This **AGREEMENT FOR SINGLE-FAMILY HOUSING DEVELOPMENT INITIATIVE (Agreement or Contract)** is entered into in San Juan, Puerto Rico, this 22 of December, 2023, by and between the **PUERTO RICO DEPARTMENT OF HOUSING (PRDOH)**, a public agency created under Act No. 97 of June 10, 1972, as amended, 3 LPRA § 441, et seq., known as the "Organic Act of Department of Housing" with principal offices at 606 Barbosa Avenue, San Juan, Puerto Rico, herein represented by William O. Rodríguez Rodríguez, attorney, of legal age, single, and resident of Guaynabo, Puerto Rico, in his capacity as Secretary; and **JPR DEVELOPMENT, LLC (CONTRACTOR)**, with principal offices in Bo. Camarones, Calle Piedras Blancas Esq. López Siberio, Lote 1, Guaynabo, Puerto Rico, herein represented by Guillermo López Colón, in his capacity as Project Manager, of legal age, married, and resident of Trujillo Alto, Puerto Rico, duly authorized by Corporate Resolution issued on March 25, 2023, collectively referred to herein as the "Parties".

**WHEREAS**, in September 2017, Hurricanes Irma and María made landfall in Puerto Rico causing catastrophic island-wide damage, knocking out power, water, and telecommunications for the entire island and its island municipalities. Hurricane María caused major structure and infrastructure damage to family homes, businesses and government facilities triggering the displacement of thousands of residents of the Island from their homes and jobs.

**WHEREAS**, under the Continuing Appropriations Act, 2018 and Supplemental Appropriations for Disaster Relief Requirements Act, 2017, signed into law on September 8, 2017 (Pub. L. 115-56), \$1.5 billion were allocated by the U.S. Department of Housing and Urban Development (**HUD**) for disaster recovery assistance to the Government of Puerto Rico under the Community Development Block Grant – Disaster Recovery (**CDBG-DR**) Program. These funds are intended to provide financial assistance to address unmet needs that arise and that are not covered by other sources of financial aid.

**WHEREAS**, on February 9, 2018, a Notice was published in the Federal Register, Vol. 83, No. 28 (83 FR 5844), that allocated \$1.5 billion for disaster recovery assistance to the Government of Puerto Rico.

**WHEREAS**, under the Bipartisan Budget Act of 2018, signed into law February 9, 2018 (Pub. L. 115-123), an additional \$8.22 billion were allocated by HUD for disaster recovery assistance to the Government of Puerto Rico under CDBG-DR.

**WHEREAS**, pursuant to a letter dated February 23, 2018, sent by the former Governor of Puerto Rico to the Secretary of HUD, the PRDOH is the governmental agency designated as the grantee of the CDBG-DR funds allocated to the Government of Puerto Rico.

**WHEREAS**, on August 14, 2018, a Notice was published in the Federal Register Vol. 83, No. 157, (83 FR 40314) that made an additional allocation to Puerto Rico of \$8.22 billion for recovery. With these allocations of funding, the PRDOH aims to lead a transparent, comprehensive recovery to benefit the residents of Puerto Rico. PRDOH holds

accountability and is committed to the responsible, efficient, and transparent administration of CDBG-DR grant funding.

**WHEREAS**, On September 20, 2018, the Governor of Puerto Rico and the Secretary of HUD signed the Grant Agreement.

**WHEREAS**, under the Further Additional Supplemental Appropriations Act for Disaster Relief Requirements Act, 2018, (Division B, Subdivision 1 of the Bipartisan Budget Act of 2018, Pub. L. 115-123, approved February 9, 2018), \$8.285 billion were allocated by HUD for mitigation activities and assistance to the Government of Puerto Rico under the Community Development Block Grant – Mitigation (**CDBG-MIT**) Program. These funds are intended to provide financial assistance in areas impacted by recent disasters. Moreover, CDBG-MIT funds represent a unique and significant opportunity for Puerto Rico to carry out strategic and high-impact activities to mitigate disaster risks and reduce future losses.

**WHEREAS**, on August 30, 2019, a Notice was published in the Federal Register, Vol. 84, No. 169, (84 FR 45838), which described the grant requirements and procedures applicable to future allocations of CDBG-MIT funds to the Government of Puerto Rico.

**WHEREAS**, on May 12, 2021, the PRDOH Secretary and the Secretary of HUD signed Grant Agreement Number B-18-DP-72-0002; allowing PRDOH access to \$8,285,284,000 in CDBG-MIT funding, obligated under Pub. L. 115-123, as amended.

**WHEREAS**, the PRDOH is the government agency designated as the grantee of the CDBG-MIT funds allocated to the Government of Puerto Rico.

**WHEREAS**, the PRDOH is interested in contracting with developers to purchase new completed and compliant detached single-family housing developments (**units**) in the contracted Period of Performance (**POP**). The developer will support PRDOH's objectives of ensuring compliance with all CDBG-MIT HUD and applicable federal and local requirements, rules and regulations, as well as in PRDOH's objectives of the Action Plan, as amended, and adequately coordinating and monitoring all CDBG-MIT related activities.

**WHEREAS**, on December 21, 2022, the PRDOH issued the Request for Proposal "CDBG-MIT-RFP-2022-04" (**RFP**) with CDBG-MIT funds. This request was placed through CDBG-DR/CDBG-MIT website and the Registro Único de Subastas (**RUS**). Through this procurement process, the PRDOH received **twenty-seven (27) proposals**. The proposals were evaluated by an Evaluation Committee appointed pursuant to Administrative Order No. 23-20 dated April 17, 2023. The Evaluation Committee performed an evaluation of the proposals based on the criteria stated in the RFP.

**WHEREAS**, on March 31, 2023, the CONTRACTOR submitted a proposal, which fully complied with the requirements set forth by the PRDOH.

**WHEREAS**, the PRDOH desires to enter into an agreement with **JPR DEVELOPMENT, LLC**, to purchase new completed detached single-family housing (**units**) developments and accepts the CONTRACTOR's Proposal and reasonable costs, and the CONTRACTOR by its acceptance of the terms and conditions of this Agreement is ready, willing and able to provide the requested deliverables contemplated under this Agreement.

**WHEREAS**, the completed single-family units object of this contract was acquired by PRDOH with the use of CDBG-DR and CDBG-MIT funds for the purpose of offering it to

eligible participants of its programs. That is, the funds are intended for an activity that meets a national objective, as required by 24 C.F.R. §570.208. This decision was made due to the shortage of properties in Puerto Rico and the rigorous requirements established by federal provisions governing CDBG-DR and CDBG-MIT funds. Therefore, it is clarified that the value stipulated in this contract does not reflect the fair market value of the real property, but rather the cost that PRDOH paid for these properties to be built in accordance with the federal provisions.

**NOW, THEREFORE**, in consideration of the mutual promises and the terms and conditions set forth herein, the PRDOH and the CONTRACTOR agree as follows:

**I. TYPE OF CONTRACT**

**Contract Type:** This is a fixed unit price contract. Under this Agreement, PRDOH will purchase completed single-family units (**Completed Units**) at the contracted price established in the **Attachment C** (Compensation Schedule). The CONTRACTOR must secure finance to perform the tasks under this Agreement through completion, issue required payments and comply with fiscal responsibilities and is responsible for all tasks and activities required to complete a housing unit as established in Sections 7, 8.2, and 21 of **Attachment B**. # Plan of Action & Work Approach

## Proposed Housing Units & Design

### Introduction

In this section we will present the architectural designs and the narrative on the architectural concepts such as the spaces provided, the construction materials, the energy efficiency and sustainability considerations and the Green Building Standard used.

### Housing Units Design Narrative

The Office of Community Planning and Development from the US Department of Housing stated that the Homeowner Repair, Reconstruction, or Relocation Program “seeks to develop viable communities by promoting integrated approaches that provide decent housing, a suitable living environment, and expand economic opportunities for low and moderate income persons.” The following narrative describes how the design approach of our Model Homes achieve this goal, by providing sustainable, resilient and accessible housing that will offer a suitable living environment for people who were greatly affected by Hurricane María.

#### 1. SPACES AND LAYOUT FUNCTIONALITY

- a. The typical house layout is composed of 3 bedrooms, 2 bathrooms, laundry closet, living room, dining room and the kitchen
- b. All houses will be easily adaptable to comply with ADA Guidelines and the ANSI 117.1. All model homes will have the following ADA requirements:
  - i. 36" of rough opening to comply with the minimum 32" clear width required by section 306 of the ADA Guidelines.
  - ii. All door will be provided the ADA compliant hardware such as lever handles.
  - iii. Kitchen and bathroom sink faucets will have lever handles.

## Plan of Action & Work Approach

- iv. Electric switches will be standardized to be installed at a maximum of 48" height.
- v. Refrigerators, gas ranges and permanent fixtures will be ADA compliant.
- vi. All laundry closets located in the hallway, will comply with ADA's requirements for Parallel Approach (Sec. 305.5), Storages (Sec. 225.2) and Side Reach (Sec. 308.2). Spaces to accommodate either Combo or side by side units are provided. Bifold closet doors were selected for laundry area and do not require any floor track to impede with walkers, canes or wheelchairs. Doors that open 90 degrees will be provided for ease of access and compliance with hallway clearances (Sec. 403.5.1).
- vii. The regular bathroom will be provided with the space for the clearance required for the toilet, the front approach clearance for the lavatory, 5' diameter maneuvering clearance and the required clearance for the shower. This will allow the future owner to easily retrofit the space by just adding grab bars and replacing the vanity. The designated ADA bathroom will be provided with a pedestal sink, grab bars and a curb less shower for ease of access.
- viii. For all ADA units, the kitchen countertop height will be at 2'-10" from the Finish Floor Elevation.

c. **Single story house space distribution:** This model will have approximately 1200 square feet. It will have three (3) bedrooms, two (2) bathroom, carport, laundry closet and an open area that accommodates the kitchen, living and dining rooms.

- i. The main entry is through the balcony, which opens-up to the main living area. The kitchen will have 12' lineal feet of lower cabinets and 8 lineal feet of upper cabinets. It will also provide a refrigerator, a stove, and a double sink. A secondary entrance will be located

adjacent to the kitchen area. The living area will have 241 square feet and the kitchen area will have 99 sq. ft.

- ii. The small bedrooms will have 138 sq. feet, two windows, a 7' wide closet with glass sliding doors and a 36" wide entry door.
- iii. The large bedroom will have 200 sq. ft., three windows, a 7.5' wide closet with glass sliding doors and a 36" wide entry door.
- iv. The bathroom will be 10'-5" x 7'-8" and will have a vanity with mirror, a toilet, and a shower. The space will also have one (1) windows. Bathroom accessories include a towel bar, a toilet paper dispenser, and a curtain rod.
- v. Rough-in facilities for a washer/dryer combo will be provided in a closet open to the hallway. Rough-in facilities for the connection of an electric generator, as well as the connection for the gas tanks will be provided in the side yard, adjacent to the secondary entrance.
- vi. Rough-in facilities for a solar water heater, water cistern, and solar panels will be provided in the roof, right above the bathroom.

**d. The following characteristics will apply to ALL model homes:**

- i. Exterior and interior walls will be a combination of structural poured-in-place concrete and concrete block walls, with plaster, primed and painted. Three façade and color schemes options will be provided to the Owners.
- ii. Interior floor-to-ceiling height will be 8'-0".
- iii. Model homes will have impact resistant exterior doors.
- iv. Interior doors will be semi-solid wood doors, 36" wide x 96" high, and will have lever handles.
- v. Interior bedroom closets will have glass sliding doors and will be equipped with hanging rods and shelves.
- vi. All bedrooms, as well as the living room, kitchen and dining areas will be equipped with ceiling fans with integrated lamps. Additional

LED ceiling mounted lighting fixtures will be located in the balcony and the hallway.

### 2. INTERIOR FINISHES, EQUIPMENT AND ACCESORIES

- a. Model homes will have ceramic floor tiles, 4" high ceramic tile base, and painted walls and ceiling. Bathrooms will have white ceramic tiles, with various dimensions (depending on availability) installed up to 72" high around the shower stall. Bathrooms will be equipped with a low-consumption-high efficiency toilet, a vanity, a 24" wide towel bar, a toilet paper dispenser and a wall mirror above the vanity. The ADA bathroom will have a wall sink instead of a vanity. The kitchen cabinets will have plastic laminate doors and tops and white ceramic tile backsplash. Interior semi-solid wood doors shall be 3' x 8' sanded and painted, with matching wood frames and lever handles, for ADA compliance. Cross ventilation will be maximized when the doors are open and open door stops mechanism will be install to secure the doors in an open position.

### 3. SUSTAINABLE DESIGN CONSIDERATIONS AND GREEN STANDARDS

- a. All Model Homes will implement active and passive techniques to minimize their environmental impact, making them sustainable and resilient in the event of natural disasters while maintaining the user's autonomy. Each Model Home becomes a framework through which the users can individualize their homes through the implementation of their preferred methods of sustainable measures and aesthetic design. The following is a list of methods, materials, and design elements that focus on sustainability and incorporate Green construction standards.
- b. In the construction process, products manufactured in Puerto Rico will eliminate the import costs and transportation emissions for the latter and will incentivize the local economy. The following products will be purchased from a locally manufacturing company: cement, gravel, roof sealant, paint, aluminum windows, kitchen cabinets, and concrete pavers.

## Plan of Action & Work Approach

- c. The homes will provide modular elements and standard sizes with the objective of diminishing waste and reducing construction time. (i.e. standard doors and windows dimensions.)
- d. The roofs will have a high-performance roof coating, equal or similar to CROSSCO Ultra Seal Plus, which is an acrylic elastomeric sealer that provides fast-dry waterproof, supporting light rain after 15 minutes of applied. It has excellent elasticity and resistance to UV rays. Its great thermal reflectivity reduces internal temperature, which results in a reduction in energy costs. *Ultra Seal Plus* also resists the growth of mold, mildew and odor causing microbes. It has a 10-year warranty.
- e. Shower heads, toilets and faucets will be *WaterSense* Certified. Toilets will use 1.28 gallons per flush or less which is 20 percent less water than the current federal standard of 1.6 gallons per flush. Water-efficient lavatory faucets will have a flow of no more than 1.5 gallons per minute (gpm) at 60 pounds per square inch (psi) of water pressure. They will also have no less than 0.8 gpm at 20 psi of water pressure to ensure they provide adequate flow for hand washing. Showerheads will have a maximum flow rate of 2.0 gallons per minute (gpm) or less, which represents a 20 percent reduction in showerhead flow rate over the current federal standard of 2.5 gpm, as specified by the Energy Policy Act of 1992.
- f. Electric infrastructure will be provided for the future connection and provision of photovoltaic panels, to be placed in the flat roofs.
- g. Flat roofs will be structurally able to withstand a water cistern, a solar water heater and/or possible future solar panels.
- h. The following equipment will be provided in the Model Homes with the goal of lowering the energy consumption, thus increasing the house sustainability:
  - i. *Energy Star*, top-freezer refrigerator (18.2 Cu.ft.)
  - ii. Electric range with the option of 30" gas range.

- iii. Solar water heaters with a water cistern located above the bathrooms.
- iv. LED & Energy Star lighting fixtures and ceiling fans.

- i. **As per ICC Energy Code R401.2.1 Tropical Zone**, all homes will comply, but not be limited to, the following requirements:

- i. ***Not more than one-half*** of the occupied space is air conditioned. (Our model homes will be provided with ceiling fans on all bedrooms and living room and will not have a/c units.)
- ii. *The occupied space is not heated.*
- iii. Solar, wind or other renewable **energy source supplies not less than 80 percent** of the energy for services water heating. (Our homes will have a solar water heater.)
- iv. Glazing in conditioned spaces has a solar heat gain coefficient of less than or equal to 0.40 or has an overhang with a projection factor equal to or greater than 0.30, (refer to Table 5.5.4.4.1 from ASHREA 90.1,2016.).
- v. Permanently installed lighting, where is in accordance with **Section R404**
- vi. The exterior roof surface **complies with one of the options in table C402.3** or the roof or ceiling has insulation with an R-value of R-15 or greater. Where attics are present, attics above the insulation are vented and attics below the insulation are unvented
- vii. Roof surface will have a slope of not less than one fourth unit vertical in 12 unit horizontal (**2% slope**).
- viii. Operable fenestration provides a ventilation area of **not less than 14 percent of the floor area** in each room. Alternatively, equivalent ventilation is provided by a ventilation fan.
- ix. Bedrooms with exterior walls facing two different directions have operable fenestration walls facing directions.

### 4. CODE COMPLIANCE

- a. The Model Homes will comply with current Puerto Rico and Federal design codes and standards, but not limited to: International Residential Code 2018, American with Disabilities Act, Puerto Rico Building Code 2018, International Fire Code, National Electric Codes, among others, as stated on Code Compliance Requirements.

### 5. PROPOSED CONSTRUCTION MATERIALS

- a. The Model Homes will be reinforced concrete shear walls structures used to resist gravity and lateral loads. Floor and roof levels will be five-inch (5") thick reinforced concrete slabs. The foundation system will be a reinforced concrete mat with perimeter aprons and thickened under the concrete walls. The foundation will serve as the finished floor at ground level. All partitions will be non-load bearing CMU walls with mortar plaster finish.

### 6. EXPECTED TIME OF CONSTRUCTION

- a. Knowing that time are of the essence of the Contract, the expected time for construction on each home will either fall within the Program designated limits or be done in less time provided that there are no delays outside of our control. Time under the Contract will stop running on the date of Substantial Completion.

### 7. PROPOSED CONSTRUCTION METHODS

- a. After the completion of design and permitting phases, the actual construction begins.

## Plan of Action & Work Approach

- b. Construction will start with rough grading and site preparation, following excavation for the proposed foundation system. Excavation should be carried out as per the drawings defined lengths & widths.
- c. Different types of services are provided before pouring of building floor. These included gas supply, water supply, sanitary etc.
- d. After excavation and services are run, the layout of the rebar specified by the plans will be completed. Finally, we pour the concrete foundation and slab per drawing specs.
- e. Formwork framing for reinforced concrete walls, columns, beams and roof slab will be prepared for pouring including plumbing and electrical rough-in. Next any masonry work is carried out with cement mortar.
- f. Once all cement and masonry work has been completed the home is dried in meaning that all the doors and windows are installed protecting the home from the elements. Conduits for electric supply are fixed in CMU walls before plastering.
- g. The last steps consist of plastering both the interior and exterior of the home, painting, flooring and interior finishes followed by all services being reconnected.
- h. Prior to turning the keys over to the homeowner all systems will be checked and re-checked and then the home will go through a final cleaning.

### 8. STRATEGIES TO MEET DESIGN BUDGET

- a. will employ a series of strategies to meet design budgets. First, the spatial distribution of each Model Home is very efficient. The model homes maximize each space to the fullest, thus reducing the overall construction area. Second, the construction methods, as described in Section 9, are very simple and efficient. These homes' modularity will allow us to reuse the concrete formwork, saving time and construction costs. Finally, by standardizing window size and type, cabinetry, doors, finishes, bathroom

### Single-Family Housing Development Initiatives Community Development Block Grant for Mitigation Puerto Rico Department of Housing CDBG-MIT-RFP-2022-04 (Revised for Addendum No. 04)

WORR  
WORR

GLC  
GLC

This document defines the Single-Family Housing Development Initiatives (**SF-HDI**) tasks that the Proposers must perform to support the Puerto Rico Department of Housing (**PRDOH**) as part of the Community Development Block Grant for Mitigation (**CDBG-MIT**). A description of the Housing Sector CDBG-MIT is included in the Action Plan approved by the U.S. Department of Housing and Urban Development (**HUD**), available at <https://cdbg-dr.pr.gov/en/download/cdbg-mit-action-plan-amendment-1-substantial-effective-on-october-17-2022/>

The PRDOH anticipates awarding the contract with a term of **twenty-four (24) months**. The contracted firms are expected to complete the construction of new detached single-family housing (**units**) development (**developments or projects**) in the contracted Period of Performance (**POP**). The PRDOH intends to purchase the completed units which must have a registered segregation and individual notarial deeds. The PRDOH may, at its sole discretion, extend the contract upon mutual written agreement of the parties.

#### 1. PRDOH's Reservation of Rights:

The PRDOH reserves the right, without limitations, to:

- (i) Reject any or all proposals, waive any informality in the RFP process, or terminate the RFP process at any time, if deemed to be in its best interests.
- (ii) Reject and not consider any proposal that does not meet the requirements of this RFP, including but not necessarily limited to, incomplete proposals and/or proposals offering alternate or non-requested goods.
- (iii) Cancel this solicitation and reissue the RFP or another version if it deems doing so is in the Public Interest.
- (iv) PRDOH shall have no obligation to compensate any proposer for any costs incurred in responding to this RFP.
- (v) To reduce or increase estimated or actual quantities in whatever amount necessary without prejudice or liability to, if:
  - a. Funding is not available.
  - b. Legal restrictions are placed upon the expenditure of monies for this category.
  - c. PRDOH's requirements in good faith change after the award of the contract.
- (vi) To require additional information from all suppliers to determine the level of responsibility.

- (vii) To contact any individuals, entities, and/or organizations that have had a business relationship with the proposer, regardless of their inclusion in the reference section of the proposal's submittal.
- (viii) To contract with one or more proposers or the cancellation of this RFP.
- (ix) To negotiate any price from the awarded proposer(s) in response to a specific order under this solicitation.
- (x) To modify the quantity of the listed items and/or services during the contract term in compliance with policies and procedures.

## 2. Overview

The PRDOH is issuing this Request for Proposal (**RFP**) to procure highly qualified and skilled entities to provide single-family housing development services for the construction of new detached single-family housing developments outside of risk and hazardous areas. The Proposers must understand and align with the CDBG-MIT Federal Register Notices<sup>1</sup>, Action Plan (as amended), Program Guidelines (including revised versions), national objectives, eligible/ineligible use of funds, and policies. In addition, proposers must be familiar with the Department of Housing and Urban Development (**HUD**) latest policy objectives, plan alignment, glossary, acronyms, policies, guidelines, and standards applicable to the Scope of Work (**SOW**) of this RFP. The Proposer remains fully responsible for determining if the information mentioned before has been amended, revised, and/or updated. The Proposers are responsible for delineating effective and efficient strategies to maximize the project development plan and schedule and to administer all project activities.

## 3. Choice Limiting Actions

Respondents to this RFP are required to immediately cease any choice-limiting action under 24 CFR § 58.22. Failure to stop activities such as acquisition, demolition, disposition, rehabilitation, repair, new construction, site preparation, and leasing or any other activities that commit to future actions for a proposed project prior to obtaining an environmental clearance will result in the project no longer being eligible for any HUD assistance.

## 4. Single-Family Housing Development Initiatives

The concept of the SF-HDI is to promote and complete the development of new resilient single-family housing projects. The PRDOH intends to purchase up to one thousand (1,000) finished units in the areas with the most housing needs. Additional phases may promote the project development and purchase of up to three thousand (3,000) units, depending on Program funds, allocation, and single-family housing needs. PRDOH may award "Qualified Proposers" up to three thousand (3,000) single family units and proceed with

<sup>1</sup> Federal Register Notices for the CDBG-MIT are published in the corresponding websites at <https://cdbg-dr.pr.gov/en/resources/federal-register/>

the initial phase contracting projects up to one thousand (1,000) single family units. Subsequent phases may be implemented with awarded entities depending on Program funds, allocation, and single-family housing needs.

## **5. Single Family Housing Needs**

Between the CDBG-DR and CDBG-MIT single-family Programs, PRDOH estimates that more than 6,000 applicants with a relocation voucher may benefit from the SF-HDI. Applicants with a relocation voucher must relocate to a location outside a floodplain, high-risk landslide area, or other hazardous areas as identified by the PRDOH.

## **6. Location of Program Relocation Needs and Functional Areas**

The **Attachment 5** illustrates the location and concentration of all current and potential CDBG-DR and CDBG-MIT single housing program cases with a relocation voucher with an emphasis on the flood zone and landslide susceptibility, their distribution within all 78 Puerto Rico municipalities and the Puerto Rico Planning Board (**PRPB**) Functional Areas.

PRDOH intends to award at minimum one (1) project in each Functional Area. A hierarchical methodology will be implemented to award projects according to the amount of R3 Program relocation cases and potential cases (single-family housing needs). The Functional Area with the greater single-family housing needs, will be awarded first with a project, continuing to the following Functional Areas up to three thousand (3,000) units. In the initial phase, if all Functional Areas are awarded with a project, and the one thousand (1,000) units are not fulfilled, the process cycles back to the hierarchical Functional Area with the greater single-family housing needs and descending until the one thousand (1,000) units are awarded. Those projects awarded in the initial phase may continue with the process and contract execution. The same hierarchical methodology could apply with awarded entities when subsequent phases are implemented to contract the additional units up to three thousand (3,000) single family units.

## **7. Single-Family Housing Developers**

The Proposers are expected to strengthen the SF-HDI by providing experience, technical knowledge, and expertise in the planning and construction of single-family developments. The Proposers are to identify, evaluate, conduct pre-development activities, and perform any necessary legal due diligence for any proposed project to correctly determine the scope, cost, time, and feasibility of completing the project under the terms of this RFP. Consequently, the Proposers are expected to secure construction financing to complete the units, at which time the PRDOH will purchase them. Proposers must operate as a single source responsibility entity to provide development, design, and

build services. The contracted Proposers will work in the PRDOH's best interest in administering and implementing all the project activities.

All tasks, activities and work performed by the Proposer's stakeholders, professionals, individuals, and subcontractors will be administered, scheduled, and controlled by the contracting entity. The Proposer is directly responsible for ensuring quality, completeness, accuracy, and timeliness to avoid unnecessary delays in completing the single-family units in the contracted time.

- Implement and maintain an effective, efficient communications system with stakeholders and teams involved to promote the best means of communication to encourage time effectiveness and efficiency.

## **8. Proposers Submission – Project Readiness**

Demonstrating the proposed project's readiness is critical due to the 24-month time frame being provided to complete any selected project. Therefore, proposers shall submit pertinent information for the PRDOH to be able to determine the Proposer's ability to complete the project under the provided time frame. This information may include the proposed project location, the number of units of the project, the project plan and schedule, a permitting plan and status of permits, a detailed cost estimate, a single-family unit reasonable sales price, and any design deliverables to evaluate the "**Project Readiness**", as described in the following Sections of this document and the corresponding sections of the RFP documents.

### **8.1. Experience, Qualifications, Organizational and Staffing Plan**

It is expected that Proposers will have a team of professionals and consultants with the technical knowledge, experience, and expertise to identify, evaluate, resolve, and reduce potential risks with due diligence.

The PRDOH expects competent and qualified staff and professionals that are authorized or permitted under federal, state, and local law to perform the scope of work under this contract. However, the PRDOH reserves the right to request the removal of any staff not performing to standard, following the code of ethics and/or irregularities that may result in an unnecessary legal burden to the PRDOH, the Programs or its representatives. Proposers must provide detailed information about the Proposer's key staff, including education degrees, licenses, and years of relevant experience.

Proposers shall submit to the PRDOH an organizational chart detailing the identity of each person (whether employed by the Proposer or a subcontractor), profession, position, rank, and relationship of the personnel performing any work for the developer firm. In addition, the Proposers' organization and staffing plan shall include the roles, and

responsibilities of development team members and support areas, their planned level of effort and the anticipated duration of involvement.

As part of the qualifications, the Proposers must include detailed information regarding their financial, administrative capacity, design, and construction experience (in similar projects), personnel, consultants, equipment, software capabilities, document controls, safety record keeping, and quality control procedures. In addition, the PRDOH promotes opportunities for maximum feasible participation of certified Section 3, Minority, and Women-Owned Business Enterprises (**MWBE**).

### **8.2. Proposed Project & Location**

As the experts in the project development process, the Proposer will perform the pre-development, site evaluation, market analysis, feasibility studies, technical evaluations, site selection, legal counseling, design, permitting, securing the property, and any other activity required for the proposed project. In addition, the Proposer personnel must assess the property accessibility, availability (or lack) of potable, sanitary, stormwater, electrical, data infrastructure, lot potential, limitations, restrictions, proximity to bodies of water, natural resources, habitat, geological formations, or any other relevant information that may limit the proposed activity, including evidence of soil contamination, erosion, landslide, flood, extreme slopes, and others.

The PRDOH will evaluate Proposers' projects and select those according to the Programs needs and the best public interest. Proposers may submit more than one project if these are in different locations (not part of or adjacent to other proposed projects) and each project comply with all the submission requirements. Additional projects may be in the same Functional Area or located in another Functional Area. If a Proposer submits more than one project, it must be thru a different Proposal submission, as instructed in the RFP. In such cases, the Proposer's submission must evidence the relationships between the proposed projects and the fiscal capacity to complete them. In addition, the Proposer must provide evidence that it can successfully perform these projects concurrently, complete all units and assure the quality of services and goods.

### **8.3. Single-Family Housing Minimum and Maximum Units per Site**

The Proposer's project may include additional units (of any type) that will not be purchased by the PRDOH but that the Proposer intends to build on the same site and are not part of the proposed project. In this case the Proposer's SF-HDI units and project limit shall be clearly delineated and all the information related to the project submission must be consistent with the project submission (including but not limited to the project plan, schedule, permitting plan, detailed cost estimate, reasonable sales price, design deliverables, code compliance, green building standards, minimum architectural and design standards, environmental review, and any other applicable requirements). The

WORR  
WORR

#### **8.4. Project Plan and Schedule**

Proposers shall submit a detailed project plan that delineates all the tasks, activities, time and duration of pre-development, technical studies, design, permitting, construction phases, milestones, unit completion, project completion, and permitting closeout. This detailed project plan and schedule must depict concurrent and non-concurrent activities and the responsible teams involved. The project plan must establish the completion of units within the POP and identify whether units will be completed in phases. The POP shall contemplate any legal process required for the segregation, registration, and other process needed for a real estate closeout. This must be presented in a graphical depiction with all the necessary notes and detail to demonstrate the technical knowledge, expertise, project intent and clarity of the proposed activities.

#### **8.5. Permitting Plan**

Proposers shall provide a permitting plan that considers the status and available details of all the agency pre-consultation, endorsement, abatement permits, notification of construction permit, final construction permit, permit closeout and occupancy permits.

#### **8.6. Detailed Project Cost Estimate & Single-Family Unit Reasonable Sales Price**

Proposers must submit a detailed project cost estimate and single-family unit type cost estimate itemized, including all trades and components, and sufficiently detailed for the PRDOH to perform a cost reasonableness and reasonable sale price analysis (Refer to, **Exhibit H-1 (Price Form – Reasonable Sale Price Form)** and **Exhibit H-2 (Price Form – Project Itemized Costs)**). The detailed cost estimate shall include the labor, equipment, material, subcontractor work, insurance, taxes, overhead and profit of each component to be incorporated into the work. This document must be organized, clear, self-explainable and include reference sources. The document shall organize following the MasterSpec® divisions and provided in an 8.5x11 letter format both in PDF and XLS files.

---

<sup>2</sup> Interventions in urban centers shall comply with the corresponding sections of the *Joint Regulation for Project Evaluation and Permitting, regarding Land Development and Use, and Business Operations* ("Reglamento Conjunto para la Evaluación y Expedición de Permisos Relacionados al Desarrollo, Uso de Terrenos y Operación de Negocios"), as adopted, the State Historic Preservation Office, the Autonomous Municipality(ies), zoning district requirements, and others. Zoning district requirements may affect the number of units allowed to be developed in a particular lot however the PRDOH reserves the right to establish the minimum amount of units to be proposed in the Single-Family Housing Development Initiatives.

### 8.7. Design Deliverables

Proposers must submit all the necessary information to explain the proposed design intent. The proposed designs shall comply with the SF-HDI Minimum Architectural and Design Standards (**MADS**) (Refer to, **Attachment 6** of the RFP) and the Selected Green Building Standard. At a minimum, a **Conceptual Design Phase** will be submitted by the Proposers as part of the RFP submission package and include as minimum a **site design and the design solution of a detached, one (1) level** (one story) with **3-bedroom and 2-bathroom** and a minimum construction area of **1,150** square feet (excluding carport, driveway, walkway and others). A minimum of **5%** of the proposed units must comply with ADA requirements. The rest of the units must be designed and built as adaptable housing units with the intention that these can be modified easily in the future to become accessible, as needed.

### 9. Code Compliance

The current International Building Code® (**IBC Codes**) establishes minimum requirements using prescriptive and performance-related provisions. The IBC Codes are fully compatible with all the International Codes® (**I-Codes**) published by the International Code Council (**ICC**). This regulation arises from the adoption of the ICC family with its amendments to conform to the requirements of Laws and Regulations of construction and occupancies in Puerto Rico. All work performed by developer firms must also comply with most current federal, state, and local codes, laws, and regulations.

### 10. Green Building Standard

The SF-HDI design and construction activities must comply with the Green Building Standards described in Federal Registers 83 FR 5844, 84 FR 4836, and as per Programs requirements. All single-family units shall be designed to incorporate sustainability and resiliency principles for efficient energy and water use. The Proposer shall identify which Green Building Standard(s) they will use for the unit design and construction and must comply with at least one of the standards set forth:

- ENERGY STAR Certified Homes (version 3, latest revision, program requirements-Tropics);
- Enterprise Green Communities;
- LEED BD+C (Building Design and Construction);
- LEED Homes;
- LEED O+M (Building Operations and Maintenance);
- LEED ND (Neighborhood Development);
- ICC-700 National Green Building Standard;
- EPA Indoor AirPlus (ENERGY STAR a prerequisite);
- The "Permiso Verde" from the "Oficina de Gerencia de Permisos"; or

WRR  
WRR

GLC  
GLC

- Any other equivalent comprehensive green building program acceptable to HUD.

A certification under one of these Green Building Standards is an SF-HDI requirement for purchasing the completed unit. Due to the above, the PRDOH encourages using a Green Building Standard that ensures completed homes can be certified when construction is completed.

WRR  
WRR

GLC  
GLC

### **11. SF-HDI Minimum Architectural and Design Standards**

The developer firms shall comply with the Minimum Architectural and Design Standards, which does not supersede the Building Code provisions and requirements, nor the Proposer's Selected Green Building Standard. These generally describe the requirements for the unit, the photovoltaic system with battery storage (**PVS**) and water storage system (**WSS**) requirements (Refer to, **Attachment 6**).

### **12. Environmental Review**

Following the preliminary selection of a project, it must undergo an Environmental Review and certification is to be completed. The Environmental Review process determines a project's potential environmental impacts and whether it meets federal, state, and local environmental standards and regulations. The SF-HDI Environmental Reviews at a site-specific level will be prepared by the Proposer and approved by the PRDOH. An environmental review process will be required for all SF-HDI projects to ensure that the proposed activities do not negatively impact the surrounding environment, and mitigate an adverse effect on historical zones, districts, properties, archeological heritage and environmental or health impacts on end users.

### **13. Construction Documents**

Upon contract execution, the developer firms will diligently engage its organization to commence and complete the architectural, civil, structural, mechanical, electrical design, and any other activity required to complete the construction documents and permitting process and complete these activities with due diligence, efficiently and in a timely manner. The developer firms are responsible for addressing and resolving any adverse effects identified in the ERR process. A complete, coordinated set of construction drawings and technical specifications must be submitted to PRDOH. The construction documents will include all the necessary information for the project design. The construction documents shall provide all the technical information to expedite the permitting, construction process and reduce unnecessary delays, risks, errors, and omissions. The construction documents must be consistent with the developer firm's project submission and ERR requirements and compliant with the Selected Green Building Standards, Minimum Architectural Design Standards, and related regulatory agency

requirements. The construction documents will be provided to the PRDOH in electronic forms.

#### **14. Occupational Safety and Health**

Health and safety in construction are particularly important because the industry is prone to hazardous situations and can be dangerous at times. To demonstrate proper tracking and compliance related to health and safety issues, Proposers shall submit copies of their Occupational Safety and Health Administration (**OSHA**) 300 forms for the past three (3) years. If OSHA 300 forms are not applicable, Proposers shall provide an explanation as to the reasons for not submitting the forms. The developer firms must comply with federal, state, or local labor laws related to the occupational safety, health and well-being of the organization's employees, subcontractors, and stakeholders. Developer firms will prepare, update, implement and administer the Safety Plan. The developer firms will have qualified safety personnel to train, ensure and reduce the risk of accidents, injury, or incidents. These will be responsible for providing Personal Protection Equipment (**PPE**) to all employees and visitors, including, but limited to, the PRDOH or its representatives during site visits or meetings at the projects.

#### **15. Quality Control and Quality Assurance**

The developer firms must comply with the residential construction industry's highest quality standards and tolerances. These quality standards will be included in the Quality Plan and will guide work implementation, completion, and supervision. In addition, the developer firm's design team will develop a quality control, assurance procedure, testing, and reporting as part of the Technical Specifications of each project.

#### **16. Single-Family Unit Development Construction**

The developer firms may commence construction upon having an environmental clearance, contracted by PRDOH, and issuance of the Final Construction Permit by the Office of Permit Management (known in Spanish as "Oficina de Gerencia de Permisos". OGPe, for its Spanish acronym). The developer firms are responsible for the following:

- Completing site improvements and utility connections to enable the construction of single-family units;
- Construction of single-family units, walkways, driveways, roof covered carport and other unit features;
- Laboratory testing, certification and reporting for quality and assurance or commissioning work;
- Preparing Designated Inspector's progress reports, which include photographs, notes, and any other information required to document the progress and compliance of work;

WORR

GLC  
GLC

- Correcting punch list items to correct deficiencies in a timely manner;  
Non-conforming work shall be quickly attended up to compliance.

### 17. Completion of Single-Family Units

The construction activities for the single-family units will be considered a "**completed unit**" when the following conditions are met:

- All punch list items have been corrected;
- Submission of the Architect of Record (**AOR**) Certification of work completion, including those works to occupy the single-family units;
- The project's infrastructure is completed and compliant with the corresponding agency requirements;
- Occupancy Permits are obtained;

This includes but is not limited to electrical, data, potable, sanitary, storm water, fire suppression systems, roadways, sidewalks, public areas, public luminaires, spaces, and others.

It is preferable that the completion of units is adjacent to each other and that any public spaces and infrastructure adjacent and near them be complete, decent, safe, and secure. Phased projects must contemplate the completion of units in a logical manner and as per the Construction Permit, Occupancy Permit requirements, etc.

## 18. Assessment and Acceptance of Work

Upon completion of a single-family unit, the PRDOH or its authorized representative may proceed with the property assessment of such unit. This assessment may include an evaluation to:

- Verify overall safety and quality of the property;
- Validate overall compliance with SF-HDI requirements;
- It is encouraged that these units are completed in adjacent groups or bundle of units (not scattered within the project) for an efficient assessment process.

The CONTRACTOR represents to the PRDOH that all work shall be performed by personnel experienced in the appropriate and applicable profession and areas of expertise, taking into account the nature of the work to be performed under this Contract.

In such event, all finished or unfinished documents, data, studies, surveys, drawings, maps, models, photographs, and reports prepared by the CONTRACTOR under this Agreement shall, at the option of the PRDOH, become the PRDOH's property and the CONTRACTOR shall be entitled to receive just and equitable compensation for any work satisfactorily completed hereunder. On December 21, 2022, the PRDOH issued the Request for Proposal (**RFP**) No. CDBG-MIT-RFP-2022-04 to support the Puerto Rico Department of Housing (**PRDOH**) in the implementation of the Single-Family Housing Mitigation Program (**SF-MIT Program**) under the Community Development Block Grant for Mitigation (**CDBG-MIT**). A description of the Housing Sector CDBG-MIT is included in the Action Plan approved by the U.S. Department of Housing and Urban Development (**HUD**)<sup>1</sup>.

#### 1. General Description

The Minimum Architectural and Design Standards (**MADS**) is not a stand-alone document, and it does not supersede the Building Codes provisions, requirements, nor the Proposers Selected Green Building Standard requirements. The Proposers must align the design of the new resilient single-family housing (**Units**) according to reasonable sale price, cost reasonableness principles with the corresponding sections of the Single-Family Housing Development Initiative, Scope of Work (**Attachment #1** of the RFP). The intent of the SF-HDI ~~SFM Program~~ Minimum Architectural and Design Standards is to:

- Set forth the minimum criteria to incorporate into design solutions;
- Enhance consistency in the design proposals, evaluation, and approval process;
- Promote the use of resilient materials and techniques;
- Promote a healthy living environment;
- Balance quality of materials with cost reasonableness principles.

**These minimum design standards may be outperformed with better performance materials, products, and techniques.**

#### 2. General Design Requirements

The proposed design solutions shall consider the following General Design Requirements:

### 5.1. PV System Requirements

The PV System shall be capable of running critical loads, household appliances (refrigerators, water pump, etc.), life support devices, to enable the occupants to shelter-in-place during electrical grid outages. The PV Systems shall be installed, commissioned, and must comply with the following installation general requirements:

#### 5.1.1. PV System Commissioning

Once the systems are installed the developer firm shall perform commissioning and inspections to correct underperformance, findings, deficiencies and validate the PV System performance. These may apply to system location, shading, quality of installation, anchoring, securing, performance as per the design intent, and others. Commissioning and inspection shall follow the International Electrotechnical Commission (IEC) standard IEC 62446, and any local or state regulation.

#### 5.1.2. PV System Standard Package

Standard packages as minimum shall have the capacity of supplying electricity to an itemized list of devices, appliances and lighting fixtures identified as critical loads. The system will supply electricity to the critical loads independently as a stand-alone system, with grid interconnecting capacity. The developer firm will provide as minimum the following standard package for PV Systems and battery storage:

- **3 kW DC** PV modules **48V** voltage lithium-ion battery bank with a minimum output of **9 kWh** and an **autonomy of 20 hours**. Loads shall consider one (1) medical life support device. The PV System shall provide and install an automatic transfer switch to allow for system operation in standalone mode.

### 6. Water Storage System Requirements

The water storage system shall provide domestic water to the single-family unit from the water storage tank using an electric water pump, controls, and a diaphragm type pressurized tank to provide back-up water supply with adequate pressure and without damaging water fixtures. The system pressure pump shall be coordinated and connected to the PV System to continue operating during electrical service interruption.

- A minimum capacity of **500** gallons per unit, with all its necessary equipment and accessories for functionality of water storage and distribution. A minimum Pump of **¾ horsepower** shall be provided.

- The water storage tank shall be located on the rooftop of the home, when feasible. If the structural integrity of the house does not support the load of any of the applicable water tank size options, installation in a reinforced concrete pad may be provided at ground level.
- The water storage tank shall be connected to the utility's main water line with a water level control valve and backflow preventer. The water storage tank shall have instrumentation to monitor (located at ground level), control pressure and water level.
- The water storage tank shall be constructed of ultraviolet (UV) and corrosion resistant material, approved for potable water and food-grade applications, and have the Food and Drug Administration (FDA) and the National Safety Foundation (NSF) approval.
- Water storage tanks must be vented to allow water level changes. The vent opening installed in downward position shall include protective screen for pest control.
- Disinfection of the water storage tank and pressure tank after installation must follow the manufacturer's recommendations.
