Narratives

Disaster Damage:

The 2017 hurricane season brought insurmountable devastation to Puerto Rico when in the month of September, the island experienced Category five (5) and four (4) storms, Hurricane Irma and Hurricane Maria. Hurricane Maria was the most devastating natural disaster to hit Puerto Rico since San Felipe made landfall nine decades ago in 1928. Since that time, the population has doubled in size from 1.5 million residents compared to today's population of 3.4 million. Hurricane Irma made landfall on September 6, 2017 as a Category five (5) storm with winds up to 100 miles per hour. The storm cut power to an estimated two-thirds of the main island, leaving communities ravaged. Just two (2) weeks later, Hurricane Maria made landfall on September 20, 2017 as a Category 4 storm measuring 35 miles in width, making direct impact with the 35-mile wide island. Hurricane Maria impacted the entirety of Puerto Rico with recorded winds up to 155 miles an hour, river surges up to 47 feet, massive mudslides, and localized catastrophic flooding reaching up to 38 inches. An estimated 64 lives were immediately lost in the storm with hundreds more lost to secondary conditions caused by lack of power, contaminated water sources, and limited to no access to healthcare services. Today over 90% of the island's power has been restored, however recurring outages continue to affect the still-fragile grid. Inundated by back-to-back storms, Puerto Rico experienced 100% impact from Hurricane Maria just two (2) weeks after surviving regional impact from Hurricane Irma. The subsequent impact of these storms compounded damage to the island leaving extremely vulnerable housing structures extensively damaged or completely leveled in almost every municipio. As a US territory located 1,000 miles from the mainland states, the Puerto Rico archipelago is isolated from the continental US and depends heavily on maritime commerce for major resources. Hurricane warnings were issued 37 hours³ before landfall, but due to the severity of Hurricane Maria and the trajectory of the storm, first responders were unable to preposition relief resources. Relief efforts and immediate aid were further delayed by up to three days due to the shutdown of significantly damaged seaports and airports. The geography of the main island further complicated relief efforts. Stretching 100 miles across and 35 miles top to bottom, the island is covered with vastly different terrain: rain forest, deserts, beaches, caves, oceans and rivers. Puerto Rico has three (3) main physiographic regions: the mountainous interior which covers approximately 60% of the island, the coastal lowlands, and the karst area characterized by underground drainage systems with sinkholes and caves. There are over 50 rivers and 60 watersheds that surged with flood waters when Maria hit. According to data gathered by FEMA Individual Assistance Program, hurricanes Irma and Maria caused damage to an estimated 1,067,6184 homes, the collapse or severe obstruction of numerous roads, and loss of power across the entire island. Post-storm conditions have only complicated relief efforts as residents had been left without essential services including power and clean water. The National Oceanic and Atmospheric Administration (NOAA) recorded Hurricane Maria winds that reached up to 155 mph in the City of San Juan. Early estimates accurately captured extreme wind and rain threats, and a storm trajectory to impact the island head-on before proceeding northwest to the mainland US. Puerto Rico sustained hurricane force winds sweeping at maximum strength first through the islands of

Vieques and Culebra then the northeast coast before sweeping westward across the main island. Wind and rain collapsed weak homes and buildings, uprooted trees, and lashed fragile power lines in every corner of the island causing a complete blackout. Severe flooding and mudslides occurred in every interior mountainous region of the island.

Recovery Needs:

Puerto Rico is committed to building back stronger and more resilient to future hazards. Activities supporting this commitment will not only enhance the quality of construction for life-saving protective measures, but also preserve the integrity of the federal investment contributed by the American people. The rebirth of Puerto Rico hinges on sustainable growth yielded by the influx of recovery monies. Through strategic partnership and resiliency planning, Puerto Rico will set the stage for long-term investment and economic return. Implementation of recovery activities will focus on innovation and the perpetual application of mitigation and resilience techniques.

With this opportunity to rebuild, Puerto Rico will increase housing opportunities and affirmatively promote housing choice throughout the housing market. Program implementation will be conducted in a manner which will not cause discrimination on the basis of race, color, religion, sex, disability, familial status, or national origin.

PRDOH will use housing counseling programs and whole community resilience programs to build programs informed by housing choice to provide affordable housing. Because planning decisions may affect racial, ethnic and low-income concentrations, these programs will help provide affordable housing choice in areas that are defined as low-poverty or non-minority where appropriate and in response to natural hazard related impacts. PRDOH will consider the impact of planning decisions on racial, ethnic, and low-income concentrations. This may include utilizing mapping tools and data to identify racially or ethnically-concentrated areas of poverty for the evaluation of possible impacts to those areas as well as to promote fair housing choice and to foster inclusive communities.

Puerto Rico will implement construction methods that emphasize quality, durability, energy efficiency, sustainability, and mold resistance. All rehabilitation, reconstruction, and new construction will be designed to incorporate principles of sustainability, including water and energy efficiency, resilience, and mitigation against the impact of future shocks and stressors.

Construction performed under the programs will adhere to the 2011 Puerto Rico building code.²⁰ Importantly, the Code includes requirements regarding earthquake loads. This is vital as Puerto Rico must build structures that are resilient not only for hurricanes and wind, but for seismic activity as well. This is consistent with the goal of protecting people and property from harm; emphasizing high quality, durability, energy efficiency, sustainability, and mold resistance; supporting the adoption and enforcement of modern and/or resilient building codes and mitigation of hazard risk, including possible sea level rise, high winds, storm surge, and flooding, where appropriate; and implementing and ensuring compliance with the Green Building standards.

Puerto Rico will enforce procurement procedures that increase the use of sustainable standards, which may include FORTIFIED Home™ and Leadership in Energy and Environmental Design (LEED) certified construction vendors.

For non-substantially rehabilitated housing structures, Puerto Rico will follow the HUD Community Planning and Development (CPD) Green Building Retrofit Checklist guidelines to the extent they are applicable to the construction methods utilized on the Island. When older or obsolete products are replaced as part of rehabilitation work, Puerto Rico will use products and appliances with ENERGY STAR labels, Water Sense labels, or Federal Energy Management Program (FEMP equivalent) designations.

In conducting its impact and unmet needs assessment for this CDBG-DR Action Plan, Puerto Rico has designed program objectives and supporting budgets to consider the additional costs associated with protecting housing and community investments from future disasters through eligible resilience activities.

Responsible Organization	Organization Type	Proposed Budget
Department of Economic Development and Commerce (DDEC)	State Agency	\$ 22,500,000.00

Location Description:

The funding is available to be used in all Puerto Rico municipalities affected by the hurricanes across the island.

Activity Description:

The Small Business Financing Program provides a range of flexible and thoroughly underwritten grant and loan options to assist with storm recovery and business expansion. Specifically, the program financing options will be composed of the Recovery Grant Program, and Recovery and Expansion Loans which will include Option A

Working Capital Line of Credit and Option B Term Loans for Larger Projects as described below. The program objective is to provide capital to:

- Expand growth opportunities and economic recovery by addressing local business needs for working capital;
- Retain and expand employment of Puerto Rico residents through business expansion; and
- Fortify and coach businesses to expand their ability to work with private banking institutions and other financial entities for future financing needs.

The program design is to have DDEC implementing the program with the support of Relationship Manager entities who will be part of the intake and application process and assist the business with supportive services throughout the life of their grant or loan. As part of the program design, DDEC will convene an RFP process to engage Relationship Managers to provide technical assistance (TA) for business recovery and growth planning and support in producing vetted grant and/or loan applications. The Relationship Manager is a combination of lender, TA provider, coach and voice of encouragement, grit, persistence and accountability as borrowers recover and grow their businesses with the needed working capital.

DDEC will also be working with BDE who will serve as loan underwriter, administrator and servicer to identify financial products with terms and conditions that best match the needs and capacity of the applicant. These three entities will work together to serve the needs of local businesses.

Department of Economic Development and Commerce (DDEC)	State Agency	\$ 10,500,000.00

Location Description:

The funding is available to be used in all Puerto Rico municipalities affected by the hurricanes across the island.

Activity Description:

The recovery funds serving to rebuild the island’s housing and infrastructure will serve as a vital injection of funds into the local economy if properly structured. Providing local contractors access to start-up and mobilization capital will build local reconstruction capacity and maximize the amount of funds recirculated into the island’s economy. The CCRL will provide capital to bridge payments on construction contracts and working capital for business recovery and expansion including items such as staff and/or services to expand grant compliance and financial management capacity. The CCRL will have two components: 1-CAPACITY BUILDING GRANTS- Borrowers can apply for a Capacity Building Grant up to \$50,000 based on need. This grant can be drawn at loan closing to cover costs related to help a contractor be more competitive and to secure and successfully manage new CDBG-DR construction work.

2-CONSTRUCTION BRIDGE FINANCING AND WORKING CAPITAL- Borrower can be approved for up to \$1,000,000. Lines of credit will be sized based on the value of construction contracts and the business recovery and expansion plan.

The combined maximum line of credit is \$1,000,000 which will be made available to borrowers demonstrating an ability to repay the loan and meet the underwriting and compliance criteria. Compensating factors may be used to assist in determining an applicant’s bankability based on flexible underwriting criteria.

In addition to flexible capital, DDEC will provide capacity building support to target contractor borrowers, especially in more rural inland areas on the island. Many contractors may need Technical Assistance (TA) to learn an expanded range of construction, business and contract management, accounting and reporting skills to meet the requirements of government-funded disaster recovery construction projects. CDBG-DR provides the flexibility to deploy TA to help target contractors grow and sustain their business operations within the discipline and accountability of a lending relationship.

DDEC will convene an RFP process to engage Relationship Managers to provide TA for business recovery and growth planning and support in producing vetted grant and/or loan applications. This role is a combination of lender, TA provider, coach and voice of encouragement, grit, persistence and accountability as borrowers recover and grow their businesses.

The Relationship Manager will work with DDEC and its underwriter BDE to identify the financial product and terms and conditions that best matches the needs and capacity of the applicant.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Department of Economic Development and Commerce (DDEC)	State Agency	\$ 24,500,000.00

Location Description:

The funding is available to be used in all Puerto Rico municipalities affected by the hurricanes across the island.

Activity Description:

The recovery funds serving to rebuild the island’s housing and infrastructure will serve as a vital injection of funds into the local economy if properly structured. Providing local contractors access to start-up and mobilization capital will build local reconstruction capacity and maximize the amount of funds recirculated into the island’s economy. The CCRL will provide capital to bridge payments on construction contracts and working capital for business recovery and expansion including items such as staff and/or services to expand grant compliance and financial management capacity. The CCRL will have two components: 1-CAPACITY BUILDING GRANTS- Borrowers can apply for a Capacity Building Grant up to \$50,000 based on need. This grant can be drawn at loan closing to cover costs related to help a contractor be more competitive and to secure and successfully manage new CDBG-DR construction work.

2-CONSTRUCTION BRIDGE FINANCING AND WORKING CAPITAL- Borrower can be approved for up to \$1,000,000. Lines of credit will be sized based on the value of construction contracts and the business recovery and expansion plan.

The combined maximum line of credit is \$1,000,000 which will be made available to borrowers demonstrating an ability to repay the loan and meet the underwriting and compliance criteria. Compensating factors may be used to assist in determining an applicant’s bankability based on flexible underwriting criteria.

In addition to flexible capital, DDEC will provide capacity building support to target contractor borrowers, especially in more rural inland areas on the island. Many contractors may need Technical Assistance (TA) to learn an expanded range of construction, business and contract management, accounting and reporting skills to meet the requirements of government-funded disaster recovery construction projects. CDBG-DR provides the flexibility to deploy TA to help target contractors grow and sustain their business operations within the discipline and accountability of a lending relationship.

DDEC will convene an RFP process to engage Relationship Managers to provide TA for business recovery and growth planning and support in producing vetted grant and/or loan applications. This role is a combination of lender, TA provider, coach and voice of encouragement, grit, persistence and accountability as borrowers recover and grow their businesses.

The Relationship Manager will work with DDEC and its underwriter BDE to identify the financial product and terms and conditions that best matches the needs and capacity of the applicant.

Department of Economic Development and Commerce (DDEC)	State Agency	\$ 25,000,000.00

Location Description:

The funding is available to be used in all Puerto Rico municipalities affected by the hurricanes across the island.

Activity Description:

Given the impacts of Hurricane Maria on tourism assets and long-term economic conditions, PRDOH in partnership with DDEC, will fund subrecipients to develop a comprehensive marketing effort to promote outside the Island that the area is open for business. DDEC will also utilize internal expertise for this activity, including work under its Collaboration Agreement with Invest Puerto Rico, which is a non-profit corporation created by law (Act 13-2017) to ensure continuity.

Additionally, Puerto Rico will create and implement strategies promoting Puerto Rico as an ideal place to do business. This will attract new businesses of external capital that can contribute additional capital to the economy. Marketing Puerto Rico as a pro-business jurisdiction will encourage new external investments, promote economic development and create new jobs. Efforts will work to prevent tourism and service sector displacement or business failure as a result of the hurricane impact.

The projected use of funds for marketing and outreach efforts will be focused on advertising creation and media placement (television/radio/digital and out-of-home advertising) outside of Puerto Rico, as well as promoting Puerto Rico as an ideal place to do business. No elected officials or political candidates will be featured or included in promotional marketing funded through this program. Per CDBG regulation, CDBG-DR funds shall not be used to engage in partisan political activities, such as candidate forums.

The increased revenue brought to local economies through tourism will fund jobs that stabilize households through primary, secondary and tertiary jobs created in communities across the Island.

Puerto Rico requested and received a waiver from HUD for \$15,000,000 for this activity. PRDOH sought a waiver request to incorporate additional funds allocated in the substantial amendment due to the critical importance of creating investment in the Island post-Maria.

KEY PERFORMANCE INDICATORS

DMO and Invest PR will track and analyze the performance and impact of the following outputs and outcomes (Key Performance Indicators, or KPIs) with their respective scopes of work:

TOURISM MARKETING

1. Optimize the brand health of Tourism in Puerto Rico as evidenced by tracking an increase in baseline targeted level of positive earned media coverage for the destination.
2. Track the Publicity Value of Promotional Investment by the dollar ad equivalency value delivered relative to the dollar value invested.
3. Increase in General Visitation as measured by an increase in # of visitors and/or % increase in visitation, as compared to the baseline measurement of likely travelers targeted over a 5-year period.

BUSINESS MARKETING

Invest PR will use standard marketing KPIs to provide specific, numerical marketing metrics and tracking to measure their progress towards increasing the visibility, within marketing channels, of doing business in Puerto Rico's by highlighting the unique benefits within the island and as a base for business operations.

1. Insight and better coordination of marketing for industry specific sectors to help sharpen the message of where and how Puerto Rico has competitive market advantages in the global economy;
2. Clarification and streamlining of processes for permitting and related logistics to facilitate attraction of businesses to invest in and set-up and expand business operations in Puerto Rico;
3. Volume and dollar amount of new investment capital in business operations in Puerto Rico;
4. Volume of existing and/or new business enterprises that establish facilities and/or operations in Puerto Rico;
5. Volume of new jobs created as a result of the added investment in new and existing businesses.

Activity Description:

RE-GROW PR has two primary aims: 1) Promote and increase food security island-wide, and 2) Enhance and expand agricultural production related to economic revitalization and development activity. Given its island status, Puerto Rico has long recognized the food security challenges of dependence on imported food products, and certainly experienced a heightened degree of risk during the aftermath of the hurricanes. Historically, Puerto Rico has focused agricultural production on several main crop typologies, and RE-GROW PR will address this food security risk by increasing local production and expanding diversity of agricultural production on the island. RE-GROW PR will serve both urban and rural areas and will seek to capitalize on urban in-fill opportunities to install community gardens where vacant lots may exist, or where blighted structures are being demolished. RE-GROW PR will work to promote crop diversification and expand production of locally consumed produce, and further meet the needs of expansion in the tourism sector to meet culinary needs of Puerto Rico’s renowned and burgeoning gastronomic sector. Greenhouses may also be viable strategies considered to reduce crop losses in both rural and urban environments, utilizing large-scale formats in rural areas, converted warehouses or abandoned industrial sites, and roof-top greenhouses in urban areas. Crops to support goals in the tourism sector via culinary arts and eco-tourism needs will also be prioritized, such as growth of key produce and herbs such as cilantro, chives, basil, oregano, avocados, tomatoes, peppers, etc. as well as investments to address impacts to coffee production. This program represents an opportunity for collaboration between multiple potential partners within the public, academic, and non-governmental sectors. At the outset, RE-GROW PR aims to focus on the following potential activities to increase food security and bolster social and economic resilience: • Urban agriculture - community gardens • Rural agriculture investments, crop diversification to meet island food security needs • Rural and urban greenhouses • Agricultural cultivation and livestock production to feed into culinary programs and meet culinary tourism demands • Aquaculture/aquafarming This program will release a notice of funding availability (NOFA) in the first quarter of 2019 that will outline parameters for application and participation, and outline award caps. Over the long-term, RE-GROW PR will aim to create further economic development opportunities through exports of locally grown produce, livestock, and aquaculture outputs.

Activity Description:

Responding to the varied opportunities that the designation of Opportunity Zones provides across the Island, the program will foster both mixed-use, community-based development, as well as major infrastructure improvements for Puerto Rico. The objective of this program is to develop a series of projects that are concentrated in opportunity zones across Puerto Rico, that result in large-scale commercial or industrial development is a broad-ranging category of activities and that cover a wide variety of economic development tasks. Projects are expected to result in the creation of public private partnerships in which CDBG-DR funds are used for the public infrastructure components of projects, while the leveraged funds will be used for the economic development activities or additional project costs. This may include, but is not limited to the development/redevelopment of:

- Retail facilities such as shopping centers or stores; commercial facilities such as hotels, shipping distribution centers, or office buildings; Industrial/manufacturing complexes such as factories or industrial parks; and public commercial spaces such as convention centers or parking garages.
- Mixed-use developments in opportunity zones, whereby funds will be used to create housing, business opportunities, and other economic development, with an initial focus on housing stock being made available to low-to-moderate income persons.
- Infrastructure development (such as a new road to a commercial facility) often accompanies these types of large economic development activities. Infrastructure activities, as related to large-scale development projects, are non-housing activities that support improvements to the public capital stock. This includes transportation facilities (street rehabilitation, sidewalk improvements, streetlights, parking facilities, etc.); and water, sewer, and drainage improvements. These projects will require large levels of financial investment, of which the CDBG-DR portion may range from minor to significant. The projects will have a large community impact, whether in terms of job creation, service to the neighborhood, or renewal of a given area. Depending on the nature of the project, they may involve real estate development, whether it is the construction of a new facility or the expansion of an existing building and will be expected to involve various types of financing and sources of funds. For example, large-scale projects often have a combination of private lender financing, various types of public financing, and business owner cash injections. This program will be established for the funding of projects that will significantly impact and enable the long-term economic growth and sustainability of the Island. This program has the capacity to be a funding stream for projects determined by the central government to be key drivers for Puerto Rico's new economy and to align with the economic recovery plan. As such, funds will be directed to innovative solutions that are forward-looking, cost efficient, and socially transformative. Targeting of new business incentives and existing business expansion will also be components of this program. Additionally, the program expects entities providing key services related to the project will result in the creation of activities that support LMI workers and key strategic growth sectors as outlined in the Recovery Plan and Fiscal Plan. The Public Private Partnerships (P3) will support this effort by cultivating potential projects with a high leverage component and initiatives that have long-term sustainability frameworks that do not solely rely upon CDBG-DR or other public funding streams. Other activities may include economic recovery subordinate loan components. PRDOH and/or P3 may enter into an agreement with BDE and/or Invest PR to provide assistance in the delivery of these programs as necessary. All potential projects will comply with HUD national objectives.

- Infrastructure development (such as a new road to a commercial facility) often accompanies these types of large economic development activities. Infrastructure activities, as related to large-scale development projects, are non-housing activities that support improvements to the public capital stock. This includes transportation facilities (street rehabilitation, sidewalk improvements, streetlights, parking facilities, etc.); and water, sewer, and drainage improvements. These projects will require large levels of financial investment, of which the CDBG-DR portion may range from minor to significant. The projects will have a large community impact, whether in terms of job creation, service to the neighborhood, or renewal of a given area. Depending on the nature of the project, they may involve real estate development, whether it is the construction of a new facility or the expansion of an existing building and will be expected to involve various types of financing and sources of funds. For example, large-scale projects often have a combination of private lender financing, various types of public financing, and business owner cash injections. This program will be established for the funding of projects that will significantly impact and enable the long-term economic growth and sustainability of the Island. This program has the capacity to be a funding stream for projects determined by the central government to be key drivers for Puerto Rico's new economy and to align with the economic recovery plan. As such, funds will be directed to innovative solutions that are forward-looking, cost efficient, and socially transformative. Targeting of new business incentives and existing business expansion will also be components of this program. Additionally, the program expects entities providing key services related to the project will result in the creation of activities that support LMI workers and key strategic growth sectors as outlined in the Recovery Plan and Fiscal Plan. The Public Private Partnerships (P3) will support this effort by cultivating potential projects with a high leverage component and initiatives that have long-term sustainability frameworks that do not solely rely upon CDBG-DR or other public funding streams. Other activities may include economic recovery subordinate loan components. PRDOH and/or P3 may enter into an agreement with BDE and/or Invest PR to provide assistance in the delivery of these programs as necessary. All potential projects will comply with HUD national objectives.

Activity Description:

The Housing Reconstruction Program provides funding to homeowners to repair damaged homes or rebuild substantially damaged homes in place in non-hazard areas. Reconstruction activity returns otherwise displaced families to their homes in their same community. Homes become eligible for reconstruction when the property estimated cost of repair exceeds \$48,000 or 50% of the current value¹¹⁵ – as confirmed through program inspection, or a feasibility inspection determines that reconstruction is required. Homes meeting this damage threshold will be reconstructed to include resilient measures in structural materials. Homes that may not be rebuilt in place due to legal, engineering or environmental constraints (permitting, extraordinary site conditions, etc.) will not be reconstructed and the homeowner will be provided relocation options.

Location Description:

The funding is available to be used in all Puerto Rico municipalities affected by the hurricanes across the island.

Activity Description:

The goal of the Title Clearance Program is to provide clear title to homeowners throughout the hurricane-impacted area, therefore resulting in long-term sustainability and security for residents. Applicants who are otherwise eligible for rehabilitation or reconstruction assistance under the housing program who need remedial and curative title/ownership actions will be prioritized for limited legal services assistance. Limited legal services to resolve title issues will be performed under the direction or supervision of one or more attorneys duly licensed and authorized to practice law within the Commonwealth of Puerto Rico under rates that are subject to program approval. Homeowners unable to resolve title issues with the assistance of the legal service providers may be recommended for longer-term assistance, separate and apart from the services provided under this program.

Activity Description:

This program creates housing capacity for special needs populations such as: homeless, senior citizens, domestic violence victims, persons with intellectual disability, persons with developmental and/ or physical disability, persons living with HIV/AIDS, individuals recovering from addiction and individuals with other functional or access needs. Residents of social interest housing constructed through this program may have access to housing counseling services, which may connect the resident with support services such as HOPWA, Section 8, or rental subsidy programs. The goal for the program is to create high-quality, modern, resilient housing solutions for these populations in need.

Puerto Rico Housing Finance (AFV)

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Puerto Rico Housing Finance (AFV)	State Agency	\$ 113,000,000.00

Location Description:

The funding is available to be used in all Puerto Rico municipalities affected by the hurricanes across the island.

Activity Description:

Puerto Rico receives millions of dollars each year in Low Income Housing Tax Credits (LIHTC) and currently has more than \$1 billion in LIHTC 4% projects available to be leveraged. Additionally, at least eleven (11) projects under the 9% tax-credit program are shovel-ready and awaiting gap financing. PRDOH will provide gap funding, using CDBG-DR dollars, for properties being developed with LIHTC, thus maximizing the benefit provided by both federal funding streams.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Puerto Rico Department of Housing	State Agency	\$ 0.00

Location Description:

The funding is available to be used in all Puerto Rico municipalities affected by the hurricanes across the island.

Activity Description:

The Home Energy Resilience program will provide homeowners or renters a voucher for a gas or solar powered water heater, and/or gas-powered stove, installation and related appurtenances so that residents can perform basic functions such as showering and preparing meals at home in the event of a power outage. 122 Vouchers may be used at PRDOH pre-qualified vendors and installers. The cap in value per applicant is \$6,000, with only one system installation per home. Equipment will be installed and affixed to the residence. Priority will be given to the elderly and limited to low-income residents. Priority for the elderly does not preclude assistance to other eligible applicants. PRDOH anticipates providing home energy resilience improvements to at least 6,000 families under this program.

Location Description:

Municipalities across the island.

Activity Description:

This program will provide funding for necessary expenses related to long-term recovery and restoration of multifamily housing and will increase the availability of affordable housing through strategic investments in multifamily buildings and by supporting code compliance updates in existing buildings. Assistance is rendered in the form of a performance-based loan as secured through a promissory note. The note will be forgiven when all contractual obligations have been met, including satisfactory completion of construction and conditions found in the Land Use Restriction Agreement, and compliance with the 15-year or 20-year affordability period, depending on the number of units and nature of construction. 139 Properties may go through an underwriting to review the ownership structure, property operations, the sources and uses of funds, and the financial statements of the owner and guarantor (if applicable). The underlying debt and operating expenses of the property may be reviewed to determine if the project is feasible during the affordability period and demonstrates income adequate to cover operating expenses and applicable debt service. This program will also seek to serve Section 8 and Égida (elderly) communities. New development of multifamily rental properties serving retirees (and potentially others) may also be considered to align with Puerto Rico as a retirement destination and to increase affordable housing options in existing urban footprints or near university centers. PRDOH may work with qualified non-profit organizations, such as Habitat for Humanity, on innovative models for multifamily building repair.

Proposed Budget

\$ 46,857,788.00

Location Description:

Municipalities across the island.

Activity Description:

Outmigration and loss of population base due to disaster creates a negative cycle for communities struggling to recover across the Island. Loss of population base post-disaster is a challenge that impacts communities of all sizes. When residents leave after a disaster and do not return, this creates ripple effects across the community, impacting schools, the economy through closure of businesses, loss of workforce, revenue declines, and reducing public financial capacity to provide services to the community. Availability of affordable housing options is part of the equation, but the financial stability and resources available to residents to purchase their own homes are also important parameters related to an individual or family's ability to secure long-term options and contributes to long-term community recovery. For individuals and families considering the option to return to their community or move, it is often a consideration of the ability to reestablish a firm foundation, whether to re-root themselves or seek a new opportunity elsewhere. This program, under the administration of the Puerto Rico Public Housing Authority (AFV), helps Puerto Ricans purchase homes through a variety of support mechanisms, thereby increasing the level of homeownership in impacted communities and contributing to long-term sustainability and viability of communities across the Island. This program will seek to target critical recovery workforce sectors, recognizing the importance of first responders, teachers, healthcare workers and medical personnel, and law enforcement. This program understands that these members of the workforce are instrumental in incentivizing the return of other residents to ensure community viability, and sufficient workforce in these critical sectors is vital in creating positive ripple effects across communities, as they provide public safety, emergency support, education for school age children, and healthcare for families in communities working to recover and rebuild. Eligible applicants will be provided with closing cost assistance (e.g. Title insurance, mortgage insurance premium, etc.), down payment assistance and/or soft second mortgage, to assist with the gap between the amount of first mortgage the household is able to obtain from a lender and the purchase price of a home. No interest or payments are required on this "silent second" mortgage provided that the recipient fulfills the five-year occupancy requirement. Before a prospective buyer is referred to counseling or to execute a sales agreement for CDBG-DR assistance, the buyer must complete an Application for Assistance. The information obtained in the application will be used – along with verifications – to determine a buyer's eligibility to purchase a home and to receive CDBG-DR assistance. Before approved buyers begin looking for a home to purchase, they should be pre-qualified for a mortgage loan. This takes the guess work out of deciding how much for a house a prospective homeowner can afford. Lenders sometimes call this preliminary paperwork a "pre-approval" and will issue a letter stating that a prospective homeowner has been conditionally approved up to a certain amount. Also, the housing counselor will help a buyer to analyze how much he or she will likely be able to borrow using these factors before the buyer approaches a lender to apply for mortgage qualification or pre-qualification. All applicants will receive housing counseling services to determine which form of housing assistance offers the best option for the household and to educate prospective homebuyers about the responsibilities of being a homeowner. Upon notification of approval of an application for assistance, buyers will be referred to an approved program that offers pre-purchase counseling and education. All homebuyers must also complete 8 hours of homeowner training to be considered eligible. PRDOH will proactively communicate with realty and lending professionals who work with the general homebuying public. These professionals can identify potentially eligible buyers and refer them for CDBG-DR qualification, effectively expanding program marketing. The real-estate professionals are experienced with the home purchase process and can help guide eligible buyers through that process, ensuring that buyers attain their goal within reasonable times.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Puerto Rico Department of Housing	State Agency	\$ 70,000,000.00

Location Description:

The funding is available to be used in all Puerto Rico municipalities affected by the hurricanes across the island.

Activity Description:

Long-term resilience measures and infrastructure improvements are critical to the ongoing recovery of Puerto Rico. To fortify infrastructure with resilience measures, it will be of the utmost importance to leverage CDBG-DR dollars in conjunction with other funding streams. By combining CDBG-DR funds with those of other federal grant programs, PRDOH will maximize the benefit achieved for the Island and greatly relieve the financial burden on local municipalities and other eligible applicants. At this time, most long-term reconstruction projects are still undergoing the formulation process. As a result, the exact amount of CDBG-DR funds needed to meet the match requirements is still being assessed. However, the total match required for just the FEMA PA, IA and HMGP programs is expected to far exceed the \$1 billion that is currently allocated to this program, as the match requirement for the HMGP program alone is \$1 billion. A significant financial burden remains even after FEMA agreed to several amendments to the disaster declaration for Hurricane María (DR 4339) and has covered 100% of the cost share of Category A and B project worksheets, including debris removal through June 17, 2018, Category B emergency protective measures through May 18, 2018, and funding for the Sheltering and Temporary Emergency Power Pilot Program (STEP) which allowed Puerto Rico to make short term repairs to over 100,000 homes, through September 15, 2018. While the amount of CDBG-DR funds needed to match the debris removal and temporary work projects is dependent on the value of work performed outside of the 100% cost-share period, PRDOH has estimated that for the STEP program alone, costs will exceed \$20 million in matching costs required for work performed outside of the 100% FEMA-funded period.

Proposed budgets for organizations carrying out Activity:

Responsible Organization	Organization Type	Proposed Budget
Puerto Rico Department of Housing	State Agency	\$ 124,954,103.00

Location Description:

Municipalities across the island.

Activity Description:

To realize the full potential of a holistic recovery across the Island, critical infrastructure needs must be addressed in a way that goes beyond what has been done in past efforts. CIR will fund the rebuilding, hardening, and making more resilient of critical infrastructure assets (e.g. roads, bridges, channels, healthcare facilities, etc.) that are located across the Island. In so doing, the Island will be more adaptable to changing conditions, and able to withstand and recover rapidly from disruptions caused by future disasters. This Program will also seek to ensure that resilient infrastructure investments carry multiple community benefits, creating public amenities, reducing hazards, and contributing to economic revitalization. CIR will make funds available to municipalities, governmental and other eligible entities through a subrecipient model and seeks to coordinate and leverage program funds with other public and private sector investments. Projects will be evaluated to ensure no duplication of benefit across other funding streams occurs. PRDOH intends to use a combination of selected projects that have been determined to be critical for the Island's recovery, meet a recovery objective, are CDBG-DR compliant, and are identified as part of the island-wide planning process. As an output of the planning process, PRDOH, at its discretion, may decide to create an application-based Notice of Funding Availability (NOFA) or will enter into agreements with selected units of government. PRDOH may focus on identifying projects that benefit LMI areas, although projects may also meet other national objectives. CIR further aligns with Puerto Rico's Recovery Plan priorities for short-term priority on critical health and safety needs. Puerto Rican Government selection will be important as some anticipated that projects in the critical infrastructure program could be eligible for FEMA's approximately \$4 billion HMGP grant program or be otherwise identified as priority projects. Puerto Rico was approved by FEMA for a concept known as global match, whereby projects that meet FEMA and HUD requirements can meet FEMA's cost share requirement. HMGP projects are expected to be primarily managed by the Government of Puerto Rico or its municipalities. With a cost share of nearly one billion dollars, PRDOH believes that outcomes of potential projects in this Program may align with FEMA's HMGP program. If a Puerto Rican Government selected project is pursued, the Government of Puerto Rico will demonstrate how the project makes a critical asset more resilient, how the project benefits the community, or how it is being used to meet Puerto Rico's cost share requirement for the HMGP program.

To realize the full potential of a holistic recovery across the Island, critical infrastructure needs must be addressed in a way that goes beyond what has been done in past efforts. CIR will fund the rebuilding, hardening, and making more resilient of critical infrastructure assets (e.g. roads, bridges, channels, healthcare facilities, etc.) that are located across the Island. In so doing, the Island will be more adaptable to changing conditions, and able to withstand and recover rapidly from disruptions caused by future disasters. This Program will also seek to ensure that resilient infrastructure investments carry multiple community benefits, creating public amenities, reducing hazards, and contributing to economic revitalization. CIR will make funds available to municipalities, governmental and other eligible entities through a subrecipient model and seeks to coordinate and leverage program funds with other public and private sector investments. Projects will be evaluated to ensure no duplication of benefit across other funding streams occurs. PRDOH intends to use a combination of selected projects that have been determined to be critical for the Island's recovery, meet a recovery objective, are CDBG-DR compliant, and are identified as part of the island-wide planning process. As an output of the planning process, PRDOH, at its discretion, may decide to create an application-based Notice of Funding Availability (NOFA) or will enter into agreements with selected units of government. PRDOH may focus on identifying projects that benefit LMI areas, although projects may also meet other national objectives. CIR further aligns with Puerto Rico's Recovery Plan priorities for short-term priority on critical health and safety needs. Puerto Rican Government selection will be important as some anticipated that projects in the critical infrastructure program could be eligible for FEMA's approximately \$4 billion HMGP grant program or be otherwise identified as priority projects. Puerto Rico was approved by FEMA for a concept known as global match, whereby projects that meet FEMA and HUD requirements can meet FEMA's cost share requirement. HMGP projects are expected to be primarily managed by the Government of Puerto Rico or its municipalities. With a cost share of nearly one billion dollars, PRDOH believes that outcomes of potential projects in this Program may align with FEMA's HMGP program. If a Puerto Rican Government selected project is pursued, the Government of Puerto Rico will demonstrate how the project makes a critical asset more resilient, how the project benefits the community, or how it is being used to meet Puerto Rico's cost share requirement for the HMGP program.

Location Description:

Municipalities across the island.

Activity Description:

During disasters, Community Resilience Centers (CRCs) increase the resource distribution and short-term sheltering capacity and support for residents to provide critical services. CRCs also represent a location for year-round community engagement through wrap-around services provided by the hosting entities through day-to-day functions. An example would be a non-profit community center that in its normal daily functioning serves the community, and through its role as an identified CRC serves as a community hub year-round in preparation and response to disasters. Further, CRCs can act to provide community gathering spaces to receive educational materials and information on preparedness and home/community resilience initiatives. In this way, CRCs will enhance social resilience within communities by creating clearly identified and easily accessible gathering spaces and rendezvous locations for residents. CRC's will predominantly be established through retrofitting existing facilities, but in some cases may entail the construction of new facilities where additional leverage funds are incorporated, and a maintenance and operations funding plan is in place. For some communities unable to make improvements to sheltering facilities through FEMA programs, the CRC program could build new shelter facilities to provide life-saving harborage during emergency events and serve community needs year-round. Shelters could contain the following components, depending on their day-to-day functioning and intended use: • Shower facilities • Cooking facilities • Refrigeration • Device Power Stations for charging cell phones • Back-up generation/ Solar panels • Sleep space • Disability Accessibility features • Green-building features • Pet-friendly spaces • Wireless internet service For CRCs that are not incorporated in an existing entity or agency, during non-crisis events CRCs may serve as traditional community centers for public benefit. For example, the CRC may be leased or rented year-round for community organizations or for events, and income generated will be utilized to maintain the operation of the center and shall not be considered program income. Whether retro-fitted or constructed, the dual-purpose CRCs will aim to be built to FEMA standards to withstand high winds and provide a safe haven for citizens in impacted areas. Public facilities will require a licensed architect to design the facilities in accordance with FEMA standards. Facilities must be made available to residents in times of emergency. All CRCs must have a long-term maintenance and operations plan and be viable through existing functions or new contractual agreements, whether through the local hosting entity or deferred through rents from tenants such as non-profits or other service providers. Non-profit organizations could request funding for their facilities if these services are provided and guaranteed in case of emergency.

Responsible Organization	Organization Type	Proposed Budget
Puerto Rico Department of Housing	State Agency	\$ 405,047,168.00

Location Description:

Municipalities throughout the island.

Activity Description:

This Program establishes a fund for municipalities to enable a variety of critical recovery activities aimed at reinvigorating urban centers and key community corridors to focus investments, reduce sprawl, and create a symbiotic environment to nurture complimentary investments from the private sector.

The funding in this Program will allow municipalities and other eligible entities to implement integrated and innovative solutions to the problems facing their communities. Eligible revitalization projects should correlate to a larger strategy that targets downtown service and business districts or key corridors and supports and aligns with future public and private investments. Eligible projects include rehabilitation or reconstruction of downtown buildings, public infrastructure improvements, and streetscape improvements such as sidewalks, lighting, parking, façade improvement, and activities to eliminate architectural barriers for the disabled. Further, City Rev may fund improvements to public spaces (plazas, town squares), cultural and art installations, and recreation amenities. This Program will also fund clearance and demolition of unoccupied substandard structures.

City Rev also includes Re-Green initiatives and is prioritizing projects that use green infrastructure techniques or restore and replant impacted natural resources. Examples include, among others, green infrastructure installations and standards, including reforestation efforts via non-profit entities such as Para la Naturaleza, and waste re-purposing and reduction initiatives. (This Program will maintain an option to expand funding of RE-GREEN components under third tranche for mitigation). Municipalities will be responsible for identifying inventory of substandard structures and evaluating costs, following standard acquisition protocols and based upon fair market values for properties that it desires to turn into green space or use for other eligible purposes, as allowed by this Program.

City Rev has a set-aside of \$100,000,000 to prioritize strategic investments in growth nodes for the redevelopment of urban areas surrounding the University of Puerto Rico (UPR), Río Piedras and Mayagüez campuses (revitalize urban centers). The student body residing and studying in these areas has been significantly strained by the physical and economic impact of the hurricanes. These investments shall not take the place of governmental investments in the UPR system but will create the environment for economic regeneration around the UPR to enable students to return to their studies in safe, economically vibrant areas.

Applications that consider a holistic multi-benefit approach including colocation with transit-oriented development (TOD), walkability, and support of commercial districts will be prioritized. Applicants are encouraged to present a blended funding approach, with supplemental leverage investments from complementary programs or other funding sources that may strengthen the proposal.

While not required, applicants will be strongly encouraged, in the application process, to provide non- CDBG-DR funding to the project, which may include in-kind contributions, land donations, long-term maintenance and operations, or support from non-profits or civic/community groups, and other measures. Applicants that bring non-CDBG-DR funds to the project will receive a scoring bonus during the application review. Projects that have non-CDBG-DR funding sources and or promote re-greening will receive additional points during the review process.

Puerto Rico has had a number of planning processes occur in the post-María environment and total damages at the municipal level, while not finalized, have become clearer. These municipal level damages and recovery processes resulted in the development of requests for recovery projects. Several proposed projects align with the goals of City Rev, with projects coming from municipalities and other entities. These planning products and summary project ideas have been submitted to PRDOH. These recovery projects in addition to City Rev projects that will be identified through the PRDOH-led municipal planning process will be considered for this Program.

Location Description:

Municipalities across the island.

Activity Description:

To simultaneously address the holistic damage wrought by the hurricanes, and to capitalize on the unique opportunity to re-think major redevelopment initiatives in strategic areas, Puerto Rico will host an international design-build competition to seek best-in class submissions, from which the best, most feasible, and cost reasonable options will be constructed. The competition will seek to leverage and stimulate investment from private sector interests and demonstrate cost-efficiency and sustainability of large-scale projects. This competition will also compliment and build upon prior PRDOH led planning efforts, including the Municipal Recovery Planning Program, other island-wide planning efforts, and tourism and marketing efforts that recognize Puerto Rico as a destination for vacation, business investment, and for retirees. PR by Design follows the competitive models developed through past HUD-funded initiatives Rebuild by Design (RBD) and the National Disaster Resilience Competition (NDRC). However, the Program is tailored to the unique risk and opportunities that have been identified on the island of Puerto Rico. The goal of the competition will be to seek innovative, transformative, high-impact, large-scale projects that will incorporate resilience measures and blend benefits across multiple sectors. While PR by Design will focus on infrastructure and economic development that addresses holistic regeneration of high-density growth nodes and opportunity zones, the goal will be the creation of simultaneous co-benefits or ripple effects in housing and real estate, public amenities, and community connectivity, as a few examples. It is expected that the planning/design phase of the Program will focus on designing projects that not only tie into the public's needs, but that are also critical priorities for the Government of Puerto Rico. The projects will assist in addressing mass transit, mobility, ports, infrastructure, natural resource recovery, and maximization of the economic development potential of the Island's natural resources.

Proposed Budget

\$ 0.00

Location Description:

The funding is available to be used in all Puerto Rico municipalities affected by the hurricanes across the island.

Activity Description:

Creation of comprehensive economic recovery strategies, the benefit of which will allow communities to develop a policy, planning, and management capacity so that they may more rationally and effectively determine their needs, set long-term goals and short-term objectives, devise programs and activities to meet goals and objectives, evaluate the progress of such programs in accomplishing these goals and objectives, and carry out management, coordination, and monitoring of activities necessary for effective planning implementation.

University Of Puerto Rico	State Agency	\$ 750,000.00

Location Description:

University of Puerto Rico is located at Jardin Botanico Sur 1187, San Juan PR 00926.

Activity Description:

\$750,000 in Planning funds will be allocated to the University of Puerto Rico to develop a Resilience Innovation Program. This includes overseeing a competition for innovative solutions to address home-based renewable energy generation, energy storage, and home functions. Home functions may include, but are not limited to appliances for cooking, water heating, refrigeration, lighting, and cooling. The combined solutions will provide residents greater resilience to power interruptions, allowing them to remain in their homes with greater health, safety, and security.

Activity Description:

Partners may include governmental agencies or governmental organizations, as applicable for the program established in the Action Plan. Performance requirements, roles, and responsibilities will be outlined by PRDOH in a formal agreement, which may be in the form of a Memorandum of Understanding (MOU). Partners may then perform all or some of Program Management activities as outlined by PRDOH. Partners may procure technical assistance and program management services as outlined by PRDOH, or have technical assistance and program management services provided to them by PRDOH or other oversight agencies. PRDOH will oversee vendor procurement and subrecipient selection processes conducted by Partners, as applicable.
