood hazards. By identifying floodplain zones where the disparity between ground datum level and base flood elevation exceeds eight vertical feet, PRDOH effectively delineated regions susceptible to severe flooding impacts, underscoring the urgent need for mitigation measures. In anticipation of major future flooding events, the Program's proactive stance aimed to mitigate the risk of flooding, ensuring the safety of affected occupants.

Concurrently with outreach efforts, the SFM Program diligently progressed through the intake, eligibility, and property assessment phases, laying the groundwork for future mitigation initiatives. The Program has created 2,082 applications, demonstrating a robust community engagement and interest in mitigation assistance. Among these, 1,604 applications remain active. Also, 1,444 applications successfully navigated the intake phase, signaling a significant step toward their eligibility determination. 1,036 applicants received a formal notification of their eligibility status, affirming their eligibility to access crucial mitigation resources.

Furthermore, the SFM Program conducted 329 property risk assessments during the reporting period, contributing to a cumulative total of 571 assessments completed to date. These assessments represent a vital component in the Program's strategic approach, facilitating informed decision-making and tailored mitigation strategies.

Additionally, PRDOH executed contracts with 15 residential developers, cementing collaborative efforts to construct single-family homes earmarked for applicants equipped with relocation vouchers. This strategic alliance underscores the Program's holistic approach, addressing not only mitigation needs but also fostering sustainable housing solutions for displaced individuals.

PRDOH remains committed to mitigating flood risks and safeguarding residents as SFM Program enhances community resilience.

Activity Description:

The Social Interest Housing Mitigation Program (SIHM) will be available for eligible organizations that have demonstrated experience working with populations to be served under this housing program, such as: homeless, senior citizens, domestic violence victims, persons with intellectual disability, persons with developmental and/ or physical disability, persons living with HIV/AIDS, individuals recovering from addiction and individuals with other functional or access needs. The SIHM Program is intended to address the varying and localized need for mitigation against a number of hazardous threats, and not to limit projects based on the top risks at the Island-wide level, nor by an assumption of need in a generalized way. Community threats differ greatly when local geography and geographic susceptibility to hazards is considered. It is for this reason that the Program promotes data-informed decision making for all eligible applicant entities by launching the publicly transparent Risk and Critical Assets Assessment tools. The goal for the Program is to address the mitigation needs by funding projects with high-quality, modern, resilient housing solutions for vulnerable populations and protected classes.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During this reporting period, the Puerto Rico Department of Housing's (PRDOH) Social Interest Housing Mitigation Program (SIHM), implemented under the Community Development Block Grant Mitigation (CDBG-MIT) allocation, is evaluating twenty-four (24) pre-selected applications through the Project Concept Feasibility

Analysis (PCFA) process. This process is being conducted by the Architectural, Engineering, and Management (AE&M) vendor, contracted to provide services to the PRDOH, specifically for the SIHM Program pre-selected applicants. In this process, the AE&M evaluation will assess the viability of the applicants' projects based on their technical knowledge, experience, and expertise. The PCFA process aims to determine if the proposed risk-based mitigation and resiliency measures, scope of work, costs, and other vital criteria are implementable while ensuring compliance with Federal, State, and Local regulations. Feasible projects meeting these criteria may advance to subsequent phases of the SIHM Program, benefiting the vulnerable population that the program aims to positively impact.

Activity Description:

The Multi-Sector Community Mitigation Program (MSC-MIT/MSC)320 has been designed to provide socially vulnerable communities (or community sectors) who experience socioeconomic and environmental disparities the opportunity to relocate away from high-risk zones while maintaining their communities together. Most, if not all, of the socially vulnerable communities in Puerto Rico have also suffered significant hardships and damages from past natural disasters and are disproportionately located in high-risk zones, such as coastal zones threatened by rising sea levels, floodplains, landslides, and liquefaction-prone areas among others.

The MSC Program recognizes that Puerto Rican communities face a pressing need to reduce environmental risks. The types and degree of natural hazards that threaten the health, safety, and well-being of these communities can vary greatly. By addressing these risks locally, and at a community, rather than an individual level, the MSC Program promotes neighborhoods and communities relocation to help its residents thrive in a lower risk environment. The MSC Program primarily considers mitigation needs for households in high-risk areas, but it also seeks to incorporate a holistic community perspective that can minimize the impact of risk reduction activities which could otherwise displace individuals or disrupt communities.

Due to the complexities of relocating residents and businesses while maintaining the community together, the MSC Program will fund a wide range of activities, including planning and feasibility studies, job creation and retention for relocated businesses, public infrastructure improvements, housing construction, reconstruction and rehabilitation, acquisition, relocation, public services, demolition, and buyout (voluntary acquisition), among other activities.

Targeted Communities that participate in the MSC Program will enter a Participatory Design process facilitated by PRDOH through which community residents will decide where they wish to relocate, which housing typology they wish to have, which communal infrastructure they wish to incorporate, and which values and priorities they wish to apply to their new community project design. Targeted communities will be assisted by a Targeted

Community Representative (TCR) who will assist the community through all phases of the MSC Program. The TRC will be entrusted with decision making authority on behalf of the community and will serve as a liaison between the community, the MSC Program and PRDOH.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During this reporting period, the Puerto Rico Department of Housing (PRDOH) completed the following tasks.

1. Executed an Agreement with a Subrecipient Pathstone Corp. to oversee and manage program activities and to conduct community outreach and engagement, for 2 communities: El Faro in Guayanilla and Juana Matos in Catano. Following this, the program completed the onboarding process with the Subrecipient, ensuring integration and alignment with the program goals and objectives.
2. Held meetings with multiple governmental agencies to identify properties suitable for the relocation of the participating communities. Through these endeavors, several potential sites were identified, with four sites currently undergoing preliminary environmental screening assessments. Additionally, the program conducted on-site visits to assess the suitability and feasibility of the locations.
3. Continued its ongoing coordination efforts with the set-aside subrecipient, ENLACE, through regular monthly meetings. Discussions during these meetings have encompassed a variety of topics, including the progress reporting through the Grant Portal Compliance (GCP), discussions regarding the implementation of the subrecipient’s relocation plan, and consultations on the RFP package for Project Management Services.
4. Initiated a QBS Negotiation process with a Design and Engineering Firm for Design Services for El Faro Community. Negotiations are currently ongoing.

Executed an Agreement with a Subrecipient Pathstone Corp. to oversee and manage program activities and to conduct community outreach and engagement, for 2 communities: El Faro in Guayanilla and Juana Matos in Catano. Following this, the program completed the onboarding process with the Subrecipient, ensuring integration and alignment with the program goals and objectives.
2. Held meetings with multiple governmental agencies to identify properties suitable for the relocation of the participating communities. Through these endeavors, several potential sites were identified, with four sites currently undergoing preliminary environmental screening assessments. Additionally, the program conducted on-site visits to assess the suitability and feasibility of the locations.
3. Continued its ongoing coordination efforts with the set-aside subrecipient, ENLACE, through regular monthly meetings. Discussions during these meetings have encompassed a variety of topics, including the progress reporting through the Grant Portal Compliance (GCP), discussions regarding the implementation of the subrecipient’s relocation plan, and consultations on the RFP package for Project Management Services.
4. Initiated a QBS Negotiation process with a Design and Engineering Firm for Design Services for El Faro Community. Negotiations are currently ongoing.

Activity Description:

PRDOH will administer one (1) Mitigation Infrastructure Program intended to fund projects within the full range of eligible public facilities improvement activities so long as the project mitigates identified risk(s). Projects must demonstrate risk mitigation properties that benefit the population under the urgent need or LMI national objective, and LMI beneficiaries must be prioritized. The greater number of hazards mitigated by one (1) project, the better. Smaller-scale projects that mitigate the most risk for specific neighborhoods, municipalities, or regions shall be considered if they are an established priority project and supported by a sound feasibility analysis and justification. The most competitive projects, however, will be those that leverage regional solutions and partnerships, provide a greater risk reduction benefit to the critical lifelines, and benefit more citizens. Due to the varying and localized need for mitigation against several hazardous threats, PRDOH does not want to limit projects based on the top risks at the Island-wide level, nor by an assumption of need in a generalized way. The ultimate goal of this Program is to strategically identify areas of risk and mitigate the most risk for the greatest amount of people in a cost-effective manner. This is best accomplished through planning, design, and innovation realized through the implementation of public facilities improvement eligible under this Program. Projects eligible for funding are intended to serve the needs of the people by allowing for scaled investments that make critical mitigation dollars accessible to all communities on the Island: municipal, regional, or Island-wide.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH) completed the evaluation of the INFRA-MIT Competitive Applications. From 270 received Applications 202 were deemed Eligible, 62 Ineligible, and 6 were Withdrawn from the Competition. Preliminary Eligibility and Selection Notices were issued on March 26, 2024. The INFRA-MIT Competitive Program selected 23 projects distributed as follows: 17 projects from municipalities, 4 from state agencies, and 2 from NGOs. PRDOH will enter into 23 Subrecipient Agreements after completing the capacity assessments and corresponding requirements, totaling \$776,275,410 in CDBG-MIT funds.

Regarding Strategic projects, the PRASA San Lorenzo Potable Water Supply project and the PRPA Army Terminal Pier project were awarded SRAs. The five (5) Strategic Solid Waste Management (SWM) Projects have been identified and preliminarily selected to commence the program eligibility review phase. All the information needed to review the eligibility of the Toa Alta SWM project was received. The Coastal Erosion Initiative continues in the project identification phase with the presentation of three projects being evaluated to the Coastal Erosion Executive Council as established in Executive Order 2023-009. Additionally, the following projects were identified as Strategic projects and are being reviewed for completeness of the information: Guaynabo’s San Patricio Flood Control project, and PRHTA’s Arcibo Access Improvements (PR-2, PR-680 and PR-681) project.

Activity Description:

The Program includes a one (\$1) billion dollars set-aside for HMGP match to provide the required twenty-five percent (25%) non-federal match funding for FEMA HMGP projects through a Global Match Program. Projects funded by FEMA HMGP must comply with HMGP resilience standards and meet the mitigation standards of this Program according to the project evaluation criteria. For HMGP match projects, mitigation merit shall be determined by the BCA results of each project selected for match funding. By working with COR3 to execute dually funded resilience projects, PRDOH will advance long-term resilience to hazard risk identified in the Risk Assessment. HMGP projects selected for match shall be determined in direct coordination with COR3, and shall therefore adhere to the direct selection method maximum award: MAX AWARD: \$600,000,000. Exceptions to the maximum award will be considered by PRDOH on a case-by-case basis which shall contemplate the project's long term mitigation potential, the circumstances under which an exception is needed, whether the project BCA demonstrates that the cost of providing assistance is necessary and reasonable, and the project operations and maintenance plan. Exceptions to the maximum award will be considered when necessary to comply with federal accessibility standards, or to reasonably accommodate persons with disabilities.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH) HMGP-MIT Program has led recurring project status meetings with PREPA, PRASA, the Municipality of Moca, and the PR Department of

Health to discuss their project's progress.

The Program has also led coordination meetings with FEMA HMGP and COR3 HMGP to discuss the progress of the HMGP-MIT projects and the project's deliverables and periods of performance.

As part of the NEPA Compliance, with PRDOH as the Lead Agency for the Environmental Review of the HMGP-MIT Projects, PRDOH submitted a consultation to USFWS for PRASA's Enrique Ortega WTP Generators Project, for which USFWS responded and concurred with the determination that the proposed project may affect but is not likely to adversely affect the Puerto Rican boa with the implementation of the conservation measures. PRDOH has also reviewed the Environmental Assessment (EA) Draft, Sections 1 – 7, and the 8-Step Process Decision Making Analysis and Final Notice Publication Draft for PRASA's Enrique Ortega WTP Generators Project.

PRDOH published the A&E Services RFP Package on behalf of the PR Department of Health for the Lajas & Rio Grande CDT Generators Project on the CDBG-DR/MIT webpage, as part of the project's Design Phase.

The Program has led Initial Planning Meetings with PRASA for the Bauta Project and with the Municipality of Ponce for the Padre Noel Storm Water Project to discuss the project implementation path.

Activity Description:

The Program includes a one (\$1) billion-dollar set-aside to strengthen healthcare facilities for the benefit of medically underserved citizens, and minimize, through accessible healthcare, the fatalities likely from a disaster event. As such, it shall be implemented in consultation with the Puerto Rico Department of Health. Method for administration of funds shall be published in the Program Guidelines. Program activities can include improvements, expansions, and construction of new facilities to fortify and innovate buildings and permanent equipment.

healthcare system to mitigate the impacts of future disasters, both natural and human-caused, such as the COVID-19 pandemic. Building architecture for new construction must incorporate disaster-resistant building elements and self-sustaining power, water, and data communication features.

Such facilities should prove resistant to disaster-induced threats, thereby increasing the number of patients that can be sheltered and served in a disaster event. New resilient hospitals and clinics must be constructed to the most recent IBC 2018 standards and strategically located to reduce vulnerability to flooding and earthquakes. New facilities will be encouraged to meet LEED or other appropriate green building standards. Building design should consider the integration of information technology and building architecture to support sustainable power and data communication. New construction must include the installation of tele-health technology. Projects for the Healthcare Strengthening Set-Aside shall be selected employing both the competitive and the strategic selection methods. Requirements for direct selection of strategic health projects shall be identified to the Program by the Central Government in coordination with the Puerto Rico Department of Health and/or other State Agencies. Projects at or above \$100 million could exceed the Covered Project threshold established by HUD, thereby requiring a full BCA for the projects to qualify for funding.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH) completed the Completeness and Eligibility Review phases for the Competitive applications received. As for now, PRDOH is conducting the Scoring and Ranking phase for the eligible applications. PRDOH expects to issue the preliminary eligibility and selection notices determinations by Q2 2024. Regarding the Healthcare Set-Aside Strategic Projects, the Program is supporting ASSMCA's Dr. Ramón Ruiz Arnau Psychiatric Hospital and DCR's Correctional Mental Health Institution with the implementation phase of their SRAs. A/E conceptual design and initial environmental review tasks were initiated for the ASSMCA hospital. For the Correctional Mental Health Institution, the DCR & PRIFA are completing an RFP package to procure Design Services. Regarding the ASEM Trauma Center project, the Strategic Project Preliminary Eligibility Report was approved on February 23rd and a Reservation of Funds Notice was issued to ASEM on March 19th. The BCA report and Covered Project Narrative are in the process of being finalized in preparation for a Substantial Action Plan Amendment to include the Trauma Center as a covered project.

Activity Description:
 PR Highway 10 Improvements.

Location Description:

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH) continued with the environmental review phase of the PR-10 project. PRDOH and FHWA issued a joint Public Notice on 03/19/2024 as part of the public involvement process for the Environmental Assessment (EA) of the project. Continued with the weekly meetings with FHWA and HUD to discuss and receive technical assistance in the implementation of the environmental review process.

Activity Description:

The Economic Development Investment Portfolio for Growth Lifeline Mitigation Program is a mitigation-focused extension of the CDBG-DR program that will target funding for privately owned lifeline infrastructure to support Risk-Based Mitigation Needs. The launch of this program shall also take into account the changing economic landscape, as benefits of economic recovery efforts tied to the hurricanes are realized. Revitalizing Puerto Rico through economic investment is more than a program. It is a commitment to the renewal and expansion of quality-of-life opportunities for Puerto Rican citizens, empowering them to own their own recovery from future hazard events. The means to accomplish such a goal are not found in a one-dimensional approach to economic funding, but rather in laying the foundation for ongoing evaluation, planning, and formulation of adaptive investment strategies that take into consideration the economic constraints and opportunities at that time. Much like CDBG-DR, this mitigation-focused extension of the program is intended to fund large-scale redevelopment projects that are transformative in nature and create jobs as well as cascading economic impacts. Projects under this program are key to a comprehensive mitigation strategy to enable and nurture strategic growth nodes and strengthen economic vitality.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH) completed the following tasks in support of the Economic Development Investment Portfolio for Growth-Lifeline Mitigation Program (IPG-MIT):

Financial and environmental pre-screenings were completed for all preliminarily eligible applications. The first IPG-MIT Strategic Council meeting was held on 2/27/2024 to reach eligibility determinations over applications received. The Strategic Council validated the eligibility and ineligibility determinations for all applications received. After the Strategic Council's determinations, all preliminary eligible notifications and ineligibility notifications were sent to applicants. The underwriting review for all preliminary eligible applications was initiated. Two authorized underwriting entities were onboarded, and all preliminarily eligible applications were assigned an underwriter. Underwriting Requests for Additional Information were sent to applicants. Virtual kick-off meetings on Program Overview, Underwriting and Environmental processes were held on 03/15, 03/20 and 03/21, respectively.

Activity Description:

INCENTIVE PROGRAM. Max Award: \$15,000 per household. An incentive program covering up to \$15,000 or up to thirty percent (30%) of household project costs, whichever is less, will be offered to enable the installation of renewable energy systems, including storage, which provide electricity to the building property during times of electric grid failure. The maximum award can be raised for households in Vieques and Culebra in tandem with the islands' market conditions.

Eligible applicants must own or have a proprietary interest in the single-family residential structure, and it must be their primary residence. Eligible households are those with a household income of up to 200% AMFI.

Applicants will be evaluated on a rolling basis to facilitate steady flow of assistance to eligible households under the urgent need mitigation national objective. Within each round of applicant evaluations, priority will be given to households with high-risk energy security need. The Program will make assistance available through rounds.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH) completed the following tasks and

continued working in support of the Community Energy and Water Resilience Installations - Incentive Program (CEWRI-IP) whose application period was been extended through March 31, 2024. Approximately 703 applications were been received in this period. Related to the Application Evaluation process, 815 intake reviews, 792 household eligibility reviews, and 1,311 system eligibility reviews were completed. Additionally, 1,040 environmental reviews were completed, 552 awards were executed, and 176 installations completed. Weekly meetings are conducted with the two Program Managers to address progress toward program goals. The Award Notice for new Program Managers' support was issued throughout this period.

Activity Description:

COMMUNITY INSTALLATIONS. Max Award: \$40,000 per household. Exceptions to the maximum award will be evaluated on a case-by-case basis taking into consideration unforeseen site conditions or incidental improvements required to meet the program's intent of community resilience. Community installations of energy production and storage systems solutions may be offered to complement home-based improvements or reduce household barriers to mitigation. Community scale projects may include individual household renewable energy and water storage systems that are installed in targeted communities as part of a collective.

Energy-related institutions, agencies, and utility providers developed relevant data on the communities that long suffered power outages after recent disasters. For example, on August 14th, 2018, Bo. Real An6n, Rafces sector, a rural community in Ponce, was declared the last community to restore power by PREPA after 328 days since Hurricane Marfa hit Puerto Rico. Communities that suffered a prolonged period of power outages dealt with catastrophic outcomes, including death, emigration, health distress, and economic instability, among other issues.

Data collected from PREPA, LUMA, as the Transmission and Distribution Operator for the Grid, the University of Puerto Rico and the Department of Energy and its Labs, among others, will be used to identify the most vulnerable communities due to the lack of energy during extended periods of time. Through this data, the Subprogram shall directly select these vulnerable communities through a targeted outreach strategy to offer the opportunity to collectively secure their well-being through resiliency improvements that may include installing water storage and photovoltaic systems with battery storage, at capacities aligned with household needs.

Eligible applicants to this Program must occupy a single-family home structure serving as their primary residence. Assistance will be provided directly to eligible occupants within targeted communities.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH) continued working on three community groups to assist residents served by the identified feeders 9901-01 and 9901-02 from the Ala de la Piedra Substation in Orocovis, Puerto Rico on behalf of the CEWRI-CI Program: Community Group 1 (GC1) comprised of the Ala de la Piedra Community, Community Group 2 (CG2) comprised by barrios in Cacaos, Collores & Damian Abajo, and Community Group 3 (CG3) comprised by the Bauta Abajo Community.

For CG1, after completing a hundred and eight (108) surveys for the Ala de la Piedra Community, the Program team has developed recommended determinations of the Photovoltaic System with Battery Storage and a Water Storage System installation for each registered household. These recommendations based on household surveys were published in January 2024 with the Request for Proposals (RFP) CDBG-MIT-RFP-2023-02 PV Systems, Water Storage System, Design, Acquisition, and Installation Services. Proposals were received for this RFP in March 2024 and are currently undergoing evaluation. Additionally, intake and eligibility have formally started for applicants from CG1.

Surveys have been completed for CG2 and the community profile has been created in preparation for a future PV Systems, Water Storage System, Design, Acquisition, and Installation Services RFP.

For CG3, home surveys continue in progress. At this time the Program has completed over 850 surveys throughout all Community Groups.

Activity Description:

HOME ENERGY RESILIENCE IMPROVEMENTS. Max Award: \$30,000. The maximum award can be raised for households in Vieques and Culebra in tandem with the islands' market conditions. Homes unprepared for the natural threats on the power grid were left vulnerable in the aftermath of Hurricanes Irma and Marfa. Rebuilding to protect federal investment and to sustain recovery efforts requires resilient design and improvements that incorporate modern technology for life-sustaining purposes during off-grid events. Energy and water resilience efforts may include conducting a home energy evaluation and the promotion of energy efficiency and stability. Resilient design and improvements include things such as the installation of photovoltaic systems, £GiGf generators, and battery storage at capacities aligned with household needs, including the consideration of critical medical needs.

Eligible applicants to this Program must own or have a proprietary interest in the single-family home structure and it must be their primary residence. Assistance will be provided directly to property owners as the eligible applicant. Households must also be below eighty percent (80%) AMFI.

PRDOH will further target the most vulnerable within the LMI population, starting with very low-income households. As ""HUD regulations and guidance for CDBG generally do not define vulnerable populations, and definitions may vary", PRDOH has identified income as a key vulnerability indicator based on historical data from CDBG-DR R3 Program applicants. Very low-income applicants made up 86% of total applications and within that group, 56% were elderly residents. Furthermore, income is directly related to a household's ability to address high-risk energy security due to the high cost of systems.

Applicants will be evaluated on a rolling basis to facilitate steady flow of assistance to eligible households. Within each round of applicant evaluations, priority will be given to households with high-risk energy security need. The Program will make assistance available through rounds. Each round will have a maximum eligible AMFI category.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH) completed the following tasks, in support of the Community Energy and Water Resilience Installations (CEWRI-HERI) Program: A new round was launched on January 31st with 6,194 tickets issued. Of those new round tickets, 3,258 applications were submitted applicants for Program review. In the Application Evaluation process pertaining to both HERI rounds, the following actions were completed throughout this reporting period: 1,965 intake reviews, 1,339 household eligibility reviews, 950 system eligibility reviews, and 633 environmental reviews. Furthermore, 778 eligibility determinations are notified with 737 of these being favorable eligibility and award determinations. 766 awards for the Program were executed, 1,000 applicants submitted their Award Disbursement Claim after completing installations, and 598 Award Disbursement Claims were approved. Weekly meetings are conducted with the two Program Managers to address progress toward program goals. Best practices training sessions have also been provided to the PM along with additional tools like the award calculator for capacity building. Two new Program Managers have been notified of an award resulting from the increase capacity RFP previously published.

Completed Activity Actual End Date:

Responsible Organization:

Puerto Rico Department of Housing

Overall	Jan 1 thru Mar 31, 2024	To Date
Total Projected Budget from All Sources	\$0.00	\$130,000,000.00
Total Budget	\$0.00	\$130,000,000.00
Total Obligated	(\$2,271,033.99)	\$5,740,262.32
Total Funds Drawdown	\$61,083.63	\$557,306.82
Program Funds Drawdown	\$61,083.63	\$557,306.82
Program Income Drawdown	\$0.00	\$0.00
Program Income Received	\$0.00	\$0.00
Total Funds Expended	\$61,083.63	\$557,306.82
Puerto Rico Department of Housing	\$61,083.63	\$557,306.82
Most Impacted and Distressed Expended	\$0.00	\$0.00

Activity Description:

The Risk and Asset Data (RAD) Collection Program will build on the foundation of the spatial data infrastructure created under the GeoFrame Program. This program will produce layers of hazard, asset, and risk data intended to complement the cadastral and land use data produced under the GeoFrame Program. It is intended to enhance the ability of citizens, private sector business and industry, mayors, governors and other leaders to make data-driven decisions that are rooted in an up-to-date comprehensive understanding of hazards, risks, and assets on the Island.

This Program encourages a common understanding of how mitigation investments reduce risks to people, homes, neighborhoods, cultural and historic resources, ecosystems, and lifelines. HUD encourages grantees in 84 FR 45838, 45849 to use CDBG-MIT funds to upgrade mapping, data, and other capabilities to better understand evolving potential disaster risk.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH) completed the following tasks in support of the Risk and Asset Data (RAD) Collection Program:

For the System Planning Vendor Services Request for Proposals (RFP), PRDOH finalized the negotiation process and submitted a Notification of Award to participating proposers.

As part of stakeholder engagement efforts, PRDOH sent engagement follow-up emails and conducted meetings with the PR Telecommunications Bureau (JRT), the Puerto Rico Office on Management and Budget (OGP), the

Insurance Commissioner Office (OCS), PR Telecommunications Alliance, and the State Election Commission (CEE) for Program introductions or Memorandum of Understanding (MOU) draft discussions.

Puerto Rico Department of Housing	\$47,540.15	\$359,071.63
Most Impacted and Distressed Expended	\$0.00	\$0.00

Activity Description:

The Mitigation and Adaptation Policy Support Program builds on information related to policy needs across the Island collected through the stakeholder engagement process for this Action Plan, the Disaster Recovery Planning Programs, including the MRP Program, WCRP Program, and the GeoFrame Program. It shall also utilize, as it becomes available, the information collected under the CDBG-MIT Planning and Capacity Building and RAD Programs. Adaptation and policy support refer to the use of policy, building code, land use plans, zoning, and planning and capacity building interventions to enhance local jurisdictional and community ability to prepare and plan for, avoid, absorb, recover from, and more successfully adapt to potential risk from hazardous events. The evaluation of social structures, such as policy and governance of development in Puerto Rico, shall be based on the geographically based Risk Assessment completed and made available to the public, which yields an increased understanding of risk to integrate and align local, state, and federal policies that impact mitigation and long-term resilience in Puerto Rico. The Mitigation and Adaptation Policy Support Program will further the policy-related goals identified by HUD in 84 FR 45838. The Federal Register seeks to support the adoption of policies that reflect municipal and regional priorities that will have long-lasting effects on community risk reduction and lessen the cost of future disasters. The Federal Register also encourages grantees to use CDBG-MIT funds to improve many of their governmental functions to better position jurisdictions to be more resilient in the face of future disasters.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH) made steady progress in supporting the Mitigation and Adaptation Policy Support Program (MAPS) Program. PRDOH MAPS Team and the Program Vendor continued to implement Task A (Analysis of Existing Policy Framework) and Task B (Gap Analysis and Collection of Additional Information) of the MAPS Program's Scope of Services outlined on Contract Exhibits. This effort is undertaken to expedite the work required to meet the Strategic timelines and Performance Goals established by the MAPS Program. PRDOH MAPS Team has requested specialized services for the development of a Resilience Scorecard. This effort will allow the Program Vendor to provide essential services for the assessment of policies and regulations about mitigation and adaptation in Puerto Rico. PRDOH MAPS Board held one (1) program meeting during this period with a briefing of the Program progress. Lastly, PRDOH continued its efforts to engage with potential Supporting Entities for the MAPS Program through informative meetings and working sessions. For the performance period, PRDOH held four (4) working sessions with the entities. The goal of these efforts is to discuss with the Supporting Entities the participation requirements and Subrecipient Agreement Process.

Activity Description:

The Planning and Capacity Building Program will build on information and progress made through the CDBG-DR Planning Programs including the MRP Program, WCRP Program, and the GeoFrame Program. It will also utilize, as it becomes available, information collected under the CDBG-MIT RAD Collection Program. Finally, the program will continue and expand on stakeholder engagement to develop and implement a regional approach to planning, permitting, and enforcement that supports risk identification and mitigation.

The Planning and Capacity Building Program is intended to strengthen the capacity of state agencies, municipalities, NGOs and existing regional partnerships by assisting in the formation and/or strengthening and formalizing existing, regional consortia to conduct mitigation enhancing activities. These activities will range from narrow to broad. Some activities may include mitigation planning, green infrastructure education programs, emergency management training and demonstrations for building code compliance. Additional activities may include broad-based mandates such as furthering regional economic development planning, promoting safe and affordable housing, and assisting in access to private, state, and federal funding for activities that benefit the lifeline sectors, among others.

HUD emphasizes capacity building in 84 FR 45838 for multiple levels of government and the benefits of regional (multi-jurisdictional) planning and cooperation as a means for increasing capacity. The Planning and Capacity Building Program seeks to further those goals by supporting regional and multi-jurisdictional approaches to planning that enhances assessment and mitigation of risk.

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH), completed the following tasks in support of the PCB Program: As part of the PCB Capacity Building Workshop Component, PRDOH finished negotiations with the two (2) selected entities as workshop providers and SRAs are pending signatures. The next step for organizations that will benefit from the workshops (eligible entities) is to register through the form available on the Program's Landing Page. This will allow the workshop provider to reach out and perform tasks related to entities' assessment, and other tasks related to potential workshop participants, as detailed in the Deliverable Guide.

For the Competitive Round Component, PRDOH hosted a second webinar announcing the first PCB Competitive Round. The PCB Competitive Round was launched on February 22nd, 2024, and will be open until May 22nd, 2024. The next step for organizations that will benefit from the competitive round (eligible entities) is to apply for the PCB Competitive Round through the Grant Application Portal Module (GAP) available on the PCB website landing page.

Activity Description:

Through the Planning and Capacity Building Program, PRDOH will work directly with applicant entities to create formalized regional consortia or strengthen existing entities that provide increased development capacity on a multi-jurisdictional basis. The program will offer technical assistance by partnering with federal agencies, national associations and other organizations to provide educational and capacity building support services. This increase in capacity will benefit state agencies, municipalities, NGOs, planning and development organizations, and other public-serving entities and organizations in the evaluation and support of partnerships to promote mitigation.

Activities of regional cooperation that promote mitigation by strengthening lifelines can include, but are not limited to:

- *Disaster and Mitigation Planning
- *Economic and Community Development activities
- *Housing
- *Natural Resource Conservation and Protection
- *Materials Management
- *Watershed Management
- *Transportation and Transit
- *Social Services

According to the Lincoln Institute of Land Policy, regionalism “generally refers to ways of thinking and acting at the regional scale. As one example, the National Association of Development Organizations (NADO) states, “(N)atural disasters do not obey local jurisdictional boundaries. [...] (R)egional hazard mitigation planning activities offer the benefit of pooling regional resources and developing a more integrated regional approach to disaster planning across jurisdictional lines.

Further, the benefits of regionalism can extend far beyond disaster planning and encompass a variety of other activities that contribute to an area's greater natural, economic, and social resilience. Again, according to NADO, such regional benefit can be achieved through the formal development of regional consortia, commonly known as Regional Development Organizations (RDO). "Known locally as councils of governments, regional planning commissions, economic development districts, and other names, RDOs provide various types of support to their member communities in a host of service areas. RDOs can open the door to grant and loan funding, provide administrative support, and supply valuable staff support and access to technology. For rural places, in particular, they can play a critical role in towns that may have limited capacity and resources."

Location Description:

Municipalities throughout the island.

Activity Progress Narrative:

During the reporting period, the Puerto Rico Department of Housing (PRDOH) completed the following tasks in support of the Planning Oversight:

Published the CDBG-MIT Action Plan Substantial Amendment for public comments and submitted the revised Action Plan for HUD approval. PRDOH continued state entity coordination with multiple agencies related to the CDBG-MIT Community Lifelines assets. Furthermore, PRDOH continued outreach and dissemination of the mitigation funds.
