Environmental Assessment
Determinations and Compliance Findings for HUD-assisted Projects
24 CFR Part 58

Project Information

Project Name: Instalación del Centro Social Cultural; Centro Social de Arte; y Música y Centro Social Deportivo /PR-CRP-000378

Responsible Entity: Puerto Rico Department of Housing (PRDOH)

Grant Recipient (if different than Responsible Entity): Municipality of Yabucoa

State/Local Identifier: Puerto Rico / Municipality of Yabucoa

Preparer: Caribe Environmental Services, Inc.

Luis R Colon Morales, P.E., M.E. — Senior Engineer

Raul Colon Vicenty, P.E, P.H. — Principal Engineer

Certifying Officer Name and Title:
Aldo A. Rivera Vázquez – Director, Permit and Environmental Compliance Division
Angel G. López Guzmán – Deputy Director, Permit and Environmental Compliance Division
María T. Torres Bregón – Permit and Environmental Compliance Manager
Sally Z. Acevedo Cosme – Permit and Environmental Compliance Specialist
Limary Vélez Marrero – Permit and Environmental Compliance Specialist
Ivelisse Lorenzo Torres – Permit and Environmental Compliance Specialist
Mónica M. Machuca Ríos – Permit and Environmental Compliance Specialist
Janette I. Cambrelén – Permit and Environmental Compliance Specialist
Santa D. Ramírez Lebrón – Permit and Environmental Compliance Specialist
Abdul X. Feliciano Plaza – Permit and Environmental Compliance Specialist
Pedro A. de León Rodríguez – Permit and Environmental Compliance Specialist
Javier Mercado Barrera – Permit and Environmental Compliance Specialist
Priscilla M. Toro Rivera – Permit and Environmental Compliance Specialist

Consultant (if applicable): Caribe Environmental Services, Inc.
Road # 172, Km 25.8, Cañaboncito Ward, Caguas, PR 00725
P.O. Box 5189, Caguas, PR 00726-5184
Tel: (787) 998-7262 / (787) 998-8390

Direct Comments to: Angel López Guzmán at comentariosambiental@vivienda.pr.gov

Project Location: Address: 47, 48, 49, and 53 Luis Muñoz Rivera Street,
Pueblo Ward,
Yabucoa, Puerto Rico

Coordinates: Plot A (18.050720, -65.879421)
Plot B (18.050815, -65.879190)
Plot C (18.050905, -65.879051)
Plot D (18.050637, -65.879629)

Cadaster(s): Plot A (#376-040-013-05-001);
Plot B & C (#376-040-013-10-002);
Plot D (#376-040-013-12-001)

A site location of the proposed project area is included in ***Attachment 1A***. A site layout of the proposed project area is included in ***Attachment 1B***.

Description of the Proposed Project [24 CFR 50.12 & 58.32; 40 CFR 1508.25]**:**

The Project consists of the rehabilitation of four vacant properties in neglected conditions and converting them into the following social centers: Cultural Social Center; Social Center of Art; and Music, and Social Sports Center. The properties are located along the Luis Muñoz Rivera Street (PR-991) within the Urban Center in the Municipality of Yabucoa. The Project will be located directly in the area in front of the Public Plaza.

The Cultural Social Center will be developed in an abandoned structure located on a lot covering an area of approximately 317.29 square meters (m²), referred to as Plot A. The Cultural Social Center will be developed to convene community meetings with the purpose of conserving cultural heritage. The Cultural Social Center will serve as a space for cultural presentations, as well as community group meetings and intercommunity agreements. Likewise, the Social Cultural Center will open its doors to the José Facundo Cintrón, Ramón Quiñones Medina, Jaime C. Rodríguez, and Teodoro Aguilar Mora Schools to complement their language, art, and music courses through book presentations, artistic works, and oratories, among other activities. The Municipality of Yabucoa owns Plot A, which will include in the distribution of its spaces: a reception area; a conference room; a presentation area; two bathroom facilities adapted for all types of functional diversity; a general storage area; and maintenance equipment.

The Social Center of Art and Music will be developed in two structures in disuse located on two contiguous lots, covering in total an area of approximately 791.39 m², referred to as Plot B and C, respectively. The Municipality of Yabucoa owns the land but not the structures. Therefore, it requires property acquisition efforts. The Social Center of Art and Music will be developed with the purpose of involving communities in the creation and presentation of artistic works. The existing structures will include in the distribution of their spaces: a reception area; a musical rehearsal area; an area for artistic and dance rehearsals; an area for general artistic presentations; a meeting area; an office; two-bathroom facilities adapted for all types of functional diversity; a general storage area; and a storage area for

maintenance equipment. The Social Center of Art and Music will serve as a community center, rehearsal center, and artistic presentations for the Municipal Band of Yabucoa and the Yabucoa Marching Band.
The Social Sports Center will be developed in a disused structure that is located on a lot covering an area of approximately 634.55 m², referred to as Plot D. The Social Sports Center will be developed as a meeting space for all Yabucoa sports organizations and educational institutions in learning sports. This parcel will be acquired through an involuntary acquisition, according to the requirements of the Uniform Real Property Relocation and Acquisition Assistance Act (URA). The Social Sports Center will include in the distribution of its spaces: a reception area; a conference room; an area for passive sports activities; a Hall of Fame; two-bathroom facilities adapted for all types of functional diversity; a general storage area; and a storage area for maintenance equipment.

Following is the breakdown of improvements.

YABUCOA TRES CENTROS SOCIALES

Breakdown of improvements	S.F.	QTY
BUILDING A - SOCIAL CULTURAL CENTER (Red)		
Floor:		
- Floor tiles	151	
- Exposed polished concrete floors	1,450	
Walls:		
- Paint	1,846	
Windows:		
- Glass		12
- Louvered		6
Doors:		
- Wood		2
- Metal		5
Roof:		
- Concrete Roof	1,518	
BUILDING B SOCIAL CENTER FOR ART AND MUSIC (Yellow / Blue)		
Floor:		
- Floor tiles	1,355	
- Exposed polished concrete floors	520	
Walls:		
- Paint	2,700	
Windows:		
- Glass		1
- Louvered		2
Doors:		
- Wood		11
- Metal		1
BUILDING C SOCIAL CENTER FOR ART AND MUSIC (Pink)		
Floor:		
- Floor tiles	4,000	
- Exposed polished concrete floors	14,050	
Walls:		
- Paint	23,000	
Windows:		
- Glass	7	
Doors:		
- Wood		14
- Metal		9
- Glass		5

BUILDING D SOCIAL CENTER FOR ART AND MUSIC (Red)		
Floor:		
- Floor tiles	150	
- Exposed polished concrete floors	2,350	
Walls:		
- Paint	4,350	
Windows:		
- Glass		1
- Louvered		2
Doors:		
- Wood		5
- Metal		3
- Glass		4

As part of the proposed project, the estimated depth of ground disturbance will be approximately 24 to 48 inches (60 to 120 centimeters) for utility trenching, up to 36 inches (90 centimeters) for any required foundation reinforcement, and 12 to 18 inches (30 to 45 centimeters) for the installation of sidewalks, ramps, and related accessibility features. All ground-disturbing work will remain strictly within the existing property footprints.

The areas to be improved were affected by Hurricanes Irma and María in 2017. Photographs of the actual site conditions are included in ***Attachment 2***.

Statement of Purpose and Need for the Proposal [40 CFR 1508.9(b)]:

The project is proposed as part of the efforts to revitalize the urban center of the Municipality of Yabucoa. This will be achieved by the rehabilitation of four vacant properties in neglected conditions, which will be converted to productive uses for the community. The impact that this project will have through the proposed improvements and development of social exchange centers open to the public will provide an attractive environment for our citizens and visitors, as well as meeting spaces for future emergency events. The new facilities will be operated and maintained through the municipal administration, in collaborative agreements with community organizations related and related to the purposes of these Social Centers.

Existing Conditions and Trends [24 CFR 58.40(a)]:

Under existing conditions, the four vacant properties are currently abandoned, heavily deteriorated and without productive use. These properties suffered significant damage after Hurricane María. If the project is not completed, the conditions throughout the El Yabucoa urban center community will continue to deteriorate with time, and the goal of revitalizing the urban center will not be achieved. Thus, resulting in a negative impact on the community. The project will avoid further deterioration of the community's buildings, improve living conditions, eliminate safety hazards, and provide an attractive environment for our citizens and visitors, as well as meeting spaces for future emergency events.

Funding Information

Grant Number	HUD Program	Funding Amount
B-17-DM-72-0001; B-18-DP-72-0001; B-19-DP-78-0002; B-18-DE-72-0001	Community Development Block Grant – Disaster Recovery (CDBG-DR)	$11,938,162,230

Estimated Total HUD Funded Amount: $1,600,000.00

Estimated Total Project Cost (HUD and non-HUD funds) [24 CFR 58.32(d)]:

HUD: $1,600,000.00
Non-HUD: $0

Compliance with 24 CFR 50.4, 58.5, and 58.6 Laws and Authorities

Record below the compliance or conformance determinations for each statute, executive order, or regulation. Provide credible, traceable, and supportive source documentation for each authority. Where applicable, complete the necessary reviews or consultations and obtain or note applicable permits of approvals. Clearly note citations, dates/names/titles of contacts, and page references. Attach additional documentation as appropriate.

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	**Are formal compliance steps or mitigation required?**	**Compliance Determinations**
STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 and 58.6		
Airport Hazards 24 CFR Part 51 Subpart D	Yes ☐ No ☒	The nearest civil airport to the project site is the Jose Aponte De La Torre Airport (RVR/TJRV) located in Ceiba Puerto Rico, which is at an approximate distance of 111,500 feet (21.1 miles) measured from the project boundary to the runway. The nearest military airport, Luis Muñoz Marín (SJU) Joint Military Airfield Muñiz Air National Guard, in Carolina Puerto Rico, is located approximately 148,500 feet (28.1 miles) measured from the project boundary to the runway (see **Attachment 3**). Since the project site is not located within 15,000 feet of a military airport or 2,500 feet of a civilian airport, the project location is outside of an Accident Potential Zone (APZ) or Runway Protection Zone/Clear Zone (RPZ/CZ). Thus, the proposed action is in compliance with Airport Hazards requirements.
Coastal Barrier Resources Coastal Barrier Resources Act, as amended by the Coastal Barrier Improvement Act of 1990 [16 USC 3501]	Yes ☐ No ☒	The proposed project is not located within a Coastal Barrier Resources Unit. The distance to the nearest Coastal Barrier Resources Unit (PR- 39) is approximately 17,200 feet (3.2 miles) to the east of the project site in Yabucoa (see **Attachment 4**). Therefore, this project has no potential to impact a CBRS Unit and is in compliance with the Coastal Barrier Resources Act.
Flood Insurance Flood Disaster Protection Act of 1973 and National Flood Insurance	Yes ☐ No ☒	The project site is located in zone [unshaded X], outside the Special Flood Hazard Area (SFHA)/ 100-year floodplain as designated in FIRM Panel number

Reform Act of 1994 [42 USC 4001-4128 and 42 USC 5154a]		[72000C1795J], effective date: [11/18/2009] (see **Attachment 5**) Therefore, the project does not require flood insurance in accordance with the Flood Disaster Protection Act of 1973 and the National Flood Insurance Reform Act of 1994. Documentation demonstrating the location outside the SFHA has been included. Therefore, the project is in compliance with 42 U.S.C. §§ 4001-4128 and 42 U.S.C. § 5154a."
STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 & 58.5		
Clean Air Clean Air Act, as amended, particularly section 176(c) & (d); 40 CFR Parts 6, 51, 93	Yes ☐ No ☒	The project is located within an "attainment" area. Non-attainment areas in Puerto Rico only include the following municipalities: Arecibo, Bayamón, Cataño, Guaynabo, Salinas, San Juan, and Toa Baja. The distance to the nearest Non-attainment areas is approximately 117,400 feet (22.2 miles) to the southwest of the project site (see **Attachment 6** and **Attachment 7**). The project proposes construction activities that can produce particulates and conditions in which soil could be exposed to wind erosion and airborne particulates. During construction, the proposed action could generate emissions (particulate material, hydrocarbons, nitrogen oxides, sulfur dioxide, among others) in addition to those produced during the operation of the existing roads in the area. For the most part, those emissions would be produced by the operation of the heavy equipment and machinery used during the construction process. Potential air quality impacts are primarily short-term and construction-related. Implementation of construction-related air pollution controls (fugitive dust control and heavy equipment emissions controls) would reduce potential impacts. This temporary effect is not significant and would not have an adverse impact on the residential, institutional, and commercial properties located near the project area. In addition, the corresponding air emissions permit from the La Oficina de Gerencia de Permisos (OGPe)/Department of Natural and Environmental Resources (DNER) will be obtained prior to initiating construction.

		The project will not impact air quality and is in compliance with the Clean Air Act.
Coastal Zone Management Coastal Zone Management Act, sections 307(c) & (d)	Yes ☐ No ☒	The project is not located in the coastal zone. The distance to the nearest coastal zone management area is approximately 2,700 feet (0.51 miles) to the northeast of the project site (see **Attachment 8**). The project is in compliance with the Coastal Zone Management Act
Contamination and Toxic Substances 24 CFR Part 50.3(i) & 58.5(i)(2)	Yes ☒ No ☐	A 3,000 ft (0.6 miles) radius map identifying locations of possible contaminated sites, obtained from the Environmental Protection Agency's (EPA) NEPA assist website, is included in **Attachment 9A**. The map identifies the following sites within the 3,000-foot radius: • RCRA – ESSO Standard Oil Co – PR-266 -RCRA ID PRR000000463 ECHO reports and Facility reports for the site listed above can be found in **Attachment 9B**. The facility is listed Active VSQG with No Violation Identified. There are no NPL Superfund Sites within a 1-mile (5,280 feet) radius of the project site. The site identified within a 3,000 feet radius does not intervene or affect the proposed development or the intended use of the actions under the project's scope. Furthermore, the site area has already been developed and is heavily impacted by high-density residential activity. According to the EPA underground storage tank (UST) Finder Tool, the closest gas stations are located as follows (see **Attachment 13**).: • RAFLIN SERVICE STATION (DNER UST ID-2-89-0071) approximately 1,000 feet (0.19 miles) northeast. This gas station is not listed as a LUST. • MILITOS SERVICE STATION (TEXACO #264) (DNER UST ID-2-86-1722) approximately 1,200 feet (0.23 miles) west. This gas station is listed as a LUST.

- MOTHER & SON'S (GULF #39) (DNER UST ID-2-86-1367) approximately 2,800 feet (0.53 miles) southeast. This gas station is listed as a LUST.
- TEXACO SS SEPULVEDA (DNER UST ID-2-86-1735) approximately 5,100 feet (0.86 miles) to the northeast of the project area. This gas station is not listed as a LUST.
- MOTHER/ SON (GULF #441) (DNER UST ID-2-86-0229) approximately 4,600 feet (0.87 miles) southeast. This gas station is not listed as a LUST.

Phase I ESA prepared for Plot B, Plot C, and Plot D are included in **Attachments 10A, 10B,** and **10C**. As a result of these Phase Is the following recognized environmental conditions and business environmental risk were identified:

Recognized Environmental Conditions

- **Stained Surfaces at the Former Electrical Substation and Electrical Transformers at Plot C**

  During a previous site inspection conducted by CES for Plot C, on January 28, 2025 a vandalized electrical substation in deteriorated conditions was observed inside the building and three disconnected electrical transformers were observed at the 1st floor. According to the information provided by ABACUS, this substation and transformers were removed from the Subject Property. However, stain surfaces were still observed on the former electrical substation and disconnected electrical transformers surroundings which could have been the result of spills or releases from the transformers.

  Part 761 of Title 40 of the Code of Federal Regulations (CFR) define PCBs as any chemical substance that is limited to the biphenyl molecule that has been chlorinated to varying degrees or any combination of substances which contains such substances. The regulations categorize PCB Transformers as:

		Non-PCB (less than 50 ppm), PCB-contaminated (50-500 ppm), and PCB (greater than 500 ppm). PCB-Contaminated Transformers contain PCBs at concentrations greater than or equal to 50 ppm and less than 500 ppm. Indoor solid surfaces and high-contact outdoor solid surfaces, defined as high contact residential/commercial surfaces under § 761.123, shall be cleaned to 10 µg/100 cm^2 (as measured by standard wipe tests). Soil contaminated by a PCB spill needs to be decontaminated to 10 ppm PCBs by weight provided that soil is excavated to a minimum depth of 10 inches. The excavated soil will be replaced with clean soil, i.e., containing less than 1 ppm PCBs, and the spill site will be restored (e.g., replacement of turf). We note that the DNER may have lower limits for the requirement of remediation of PCB impacted media. Therefore, the observed stained areas at the former vandalized electrical substation area in L:ot B, and the former storage area of the three disconnected electrical transformers area ***represents a REC*** for the Subject Property. • **Asbestos Containing Materials (ACM) and Lead Based Paint (LBP) at Plot C** An asbestos-containing materials survey for Plot C, was conducted by Nortol Environmental & Occupational Safety, Inc. on January 28 and March 19, 2025. The survey indicates that Nortol identified asbestos-containing materials and bulk samples were collected and submitted for laboratory analysis. About 7,000 ft^2 of roofing sealer materials and about 4,000 ft^2 of vinyl floor tiles (and/or its mastic layer) resulted positive (>1%) to asbestos-containing material. The survey also classifies the asbestos-containing material as damaged. Also, a Lead Based Paint survey was conducted by Nortol Environmental & Occupational Safety, Inc. on on January 28 and March 19, 2025. The survey indicates that Lead-glazed ceramic wall tiles (which are regulated as LBP in Puerto Rico) were found in the bathrooms.

According to 40 CFR 302.4, Lead and Asbestos (friable forms only) is listed as a hazardous substance subject to CERCLA. Based on the observed deteriorated building conditions, the detected ACM and LBP may be easily detached from the building, or some have been already detached from the building and represents a release or threat of release into the environment. Therefore, until ACM and LBP is properly mitigated, this ***represents a REC*** for the Subject Property.

Business Environmental Risk for

- **Non-Hazardous Solid Wastes**

  At the time of our site reconnaissance, no solid wastes were observed generated at the Subject Property. However, significant accumulations of discarded materials were observed inside the building. No evidence of hazardous substances or petroleum products releases in connection with these wastes was observed. Until all of the solid wastes are properly disposed of, *this represents a BER* for the Subject Property.

Discarded fluorescent at Plot C

At the time of our site reconnaissance, no Hazardous Wastes generation or storage was observed. According to Mr. Rivera, he is not aware that hazardous wastes have been generated or stored at the Subject Property. Accumulations of a few discarded fluorescent lamps were observed either broken or inappropriately store inside the building. It is known that tubular fluorescent bulbs may contain amounts of metals such as mercury. The observed limited number of fluorescent lamps are considered as a *de minimis* condition and do not represent a REC for the Subject Property. However, until all of the observed discarded lamps are properly disposed of *this represents a BER* for the Subject Property.

- **Suspect Concrete Slab at Plot C**

		A suspect concrete slab was observed on the basement. Mr. Rivera indicated he is not aware of what is the purposes of this slab and could not confirm if this slab is associated with an existing or former underground regulated structure such as a septic tank system. Should this structure be associated with a regulated UIC, then it should be properly closed following the DNER UIC regulation. The uncertainty regarding this concrete slab *represents a BER* for the Subject Property. Lead-based paint surveys conducted by Nortol Environmental & Occupational Safety, Inc. on January 28 and March 19, 2025, for the existing structures are included in **Attachments 10D, 10E,** and **10F**. As a result of these surveys, LBP was found in some of the project-accessed components. Nortol concludes that an LBP mitigation project shall be done prior to any demolition when lead is present in painted components. The LBP abatement project shall be in accordance with the PRDNER applicable regulations which include accredited personnel, special enclosure/work practices and permits for abatement and waste disposal (or metal recycling as first option). If demolition is not proposed, no further action is required other than compliance with federal and local regulations applicable to child-care facilities. Also applies to comply with proper communication to the maintenance employees and contractors following OSHA "Hazard Communication" to avoid unforeseen damages on the LBP. Asbestos-Containing Materials Survey conducted by Nortol Environmental & Occupational Safety, Inc. on January 28 and March 19, 2025, for the existing structures are included in **Attachment 10G, 10H,** and **10I**. As a result of these surveys about 7,000 ft² of roofing sealer materials, about 4,000 ft² of vinyl floor tiles (and/or its mastic layer), and about 1,200 ft² of vinyl floor tiles (black mastic layer) resulted positive (>1%) to asbestos-containing material. Nortol concludes that Removal of Asbestos Containing Materials has the widest applicability. It also is the only

		truly permanent solution since no building or equipment containing asbestos can be demolished or renovated without first removing the ACM. If a proposed demolition plan is in schedule, please refer to 29 CFR 1926.1101 Construction Industry Standards, National Emissions Standards for Hazardous Air Pollutants (NESHAP) (40 CFR 61), and the DRNA (former Environmental Quality Board) Rule 422 for procedures concerning to asbestos abatement prior to commencement of any renovation and/or demolition activity. The project scope includes improvements to the community center, which may be occupied for more than four hours a day. However, it was determined that testing the property's radon levels is infeasible and impractical. A radon memo justifying the infeasibility and impracticality of radon testing as well as correspondence with the EPA, the University of Puerto Rico, the CDC the Puerto Rico Department of Natural Resources, the Puerto Rico Department of Health, and the US Geological Survey can be found in **Attachment 10J.** The project requires mitigation to meet HUD's toxic standards. As part of OGPe's Permiso Unico Incidental (PUI) the construction contractor will be required to remove all of the Asbestos Containing Materials and Lead Based Paint in compliance with the DRNA Rule 422 and in accordance with the PRDNER applicable regulations, which include accredited personnel, special enclosure/work practices, and permits for abatement and waste disposal. The stained surfaces at the former electrical substation and electrical transformers need to be further investigated by conducting surface sampling to determine the proper cleanup and disposal alternatives.
Endangered Species Endangered Species Act of 1973, particularly section 7; 50 CFR Part 402	Yes ☐ No ☒	Self-Certification under the Blanket Clearance Letter for federally sponsored projects, Housing and Urban Development to be submitted to the US Fish and Wildlife Service was signed by PRDOH on October 8, 2025, (see **Attachment 11**) under the following criterion: 2. Repair, replace, improve, reconstruct

		and/or rehabilitate facilities in already established public transportation systems (signs, sidewalks and ramps, bus stops and existing routes); 6. Reconstruction, or emergency repairs, of existing structures, including but not limited to buildings, facilities and homes, 9. Retrofitting existing buildings, 14. Improvements or renovations to existing structures (exterior and interior renovations) resulting in an exterior increase of less than 20%, and 15. Acquisition of residential and/or commercial properties in urban or developed areas for the relocation of families and/or activities. The project site is not located within a critical habitat area (see **Attachment 12A**). The distance to the nearest critical habitat is approximately 9,500 feet (1.8 miles) to the southwest of the project site. Additionally, the project site is located within an urbanized, developed area. According to the IPAC (see **Attachment 12B**), the following Endangered species are listed at the project site: • Puerto Rican Boa (Chilabothrus inornatus) Being at a heavy developed urban area, we believe that it is unlikely that this species would be located within the project site. Therefore, It is our understanding that this project is in compliance with the Endangered Species Act. However, if a Puerto Rican Boa is found in the project action site, work shall cease until the Boa moves off on its own. If the Boa does not move off, the construction contractor shall contact the Puerto Rico Department of Natural and Environmental Resources and ask for them to relocate the Boa. The project is in compliance with the Endangered Species Act of 1973
Explosive and Flammable Hazards 24 CFR Part 51 Subpart C	Yes ☐ No ☒	The proposed project does not include a hazardous facility that mainly stores, handles, or processes flammable or combustible chemicals such as bulk fuel storage facilities. Planned activities in the project area do not include installation of storage tanks. Furthermore, the project does not involve development, construction, rehabilitation that will increase residential density, or conversion. Therefore,

		the project is following the Explosive and Flammable Hazards requirements.
Farmlands Protection Farmland Protection Policy Act of 1981, particularly sections 1504(b) and 1541; 7 CFR Part 658	Yes ☐ No ☒	The project site does not cover any area classified as prime or unique farmland, or other farmland of statewide or local importance as identified by the U.S. Department of Agriculture Natural Resources Conservation Service NRCS. The project site is completely located on Urban Lands (Ul), classified as Not prime farmland, see **Attachment 14**. In addition, according to the definitions at 7 CFR Part 658.2(a), "farmland" does not include land already in urban development (all such land with a density of 30 structures per 40-acre area). The project site is already developed and is situated within an urban setting surrounded by existing residential and commercial buildings, and roads. The project is in compliance with the Farmland Protection Policy Act.
Floodplain Management Executive Order 11988, particularly section 2(a); 24 CFR Part 55	Yes ☐ No ☒	Based on the Flood Insurance Rate Map (FIRM) (effective date 11/18/2009) and the Advisory Base Flood Elevation (ABFE), the project site is located within Zone X (unshaded). Therefore, the project is not located within a 100-year or 500-year floodplain or a special flood hazard area. Based on this information, the project is located outside of the floodplain, based on the 0.2 annual chance approach. No PFIRM is available for the project location. The project does not require compliance with 8-step decision-making at 24 CFR Part 55.20 or the 5-step decision-making at 24 CFR 55.12(a). The proposed action does not have an adverse effect on Floodplain Management and does not require mitigation or attenuation, no formal consultation, permit, or agreement is required to establish compliance. The proposed action is in compliance with the Floodplain Management Executive Order 11988 and 24 CFR Part 55.

		See **Attachments 5** and **15**.
Historic Preservation National Historic Preservation Act of 1966, particularly sections 106 and 110; 36 CFR Part 800	Yes ☐ No ☒	SOI-Qualified Architect/Architectural Historian: Jorge Lizardi Pollock, Ph.D. and SOI-Qualified Archaeologist: Jesus E. Vega, Ph.D. prepared the Section 106 Effect Determination Form. The consultation process was submitted to PRSHPO on 06/23/2025. On 07/23/2025, the Puerto Rico State Historic Preservation Office issued a written communication concurring with a determination of no historic properties affected. If a historic properties, at any point during project implementation is discover SHPO should be notify immediately. The project is in compliance with National Historic Preservation Act of 1966, particularly sections 106 and 110; 36 CFR Part 800." See **Attachment 16**.
Noise Abatement and Control Noise Control Act of 1972, as amended by the Quiet Communities Act of 1978; 24 CFR Part 51 Subpart B	Yes ☐ No ☒	The proposed project does not include new construction for residential use or rehabilitation of an existing residential property. The project does not involve the development of noise sensitive uses. Based on the project description, this project includes no activities that would require further evaluation under HUD's noise regulation. The project is in compliance with HUD's Noise regulation. The project is in compliance with HUD's Noise regulations. The noise that will be produced during the construction phase of the project will be generated by the operation of construction equipment. The noise levels attributable to construction activities will be temporary in nature and it is expected that they will not exceed 65 dBA. The noise to be produced during the period of operation will be that normally produced by motor vehicles passing through the area. The construction activities will be conducted during daily hours. Given the case that the proposed action does not entail an increase in the generation of trips, with the exception of the construction period of the proposed project, no

		noise impacts are anticipated and the project is in compliance with the Noise Control Act of 1972
Sole Source Aquifers Safe Drinking Water Act of 1974, as amended, particularly section 1424(e); 40 CFR Part 149	Yes ☐ No ☒	There are no sole-source aquifers in Puerto Rico. Therefore, the proposed project site is not located within a sole source aquifer, nor will it directly or indirectly impact one. The nearest Sole Source Aquifer is located in Cross Key, Florida, approximately 5,617,500 feet (1,063 miles) away from the project site (see **Attachment 17**). Therefore, the project is in compliance with the Safe Drinking Water Act of 1974, as amended, particularly section 1424(e); 40 C.F.R. Part 149.
Wetlands Protection Executive Order 11990, particularly sections 2 and 5	Yes ☐ No ☒	A desktop study included a review of the National Wetlands Inventory (NWI) map. The NWI map confirms that no wetlands are located within or adjacent to the project site. The nearest wetlands is located approximately 300 feet (0.06 miles) to the north of the project site (see **Attachment 18**). The project area and surroundings are already developed, and no work is proposed outside of the existing buildings. Photos taken during a site visit in January 2025 (see **Attachment 2)** confirm that the project area is already developed and does not contain any indication of the presence of wetlands. Based on these findings, the project complies with the Wetlands Protection requirements of Executive Order 11990. Furthermore, no additional mitigation measures or implementation of the 8-Step Process are required. All findings are consistent with the regulatory requirements of 24 CFR § 55.9.
Wild and Scenic Rivers Wild and Scenic Rivers Act of 1968, particularly section 7(b) and (c)	Yes ☐ No ☒	The project is not located within one mile of a listed Wild and Scenic River (WSR). The distance to the nearest WSR is approximately 72,350 feet (13.7 miles) to the northeast of the project site (see **Attachment 19**). No further consultation or mitigation measures are required. The project complies with the Wild and Scenic Rivers Act, as outlined in 24 CFR Part 50 and Part 58.
ENVIRONMENTAL JUSTICE		

Environmental Justice Executive Order 12898	Yes ☐ No ☒	On January 21, 2025, President Donald Trump issued the Executive Order 14173 titled "Ending Illegal Discrimination and Restoring Merit-Based Opportunity", which revoked Executive Order 12898 and eliminated federal mandates requiring agencies to assess environmental justice impacts. Consequently, there is no longer a federal requirement to address environmental justice concerns in the environmental compliance review process.

Environmental Assessment Factors [24 CFR 58.40; Ref. 40 CFR 1508.8 &1508.27] Recorded below is the qualitative and quantitative significance of the effects of the proposal on the character, features and resources of the project area. Each factor has been evaluated and documented, as appropriate and in proportion to its relevance to the proposed action. Verifiable source documentation has been provided and described in support of each determination, as appropriate. Credible, traceable and supportive source documentation for each authority has been provided. Where applicable, the necessary reviews or consultations have been completed and applicable permits of approvals have been obtained or noted. Citations, dates/names/titles of contacts, and page references are clear. Additional documentation is attached, as appropriate. **All conditions, attenuation or mitigation measures have been clearly identified.**

Impact Codes: Use an impact code from the following list to make the determination of impact for each factor.

(1) Minor beneficial impact
(2) No impact anticipated
(3) Minor Adverse Impact – May require mitigation
(4) Significant or potentially significant impact requiring avoidance or modification which may require an Environmental Impact Statement

Environmental Assessment Factor	Impact Code	Impact Evaluation
LAND DEVELOPMENT		
Conformance with Plans / Compatible Land Use and Zoning / Scale and Urban Design	2	The Project consists of the rehabilitation of four vacant properties in neglected conditions and converting them into the following social centers: Cultural Social Center; Social Center of Art; and Music, and Social Sports Center. The project site will be located in a lot designated as Suelo Urbano (SU) and classified as Comercial Intermedio (C-I) (see **Attachment 20**). According to Rule 6.1.7.2 of the Reglamento Conjunto Para La Evaluación Y Expedición De Permisos Relacionados Al Desarrollo, Uso De Terrenos Y Operación De Negocios (June 2023), this type of classification allows institutional, civic, and cultural uses.

		The project site landform has already been impacted by the existing urban setting. The proposed project does not contemplate changing the existing landform. The proposed project will not increase building density, and its design is consistent with the context of the existing community. There is no element of the proposed project that will be out of character compared with the existing built environment. The proposed action would not change the current land use classification.
Soil Suitability/ Slope/ Erosion/ Drainage/ Storm Water Runoff	3	The project site is already graded and developed. There are no adverse effects anticipated due to site slopes. The proposed project shall comply with Section 5.1.9.4 of the "Reglamento Conjunto" - Manejo de Aguas Pluviales. This section indicates that the runoff discharges from a proposed development must not exceed the runoff discharges from the property under existing conditions, for all intensities and rainfall durations after the construction According to the Soil Survey of the Humacao Area, Puerto Rico (https://websoilsurvey.sc.egov.usda.gov/App/WebSoilSurvey.aspx), the Site soil survey is classified as Urban land. Projects larger than 1 acre must comply with the CWA and develop a SWPPP with the NPDES. The expected ground to be disturbed will be less than 1 acre. The project site area is rated "low" to "moderate" for landslide susceptibility, see **Attachment 21**. Therefore, landslide mitigation measures such as retaining walls or special engineering design, may be required, subject to the evaluation of the geotechnical and structural engineering analysis. Standard construction BMPs would be used to control erosion and runoff during construction. Therefore, to mitigate potential minor adverse impact related to erosion and sedimentation, as part of the proposed project the municipality will comply with the Reglamento Conjunto. As part of the proposed construction activities, compliance with the Permiso Unico Incidental and implementation of Standard construction BMPs would be used to control erosion and runoff.
Hazards and Nuisances including Site Safety and Noise	2	During the construction phase of the project, construction activities may result in a temporary increase of ambient noise levels in the immediate vicinity of any active construction sites during work hours. The only nearby receptors are the residents of the Yabucoa town center community. Standard best management practices, such as construction fencing and hazard signs, will be used to minimize access to the project areas while under construction and improve safety for the public.

Environmental Assessment Factor	Impact Code	Impact Evaluation
SOCIOECONOMIC		
Employment and Income Patterns	1	The proposed project is expected to generate temporary employment of workers related to construction activities. The workers are expected to come from the local region. The project will not negatively impact employment of income patterns. Rehabilitating the deteriorated buildings will serve as part of the revitalization of the urban center of the Municipality of Yabucoa; this will increase opportunities for employment and will beneficially impact local income patterns.
Demographic Character Changes, Displacement	2	The proposed project would not result in demographic character changes or displacement. No relocations or demolition of residential structures or businesses will occur as part of the project. The project will comply with any existing design guidelines and will be consistent with the character of the existing built environment within the Yabucoa urban center.
Environmental Justice	N/A	On January 21, 2025, President Donald Trump issued the Executive Order 14173 titled "Ending Illegal Discrimination and Restoring Merit- Based Opportunity", which revoked Executive Order 12898 and eliminated federal mandates requiring agencies to assess environmental justice impacts. Consequently, there is no longer a federal requirement to address environmental justice concerns in the environmental compliance review process.

Environmental Assessment Factor	Impact Code	Impact Evaluation
COMMUNITY FACILITIES AND SERVICES		
Educational and Cultural Facilities	1	The project would not result in any changes to local or regional educational facilities. However, as part of the proposed project, a Cultural Social Center; a Social Center of Art; and a Music, and Social Sports Center will be developed. Therefore, it is expected the project will improve cultural and recreational opportunities in the Yabucoa urban center.
Commercial Facilities	1	By rehabilitating the deteriorated buildings, the proposed project will likely result in a benefit for the neighboring commercial facilities.

Health Care and Social Services	2	Health care and social services would not be impacted by the proposed project. The project would not increase demand for health care or social services.
Solid Waste Disposal / Recycling	3	Limited amounts of solid waste are expected to be generated as a result of the construction activities and during the operation of social centers. This waste will be properly disposed of at an approved DNER landfill through private waste management companies or the Municipality of Yabucoa.
Waste Water / Sanitary Sewers	2	Other than rehabilitating the existing bathrooms located in the buildings, the proposed project would not include any additional bathrooms, wastewater, or sewage facilities. Current Sanitary Sewers would remain unchanged.
Water Supply	2	Other than the existing water supply connected to the buildings, the proposed project would not include any new water supply needs. The proposed project will have no impact on water availability in the area.
Public Safety - Police, Fire and Emergency Medical	2	The proposed project would not increase the area population and so demand for police, fire, and emergency medical services in the community would not increase. Services at the project site would be provided by the existing community police, fire, and emergency medical services. In fact the rehabilitation of the project existing buildings will improve public safety in the area.
Parks, Open Space and Recreation	1	The proposed project includes a Cultural Social Center; a Social Center of Art; and a Music, and Social Sports Center. Therefore, it is expected the project will improve recreational opportunities in the Yabucoa urban center.
Transportation and Accessibility	2	Construction of the proposed project may result in minor temporary traffic increases and access issues during construction due to material deliveries or use of equipment. Emergency services would be notified of traffic control changes ahead of time, and access by emergency vehicles always would be allowed within the work zone. There would be no long term impacts. Long-term access to the project would remain the same.

Environmental Assessment Factor	Impact Code	Impact Evaluation
NATURAL FEATURES		
Unique Natural Features, Water Resources	2	The proposed project will be situated on previously developed urban land with no expansion of the project footprint. No stream or wetland would be affected by the changes to the proposed activity.
Vegetation, Wildlife	2	The proposed project will be situated on previously developed urban land and will not impact vegetation or wildlife. The project activities are cleared under the USFWS Blanket Clearance Letter for federally

		sponsored projects. Additionally, there is no critical habitat in the project area. The project would not impact native vegetation.
Other Factors	N/A	N/A

Environmental Assessment Factor	Impact Code	Impact Evaluation
CLIMATE AND ENERGY		
Climate Change Impacts	N/A	On January 20, 2025, President Donald Trump issued the Executive Order 14148 titled "Initial Rescissions of Harmful Executive Orders and Actions", which revoked Executive Order 14008 and eliminated federal mandates requiring agencies to assess climate change impacts. Consequently, there is no longer a federal requirement to address climate change concerns in the environmental compliance review process.
Energy Efficiency	2	The project would not result in a major change in the area's energy demand. Regional energy use would not significantly change.

Additional Studies Performed:

- Asbestos-Containing Materials Survey social center arts and music, **Attachment 10G**
- Asbestos-Containing Materials Survey Social Sport Center, **Attachment 10H**
- Asbestos-Containing Materials Survey - cultural social center, **Attachment 10I**
- Section 106 of the National Historic Preservation Act, **Attachment 16**

Field Inspection (Date and completed by)**:**

Field inspections were conducted by engineers Luis R. Colón Morales and Raúl Colón of Caribe Environmental Services on January 28, 2025, and July 15, 2025. Architect Mara Vázquez, of ABACUS, accompanied CES personnel during the site inspections. Photographs of the site conditions are included in **Attachment 2**. The following environmental features, which are further evaluated in the Phase I reports included in this ERR, were identified: Based upon the year the buildings were constructed, the presence of ACMs and LBP cannot be discarded. ACM-LBP survey confirmed the presence. Also, minor accumulation of discarded materials was observed inside the buildings. At the time of the July 2025 reconnaissance, no suspect PCBs PCB-containing equipment was observed installed at the Subject Property. However, during a previous site inspection conducted by CES on January 28, 2025, a vandalized electrical substation in deteriorated conditions was observed inside the Plot C building, and three disconnected electrical transformers were observed on the 1st floor. According to the information provided by ABACUS, this substation and the transformers were removed from the Subject Property. Stain surfaces were observed in the former electrical substation and the disconnected electrical transformers' surroundings, which could be the result of spills or releases from the transformers. Accumulations of a few discarded fluorescent lamps were observed, at Plot C, either broken or inappropriately stored inside the building. It is known that tubular fluorescent bulbs may contain amounts of metals such as mercury. Also, a suspect concrete slab was observed in the basement. Should this structure be associated with a regulated UIC, then it should be properly closed following the DNER UIC regulation.

List of Permits Obtained:

- No permits have been obtained yet.

Public Outreach [24 CFR 50.23 & 58.43]**:**

- The Municipality of Yabucoa has worked closely with the urban center community to make sure that the proposed project satisfy the requirements of the community. In compliance with the National Environmental Policy Act (NEPA) regulations for HUD, the public will be notified of the project through publication of the combined Finding of No Significant Impact (FONSI) – Notice of Intent to Request Release of Funds (NOI-RROF) notice with a 15-day public comment period.

Cumulative Impact Analysis [24 CFR 58.32]**:**

The proposed actions are not anticipated to have a negative impact on environmental resources. None of the environmental assessment factors nor the regulations reviewed in the above checklist resulted in a significant or potentially significant impact. Overall, the proposed project will have a positive impact by improving the existing conditions Yabucoa urban center and by providing a new sources of employment for the area. No other planned or ongoing projects were identified in the project vicinity that could contribute to the cumulative impacts on environmental resources.

Short-term impacts during construction would be mitigated through the measures detailed in the table below and would not contribute to construction. In accordance with 24 CFR 58.32 (Aggregation), there are no cumulative impacts associated with the proposed project. The repair and improvements to the existing public spaces/recreation area would not change the land use of the spaces or the adjoining parcels.

Alternatives [24 CFR 58.40(e); 40 CFR 1508.9]:

Other locations and alternate reconstruction designs were considered as alternatives to the current action alternative. However, relocating the proposed project to an alternate location would not provide

the central location desired as a social and cultural center facility for the residents and visitors of the Yabucoa urban center. In addition, an alternate location will not allow to put into productive use the abandoned and deteriorated buildings presently located at the study area. The action to demolish and construct a new facility within the existing footprint was evaluated to include the renovation of the existing building, but was not considered feasible, due to the elevated costs and potential larger environmental impacts, such as greater earth disturbances, noise pollution, and impact to historical buildings. Alternatives to the design were evaluated. However, it was decided that the selected project design will meet the needs of the urban center residents, considering best engineering and economic practices.

The current town square lacks adequate space for community gatherings. Therefore, the idea is to transform these existing structures into a vibrant social center for the community. The town of Yabucoa is rich in culture and community spirit, yet it currently lacks adequate public spaces to support meaningful community gatherings, educational programs, and cultural activities. The existing town square, while central and symbolic, does not offer sufficient space or infrastructure to meet the needs of a growing and engaged population. To address this need, the Cultural Social Center proposes the transformation of four abandoned structures located adjacent to the town square. These buildings, currently underutilized and in disrepair, present a unique opportunity for revitalization. By repurposing these structures, we aim to create a vibrant, multifunctional social center that will serve as a hub for community engagement, cultural expression, and social development.

The project goals include revitalize abandoned spaces and integrate them into the town's urban and cultural fabric, provide a venue for educational workshops, art exhibits, performances, and public forums, foster community pride by creating a safe, inclusive, and accessible gathering space for all ages, and support local talent and traditions by offering a platform for cultural exchange and collaboration. This project will not only breathe new life into neglected structures but also strengthen social cohesion, promote cultural heritage, and contribute to the economic and civic revitalization of Yabucoa. It reflects a broader vision of sustainable urban development through community empowerment and cultural investment.

No Action Alternative [24 CFR 58.40(e)]:

Under the No Action Alternative, the applicant would not receive federal funding for the project, the proposed project will not be implemented, and the site will continue to be unused and not be improved. The Yabucoa urban center would continue to be deprived of an adequate cultural and social center as proposed in this project. Therefore, the no-action alternative does not meet the purpose and need of the Project.

Summary of Findings and Conclusions:

The proposed activity will not have any adverse effects on the environment, nor is there a requirement for further consultation with federal agencies associated with the topics evaluated above. There are no environmental review topics addressed above that result in the need for additional formal compliance steps with federal agencies or the requirement for mitigations other than those listed below. There may be additional approvals or permits from local agencies. Such as, but not limited to, the Office of Permit Management (OGPe), which is responsible for granting permits, licenses, certifications, consultations, construction, and any other procedure necessary for business development and land use in Puerto Rico. In addition, the project will implement mitigation measures that will include; construction-related air pollution controls, removal of Asbestos Containing Materials and A Lead Based Paint materials, further investigation will be conducted to confirm the presence of petroleum products and/or hazardous substances associated with the Stained Surfaces at the Former Electrical Substation and Electrical Transformers, all of the solid wastes and discarded fluorescent lamps located in the existing buildings need to be properly disposed of, the suspect concrete slab located at Plot C needs will be further investigated to determine if it is associated with an existing or former underground regulated structure, such as a septic tank system, if a Puerto Rican Boa is encountered, the Puerto Rico Department of Natural and Environmental Resources will be notified for safe capture and relocation of the animal, in accordance with the USFW Puerto Rican Boa Conservation Measures guidelines, solid wastes generated during the construction and operation activities will be properly disposed of, traffic control signage and adequate fencing around construction areas while construction activities are undertaken, construction and demolition activities will be conducted in accordance with local noise regulations and proper construction equipment maintenance, all wastewater and sanitary sewer work will be done in coordination with the Puerto Rico Aqueduct and Sewer Authority (PRASA), all work on potable water supply activities will be done in coordination with PRASA, emergency services would be notified of traffic control changes ahead of time, and access by emergency vehicles always would be allowed within the work zone. Overall, the project is expected to have a positive impact on the Yabucoa urban center by improving living conditions, eliminating safety hazards, and promoting resilience and sustainability.

Mitigation Measures and Conditions [40 CFR 1505.2(c)]

Summarize below all mitigation measures adopted by the Responsible Entity to reduce, avoid, or eliminate adverse environmental impacts and to avoid non-compliance or non-conformance with the above-listed authorities and factors. These measures/conditions must be incorporated into project contracts, development agreements, and other relevant documents. The staff responsible for implementing and monitoring mitigation measures should be clearly identified in the mitigation plan.

Law, Authority, or Factor	Mitigation Measure
Clean Air Act, as amended, particularly section 176(c) & (d); 40 CFR Parts 6, 51, 93	The project development will implement construction-related air pollution controls, including fugitive dust control and heavy equipment emissions controls. This will be incorporated by ensuring the machinery is in good condition and under a preventive maintenance program. Any air emissions permit from OGPe/DNER that applies to the project will be obtained.
Contamination and Toxic Substances, 24 CFR Part 50.3(i) & 58.5(i)(2)	Removal of Asbestos Containing Materials has the widest applicability. It is also the only truly permanent solution since no building or equipment containing asbestos can be demolished or renovated without first removing the ACM. Any proposed demolition plan will comply with 29 CFR 1926.1101 Construction Industry Standards, National Emissions Standards for Hazardous Air Pollutants (NESHAP) (40 CFR 61), and the DRNA (former Environmental Quality Board) Rule 422 for procedures concerning to asbestos abatement prior to commencement of any renovation and/or demolition activity. A LBP mitigation project shall be done prior to any demolition when lead is present in painted components. The LBP abatement project shall be in accordance with the PRDNER applicable regulations which include accredited personnel, special enclosure/work practices and permits for abatement and waste disposal (or metal recycling as first option). If demolition is not proposed, no further action is required other than compliance with federal and local regulations applicable to child-care facilities. Also applies to comply with proper communication to the maintenance employees and contractors following OSHA “Hazard Communication” to avoid unforeseen damages on the LBP. In compliance with §312.31 (b) of the AAI final rule and §12.8 of the ASTM E1527-21, additional appropriate investigation will be required to confirm the presence of petroleum products and/or

	hazardous substances associated with the Stained Surfaces at the Former Electrical Substation and Electrical Transformers. All of the solid wastes and discarded fluorescent lamps located in the existing buildings need to be properly disposed of. The suspect concrete slab located at Plot C needs to be further investigated to determine if it is associated with an existing or former underground regulated structure, such as a septic tank system.
Endangered Species Act of 1973, particularly section 7; 50 CFR Part 402	If a Puerto Rican Boa is encountered, work will cease until it moves off the site or, failing that, the Puerto Rico Department of Natural and Environmental Resources will be notified for safe capture and relocation of the animal, in accordance with the USFW Puerto Rican Boa Conservation Measures guidelines.
Solid Waste Disposal / Recycling	Solid wastes generated during the construction and operation activities will be properly disposed of at an authorized landfill. Recycling materials recovered from construction debris, where possible, would minimize the generation of solid waste. As required by the construction permit, a development and Implementation of a recycling plan shall be prepared by the construction contractor.
Hazards and Nuisances including Site Safety and Noise	Traffic control signage and adequate fencing around construction areas while construction activities are undertaken would protect the public from hazards and nuisances. Signs will be posted informing the citizens of the construction of the project, and public access will be restricted by security fences. Noise impacts would be addressed by conducting construction and demolition activities in accordance with local noise regulations and proper construction equipment maintenance. Noise disturbance missions from the equipment used would be minimized by restricting the contractor's working hours to daytime hours.
Waste Water / Sanitary Sewers	All wastewater and sanitary sewer work will be done in coordination with the Puerto Rico Aqueduct and Sewer Authority (PRASA).
Water Supply	All work on potable water supply activities will be done in coordination with PRASA.
Public Safety - Police, Fire and Emergency Medical	Emergency services would be notified of traffic control changes ahead of time, and access by emergency vehicles always would be allowed within the work zone.

	During the operation of the site, a SOP shall be developed for employees in order to contact Police, Fire, and Emergency Medical Services as needed.
Local regulatory compliance	The proposed project will comply with all local permits and regulations. The Puerto Rico Department of Housing (PRDOH) and the Municipality of Yabucoa will ensure that all necessary permits are obtained and all local regulations are adhered to. This includes compliance with environmental, zoning, and construction permits as required by local authorities.

Determination:

☒ **Finding of No Significant Impact** [24 CFR 58.40(g)(1); 40 CFR 1508.27]
The project will not result in a significant impact on the quality of the human environment.

☐ **Finding of Significant Impact** [24 CFR 58.40(g)(2); 40 CFR 1508.27]
The project may significantly affect the quality of the human environment.

Community

Demographic Profile of Surrounding Area (1-Mile Radius)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2022 American Community Survey (ACS) 5-year Summary and are accurate to the extent that the facility latitude and longitude listed below are correct. Census boundaries and demographic data for U.S. Territories are based on the "2020 Island Areas Demographic Profiles" from the U.S. Census Bureau. EPA's spatial processing methodology considers the overlap between the selected radii and ACS census block groups in determining the demographics surrounding the facility. For more detail about this methodology, see the DFR Data Dictionary <https://epa.gov/help/reports/dfr-data-dictionary#demographic>.

General Statistics (ACS (American Community Survey))

Subject: **PRIVILEGED AND CONFIDENTIAL**
Phase I Environmental Site Assessment Report
Community Development Block Grant – Disaster Recovery
PRDOH/Municipality of Yabucoa
Agreement No. CDBG-DR: 000378
Plot B [Finca 2122 (Dr. Vilar)]
48 and 49 Luis Muñoz Rivera Street
Pueblo Ward
Yabucoa, Puerto Rico
CES Project No. 24-0002

Dear Mr. Rodriguez:

Caribe Environmental Services (CES) respectfully submits to your attention this Phase I Environmental Site Assessment report of the referenced property. One digital version in PDF format of the report is submitted for your use. These services were conducted in accordance with the scope of work described in our proposal PR24-0129 dated January 14, 2025.

For your information according to the ASTM Standard, this practice does not address whether requirements in addition to all appropriate inquiries have been met in order to qualify for the LLPs. For example, the duties specified in 42 U.S.C. §9607(b)(3)(a) and (b) and cited in Appendix X1 of the ASTM E1527-21 Standard, including the continuing obligation not to impede the integrity and effectiveness of activity and use limitations (AULs), or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations. After acquiring a property, to maintain the liability protections, landowners must comply with "continuing obligations" during their property ownership. We understand that the continuing obligations may include:

- Provide all legally required notices with respect to the discovery or release of a hazardous substance;

PRIVILEGED AND CONFIDENTIAL

- Exercise appropriate care with respect to the hazardous substances by taking reasonable steps to stop or prevent continuing or threatened future releases and exposures, and prevent or limit human and environmental exposure to previous releases;
- Provide full cooperation, assistance, and access to per- sons authorized to conduct response actions or natural resource restoration;
- Comply with land use restrictions and not impede the effectiveness of institutional controls; and
- Comply with information requests and subpoenas.

This is a legal evaluation which is beyond the scope of the Phase I assessment.

We appreciate the opportunity to provide our professional services to you and look forward to our continued working relationship. If you have any questions regarding the enclosed report, please do not hesitate to contact us at your convenience.

Respectfully yours,

CARIBE ENVIRONMENTAL SERVICES

1.0 SUMMARY

Caribe Environmental Services (CES) was retained by ABACUS Architecture, PSC (ABACUS) to conduct a Phase I Environmental Site Assessment (Phase I) of the Plot B [Finca 2122 (Dr. Vilar)] located at the 48 and 49 Luis Muñoz Rivera Street, within the Pueblo Ward of the Yabucoa Municipality in Puerto Rico. Plot B [Finca 2122 (Dr. Vilar)] covers an area of approximately 278.96 square meters (m²) (0.0710 "*cuerdas*") and is improved with an estimated 2,400 square feet (ft²) vacant single-story structure. It is our understanding that Plot B is part of a rehabilitation project that will covert this vacant property into a Social Center of Art and Music. From hereon the Plot B [Finca 2122 (Dr. Vilar)] will be referenced to as the Subject Property.

CES understands that at the time of the site reconnaissance, the land underlying the Subject Property was owned by the Municipality of Yabucoa and the vacant structure was owned by Dr. Ismael Vilar. It is also our understanding that as part of the Community Development Block Grant – Disaster Recovery (CDBG-DR) program requirements, a Phase I was requested to be conducted for Plot B since it will involve the acquisition of the structure. ABACUS requested a Phase I assessment of the Subject Property.

This Phase I was prepared in conformance with the scope and limitations of ASTM E1527-21 standard (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process). According to the Code of Federal Regulations (CFR), Volume 87, No. 240, dated December 15, 2022, US Environmental Protection Agency (EPA)'s final ruling accepts the new ASTM E1527-21 Standard as compliant with the All Appropriate Inquiry (AAI) Rule as set forth in 40 CFR Part 312. The new rule establishes that the ASTM E1527-21 Standard became effective on July 24, 2023, officially recognizing the new standard for Phase I Environmental Site Assessment.

The purpose of the Phase I was to evaluate environmental concerns or issues with respect to the range of contaminants within the scope of the Comprehensive Environmental Response and Liability Act (CERCLA) and petroleum products that maybe associated with the Subject Property, based upon readily available information and site observations. In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a property, the goal of the processes established by this practice is to identify *"Recognized Environmental Conditions (REC)"*, Historic RECs or Controlled RECs associated with the current and historical use of the property.

The term Recognized Environmental Condition (REC) means (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of

hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

The term Controlled Recognized Environmental Condition (CREC) means a Recognized Environmental Condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

The term historical recognized environmental condition (HREC) means a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meets unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

This Phase I may have identified *de minimis* condition. These are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

This Phase I investigation may identify issues of environmental concern not necessarily limited to those environmental issues required to be investigated in the ASTM E1527-21 Standard. Those issues are defined by the Standard as "business environmental risks (BER). BERs are defined by the standard as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated by the ASTM E1527-21 practice.

The scope of work for this study consisted of:

- A visual reconnaissance of the Subject Property and surroundings;
- Telephone interview with Mr. Luis Rivera of the Municipality of Yabucoa, designated owner representative;
- Submittal of User Questionnaire (Appendix X3 of ASTM E1527-21) to Arch. Luis Rodriguez of ABACUS;
- Submittal of request of information letter to the Puerto Rico Department of Natural and Environmental Resources (DNER) Office;

- Review of readily available regulatory and technical information, including a review of geological, hydrogeological and hydrological information to establish environmental receptors at the site and in its vicinity;
- A review of available historical information, including historical aerial photographs, to ascertain historical use of the site and its immediate surroundings;
- A review of available information from public databases, local public offices and environment agencies (as reasonably available within timeframe);
- Preparation of a report outlining the findings and conclusion of the assessment.

A site reconnaissance was conducted by engineer Luis R. Colón Morales on January 28, 2025. During the site reconnaissance, Architect Mara Vázquez, of ABACUS accompanied CES personnel. At the time of CES visit, the Subject Property was observed to consist of a vacant one-story structure observed to be in deteriorating conditions with no specific use.

We note that site conditions and regulatory requirements may change in the future. Therefore, the information included in this report, our findings, or recommendations presented are based upon information readily available and observations made at the time of the Site visit. Sampling and analysis of site, water, air or other materials were not performed as part of the Phase I assessment.

This assessment has revealed ***no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps*** in connection with the Subject Property.

However, the following environmental concerns and/or findings associated with the site which may represent a business environmental risk, as defined by the ASTM Standard were identified:

- **Asbestos Containing Materials (ACM) and Lead Based Paint (LBP)**

  Based upon the year the building was constructed; the presence of ACMs and LBP cannot be discarded. However, to properly assess the presence of ACM and LBP, a survey is needed to be conducted.

Details about the scope, activities, findings and conclusions of this Phase I Environmental Site Assessment are described in the following sections of this Phase I report. This summary is provided for your convenience. It should not be construed as a separate document without reviewing the complete report, including the appendices.

PRIVILEGED AND CONFIDENTIAL

2.0 INTRODUCTION

2.1 PURPOSE

Caribe Environmental Services (CES) was retained by ABACUS Architecture, PSC (ABACUS) to conduct a Phase I Environmental Site Assessment (Phase I) of the Plot B [Finca 2122 (Dr. Vilar)] located at the 48 and 49 Luis Muñoz Rivera Street, within the Pueblo Ward of the Yabucoa Municipality in Puerto Rico. Plot B [Finca 2122 (Dr. Vilar)] covers an area of approximately 278.96 square meters (m^2) (0.0710 "*cuerdas*") and is improved with an estimated 2,400 square feet (ft^2) vacant single-story structure. It is our understanding that Plot B is part of a rehabilitation project that will covert this vacant property into a Social Center of Art and Music. From hereon the Plot B [Finca 2122 (Dr. Vilar)] will be referenced to as the Subject Property.

CES understands that at the time of the site reconnaissance, the land underlying the Subject Property was owned by the Municipality of Yabucoa and the vacant structure was owned by Dr. Ismael Vilar. It is also our understanding that as part of the Community Development Block Grant – Disaster Recovery (CDBG-DR) program requirements, a Phase I was requested to be conducted for Plot B since it will involve the acquisition of the structure. ABACUS requested a Phase I assessment of the Subject Property.

This Phase I was prepared in conformance with the scope and limitations of ASTM E1527-21 standard (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process). According to the Code of Federal Regulations (CFR), Volume 87, No. 240, dated December 15, 2022, US Environmental Protection Agency (EPA)'s final ruling accepts the new ASTM E1527-21 Standard as compliant with the All Appropriate Inquiry (AAI) Rule as set forth in 40 CFR Part 312. The new rule establishes that the ASTM E1527-21 Standard became

effective on July 24, 2023, officially recognizing the new standard for Phase I Environmental Site Assessment.

The purpose of the Phase I was to evaluate environmental concerns or issues with respect to the range of contaminants within the scope of the Comprehensive Environmental Response and Liability Act (CERCLA) and petroleum products that maybe associated with the Subject Property, based upon readily available information and site observations. In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a property, the goal of the processes established by this practice is to identify *"Recognized Environmental Conditions (REC)"*, Historic RECs or Controlled RECs associated with the current and historical use of the property.

The term Recognized Environmental Condition (REC) means (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

The term Controlled Recognized Environmental Condition (CREC) means a Recognized Environmental Condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

The term historical recognized environmental condition (HREC) means a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed

to the satisfaction of the applicable regulatory authority or authorities and meets unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

This Phase I may have identified *de minimis* condition. These are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

This Phase I investigation may identify issues of environmental concern not necessarily limited to those environmental issues required to be investigated in the ASTM E1527-21 Standard. Those issues are defined by the Standard as "business environmental risks (BER). BERs are defined by the standard as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated by the ASTM E1527-21 practice.

2.2 DETAILED SCOPE OF SERVICES

The scope of work for this study consisted of:

- A visual reconnaissance of the Subject Property and surroundings;
- Telephone interview with Mr. Luis Rivera of the Municipality of Yabucoa, designated owner representative;
- Submittal of User Questionnaire (Appendix X3 of ASTM E1527-21) to Arch. Luis Rodriguez of ABACUS;

- Submittal of request of information letter to the Puerto Rico Department of Natural and Environmental Resources (DNER) Office;
- Review of readily available regulatory and technical information, including a review of geological, hydrogeological and hydrological information to establish environmental receptors at the site and in its vicinity;
- A review of available historical information, including historical aerial photographs, to ascertain historical use of the site and its immediate surroundings;
- A review of available information from public databases, local public offices and environment agencies (as reasonably available within timeframe);
- Preparation of a report outlining the findings and conclusion of the assessment.

A site reconnaissance was conducted by engineer Luis R. Colón Morales on January 28, 2025. During the site reconnaissance, Architect Mara Vázquez, of ABACUS accompanied CES personnel. At the time of CES visit, the Subject Property was observed to consist of a vacant one-story structure observed to be in deteriorating conditions with no specific use. The purpose of the field visit was to observe physical conditions of the Site and identify regulated or suspect facilities in the vicinity of the Subject Property.

Copies of historical aerial photographs obtained from the Puerto Rico Highway and Transportation Authority (PRHTA) were reviewed. The purpose of this review was to understand the historical land uses of the Subject Property. Aerial photographs available for the site were obtained for flight dates of January 30, 1937; January 9, 1951; February 11, 1965; March 24, 1977; March 16, 1988; and March 1990. In addition, high-resolution satellite photos were obtained from Google Earth Pro for: June 30, 2002; October 31, 2006; September 6, 2012; May 25, 2017; and May 13, 2024. Aerial photos for the 1940's decades were not available. The following published information (references) was also reviewed to gain an understanding of the site's natural setting:

- *Topographic Map of the Yabucoa Quadrangle by U.S. Geological Survey (2018)*
- *Topographic Map of the Yabucoa Quadrangle by U.S. Geological Survey, (1960) Photorevised 1982.*

The following database of standard environmental record sources prepared obtained from the U.S. Environmental Protection Agency (EPA), DNER or the Solid Waste Management Authority (SWMA) were reviewed to determine if the Subject Property was listed as a regulated facility, and if other potential regulated facilities or hazardous waste sites were located near the Subject Property. In addition, the environmental record sources prepared by Environmental Data Resource (EDR) were reviewed.

Database	**Search Radius**
Federal NPL site list (December 19, 2024)	1-mile
Federal Delisted NPL site list (December 19, 2024)	0.5 -mile
Federal CERCLIS list	
SEMS (dated December 19, 2024)	0.5-mile
Federal CERCLIS NFRAP site list	
SEMS Archived (dated December 19, 2024)	0.5-mile
Federal RCRA TSD Facilities list	
CORRACTS (dated September 16, 2024)	1-mile
Non-CORRACTS (dated September 16, 2024)	0.5 miles
Federal RCRA Generators list (dated September 16, 2024)	Property and adjoining properties
Federal Engineering Control Registries (November 4, 2024)	Property only
Federal Institutional Control Registries (November 4, 2024)	Property only
Federal Emergency Response Notification System (ERNS) list (dated December 3, 2024)	Property only

State UST Registration List (dated January 1, 2008)	Property and adjoining properties
State Leaking USTs List (dated 2024) (https://www.drna.pr.gov/public-record-for-lust-sites/)	0.5 miles
State Landfill and/or Solid Waste Disposal Site Lists (as of July 2012) http://www.ads.pr.gov/	0.5 miles
Federal, State, and tribal Brownfield sites (September 9, 2024)	0.5 miles

The following state and tribal environmental database record sources are recommended to be reviewed by the ASTM Practice E1527-21. However, they were not reviewed because Puerto Rico does not maintain a list (i.e. State NPL list) and/or they are not applicable (i.e. no Indian land is designated in Puerto Rico).

State and tribal lists of *hazardous waste* sites identified for investigation or remediation
State and tribal-equivalent NPL
State and tribal-equivalent CERCLIS
State and tribal institutional Control/Engineering Registries
State and tribal voluntary cleanup sites

In addition, the ASTM Standard suggests reviewing fire insurance maps and city directories. However, these sources are not available for Puerto Rico.

Also, the Environmental Protection Agency (EPA) Facility Registry Service (FRS), to verify if the Subject Property was included in the registry. The FRS is a database maintained by the EPA of facilities, sites or places of environmental interest subject to regulation. It provides quality facility data to support EPA's mission of protecting human health and the environment. The FRS includes facilities listed in databases such as: NPL, Delisted NPL, CERCLIS, CERCLIS NFRAP, RCRA TSD, RCRA Generators, Brownfield, etc.

2.3 SIGNIFICANT ASSUMPTIONS

The Phase I was prepared in conformance with the scope and limitations of ASTM Practice E1527-21. No other significant assumptions were made or taken into consideration during the preparation of this Phase I report.

2.4 LIMITATIONS AND EXCEPTIONS

The opinions included in this report are based upon reasonably ascertainable information obtained during the course of the assessment, site observations, and interviews, and our understanding of applicable environmental regulations. No representations or warranties are made concerning the nature or quality of the air, soil, water, building materials or any other substances on the Property, other than the visual observations as stated in this report. Sites not listed on the reviewed regulatory agencies databases or hidden sources of potential liability cannot be detected by the methods used for the Phase I assessment.

The scope of work for this Phase I meets the requirements of the ASTM E1527-21. The ASTM E1527-21 Section 13.1.5 includes Non-Scope considerations such as; Asbestos-Containing Building Materials (ACM), Biological agents, Cultural and historic resources, Ecological resources, Endangered species, Health and safety, Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, Industrial hygiene, Lead-Based Paint (LBP), Lead in Drinking Water, Mold, Regulatory compliance, and Wetlands, that are not part of the required ASTM Standard scope of work. However, as requested by ABACUS, general observations regarding only one or more of the following non-Scope considerations are included in this Phase I report; ACM, LBP, environmental permitting issues associated only with UST, AST, air emissions, UIC, used oil, bio-medical waste if identified by the environmental professional during the site reconnaissance, mold, and included the identification of the potential

presence of wetlands, if during the site reconnaissance, this was observed by the environmental professional. Also, this Phase I does not include specialized studies such as sampling, ACM-LBP survey, or mold survey, among others.

In addition, the likely presence of per-and polyfluoroalkyl substances, also known as "PFAS", at the Subject Property area was assessed. PFAS are described, in the ASTM E1527-21 Standard, as "Substances Not Defined as Hazardous Substances". These and any other "emerging contaminants," where they are not identified as a hazardous substances by CERCLA, as interpreted by EPA regulations and the courts, are not included in the scope of the ASTM E1527-21 practice. However, on April 10, 2024, EPA announced the final National Primary Drinking Water Regulation (NPDWR) for six PFAS. With this rule, EPA is establishing legally enforceable levels for six PFAS known to occur individually and/or as mixtures in drinking water. EPA established legally enforceable levels, called Maximum Contaminant Levels (MCLs), for six PFAS in drinking water: perflouorooctanoic acid (PFOA), perfluorooctane sulfonate (PFOS), Perfluorohexanesulfonic acid (PFHxS), Perfluorononanoic acid (PFNA), and Hexafluoropropylene oxide-dimer acid (HFPO-DA) as contaminants with individual MCLs, and PFAS mixtures containing at least two or more of PFHxS, PFNA, HFPO-DA, and Perfluorobutanesulfonic acid (PFBS) using a Hazard Index MCL to account for the combined and co-occurring levels of these PFAS in drinking water. EPA also finalized health-based, non-enforceable Maximum Contaminant Level Goals (MCLGs) for these PFAS. We note that presently Puerto Rico does not have any regulations or guidance related to the impacts of PFAS or assessment requirements for PFAS. However, the Federal EPA PFAS regulations apply to Puerto Rico.

If additional information that might impact our conclusions becomes available, we reserve the right to review the information, reassess the potential concerns, and modify our opinions, if warranted.

PRIVILEGED AND CONFIDENTIAL

In the preparation of this report, CES has relied upon documents and information provided by ABACUS and the property owner. In addition, CES has relied upon a computer search of government databases provided by EDR and the EPA FRS. Except as discussed in the report, CES did not attempt to independently verify the accuracy or completeness of that data but did not detect inconsistencies or omissions of a nature that might question the validity of the information. We note that the accuracy of the information provided in the databases is not warranted by EDR online services because these are controlled by the regulatory agencies.

CES understands that the data obtained from these databases are the most current data available. To the extent that the conclusions in this report are based in whole or in part on such information, they are contingent on its validity. CES assumes no responsibility for any consequence arising from any information or condition that was concealed, withheld, misrepresented or otherwise not fully disclosed or available to us.

The Phase I report may include observations and/or comments regarding possible issues of environmental compliance identified at the Subject Property. The inclusion of such information must not be interpreted as representative or indicative of the environmental compliance status of the facility. This Phase I investigation must not be construed as an environmental compliance or environmental audit investigation for the Site.

We note that Site conditions and regulatory requirements may change in the future. Therefore, the information included in this report, our findings, or recommendations presented are based upon information readily available and observations made at the time of the site visit.

We note that any property boundary, feature location, or measurements included in this report are approximate, for illustration purposes only, and other than for the ease of use of this report, these shall not be used. Any property boundary, feature location, or measurement included in this report

must not be assumed to be or interpreted as a certified building covering area, a survey foot-print area, or a certified property limit.

Although this assessment has attempted to identify potential for environmental impairment to the Subject Property, potential sources of contamination may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, and/or (5) deliberate concealment of detrimental information. It was not the purpose of this study to determine the actual presence, degree, or extent of contamination, if any, at the Site. This could require additional exploratory work, including sampling and laboratory analysis. Also, other than a general opinion and observation during the site reconnaissance, it was not the purpose of this study to provide asbestos and/or lead-based paint materials services.

For the purposes of this report, "migrate" and "migration" refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Therefore, this report may include an opinion or assessment of RECs associated to hazardous substances or petroleum products vapor migration issue with respect to the Subject Property. The ASTM E2600 Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions may have been used during this report only as a reference. However, it is not the intent of this study to conduct a Vapor Encroachment Screening study or to identify a Vapor Encroachment Condition, since that study was not part of the Phase I scope of work.

We note that a finding of no recognized environmental condition is not a warranty or guarantee that the property remains free from contamination. No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the Property. Performance of this practice is intended to reduce, but not to

eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the Property.

This assessment has been undertaken and performed in a professional manner, in accordance with generally accepted practices, using the degree of skill and care ordinarily exercised by reputable environmental consultants under similar circumstances. No other warranty, expressed or implied is made.

An environmental site assessment meeting or exceeding this practice and for which the information was collected or updated within *1 year* prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction may be used provided that the following components of the inquiries were conducted or updated within *180 days* of the date of purchase or the date of the intended transaction: 1) interviews with owners, operators, and occupants; 2) searches for recorded environmental cleanup liens; 3) reviews of federal, tribal, state, and local government records; 4) visual inspections of the property and of adjoining properties; and 5) the declaration by the environmental professional responsible for the assessment or update.

2.5 USER RELIANCE

This report was prepared at the request and for the exclusive use of ABACUS Architecture, PSC, its agents, advisors, and legal representatives. No other party is entitled to rely on the conclusions, observations, specifications, or data contained herein without the express written consent of CES. It should be emphasized that because conditions at the Subject Property can change over time, the use of this report by unauthorized third parties without written authorization from CES shall be at their own risk.

2.6 REPORT VIABILITY

This Phase I report is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the Subject Property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction).

The dates of the components included in this Phase I report are as follows:

Component	Date Conducted	Expiration Date
Interviews with Owner (land)	January 28, 2025	July 27, 2025
Interviews with Owner (structure)	Not Available	Not Available
Review of government records	February 20, 2025	August 19, 2025
Visual inspections	January 28, 2025	July 27, 2025
Environmental Professional Declaration	March 31, 2025	September 27, 2025

PRIVILEGED AND CONFIDENTIAL

3.0 SITE DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

The Subject Property is located at the 48 and 49 Luis Muñoz Rivera Street, within the Pueblo Ward of the Yabucoa Municipality in Puerto Rico. A Site Vicinity Map is provided in ***Appendix 1***. A Site Aerial Photograph, showing the Site's features, general settings, and surroundings is provided in ***Appendix 2***. The project site boundaries included in ***Appendix 2*** are approximate based upon the information provided to CES. ***Appendix 3*** presents general photographs of the site as observed during the site reconnaissance. The approximate coordinates of the center portion of the Subject Property are: 18°03'2.98"N; 65°52'45.11"W.

A title study prepared by Luis Angel Ortiz Carrasquillo; Abogado-Notario dated October 11, 2023 was provided for our review. The legal description as included in the title study is as follows:

> *"Urbana: Casa de mampostería radicada en solar del municipio en la calle del comercio hoy Muñoz Rivera del pueblo de Yabucoa marcado con el número 75 con martillo. Está destinada a tienda y mide el solar 45 y medio pies de frente por 66 pies de fondo y la casa mide en su cuerpo principal 45 y medio pies de frente por 38 pies de fondo y el martillo mide 24 pies de frente por 11 pies de fondo y colinda todo por la derecha entrando con casa de Méndez, Hermanos y Compañía, hoy Martínez Fernández y Compañía Sociedad en Comandita; por la izquierda con otra casa de María Rodríguez, hoy Jose M. Méndez, por el fondo con la calle del Hueso y por el frente con la Calle Comercio hoy calle Muñoz Rivera, según surge de la inscripción 4."*

A copy of the Title Survey and land survey provided to us is included in ***Appendix 4***. This Phase I is limited only to Plot B.

3.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The Subject Property consists of a lot improved with a vacant concrete one-story structure with an estimated gross building area of about 2,400 ft². The structure was observed in deteriorating conditions. The Subject Property appears to have been connected to the electric power utility grid operated by LUMA, and the potable water system and sanitary sewer system owned by PRASA. However, due to the observed deteriorated conditions, it is expected that none of the utilities may be functional. The Subject Property was not observed to have liquified petroleum gas (LPG) lines within its limits.

The Subject Property's grading is relatively flat. Photographs of the Subject Property and vicinity areas are included in ***Appendix 3***. As appropriate, selected site photographs are illustrated for orientation purposes only in ***Appendix 2.*** General views of the Subject Property and surroundings are shown in ***Photographs 1*** through ***10***.

3.3 CURRENT USE OF THE PROPERTY

The Subject Property is presently vacant and has no specific use.

3.4 DESCRIPTION OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SITE

A summary of the main structures and improvements observed at the Subject Property was included in *Section 3.2* above.

3.5 CURRENT USE OF ADJOINING PROPERTIES

The following are the properties adjoining the Subject Property and their respective uses.

North: Residential Properties
West: Vacant Mix-Use Property
East: Vacant Commercial Property (former supermarket)
South: Muñoz Rivera Street and Parroquia Santos Ángeles Custodios

During our site reconnaissance, a visual inspection of the adjoining properties from the Subject Property's property limits was conducted. Based upon our site observations *no* evident accumulations, releases, threat of releases of hazardous or petroleum products were observed at the adjoining properties boundaries that could represent an environmental concern for the Subject Property.

PRIVILEGED AND CONFIDENTIAL

4.0 USER-PROVIDED INFORMATION

4.1 TITLE RECORDS

A title study of the Subject Property prepared by Luis Angel Ortiz Carrasquillo; Abogado-Notario dated October 11, 2023 was provided for our review. This title study does not indicate any environmental liens, environmental limitations, or concerns with respect to the Subject Property. A legal description of the Subject Property, as included in the title study, is presented in *Section 3.1* of this report.

4.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATION

In Puerto Rico claims against the title of the property and property restrictions including environmental liens and Activity And Use limitations are available from the Property Registrar's office part of the Puerto Rico Department of Justice. As part of the *User's Responsibilities*, ABACUS as the user must inform CES if environmental liens/AULs exists at the Subject Property.

CES does not need to review, assess, or otherwise evaluate the land title records or the user's conclusions as to whether AULs or environmental liens were identified. The environmental professional only needs to identify whether they received land title records from the user and whether the user identified AULs or environmental liens.

ABACUS as the user did not report to us any environmental liens or Activity and Use Limitations (AULs) associated with the Subject Property. In addition, ABACUS in their response to the User Questionnaire indicated that they are *unaware* of any environmental cleanup liens against the Subject Property.

4.3 SPECIALIZED KNOWLEDGE

According to information provided by ABACUS in their response to the User Questionnaire, ABACUS does *not* have specialized knowledge information related to conditions, events, and/or activities at the Subject Property that could constitute environmental concerns or issues to the Subject Property.

4.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Based upon information provided by ABACUS in their response to the User Questionnaire, ABACUS is *not* aware of any commonly known or reasonably ascertainable information about the Property that is material to recognized environmental conditions in connection with the Property.

4.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

According to information provided by ABACUS in their response to the User Questionnaire, ABACUS is *not* aware of any environmental issues that would affect the present value of the property.

4.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

- Owner of Subject Property — Municipio de Yabucoa
P.O. Box 97
Yabucoa, P.R. 00767-0097
- Owner of Building — Dr. Ismael Vilar Porrata
CALLE MUÑOZ RIVERA
Yabucoa, P.R. 00767-0097

- Occupant Information: Vacant
- Property Manager: Same as owner

4.7 REASON FOR PERFORMING PHASE I

According to information provided to CES, this Phase I was performed as part of the CDBG-DR program environmental requirements.

This practice is intended to permit a user to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bonafide prospective purchaser* limitations on CERCLA liability (*land owner liability protection of LLPs*): that is, the practice constitutes all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial and customary practice, as defined by 42 U.S.C.§9601(35)(B).

4.8 OTHER INFORMATION

Other than the documents and information discussed in this report, no additional user information was provided to CES by the user during the preparation of this Phase I.

PRIVILEGED AND CONFIDENTIAL

5.0 RECORDS REVIEW

5.1 STANDARD ENVIRONMENTAL RECORD SOURCES

CES reviewed Federal and Commonwealth environmental regulatory agency lists, prepared by EDR and/or provided by the EPA, DNER, and Solid Waste Management Agency (SWMA). A copy of the EDR report and databases obtained are included in ***Appendix 5*** of this Phase I report. In addition, FRS database reviewed for this report is included in ***Appendix 6.*** These databases include other facilities that are outside the ASTM E1527-21 required database search radius. Therefore, only those facilities that are within the required database search radius are evaluated in this Phase I report.

The information obtained during our site visit, and published information were reviewed and evaluated in relation to principal environmental regulations that may expose site owners and/or operators to potential liabilities. Our regulatory review findings are presented in the following subsections of this report.

5.1.1 Resource Conservation & Recovery Information System (RCRIS)

Hazardous solid wastes are regulated by the Puerto Rico Regulation for the Control of Hazardous Wastes, as well as by the Federal Resource Conservation and Recovery Act (RCRA), Subtitle C. RCRA regulates the management of hazardous wastes including its generation, transportation, and treatment/storage/disposal (T/S/D). The US Environmental Protection Agency (EPA) catalogs and compiles lists of facilities that are regulated under the RCRA Subtitle C and makes these available through the RCRA Information System (RCRIS).

A review of the RCRIS database indicated the following:

- According to the reviewed databases, the Subject Property is *not* listed as a RCRA generator.
- According to the reviewed databases, there are *no* adjoining facilities listed as a RCRA generator.
- There are *no* facilities located within a *one-mile radius* of the Subject Property listed as Corrective Action (CORRACT) TSD facilities.
- There are *no* facilities located within *one half-mile radius* of the Subject Property listed as Non-CORRACTS TSD facilities.

5.1.2 Superfund Enterprise Management System (SEMS)

The Superfund Enterprise Management System (SEMS) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

The Superfund Enterprise Management System (SEMS-ARCHIVE) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps

will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the Federal Facility and SEMS database revealed the following:

- The Subject Property is *not* listed as a FEDERAL FACILITY or SEMS site.
- There are *no* facilities listed as SEMS sites *within a one-half mile radius* of the Subject Property.
- There are *no* facilities listed as FEDERAL FACILITY sites *within a one-half mile radius* of the Subject Property.
- There are *no* facilities listed as a SEMS-ARCHIVE sites located *within a one-half mile radius* of the Subject Property.

5.1.3 National Priorities List (NPL)

CERCLA established the NPL or federal superfund sites list**.** These are contaminated facilities to which the EPA has assigned a high ranking in terms of their potential health effects. The CERCLIS database also includes NPL sites. A review of the CERCLIS database indicated the following:

- The Subject Property is *not* on the NPL.
- There are *no* NPL sites located within a *one-mile radius* of the Subject Property.
- There are *no* delisted NPL sites located within a *one-half-mile radius* of the Subject Property.

5.1.4 Emergency Response Notification System (ERNS)

The ERNS is a list of hazardous material spills reported to various state and federal agencies. Our review of the ERNS report found that the Subject Property is *not* listed in the ERNS.

5.1.5 Petroleum Underground Storage Tanks (USTs) List

Petroleum USTs are subject to regulation under RCRA Subtitle I, which is administered by the DNER. CES utilizes EDR as an environmental database. EDR in turn obtains USTs and LUSTs information from the Puerto Rico Department of Natural and Environmental Resources (DNER) UST Program Inventory. CES reviewed the EDR database as well as the DNER USTs/LUSTs inventory, including the Puerto Rico Planning Board webpage (http://gis.jp.pr.gov/itr/http://jcagnet.jp.pr.gov/) which provides spatial coordinates for UST and LUST facilities.

A review of the DNER UST Registration List indicated the following:

- The Subject Property is *not* listed as a UST facility.
- There are *no* UST adjoining facilities listed as a UST facility.

The identification of the USTs facilities was based on the addresses included in the DNER UST List and our understanding of the general site area. USTs facilities that were listed with an incorrect or incomplete address might have not been able to be properly located.

5.1.6 Leaking Underground Storage Tanks (LUSTs) List

The DNER LUST list identifies known releases and other information (i.e. closure report submittals, performance of integrity tests, etc.) by facility. CES utilizes EDR as an environmental database. EDR in turn obtains USTs and LUSTs information from the Puerto Rico Department of Natural and Environmental Resources (DNER) UST Program Inventory. CES reviewed the EDR database as well as the latest DNER LUSTs inventory (https://www.drna.pr.gov/public-record-for-lust-sites/) which includes the LUST facilities.

A review of the DNER LUST list revealed that:

- The subject property is *not* listed in the LUST list.
- The following LUST facilities are *listed* within a *one-half mile radius* of the Subject Property:

  - Esso CO-266 with DNER ID. 86-1367 located at Calle Cristobal Colón 65 at approximately 0.25 miles to the south of the Subject Property. This facility has not been released by the DNER.

  - Texaco #264 with DNER ID. 86-1722 located at Carr 182 Salida San Lorenzo at approximately 0.23 miles to the west of the Subject Property. This facility has not been released by the DNER.

  - Independiente/Gulf with DNER ID. 86-0381 located at Carr. 901 Km. 0.5 at approximately 0.50 miles to the southeast of the Subject Property. This facility has not been released by the DNER.

The identification of the LUSTs facilities was based on the addresses included in the DNER LUST List and our understanding of the general site area. LUSTs facilities that were listed with an incorrect or incomplete address might have not been able to be properly located.

5.1.7 Solid Waste Landfills

The PRSWMA has compiled a list of known active landfills on the island. Based upon this list and our site visit observations:

- There are *no* registered state landfill and/or solid waste disposal sites located *within a one half-mile radius* of the Site.
- *No* obvious signs of present landfill activity were observed at the Subject Property.

5.1.8 Federal, State, and Tribal Institutional Control/Engineering Control Registries

The Federal, State and Tribal Institutional Control/Engineering Control Registries (ICECR) are registries of sites or facilities listed as having legal or physical restrictions or limitations on the use of, or access to the site or facility: (1) to reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil or ground water on the *property*, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to *hazardous substances* and *petroleum products* in the soil or groundwater on the property.

Our review of the EDR report indicates that at the time of the preparation of this report, the site was *not* listed in the Federal, State, and Tribal Institutional Control/Engineering Control Registries.

5.1.9 Facility Index System

The Facility Index System (FINDS) contains both facility information and '*pointers*' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Our review of the FINDS list indicates that the Subject Property *is not* listed in the FINDS.

5.1.10 Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program. However, ICIS is a secure system only available to EPA and state users. The public should use the Enforcement and Compliance History Online (ECHO). ECHO is a Web-based tool that provides public users with compliance monitoring and enforcement data.

Our review of the ICIS/ECHO, indicates that at the time of the preparation of this report, the Subject Property was *not* listed in ECHO database.

5.1.11 Federal, State and Tribal Brownfield Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on Brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions.

Our review of the US Brownfields sites database indicates that:

- The Subject Property is *not* listed in this database.
- There are *no* facilities listed as Brownfield sites located within *one-half mile radius* of the Subject Property.

5.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

As required by the ASTM E1527-21 Standard if the property or any of the adjoining properties is identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing should be reviewed. The Subject Property is not listed in the reviewee data resources. To further investigate the potential listing of the Subject Property and adjoining properties, CES reviewed the information included in the EPA FRS.

Our review of this information is presented in the following sections.

5.2.1 EPA Facility Registry Service (FRS)

The EPA Facility Registry Service allows citizens to retrieve a list of facilities registered with EPA, by conducting a database search with user defined search criteria. EPA FRS is part of the EPA EnviroFacts database system, which is a single point of access to select U.S. EPA environmental data. The website provides access to several EPA databases to provide with information about environmental activities that may affect air, water, and land anywhere in the United States.

Our review of the EPA FRS report found that the Subject Property is *not* listed in the FRS.

5.3 PHYSICAL SETTING SOURCES

Physical setting sources provide information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of a site.

5.3.1 USGS Topographic Map

According to the Topographic Map of the Yabucoa and Punta Tuna Quadrangles, the elevation at the Subject Property is approximately 20 meters above mean sea level (MSL). Presently, the Subject Property is developed and the topography is relatively flat with sloping terrain towards the north. The closest surface water body to the Subject Property is Caño de Santiago located approximately 230 feet to the north of the Subject Property.

5.3.2 USGS Geologic Map

According to the Geologic Map of the Yabucoa and Punta Tuna Quadrangles, the Subject Property consists entirely of Tonalite Facies of Granodiorite of San Lorenzo {Upper Cretaceous} (Klt) which is composed of plagioclase, potassium feldspar, quartz, hornblende, augite, biotite, magnetite, minor myrmekite, and accessory sphene, apatite, and zircon. (Roger, Cram, Pease, and Tischler, 1979).

5.3.3 USDA NRCS Soil Survey

According to the *Soil Survey of the Humacao Area, Puerto Rico Eastern Part,* the Subject Property soils are classified as Urban land (Ul). Urban land are miscellaneous areas.

5.3.4 USGS Atlas of Ground-Water Resources and Aquifer Systems

According to the Atlas of Ground-Water Resources in Puerto Rico and the US Virgin Islands, groundwater in the alluvial aquifers flows east in the Humacao-Naguabo and Yabucoa basins, and southeast in the Maunabo basin, towards the coast. Ground water may flow toward or away from streams, depending on the hydraulic gradient between the stream and the adjacent aquifer. Rivers

in the Yabucoa and Maunabo alluvial valleys drain the alluvial aquifer. Discharge from the alluvial aquifers into the streams represent 27 to 50 percent of the annual river flow in Yabucoa and Maunabo basins, respectively.

According to "Principal aquifers of Puerto Rico and the U.S. Virgin Islands" by Robert A. Renken, January 11, 1998, U.S. Geological Survey, the Subject Property is located overlying Volcaniclastic-, igneous-, and sedimentary-rock aquifers.

The groundwater depth and flow direction were not measured during this assessment. However, based upon the expected hydrogeological setting of the area the groundwater is inferred to flow towards the north towards the Caño Santiago.

The depth and gradient of the water table likely vary seasonally with changes in precipitation and may change significantly over time in response to development, including impervious surfaces, storm water controls, and pumping wells (domestic, industrial or irrigation). Based upon our experience during other groundwater investigations conducted at similar areas in Puerto Rico, it is not uncommon to encounter perched or local groundwater conditions in which the groundwater flow direction may be different from the expected and regional groundwater flow direction.

5.3.5 Flooding Conditions

According to the *Flood Insurance Rate Map*, Panel 1795 of 2160 (Map Numbers 72000C1795J) dated April 13, 2018, the Subject Property is located outside the 1% (100-year) and 0.2% (500-year) annual flood chance boundaries.

5.3.6 Wetlands

Section 404 of the Clean Water Act (CWA) establishes a program to regulate the discharge of dredged or fill material into waters of the United States, including wetlands. Activities in waters of the United States regulated under this program include filling for development, water resource projects (such as dams and levees), infrastructure development (such as highways and airports), and mining projects. Section 404 requires a permit before dredged or fill material may be discharged into waters of the United States unless the activity is exempt from Section 404 regulation (e.g. certain farming and forestry activities).

To verify if the proposed project area, may be located within regulated wetlands, CES evaluated the National Wetlands Inventory (NWI) established by the US Fish and Wildlife Service (FWS). The NWI was developed to conduct a nationwide inventory of U.S. wetlands to provide biologists and others with information on the distribution and type of wetlands to aid in conservation efforts. To do this, the NWI developed a wetland classification system (Cowardin et al. 1979) that is now the official FWS wetland classification system and the Federal standard for wetland classification (adopted by the Federal Geographic Data Committee on July 29, 1996: 61 Federal Register 39465).

The NWI also developed techniques for mapping and recording the inventory findings. The NWI relies on trained image analysts to identify and classify wetlands and deep-water habitats from aerial imagery. As computerized mapping and geospatial technology evolved, NWI discontinued production of paper maps in favor of distributing data via online "mapping tools" where information can be viewed and downloaded. Today, FWS serves its data via an on-line data discovery "Wetlands Mapper". GIS users can access wetlands data through an online wetland mapping service or download data for various applications (maps, data analyses, and reports).

According to the US Fish and Wildlife Services national wetland inventory map, no wetlands are identified at the Subject Property. During our site reconnaissance we did not identify any wetland type vegetation in the Subject Property.

5.4 HISTORICAL USE INFORMATION ON THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

This report describes, to the extent possible, all identified uses, and justifies the earliest date identified for the subject property's first developed use, or back to 1940, whichever is earlier (for example, records showed no development of the subject property prior to the specific date).

According to the ASTM Standard, the following standard historical resources shall be reviewed if, based on the judgment of the environmental professional, they are reasonably ascertainable, likely to be useful, and applicable to the subject property: (1) aerial photographs, (2) fire insurance maps, (3) local street directories, and (4) historical topographic maps. In cases in which any of the preceding four standard historical resources are not reviewed, the environmental professional shall indicate in the report why such a review was not conducted.

In addition, the Property Tax Files obtained from Centro de Recaudaciones de Ingresos Municipales (CRIM) database, https://catastro.crimpr.net/cdprpc/, and use permits and Zoning/Land Use Records obtained from the Puerto Rico Planning Board online database (http://gis.jp.pr.gov/itr/), were review (if available).

According to the Sanborn Fire Insurance Maps Online Checklist published by the Sanborn Map Company, the maps are based upon the Library's 1981 publication Fire Insurance Maps in the Library of Congress. The online presentation includes entries from all 50 United States, as well as Canada, Mexico, Cuba sugar warehouses, and U.S. whiskey warehouses. However, Puerto Rico is

not included in this database. Therefore, the review of Sanborn fire insurance maps was considered not reasonably ascertainable and was not included as part of this Phase I.

According to the Library of the U.S. Congress (https://www.loc.gov/rr/genealogy/bib_guid/telephon.html), there are no current city directories for many major U.S. cities. It is our experience that there is no local street directories centralized digital record for Puerto Rico. Therefore, the review of city directories was considered not reasonably ascertainable and was not included as part of this Phase I.

5.4.1 Historical Aerial Photographs

In the 1937 photograph, the Subject Property and surrounding areas were already developed as part of the Yabucoa town core. A small square shaped building is observed located on the Subject Property. No details of the specific use that was given to the Subject Property at this time was available during the preparation of this Phase I. However, based on our experience with other similar facilities located at this time in other municipality town cores in Puerto Rico, it may have been used for residential and/or as a retail business. The Yabucoa Town core public square and catholic church are observed to the south of the Subject Property. The Luis Muñoz Rivera Street is also observed to the south of the Subject Property.

In the *1951 photograph*, the Subject Property and adjoining properties' conditions are similar to those observed in the 1937. No details of the specific use that was given to the Subject Property at this time was available during the preparation of this Phase I. However, based on our experience with other similar facilities located at this time in other municipality town cores in Puerto Rico, it may have been used for residential and/or as a retail business.

In the *1965 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in 1951. No details of the specific use that was given to the Subject Property at this time was available during the preparation of this Phase I. However, based on our experience with other similar facilities located at this time in other municipality town cores in Puerto Rico, it may have been used for residential and/or as a retail business.

In the *1977 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in 1965. No details of the specific use that was given to the Subject Property at this time was available during the preparation of this Phase I. However, based on our experience with other similar facilities located at this time in other municipality town cores in Puerto Rico, it may have been used for residential and/or as a retail business.

In the *1988 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in the 1977. Based on the information obtained from the owner's representative, at this time it is likely the Subject Property was used as a retail store.

In the *1990 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in 1988. Based on the information obtained from the owner's representative, at this time it is likely the Subject Property was used as a retail store.

In the *2002 Google Earth*® aerial photograph, the Subject Property and adjoining properties' conditions are similar to those observed in 1990. Based on the information obtained from the owner's representative, at this time it is likely the Subject Property was used as a retail store.

In the *2006 Google Earth*® aerial photograph, the Subject Property and adjoining properties' conditions are similar to those observed in 2002. Based on the information obtained from the owner's representative, at this time it is likely the Subject Property was used as a retail store.

The 2012 *Google Earth*® aerial photograph indicates that site conditions and surroundings are similar to those observed in the 2006 photograph. Based on the information obtained from the owner's representative, at this time it is likely the Subject Property was used as a retail store.

The 2017 *Google Earth*® aerial photograph indicates that site conditions and surroundings are similar to those observed in the 2012 photograph. Based on the information obtained from the owner's representative, at this time it is likely the Subject Property was vacant.

In the *2024 Google Earth*® aerial photograph site and surrounding conditions are similar to those observed at the time of the site visit.

5.4.2 Historical USGS Topographic Maps

In the 1946 *Topographic Map* a small structure is shown at the Subject Property. The Subject Property is illustrated as an urban area which is part of the Yabucoa town core.

In the 1960 (rev 1982) *Topographic Map,* a small structure is shown at the Subject Property. The Subject Property is illustrated as an urban area which is part of the Yabucoa town core.

In the 2018 *Topographic Map,* a small structure is shown at the Subject Property. The Subject Property is illustrated as an urban area which is part of the Yabucoa town core.

5.4.3 Puerto Rico Planning Board Listed Uses and Permits

According to the Puerto Rico Planning Board online database **(**http://gis.jp.pr.gov/itr/), the following uses and permits are listed for the Subject Property and adjoining properties:

Property	Listed Permits Description
Subject Property	• VENTA DE PRODUCTOS DE BELLEZA Y SALON DE BELLEZA. • VENTA DE CARTERAS, ZAPATOS Y ACCESORIOS • HEAD START • BARBERIA • OFICINA PROGRAMA DE VISTA • ALMACEN SUPERMERCADO-CARNICERIA CON VENTA DE BEBIDAS ALCOHOLICAS SELLADAS • SUPERMERCADO CON VENTA DE BEBIDAS ALCOHOLICAS SELLADAS CARNICERIA Y VENTAS AL POR MAYOR DE PROVISION... • ESTABLECIMIENTO PARA VENTA DE TELAS Y ACCESORIOS DE COSTURAS
Adjoining Property North	• Not Available (various residential properties)
Adjoining Property South	• (PARROQUIA SANTOS ANGELES CUSTODIOS)
Adjoining Property East	• VENTA DE PRODUCTOS DE BELLEZA Y SALON DE BELLEZA. • VENTA DE CARTERAS, ZAPATOS Y ACCESORIOS • HEAD START • BARBERIA • OFICINA PROGRAMA DE VISTA • ALMACEN SUPERMERCADO-CARNICERIA CON VENTA DE BEBIDAS ALCOHOLICAS SELLADAS • SUPERMERCADO CON VENTA DE BEBIDAS ALCOHOLICAS SELLADAS CARNICERIA Y VENTAS AL POR MAYOR DE PROVISION... • ESTABLECIMIENTO PARA VENTA DE TELAS Y ACCESORIOS DE COSTURAS
Adjoining Property West	• BARBERIA

5.4.4 Puerto Rico Property Municipal Tax Files

According to the CRIM database, https://catastro.crimpr.net/cdprpc/, the Subject Property and adjoining properties' cadastral identification numbers are:

Cadastral Identification	Owner	Previous Owner	Transaction Date
376-040-013-10-002 (Subject Property)	VILAR PORRATA ISMAEL DR	No Information Available	No Information Available
Various (North Adjoining Property)	Residential Properties	Residential Properties	Residential Properties
376-040-013-10-001 (East Adjoining Property)	MARTINEZ FERNANDEZ Y CO	No Information Available	No Information Available
376-040-017-07-000 (South Adjoining Property)	IGLESIA CATOLICA SANTOS ANGELES CUSTODIO	IGLESIA CATOLICA	12/16/2015
376-040-013-11-001 (West Adjoining Property)	MUNICIPIO DE YABUCOA	MENDEZ CALDERON RAFA	1/29/2019

5.4.5 Land Use

According to the Puerto Rico Planning Board Zone Maps, the Subject Property is classified C-I: (Comercial Intermedio).

5.4.6 Historic Profile Interview

Interviews with one or more persons knowledgeable about the past uses of the Subject Property, Adjoining Properties, or the surrounding area may provide information about the past uses of the subject property and adjoining properties.

During the preparation of this report, Mr. Luis Rivera of the Municipality of Yabucoa who has known the project area and surroundings for more than 40 years was interviewed as the owner's representative. According to the information provided by Mr. Rivera, the Subject Property was previously used as retail stores and other offices.

5.4.7 Historical Uses Summary

In summary, the historical records available to CES indicate that the Subject Property has been used as retail stores and other offices purposes for many years. From the information provided by the owner representatives, no environmental sensitive operations such as gasoline stations, industrial manufacturing, or dry-cleaning activities have been conducted at the Subject Property.

We note that although there are gaps of greater than 5 years in the historical review of the Subject Property, during those gaps the subject property appears unchanged. Therefore, we understand that this gap *should not* represent a significant concern or gap for the Subject Property.

5.5 FIRE DEPARTMENT FILES REVIEW

In Puerto Rico, the DNER is the state agency that holds records regarding fuel tanks, hazardous materials, incidents, spills, violations or petroleum/chemical releases that can represent potential environmental concerns. Other departments, such as the Fire and Police departments, Planning Department and others typically do not contain information that are associated with environmental concerns that could be of use for the preparation of the Phase I report. According to the *Cuerpo de Bomberos de PR* (PR Fire Department) this agency does not maintain a digital record of environmental emergencies for individual facilities. They maintain a record of emergencies and activities that they conduct based on the date of occurrence of the incident. They do not keep records that would make reference to the location of the properties or the geographic area where the properties are located. Therefore, for purpose of the preparation of this Phase I such records are considered not practically reviewable.

PRIVILEGED AND CONFIDENTIAL

6.0 SITE RECONNAISSANCE

6.1 METHODOLOGY AND LIMITING CONDITIONS

A visual reconnaissance of the Subject Property and surrounding areas was performed by engineer Luis R. Colón Morales of CES on January 28, 2025. CES observed accessible areas of the Subject Property to assess obvious visual indications of present or past activities or conditions that have or could have impacted the Subject Property.

The method used to observe the Subject Property consisted of walking along property perimeter boundaries and within the property limits. The site visit included the following visual inspections: the Subject Property by walking transects; the exterior perimeter of the property; the building interior. Site settings and conditions were documented with photographs as appropriate.

Site settings and conditions were documented with photographs as appropriate.

6.2 GENERAL SITE SETTING

At the time of CES visit, the Subject Property was observed to consist of a vacant one-story structure. Additional information and description of the Site's setting, characteristics, uses, and improvements are included in *Section 3.2* of this report. A Site Sketch, showing the Site's features, general settings, and surroundings are provided in ***Appendix 2***.

6.3 EXTERIOR AND INTERIOR OBSERVATIONS

The following sections describe observations made by CES personnel during the Site reconnaissance.

6.3.1 Potable Water, Wastewater, and Stormwater

At the time of the site reconnaissance, the Subject Property was observed to have potable water and wastewater infrastructure installed. Based on our observations and the information provided by the municipality's representative, the potable water is supplied to the Subject Property by the Puerto Rico Aqueduct and Sewer Authority (PRASA) potable water distribution system.

Based on the information provided by the municipality's representative, the wastewater previously generated included wastewater from the bathroom inside the building. Reportedly, the wastewater were discharged into the PRASA sanitary sewer system.

No signs of stains or releases were observed along the stormwater flow paths and drains.

6.3.2 Toxic Substances

6.3.2.1 Polychlorinated Biphenyl's

Prior to the 1979, PCBs entered the environment during their manufacture and use in the United States. Today PCBs can still be released into the environment from poorly maintained hazardous waste sites that contain PCBs, illegal or improper dumping of PCB wastes, leaks or releases from electrical transformers and hydraulic equipment containing PCBs and hydraulic equipment, and disposal of PCB-containing consumer products into municipal or other landfills not designed to handle hazardous waste. PCBs may also be released into the environment by the burning of some wastes in municipal and industrial incinerators.

At the time of our site reconnaissance, no suspect PCBs containing equipment was observed installed at the Subject Property.

6.3.2.2 Asbestos Containing Materials (ACM)

Building construction materials such as vinyl floor tiles (VFTs), acoustic ceiling tiles (ACTs), thermal system insulation (TSI), sprayed-on ceiling material, roofing material and others are known to have been manufactured with asbestos in the past. The scope of work of this Phase I was limited to visual observations of accessible areas and did not include the collection and laboratory analysis of bulk samples of suspect ACMs. Suspect ACMs may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, interior of machinery or equipment, and water or sewer systems.

Based upon the year the building was constructed; the presence of ACMs cannot be discarded. ACTs were observed inside the building (***Photographs 3, 6,*** and ***7***). However, to determine the presence of ACMs in the Subject Property, an ACM survey would be required.

6.3.2.3 Lead Based Paint (LBP)

Buildings constructed before 1978, are known to have been painted with lead-based paint. Lead from paint, chips, and dust can pose serious health hazards if not taken care of properly. Based upon the year the building was constructed; the presence of LBP cannot be discarded. However, to determine the presence of LBP in the Subject Property, a LBP survey would be required.

6.3.3 Non-Hazardous Solid Wastes

At the time of our site reconnaissance, no solid wastes were observed generated at the Subject Property. Minor accumulation of discarded materials was observed inside the building (***Photographs 3*** and ***4***).

6.3.4 Used Oil

At the time of our site reconnaissance, no used oil generation or storage was observed.

6.3.5 Aboveground Storage Tanks (ASTs)

At the time of our site reconnaissance, no ASTs were observed.

6.3.6 Hazardous Wastes

At the time of our site reconnaissance, no Hazardous Wastes generation or storage was observed. According to Mr. Rivera, he is not aware that hazardous wastes have been generated or stored at the Subject Property.

6.3.7 Underground Storage Tanks (USTs)

At the time of our site reconnaissance, no visual evidence of USTs was identified at the Subject Property. According to Mr. Rivera, he is not aware that an UST is located at the Subject Property.

6.3.8 Air Emission Sources

At the time of our site reconnaissance, no Air Emission Sources were observed at the Subject Property.

6.3.9 Underground Injection Control (UIC) Units

At the time of our site reconnaissance, no visual evidence of UICs was identified on the Subject Property. According to Mr. Rivera, he is not aware that an UIC is located at the Subject Property.

6.3.10 Miscellaneous Containers with Chemicals, Petroleum, and Unknown Products

At the time of the site reconnaissance, no Miscellaneous Containers with Chemicals, Petroleum, and Unknown Products were observed at the Subject Property.

6.3.11 Drums, Totes, and Intermediate Bulk Containers

At the time of the site reconnaissance, no drums, totes or bulk containers were observed at the Subject Property.

6.3.12 Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances or Petroleum Products

At the time of the site reconnaissance, water pools or standing water areas were observed at the Subject Property.

6.3.13 Strong, Pungent, or Noxious Odors and Their Sources

At the time of our site reconnaissance, no suspect or pungent odors were perceived at the Subject Property.

6.3.14 Areas of Stained Soil, Concrete Floor and/or Pavement

At the time of the site reconnaissance, no Areas of Stained Floor, Concrete Floor and/or Pavement were observed at the Subject Property.

6.3.15 Stressed Vegetation

At the time of the site reconnaissance, no signs of stressed vegetation were observed at the Subject Property.

6.3.16 Drains and Sumps

At the time of the site reconnaissance, no drains or sumps were observed at the Subject Property.

6.3.17 Pits, Ponds, and Lagoons

At the time of the site reconnaissance, CES did not observe any pits, ponds or lagoons at the Subject Property.

6.3.18 Stains or Corrosion on Floors, Walls, or Ceilings

At the time of the site reconnaissance, other than water stains and mold, *no* areas of stained equipment, walls, or suspect corrosion were observed at the Subject Property.

6.3.19 Wells

At the time of the site reconnaissance, CES did not observe any wells at the Subject Property.

According to Mr. Rivera, he is not aware of the presence of any wells located at the Subject Property.

6.3.20 Per- and Polyfluoroalkyl (PFAS)

According to EPA information, PFAS are widely used, long lasting chemicals, components of which break down very slowly over time. These are manufactured chemicals that have been used for more than 50 years. There are thousands of PFAS chemicals, and they are found in many different consumer, commercial, and industrial products (https://www.epa.gov/pfas). However, presently these chemicals are not listed as hazardous substances under CERCLA. We note that presently Puerto Rico does not have any regulations or guidance related to PFAS impacts or assessment requirements.

PFASs have been used to provide water, oil, and stain repellency to textiles, carpets, and leather; to create grease-proof and water-proof coatings for paper plates and food packaging; and to aid processing in fluoropolymer manufacturing among many other commercial and consumer applications. They also have been used in chrome plating, firefighting foams, liquid carpet and textile care treatments, and floor waxes and sealants (CECBP 2015).

PFAS chemicals have been widely used, among others, by the following industries:

- Aviation, aerospace & defense
- Household products
- Biocides
- Metal plating
- Cable & wiring
- Oil and mining production
- Construction products (paints and coatings)
- Paper and packaging

- Electronics
- Polymerization
- Fire-fighting
- Textiles, leather and apparel
- Food processing

The manufacture, use, and disposal of items from these industries can contribute to PFAS environmental occurrence. Additional information on potential commercial sources can be found in UNEP (2015), which provides in-depth information on the kinds of articles that might contain PFOS and related chemicals; lists the industries that use and produce the chemicals; describes the supply chain (suppliers, importers and exporters, producers, manufacturers, downstream users); and discusses product end-of-life and recycling relevant to waste, stockpiles, and contaminated sites.

Water resources (i.e., surface water and groundwater) are susceptible to contamination by PFAS release from manufacturing sites, industrial use, aircraft fire and emergency response training areas, and industrial or municipal waste sites where products are disposed of or applied. PFOA and other PFASs have been reported in wastewater and biosolids as a result of manufacturing activities, disposal of coated paper and other consumer products, and from washing stain-repellant fabrics (https://clu-in.org/contaminantfocus/default.focus/sec/Per-_and_Polyfluoroalkyl_Substances_(PFASs)/cat/Occurrence/).

According to the information available for the Subject Property, the disposal of PFAS within the property appears *unlikely*.

6.3.21 Heating/Cooling

The climate of Puerto Rico falls into the tropical climatic zone. Temperatures are moderate year-round, averaging near 80 °F (27 °C) in lower elevations and 70 °F (21 °C) in the mountains, for

this reason no heating of the buildings is required. Cooling is typically provided by electrical cooling systems that do not require fuel (oil/gas) sources that may have been stored in aboveground or underground storage tanks.

6.4 NON-SCOPE CONSIDERATIONS

No considerations outside the scope of the ASTM E1527-21 practice and the AAI Standards were assessed as part of this Phase I except for the general information provided for the following issues:

- Asbestos Containing Building Materials
- Lead-based paint
- Limited Regulatory Compliance Observations
- PFAS
- Wetlands

PRIVILEGED AND CONFIDENTIAL

7.0 INTERVIEWS

7.1 INTERVIEW WITH OWNER (LAND)

CES conducted a telephone interview with Mr. Luis Rivera designated as the authorized representative of the Municipality of Yabucoa. During the interview, Mr. Rivera was questioned in relation to the following environmental concerns: (1) any pending, threatened or past litigation relevant to hazardous substances or petroleum products in, on or from the property or vicinity; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property or vicinity; and (3) any notices from any governmental entity regarding any possible violations of environmental laws or possible liability relating to hazardous substances or petroleum products in connection with the subject property or its surroundings.

Mr. Rivera stated that to the best of his knowledge, there are *no* environmental concerns that he is aware of associated with the Subject Property.

7.1 INTERVIEW WITH OWNER (STRUCTURE)

During the preparation of this Phase I, no contact information of Dr. Ismael Vilar Porrata was provided to us. Therefore, we were not able to interview the owner of the building structure.

7.2 INTERVIEW WITH SITE OCCUPANTS

The Subject Property was vacant at the time of the site visit.

7.3 INTERVIEW WITH SITE MANAGER

Same as *Section 7.2*.

7.4 INTERVIEW WITH GOVERNMENT OFFICIALS

On October 29, 2024, CES submitted a letter to the DNER's inquiring about spills or environmental emergencies reported for the Sites, or assessments conducted at the Sites or nearby areas. However, no information was provided in the DNER response of an event that could have affected the Subject Property.

7.5 INTERVIEW WITH OTHERS

No other persons were interviewed during the preparation of this Phase I report.

PRIVILEGED AND CONFIDENTIAL

8.0 FINDINGS AND OPINIONS

Based on the findings of our Phase I of the subject property, we offer the following comments and opinions relative to potential environmental concerns:

8.1 ON-SITE FINDINGS

- **Asbestos Containing Materials (ACM) and Lead Based Paint (LBP)**

  Based upon the year the building was constructed; the presence of ACMs and LBP cannot be discarded. However, to properly assess the presence of ACM and LBP, a survey needs to be conducted.

- **Non-Hazardous Solid Wastes**

  At the time of our site reconnaissance, no solid wastes were observed generated at the Subject Property. Minor accumulation of discarded materials was observed inside the building. The observed wastes ***do not*** represent a REC for the Subject Property.

- **Per- and Polyfluoroalkyl (PFAS)**

  According to EPA information, PFAS are widely used, long lasting chemicals, components of which break down very slowly over time. These are manufactured chemicals that have been used for more than 50 years. There are thousands of PFAS chemicals, and they are found in many different consumer, commercial, and industrial products (https://www.epa.gov/pfas). However, presently these chemicals are not listed as hazardous substances under CERCLA. We note that presently Puerto Rico does not have any regulations or guidance related to PFAS impacts or assessment requirements.

  PFASs have been used to provide water, oil, and stain repellency to textiles, carpets, and leather; to create grease-proof and water-proof coatings for paper plates and food packaging; and to aid processing in fluoropolymer manufacturing among many other commercial and consumer applications. They also have been used in chrome plating, firefighting foams, liquid carpet and textile care treatments, and floor waxes and sealants (CECBP 2015).

  According to the information available for the Subject Property, the disposal of PFAS within the property appears *unlikely*.

8.2 OFF-SITE FINDINGS

- **Leaking Underground Storage Tanks (LUSTs) List**

  The following LUST facilities are *listed* within a *one-half mile radius* of the Subject Property:

  - Esso CO-266 with DNER ID. 86-1367 located at Calle Cristobal Colón 65 at approximately 0.25 miles to the south of the Subject Property. This facility has not been released by the DNER. Based on the hydrogeological setting of the area, this LUST facility appears to be located side-gradient from the Subject Property. Therefore, based on the distance from the Subject Property, this LUST facility ***does not*** represent a REC for the Subject Property.

  - Texaco #264 with DNER ID. 86-1722 located at Carr 182 Salida San Lorenzo at approximately 0.23 miles to the west of the Subject Property. This facility has not been released by the DNER. Based on the hydrogeological setting of the area, this LUST facility appears to be located side-gradient from the Subject Property. Therefore, based on the distance from the Subject Property, this LUST facility ***does not*** represent a REC for the Subject Property.

  - Independiente/Gulf with DNER ID. 86-0381 located at Carr. 901 Km. 0.5 at approximately 0.50 miles to the southeast of the Subject Property. This facility has not been released by the DNER. Based on the hydrogeological setting of the area, this LUST facility appears to be located side-gradient from the Subject Property. Therefore, based on the distance from the Subject Property, this LUST facility ***does not*** represent a REC for the Subject Property.

Our opinion regarding the potential concern that these off-sites facilities may represent for the Subject Property is based upon the requirements of the ASTM screening process. We note that even if there is the potential that contaminants from the above-mentioned off-sites facilities have reached groundwater or vapors underlying the Subject Property, information contained in EPA's Final Policy Toward Owners of Property Containing Contaminated Aquifers (60 FR 34790, July 3, 1995), provides ways to manage such unlikely scenario. In general, this policy states that the EPA will not take enforcement action against a property owner to require clean up or the payment of clean-up costs where: (1) hazardous substances have come to the property solely as a result of subsurface migration in an aquifer from a source outside the property, (2) the landowner did not

cause, contribute to, or aggravate to the source of contamination and (3) the person that caused the release is not an agent or employee of the landowner, and was not in a direct or indirect contractual relationship with the landowner. A complete copy of this EPA policy can be obtained at the EPA web-site such as (https://www.epa.gov/enforcement/guidance-owners-property-containing-contaminated-aquifers).

8.3 VAPOR MIGRATION

CES reviewed reasonably ascertainable information for the Subject Property and nearby properties limited to the standard environmental record sources discussed in Section 5.1 of this report, for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present and could impact the Subject Property.

Based on the review of available resources as documented in this report, CES ***did not*** identify a REC associated with a vapor-phase migration.

PRIVILEGED AND CONFIDENTIAL

9.0 DATA GAPS

According to the ASTM E1527-21, *a data gap* is defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance and interviews.

During the preparation of this Phase I report, no data gaps were identified, except for the following;

- **Interview with Government Officials -** On October 29, 2024, CES submitted a letter to the DNER's inquiring on spills or environmental emergencies reported for the Subject Property, or assessments conducted at the Sites or nearby areas. At the time this report was written no response from the DNER had been received. We understand that additional information provided by the DNER in response to this letter would not change significantly the opinions and conclusions included in this Phase I report. Therefore, this ***should not*** be considered as a significant data gap. However, CES reserves the right to change or modified this report as needed based upon any additional information provided by the DNER.

- **Interview Structure owner:** The objective of this interview is to obtain information indicating potential recognized environmental conditions in connection with the property. During the preparation of this Phase I, no contact information from the structure owner Dr. Ismael Vilar Porrata, was provided to us. Therefore, we were not able to interview the owner of the building structure. Based upon the reported uses and our observations, we understand that interviewing the owner would not change significantly the opinions and conclusions included in this Phase I report and therefore ***does not*** present a significant data gap. However, Caribe Environmental Services reserves the right to change or modified this report as needed based upon any additional information obtained.

PRIVILEGED AND CONFIDENTIAL

10.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the Plot B [Finca 2122 (Dr. Vilar)] located at the 48 and 49 Luis Muñoz Rivera Street, within the Pueblo Ward of the Yabucoa Municipality in Puerto Rico. Plot B [Finca 2122 (Dr. Vilar)] covers an area of approximately 278.96 square meters (m^2) (0.0710 "*cuerdas*") and is improved with an estimated 2,400 square feet (ft^2) vacant single-story structure. It is our understanding that Plot B is part of a rehabilitation project that will covert this vacant property into a Social Center of Art and Music. Any exceptions to, or deletions from, this practice are described in *Section 2.4* of this report.

This assessment has revealed ***no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps*** in connection with the Subject Property.

PRIVILEGED AND CONFIDENTIAL

11.0 DEVIATIONS

This Phase I was prepared in conformance with the scope and limitations of ASTM E1527-21 Standard Practice for Environmental Site Assessments. It is CES opinion that no significant deviations have occurred from ASTM E1527-21 Standard. Limitations and exceptions to our scope of services were discussed in *Section 2.4* of this report.

PRIVILEGED AND CONFIDENTIAL

12.0 ADDITIONAL SERVICES

Our scope of services for this Phase I, as well as limitations and exceptions, are included in *Sections 2.2* and *2.4* of this report.

PRIVILEGED AND CONFIDENTIAL

13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The following personnel have prepared and/or reviewed this report for accuracy, content, and quality of presentation.

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Luis R. Colón Morales, P.E., M.E.
Project Engineer

ESTUDIO DE TITULO
FINCA 2122 Yabucoa
Inscrita al folio 1 del Tomo 56 pasa al Folio 195 Tomo 139
Número de Catastro: 376-040-013-001

DESCRIPCION:

Urbana: Casa de mampostería radicada en solar del municipio en la calle del comercio hoy Muñoz Rivera del pueblo de Yabucoa marcado con el número 75 con martillo. Está destinada a tienda y mide el solar 45 y medio pies de frente por 66 pies de fondo y la casa mide en su cuerpo principal 45 y medio pies de frente por 38 pies de fondo y el martillo mide 24 pies de frente por 11 pies de fondo y colinda todo por la derecha entrando con casa de Méndez, Hermanos y Compañía, hoy Martínez Fernández y Compañía Sociedad en Comandita; por la izquierda con otra casa de María Rodríguez, hoy Jose M. Méndez, por el fondo con la calle del Hueso y por el frente con la Calle Comercio hoy calle Muñoz Rivera, según surge de la inscripción 4.

TRACTO:

El terreno se inscribe a favor del Municipio de Yabucoa y la estructura que enclava se construyó con autorización el municipio. El Municipio se halla en posesión del solar por formar parte del área de terreno que le fue cedida para la fundación del pueblo sin que se sepa por quien ni en qué fecha.

CARGAS:

Libre.

DOMINIO:

Inscrito el terreno a favor del Municipio de Yabucoa, ***según surge de la inscripción 1.***

Inscrito el edificio a favor de los esposos William Rivera Rodríguez y Ana Cristina Herranz Izquierdo, mayores de edad y vecinos de Humacao, por el precio de $34,450.00 mediante Escritura Número 36 otorgada en Yabucoa el 28 de septiembre de 1987 ante el notario Angel Ortiz Rodriguez, sobre Venta Judicial, Caso Civil número 86-264 seguido en el Tribunal Superior de Puerto Rico, Sala de Humacao, sobre Ejecución de Hipoteca y Cobro de Dinero seguido por Ismael Vilar Porrata y Yolanda Surillo Ortiz, demandantes versus Joyería Manolito Inc. Demandados, se dictó sentencia el 5 de agosto de 1986, ***según surge de la inscripción 9 y última en esta finca.***

REVISADO EN SISTEMA KARIBE:

Embargos Estatales y Federales, Sentencias, Bitácora de Documentos pendientes: NINGUNO.

NOTA: No nos hacemos responsables por errores u omisiones en la entrada y búsqueda de datos en el Sistema Karibe.

OBSERVACION:

En la inscripción 1 se describe el solar de la siguiente manera:

Urbana: Casa de mampostería con techo de hierro galvanizado marcado con el número 75 que mide 13 metros de frente por 11 metros de fondo enclavada en un solar del Municipio de Yabucoa marcado con el numero 31 radicado en la calle Comercio hoy Luis Muñoz Rivera que mide 13 metros de frente por 11 metros de fondo con una superficie de 143 metros cuadrados.

Los folios de las inscripciones 1 a la 7 están deteriorados por lo que la información puede no estar completa.

Se aneja el historial de la misma para su revisión.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Safe Drinking Water Information System contains information about public water systems and their violations of EPA's drinking water regulations.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the

MI NUEVO CONCEPTO INC. (Continued) **1027301349**

Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The National Pollutant Discharge Elimination System (NPDES) module of

the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

Site	Database(s)	EDR ID Number EPA ID Number

CHEMICAL SOLUTIONS LLC (Continued) **1026463146**

storers, and disposers of hazardous waste.
The Section Seven Tracking System (SSTS) tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System

Site	Database(s)	EDR ID Number EPA ID Number

CENTRAL ROIG SUGAR MILLS (Continued) **1015993314**

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Safe Drinking Water Information System contains information about public water systems and their violations of EPA's drinking water regulations.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Safe Drinking Water Information System contains information about public water systems and their violations of EPA's drinking water regulations.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial

Site	Database(s)	EDR ID Number EPA ID Number

OLEIN RECOVERY GROUP (Continued) **1027568675**

enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the

Site	Database(s)	EDR ID Number EPA ID Number

PRASA WTP GUAYABOTA (Continued) **1013875905**

Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

FINDS:
Registry ID: 110070004292

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

NO SITES FOUND

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/19/2024

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database
EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

APPENDIX 7

RESUMES OF ENVIRONMENTAL PROFESSIONALS

Resume of: Valentín Félix Flores, P.E.

Title: Chemical/Environmental Engineer

Profession: Senior Chemical/Environmental Engineer

Education: Graduate Studies towards M.S. in Engineering Administration,
George Washington University
B.S. Chemical Engineering, UPR Mayagüez, 1981

Professional Registrations/ Certifications:

- Professional Engineer (Puerto Rico License Number 16628)
- Certified Environmental Manager (CEM) and Certified Environmental Specialist (CES) at the Environmental Assessment Association (Certification Nos. 14841)

Professional Memberships and Associations:

- College of Engineers and Land Surveyors of Puerto Rico (CIAPR)
- Instituto de Ingenieros Ambientales (CIAPR)
- Environmental Assessment Association
- National Groundwater Association
- Asociacion Interamericana de Ingenieria Sanitaria y Ciencias del Ambiente (AIDIS)

Career Summary:

Mr. Félix has been a Principal Engineer with the environmental consulting firm of Caribe Environmental Services (CES) Inc. in Caguas Puerto Rico, since August, 1996. Mr. Félix is a chemical/environmental engineer with over 30 years of experience, and some of his duties include; marketing, preparation of proposals, coordination, execution, and management of environmental projects, and reports preparation.

Prior to joining CES, Mr. Félix was the Technical Operations Manager of the Law Environmental-Caribe office in San Juan Puerto Rico. He was responsible for the allocation of resources and technical aspects, coordination and execution of Branch projects. He was the Underground Storage Tanks (UST) Department Manager since January 1990 when he joined Law Environmental-Caribe. As UST Department Manager he managed numerous geologic and hydrogeologic assessment projects for pharmaceutical, local and federal government agencies, and industry. These projects involved initial site assessments soil borings and monitoring wells installation, soil and ground water sampling, extent of contamination determination, remedial action plans preparation and execution and USTs removal.

He also managed numerous Phase I assessment, lead paint removal, and other miscellaneous environmental assessment projects. Prior to joining Law in 1990, Mr. Felix worked as the Environmental Compliance Branch Manager at the Naval Ordnance Station, Indian Head, Maryland. He was responsible for the plant environmental permits compliance, NPDES Sampling and Reporting, Discharge Monitoring Reports, PCBs and Hazardous Wastes annual inventories, preliminary environmental assessments review. He was a member of the base Emergency Response Team.

Technical Experience:

PERMITTING/ENVIRONMENTAL AUDITS/ REGULATORY COMPLIANCE

Mr. Félix has worked with environmental projects related to permitting and regulatory compliance. He has dealt extensively with the P.R Environmental Quality Board EQB) Programs with permitting and compliance issues. He has conducted many regulatory compliance audits for industries in Puerto Rico. These projects typically involve conducting an evaluation of facility processes and chemicals handling, storage, and disposal practices and documentation for regulatory compliance. He has participated in numerous regulatory compliance audit of plants in Puerto Rico. The audits typically consist of the evaluation of plant processes, documentation and other recordkeeping to verify compliance with applicable environmental regulations such as RCRA, SARA Title III, TSCA, and other local regulatory agency. Mr. Félix has conducted numerous assessment of industrial facilities for compliance with SARA Title III requirements. He has dealt extensively with the preparation of air emission sources permit applications, Underground Storage Tanks and Underground Injection Facility closure plans preparation and execution.

Conducted environmental audits under the EPA's Voluntary Auditing Program for the following medical facilities: San Pablo Bayamon, San Pablo del Este Fajardo, Caribbean Pediatrics, San Juan Capestrano, Ojos Clinic, Centro Cardiovascular de PR y el Caribe, San Juan Bautista Medical Center.

Other audits included the Papelera Puertorriqueña Utuado, Lanco San Lorenzo facility, the Enco Cidra facility.

GEOLOGIC/HYDROGEOLOGIC ASSESSMENT

Mr. Félix has been managing throughout his career hydrogeologic assessment projects for pharmaceutical, local and federal government agencies, and industry, involving soil and groundwater contamination assessment. These projects typically involve soil borings installation for initial site assessments, monitoring wells installation, soil sampling, wells development and ground water sampling, determination of soil and groundwater extent of contamination, determination of groundwater flow direction.

He has prepared and executed remedial action plans for remediation projects. He is very familiar with field sampling and screening techniques such as Ultraviolet Fluorescence Spectrometer (UVF), X-Ray Fluorescence (XRF), and HAZCAT screening, used to expedite site assessment projects.

Mr. Félix was the project manager for a large assessment project for a former Manufactured Gas Plant (MGP) in Puerto Rico.

UNDERGROUND/ABOVEGROUND STORAGE TANKS

Mr. Felix has managed over 25 projects involving the closure/removal of Underground Storage Tanks (USTs), including the preparation of Closure Plans with sampling requirements, execution of sampling activities and Closure Reports preparation. He managed a Navy contract to conduct groundwater/USTs studies and remedial design documents preparation for various locations in the Commonwealth of Puerto Rico. He was responsible for the negotiation of delivery orders, preparation of Health and Safety and Sampling Plans, overseeing the execution of field activities, reports preparation and overall management of the contract. Under this contract he managed the execution of: Various Site Checks, Site Characterizations, Corrective Action Plans Preparation, Preparation of design drawings and specifications for the removal of over forty five USTs, at the Navy facilities in Puerto Rico.

Mr. Félix executed and managed a Fuel Oil Spill Investigation and Site Assessment at the Kayser Roth facility in Arecibo, Puerto Rico. This project involved the detection of the release source, drilling of soil borings and soil sampling to determine extent of contamination, preparation of a Remedial Action Plan (RAP) which was approved by the Puerto Rico Environmental Quality Board (EQB). The RAP which involved fuel oil contaminated soil excavation, removal and disposal was also executed and a Final Report prepared.

Mr. Félix managed a Six 50,000 gal. Tank Farm Assessment at the U.S.C.G. Air Station Borinquen in Aguadilla, Puerto Rico. This project involved the tanks integrity testing, drilling of soil borings, soil gas survey, installation of over 20 monitoring wells, geologic/hydrogeologic assessment to determine extent of contamination, preparation and execution of a Contamination Assessment Plan which was approved by the P.R Environmental Quality Board. In addition, Mr. Felix prepared a Contamination Assessment Plan (CAP) for a two-USTs site within the Air Station Borinquen. The CAP was reviewed and approved by the P.R. Environmental Quality Board. Mr. Félix managed the execution of the CAP and prepared the Final Report which was submitted to the U.S.C.G. and eventually to the Local Regulatory Agency for approval.

Mr. Félix managed the execution of a Site Assessment and Closure of nine USTs at the Union Carbide Grafito plant in Yabucoa, Puerto Rico. This project consisted of assessing various Underground, on-ground and aboveground storage tanks sites to confirm the presence of hydrocarbons in soil and groundwater. Soil borings were drilled and monitoring wells installed. Nine USTs were permanently closed by removing the tanks and hydrocarbon affected soils surrounding the tank areas.

Mr. Félix has been managing throughout his career UST related projects (tanks removal, geologic and hydrogeologic assessments, tanks testing, for petroleum, pharmaceuticals and other industries in Puerto Rico.

He has also prepared many Spill Prevention Countermeasure and Control (SPCC) Plans as required by 40 CFR 112.

HEALTH AND SAFETY

Mr. Félix has vast experience with Hazardous Waste Operations and Emergency Response as required by the Occupational Health and Safety Agency (OSHA) under 29 CFR 1910.120. He has acquired this experience through numerous courses and seminars involving the management of hazardous materials and wastes, and through field experience managing projects involving hazardous materials/wastes.

Mr. Félix has extensive knowledge preparing Health and Safety Plans for projects involving primarily the removal of Underground Storage Tanks (USTs), USTs Assessment Projects, lead paint removal, geologic and hydrogeologic assessments, contaminated soil removal and disposal. As Hazardous Materials Program Manager at the Naval Ordnance Station, Mr. Felix obtained vast experience with health and safety issues related to hazardous materials identification, exposure, storage, handling, compatibility, labeling and disposal activities in accordance with 40 CFR 265. Mr. Felix has been assigned as the Health and Safety Officer in many of the projects where he has been involved.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENTS

Mr. Félix has executed and managed over 150 projects involving Phase I Environmental Site Assessments, primarily for real estate transactions for facilities in Puerto Rico, St. Thomas and the Dominican Republic. These Phase I site assessments typically involve interviews with facility/property personnel, conducting site reconnaissance, review of property history, surrounding land use, regulatory compliance review, hazardous materials handling, EPA databases review, and EQB Programs files review. He managed the execution of a fast track project involving Phase I Assessments of over twenty five facilities purchased by a U.S. based furniture factory. He has also managed Phase II Assessment projects involving the installation of soil borings, and monitoring wells, asbestos and lead based paint surveys, soil, groundwater, wastes, and other media sampling. He has also conducted cleanup and remediation activities at various of these sites as part of Phase III activities. Mr. Félix conducts Phase I Assessments following the AAI Rule and the ASTM E1527-05 Standard and qualifies as environmental professional as defined by the AAI Rule. As a member of the Environmental Assessment Association, Mr. Félix stays abreast of the constantly changing environmental rules and regulations that impact the execution of Phase I and Phase II projects in accordance with the most recent versions of the ASTM Standard.

REMEDIATION/ HAZARDOUS WASTES CHARACTERIZATION

Mr. Felix managed a project where EPA's issued an Administrative Order of Consent (AOC) in May 2001 for removal action under CERCLA to conduct cleanup and remedial activities at the CIP facility in Caguas, PR.. Mr. Felix was responsible for the preparation of EPA required documentation (Quality Assurance Project Plan (QAPP) Sampling Plan (SP) and Health and Safety Plan (HSP) and managed field/assessment activities. Documents were approved by the EPA and implemented. Final report was submitted to EPA, which changed site's qualification to No Further Remedial Action Planned (NFRAP).

Mr. Félix was the project manager and field supervisor of a waste characterization project for the Puerto Rico Industrial Development Company (PRIDCO) abandoned industrial facility. The facility had unidentified abandoned hazardous and toxic wastes. The project consisted of an initial site entry to identify the need for emergency response activities, inventory of wastes, field chemistry screening (HAZCAT) to identify compatible waste groups, segregation of compatible groups, laboratory analysis, and reporting. Mr. Felix has also prepared requests for proposals for remediation contractors, evaluated contractors proposals and has managed the remediation activities by the selected contractor. Mr. Felix has also provided technical assistance and has served as the liaison between the client and the regulatory agency to comply with the environmental regulations.

Worked on EPA required documentation (Quality Assurance Project Plan (QAPP) Sampling Plan (SP) and Health and Safety Plan (HSP) and managed field/assessment activities for a project at the Metal Finishing Toa Baja. After review of the submitted documents, EPA changed the site's classification from a potential National Priority List Site to a No Further Remedial Action Planned.

Managed a Phase III Assessment/Remediation activities project which consisted of: drums/containers sampling and disposal; characterization, removal and disposal of waste waters and/or sludge in process tanks and sumps; cleaning of sumps and surfaces potentially affected with regulated metals, cleanup verification by sampling and analysis, and; characterization and disposal of waste wasters generated from cleaning activities from properties/ lots formerly owned by PRIDCO, within the Panamerican Grain Facilities in Cataño.

Managed a Phase III Assessment activities/Remediation at Former Electronics facility in Guanica. Waste characterization using the HAZCAT system: inventory, sampling, field screening, waste grouping, laboratory analysis of waste group samples, technical guidance during waste consolidation in preparation for transportation and disposal by PRIDCO's contractor. Field screening, sampling, characterization and disposal of abandoned chemical containers.

AIR EMISSION PERMITTING

Mr. Felix has worked on over 50 air emission permit projects involving the preparation of construction and operation permit applications for various commercial and industrial facilities in P.R. These projects involve the assessment of the facilities to identify the air emission sources, preparation of the applications including the emissions computations, stamping by professional engineer and submittal to Environmental Quality Board.

OSHA PROCESS HAZARD ANALYSIS

Mr. Félix conducted a Process Hazard Analysis (PHA) for seven processes of the Caribbean Refrescos (Coca Cola) facility in Cidra, Puerto Rico, as required by OSHA Process Safety Management under 29 CFR 1910.119.

Career History:

Nov. 2010 – Present	Principal Engineer, Caribe Environmental Services, Inc.
Aug. 1996 – Nov. 2010	Partner/Principal Engr. Caribe Environmental Services, Inc.
Jan. 1990 - Aug. 1996	Manager Law Environmental-Caribe, San Juan, Puerto Rico
Jan 1981 - Dec. 1989	Naval Ordnance Station, Indian Head, Maryland

- Micropurge Low-Flow Purging and Groundwater Sampling, The Nielsen Environmental Field School, Tampa Florida, March 12, 2004

2003

- Air Quality Emissions Factor Model MOBILE 6. US Department of Transportation Federal Highway Administration, San Juan Puerto Rico, December 8 and 9, 2003

- "Risk-Based Corrective Action at Petroleum Release Sites, ASTM Standard E1739, Sponsored by the ASTM, Lansing, Michigan, October 14-15, 2003.

- "Environmental Compliance Update" Technologies for Water and Wastewater, Stormwater Regulations, Toxic Release Inventory Form and SPCC Plans, College of Engineers and Surveyors of Puerto Rico, San Juan, Puerto Rico, June 27, 2003.

2002

- "Reglamentación Actual para el Tratamiento de las Aguas de Escorrentías", College of Engineers and Surveyors of Puerto Rico, San Juan, Puerto Rico, November 26, 2002.

- "Phase I Environmental Site Assessment Practices for Commercial Real Estate" Sponsored by the ASTM, College of Engineers and Surveyors of Puerto Rico, San Juan, Puerto Rico, October 24 and 25, 2002.

2001

- "How to Manage Multiple Projects, Meet Deadlines, and Achieve Objectives" Fred Pryor Seminars, San Juan, Puerto Rico, March 29, 2001.

2000

- " Manufacturers Training Course for NITON's Portable Spectrum Analyzer Instrument XRF Analyzer, San Juan, Puerto Rico, May 8, 2000

- "Seminario sobre Nuevo Permiso Federal para Descargas de Aguas de Escorrentia y Desarrollos Recientes en Reglamentación Ambiental", AIDIS/CIAPR, San Juan, Puerto Rico, May 2, 2000.

1999

- "EPA Voluntary Environmental Audits" Sponsored by Reichard & Escalera Law Firm, San Juan, Puerto Rico, June 30, 1999.

- Risk Management Program RMP (40 CFR 68), F. Irizarry & Asociados, Ponce, Puerto Rico, May 14, 1999.

- EPA Brownfields Workshop, Sponsored by Puerto Rico Industrial Development Company (PRIDCO), San Juan, Puerto Rico, February 3, 1999.

- National Pollutant Discharge Elimination System – Storm Water Regulations and NPDES Permit Seminar, Multi-Sector General Permit (MSGP) Modification Seminar" Sponsored by the Environmental Protection Agency (EPA), San Juan, Puerto Rico, March 17, 1999.

- " Presentacion Nuevo Reglamento Documentos Ambientales" Junta de Calidad Ambiental, Sponsored by Puerto Rico Highway and Transportation Authority" , San Juan, Puerto Rico, December 7, 1999.

- "Generadores de Electricidad Solucion o Agravante a la Emergencia", College of Engineers and Surveyors of Puerto Rico, San Juan, Puerto Rico, September 3, 1999.

1998

- Environmental Site Characterization, ASTM Technical and Professional Training in the Performance, Use and Application of ASTM Standards, Orlando Florida, August 13-14, 1998

- "Expedited Site Assessment Tools for Underground Storage Tanks Sites" Sponsored by Transglobal Environmental Geochemistry, San Juan, Puerto Rico, March 18, 1998.

1997

- " ACCESS Basics" Sponsored by Abremar Computer Learning Center, San Juan, Puerto Rico, September 19, 1997.

- Brownfields 97 Conference, Sponsored by the EPA, Kansas City, Mo., September 3-5, 1997.

1996

- "Bioremediation of Soils and Groundwater Contamination"" On-Site Environmental, Inc. San Juan Puerto Rico May 31, 1996.

1995

- Puerto Rico's Title V Operating Permit Program", Puerto Rico Manufacturers Association" San Juan, Puerto Rico, March 17, 1995.

- "Fugitive Emissions Monitoring and Compliance Seminar" The Foxboro Company, San Juan, Puerto Rico, January 25, 1995.

1994

- " Basic Risk Management Law Engineering and Environmental Services, San Juan, Puerto Rico, January 29, 1994.

1993

- " Basic Project Management" Law Environmental Inc., San Juan, Puerto Rico, August 28, 1993.

- " TCL Seminar" Sponsored by the Environmental Protection Agency, San Juan, Puerto Rico June 14, 1993.

1992

- "8-Hour Supervisory Course for Hazardous Waste Operations OSHA 29 CFR 1910.120", Law Companies Environmental Group, San Juan, Puerto Rico, September 11, 1992.

- "Fundamentals of Puerto Rico Environmental Law Compliance", Government Institutes Inc., April 1992.

- " Quality Assurance Procedures" Law Environmental Inc., San Juan, Puerto Rico, February 14, 1992.

- "Professional Orientation" Law Environmental Inc., San Juan, Puerto Rico, February 18 1992.

1991

- " Thin Layer Chromatography"" Scott Newborne, Law Environmental Government Services, San Juan, Puerto Rico, February 1, 1991.

1990

- " Basic Project Management" Law Environmental Inc., San Juan, Puerto Rico, November 6, 1990.

- "Leaking Underground Storage Tanks, Corrective Action Alternatives" Georgia Institute of Technology, Atlanta Georgia, November 1 and 2 1990.

- "Dye Tests Seminar" Law Environmental Inc., San Juan, Puerto Rico, October 24, 1990.

- "Liability and Loss Prevention" Law Companies Group, Inc., San Juan, Puerto Rico, October 20 1990.

- " The Functional Assessment of Wetlands (WET II) Wetland Delineation"" Office of Environmental Policy, National Highway Institute, Federal Highway Administration, San Juan, Puerto Rico, August 27-31, 1990.

1989

- "Environmental Regulation Course, a Basic Comprehensive Course on Environmental Regulations", Executive Enterprises Inc., Washington, D.C., November 15-17, 1989.

- "Hazardous Materials Leak, Spill and Fire Control School, Special Hands On" "Part 3 Command Considerations" Safety Systems Emergency Response Schools, The St. Augustine Technical Center, November 14 thru 16, 1989.

- "Hazardous Waste in Maryland", National Business Institute, Baltimore, Maryland, August 25, 1989.

- "Prevention of Sexual Harassment" Naval Ordnance Station, Indian Head, Maryland, July 26, 1989.

- "Managing Hazardous Chemicals: Integrating Hazard Communication, Chemical Safety, Hazardous Waste Management and Emergency Response" Occupational Safety and Health Educational Resource Center, University of North Carolina at Chapel Hill, March 1-3, 1989.

1988

- "Federal Hazard Communication Training Program", Naval Ordance Station, Indian Head, Maryland, December 12, 1988.

- "NAVSEA OP-5 Volume I Ammunition and Explosive Ashore", Naval Ordance Station, Indian Head, Maryland, May 12, through October 27, 1988.

- " Beginning DBase III Plus", Charles County Community College September, 23, 1988.

- "Radiation Safety Training" Naval Sea Systems Command Detachment (RASO) Yorktown, Virginia, August 8-19, 1988,

- "OSH-340, Hazardous Material Control", Navy Safety School, Naval Station, Treasure Island, San Francisco, California, June 7 – 16, 1988.

- "Engineering Administration", George Washington University, Naval Ordance Station, Indian Head, Maryland, January 14 – May 15, 1988.

- "Introduction to Engineering Economic Analysis", George Washington University, Naval Ordance Station, Indian Head, Maryland, September 10, – December 17, 1988.

- "Stress Management", Associates in Counseling, Consulting and Training, Naval Ordance Station, Indian Head, Maryland, January 26-29 1988.

1987

- "Performance Improvement Project Planning" ; R.T. Westcott & Associates, Naval Ordance Station, Indian Head, Maryland, October, 1987.

1986

- "Effective Time Management Workshop" ; Vicore Inc., Training, Education Development Consultants, Naval Ordance Station, Indian Head, Maryland, April 23, 1986.

- "Mechanical Stress Analysis"; Research Analysis Corporation, Naval Ordance Station, Indian Head, Maryland, March 28, 1986.

1985

- "Management and Motivation" Naval Ordance Station, Indian Head, Maryland, May 28-30, 1985.

- "Effective Writing Workshop Module 2", Carolyn Sherman, Naval Ordance Station, Indian Head, Maryland, February 26-27, 1985.

"Better Naval Writting", Carolyn Sherman, Naval Ordance Station, Indian Head, Maryland, February 27, 1985.

1984

- "Effective Briefing Techniques" Sponsored by Teleview Inc. Fairfax, Virginia Naval Ordance Station, Indian Head, Maryland, May 22-24, 1984.

- "Engineering Project Management" Sponsored by John Hopkins University, Naval Ordance Station, Indian Head, Maryland, April 17-19, 1984.

- "Evelyn Woods Reading Dynamics (Reading Improvements)" Naval Ordance Station, Indian Head, Maryland, March 5-9, 1984.

- "Configuration Management" James V. Clark and Associates, Naval Ordance Station, Indian Head, Maryland, March 20-21, 1984.

1983

- "EEO for Non Supervisors" Naval Ordance Station, Indian Head, Maryland, October, 1983.

- "Corrosion Engineering", Naval Ordance Station, Indian Head, Maryland, October 25-26, 1983.

- "Kepner Tregoe Genco II" Naval Ordance Station, Indian Head, Maryland, September, 19-23, 1983.

- "Contracting Officers Technical Representative (COTR)" Naval Ordance Station, Indian Head, Maryland, August 4, 1983.

1982

- "Review of Engineering Fundamentals" Naval Ordance Station, Indian Head, Maryland, August 19 – October 21, 1982.

- "Advanced Ordnance Technology (Double Base Rocket Propellant)", Naval Ordance Station, Indian Head, Maryland, July 13-16, 1982.

- "Advanced Ordnance Technology (Motor Design)", Naval Ordance Station, Indian Head, Maryland, May 17-21, 1982.

- "Advanced Ordnance Technology (Sec II Interior Ballistics)", Naval Ordance Station, Indian Head, Maryland, May 10-14, 1982.

- "Advanced Ordnance Technology (Composite Rocket Propellant)", Naval Ordance Station, Indian Head, Maryland, April 19-23, 1982.

- "Effective Writing Workshop", Michael L. Murdock, Communications Consultant, Naval Ordance Station, Indian Head, Maryland, May 5, 1982.

- "Using Instrumentation for Dynamic Measurements", Heiber Engineering, Naval Ordnance Station, Indian Head, Maryland, January 26-28, 1982.

- "Dimensioning and Tolerancing", Bibeau Associates, Naval Ordance Station, Indian Head, Maryland, December 08-10, 1982.

1981

- "Introduction to Engineering Administration", George Washington University, Naval Ordnance Station, Indian Head, Maryland, September 15 – December 15, 1981.

- "Basic Quantitative Methods for Engineering Administration", George Washington University, Naval Ordnance Station, Indian Head, Maryland, September 10 – December 17, 1981.

- "Accelerated Training and Promotion Program for Entry Level Engineers", Naval Ordnance Station, Indian Head, Maryland, January 26 – July 26, 1981.

- "Basic Ordnance Technology", Naval Ordance Station, Indian Head, Maryland, July 31, 1981.

- "Technical Writting Workshop", Charles County Community Collage, Naval Ordnance Station, Indian Head, Maryland, May 19-21, 1981.

- "Vibration and Shock Testing", Tustin Institute of Technology, Santa Barbara, California, Naval Ordance Station, Indian Head, Maryland, April 24, 1981.

OSHA Health and Safety 40 Hrs. Training and OSHA Refresher Courses on a yearly basis, since April 1988.

LIST OF PROJECTS

The following list shows a representative sample of Mr. Félix's professional work experience throughout his professional career.

HYDROGEOLOGY

- Site Characterization of Soil and Groundwater, former Hospital Dr. Pila owned by Metro Pavia, Ponce, Puerto Rico, on-going.
- Site Characterization of Soil and Groundwater, Dense Non-Aqueous Phase Liquids (DNAPLs), Confidential Client, Carolina, Puerto Rico, July 2009
- Assessment of Dense Non-Aqueous Phase Liquids (DNAPLs) in Groundwater, Confidential Client, Carolina, Puerto Rico, On-going.
- Groundwater and deep well sampling at the IPR Canovanas Facility, Canovanas, Puerto Rico, 2007.
- Groundwater and Clean-up Verification Sampling at the former Shell Yabucoa facility, Yabucoa, Puerto Rico, 2007.
- Hydrogeologic and Groundwater Characterization Assessment - Former Manufactured Gas Plant (MGP) Facility, Miramar, San Juan, Puerto Rico, June 1997.
- Subsurface and Groundwater Contamination Assessment - Air Liquid Facility, Cataño, Puerto Rico, October 1996
- Subsurface and Groundwater Contamination Assessment - General Gases Facility, Bayamón, Puerto Rico, October 1996
- Preliminary Subsurface Site Assessment - Former Fortiflex Manufacturing Facility, Bayamón, Puerto Rico
- Hydrogeologic Assessment and Groundwater Characterization - Former Metal Finishing Facility, Toa Baja, Puerto Rico, June 1996
- Subsurface and Groundwater Contamination Assessment ACERVO Transportation and Maintenance Facility, Hato Rey, Puerto Rico, January 1996

ENVIRONMENTAL ENGINEERING

- Soil Investigation, Baxter Healthcare Facility, Aibonito, Puerto Rico, on-going.
- Environmental Site Investigation, Shellfoam Facility, Puerto Rico Industrial Development Company (PRIDCO), Cidra, Puerto Rico, On-going.
- Environmental Assessment for soil contamination, Becton Dickinson Affirm Expansion, Cayey, Puerto Rico, March 2010.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Canovanas, Canovanas, Puerto Rico, on-going.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Toa Baja, Toa Baja Puerto Rico, on-going.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Aguadilla, Aguadilla, Puerto Rico, on-going.
- Environmental Audits and Permitting Compliance for the LANCO Group Facilities located in San Lorenzo, Cidra and Rio Piedras, on-going.
- Phase I and Phase II ESA for former Union Carbide Caribe Facility, as requested by Peerless Oil and Chemicals, Peñuelas/Guayanilla, Puerto Rico, 2009.
- Environmental Audit and Permitting Compliance, Papelera Puertorriqueña, Utuado, Puerto Rico, 2009.
- Baseline Assessment for the Texaco Farm Tank, as requested by Peerless Oil and Chemicals, Guayanilla, Puerto Rico, 2009.
- Environmental Assessments and Remediation for the ACERVO Facility for the proposed Villas El Paraiso Project, Hato Rey, Puerto Rico, 2008.
- Phase I and Phase II ESA for the former Schering Plough manufacturing facility, Manati, Puerto Rico, 2008.
- Phase I ESA for various facilities around Puerto Rico owned by the Banco Gubernamental de Fomento para Puerto Rico, 2009.
- Phase I ESA for 15 facilities around Puerto Rico owned by Empresas Alberic Colon, 2008.
- Phase I ESA for 6 airports facilities at various Dominican Republic, owned by AERODOM, 2008.
- Phase I ESA of former Empresas Santana facilities at the Luis Muñoz Marin International Airport and Base Muñiz, Carolina, Puerto Rico, 2008.
- Phase I ESA for four facilities owned by Borinquen Memorial Funeral Home, First Bank, various locations in Puerto Rico, 2008.
- Phase I for Hogar Manuel Mediavilla of a 11,861 square meter undeveloped lot, Humacao, January 2008
- Phase I and Phase II Environmental Site Assessments for the former Schering Plough Facilities, Manati, 2008
- Phase I and Phase II ESA for the Aguas Puras project at the PRASA Treatment Plant, First Bank, Bayamon, Puerto Rico, 2008.

- Phase I Assessment of the 6.5 lot adjacent to the Manati Medical Center, Manati, January 2007
- RCRA Hazardous Waste Environmental Audit/Inspection for the UPR, Humacao Campus, Humacao, Puerto Rico, April 2007
- RCRA Hazardous Waste Environmental Audit/Inspection for the UPR Arecibo Campus, Arecibo, April 2007
- Environmental Audit of the Quadrel Leasing Toa Baja facility, Toa Baja, Puerto Rico, 2007
- RCRA Hazardous Waste Environmental Audit/Inspection for the UPR, Bayamon Campus, Bayamon, Puerto Rico, March 2007
- Phase I Assessment for Banco Gubernamental de Fomento of the undeveloped lot adjacent to the Westin Rio Mar, Rio Grande, December 2007
- Phase I Assessment of the Empresas Santana facilities at the LMM International Airport, Carolina, November 2007
- Phase I Assessment of a 63 cuerdas lot for the former Ochoa Poultry, Salinas, September 2007
- Phase I Assessment of the Mr. Quicks Bayamon Facility, October 2007
- Phase I Assessment of a property at the Pajaros Ward, Bayamon, July 2007
- Environmental audit of the Centro Cardiovascular de PR medical facility, Rio Piedras, Puerto Rico, February 2006
- Phase II Site Characterization Shell Puerto Rico Former Gasoline Station, Mayaguez, Puerto Rico, August 2005.
- Assessment and Remediation Activities, EPA Brownfields Program, Hato Rey Electroplating PRIDCO Facility, Hato Rey, Puerto Rico, September 2005.
- Assessment and Remediation Activities, EPA Brownfields Program, National Circuit PRIDCO Facility, Fajardo, Puerto Rico, September 2005.
- Soil Assessment Cardinal Health Facility, Humacao, Puerto Rico, August 2005.
- Remedial Action Plans Preparation for the ACERVO Facility (Villas del Paraiso Residential Development), Hato Rey, Puerto Rico, February 2004
- Environmental audits of the following medical facilities: San Pablo Bayamon, San Pablo del Este Fajardo, Caribbean Pediatrics, San Juan Capestrano and Ojos Clinic, June 2004
- Environmental Sampling Assessment, Taller Bufalo, Barceloneta, Puerto Rico, October 2003
- Closure of Septic Tank System, US Navy, Vieques, Puerto Rico.
- Phase I Environmental Site Assessment, Proposed Home Depot facility, Arecibo, Puerto Rico, 2003
- Phase I, Phase II, and Remediation Activities, Saint Luke's Memorial Hospital, Former Hospital Regional de Ponce, Ponce, Puerto Rico, September 2003
- Assessment and Remediation Activities, EPA Superfund Program, Metal Finishing Toa Baja Facility, Toa Baja, Puerto Rico, February 2004
- Technical Assistance, Former San Juan Gas Facility, San Juan, Puerto Rico, December 2000
- Phase III Assessment activities at Former Electronics facility in Guanica. Waste characterization using the HAZCAT system: inventory, sampling, field screening, waste

grouping, laboratory analysis of waste group samples, field screening, sampling, characterization and disposal of abandoned chemical containers. May 2000.

- Phase II Environmental Site Assessment (Soil and Groundwater, Septic Tank Characterization, PCB Testing, Asbestos and Lead-based Paint Limited Surveys, ACERVO Facility, Hato Rey, Puerto Rico, February 2002
- Phase III Assessment/Remediation activities Project: drums/containers sampling and disposal; characterization, removal and disposal of waste waters and/or sludge in process tanks and sumps; cleaning of sumps and surfaces potentially affected with regulated metals, cleanup verification by sampling and analysis, and; characterization and disposal of waste wasters generated from cleaning activities from properties/ lots formerly owned by PRIDCO, within the Panamerican Grain Facilities in Cataño. June 2003.
- Phase I Environmental Site Assessment, Undeveloped property, Guayama, Puerto Rico, January 2003
- Phase I Environmental Site Assessment, San Juan and Carolina properties, January 2003
- Environmental Assessment, Isla Grande Site 36 Site, San Juan, Puerto Rico, January 2010.
- Phase II Assessment activities at the former ACERVO Facilities for the proposed Villas El Paraiso residential development, Hato Rey, 2007
- Environmental audits under the EPA Voluntary Environmental Auditing Program of the Caguas and Humacao medical facilities, Caguas and Humacao, Puerto Rico, June 2006
- Environmental audit under the EPA Voluntary Environmental Auditing Program of the San Juan Bautista Medical Center facility, Caguas, Puerto Rico
- Environmental audit under the EPA Voluntary Environmental Auditing Program of the Centro Cardiovascular de PR y el Caribe medical facility, Rio Piedras, Puerto Rico, February 2006
- Underground Injection Control System Closure, Former Mayaguez Filter Facility, Mayaguez, Puerto Rico, January 2005.
- Hazardous Waste Management and Characterization at the former Hato Rey Electroplating, Hato Rey, September 2005
- Phase II assessment at Sprint Store, Fajardo, August 2005
- Phase II assessment for Alberic Colon at Carolina Day & Night site, May 2005
- Phase I for Home Depot of an Undeveloped Lot, Hatillo, October 2005
- Phase I Environmental Site Assessment, Plaza Tropical Facility, Bayamon, Puerto Rico, January 2003
- Phase I Assessment for ParaPiezas Corp of the San Juan Properties Inc. Site, Rio Cañas Ward, Caguas, January 2004
- Environmental audits under the EPA Voluntary Auditing Program of the following medical facilities: San Pablo Bayamon, San Pablo del Este Fajardo, Caribbean Pediatrics, San Juan Capestrano, and Ojos Clinic, June 2004
- Phase II Assessment for Hewlett Packard for the proposed Las Americas Technology Park, Moca, October 2004
- Phase II assessment for Pfizer Caguas, outside property, December 2004
- Phase I Assessment for the Cayetano Coll y Toste Hospital, PR129, Arecibo, May 2004

- Phase I Assessment for the Dr. Susoni Hospital, PR129, Arecibo, May 2004
- Environmental assessment and remedial activities, confidential site in Caguas, EPA's AOC was issued in May 2001 for removal action under CERCLA to conduct cleanup and remedial activities. QA/QC plans were prepared and approved by the EPA and implemented. Final report was submitted to EPA, which changed site's qualification to No Further Remedial Action Planned (NFRAP).
- Phase I and Phase II Assessments, Revitalización Centro Urbano de Santurce, San Juan, Puerto Rico, February 2003.
- Phase I Assessment for Reichard & Escalera Law Firm of the Makro Facility, PR Road 834, Guaynabo July 2003
- Phase I Assessment for CAS Management of the Alejandro Otero Lopez Hospital, Manati, September 2003
- Phase II Assessment of the El Mundo WKAQ Broadcasting facility, Cataño, May 2003
- Phase I Assessment of Plaza Tropical at PR167, Bayamon, February 2003
- Air permitting and other environmental consulting services for various Mendez & Co. Facilities in Guaynabo, Añasco, and Cataño, Puerto Rico, since 1996 and on-going..
- Phase II Environmental Assessment, Bard Undeveloped Lot, Humacao, Puerto Rico, November 2002.
- Phase II Assessment; soil borings drilling, concrete sampling, hazardous waste drums/containers sampling at wood treating facility at lots formerly owned by PRIDCO, within the Panamerican Grain Facilities, April 2002
- Phase I Environmental Site Assessment, Leaseway facilities, Cataño and Toa Baja Site, Puerto Rico, September 2002.
- Phase I Environmental Site Assessment, Mountain Union Telecommunication Towers, various location in Puerto Rico, November 2002.
- Phase I Assessment for the San Juan Capestrano Hospital, Rio Piedras, January 2001
- Phase I Assessment for Lifetime properties located at Mayaguez and Hato Rey, March 2001
- Phase I Assessment and Asbestos Survey of the Humacao Regional Hospital, Humacao, January 2001
- Puerto Rico Hospital; Environmental Evaluation document, for the expansion of the Customed Facility, in Fajardo, and air permitting of Ethylene Oxide facility September 2001
- Phase II Assessment activities Biovail Laboratories Carolina:. Soil borings drilling and monitoring wells installation. Soil and groundwater sampling, asbestos survey and lead based paint survey,. June 2001
- Phase I Assessment for Mr. Ian Simmons of Vieques track of land, Vieques, August 2000
- Phase I Assessment of Centro de Diagnostico y Tratamiento de Arecibo, July 2000
- PhaseII Assessment of an industrial building formerly occupied by General Electric in Rio Piedras. Asbestos Survey, PCB sampling, wastes sampling and disposal, February 2000
- Phase II Assessment activities at Underground Storage Tank areas at the Cabo Rojo CDT and the Hospital de San German. Soil borings drilling and soil sampling, June 2000
- Phase I Assessment of the Cabo Rojo CDT and the Hospital de San German, January 1999

- Phase III Assessment at a former electroplating facility at Yabucoa. Implemented limited remedial activities at the facility to achieve EPA action levels for identified metals and EQB cleanup levels for hydrocarbon affected soils. Remedial activities included soil removal and cleanup of floor surfaces affected with regulated metals, followed by cleanup verification by sampling and analysis. Cleanup goals and/or action levels were achieved with the remedial activities implemented, October 1998
- Phase II Assessment: Hospital Regional de Fajardo, asbestos survey, PCB sampling, installation of soil borings, soil sampling, closure of 5 USTs, December 1999
- Phase II Assessment activities including: Sampling and Closure of Septic Tank from Former printing industrial facility (Vieques Graphics) in Vieques, March 1999
- Phase I and Phase II Assessments for Yauco, Guayama and San Pablo Medical Facilities, From 1997 to 1998.
- Phase I Assessment of a property in Bayamón to be acquired by Goya, December 1998
- Phase I Assessment of the HIMA Hospital in Caguas, and the Font Martello Hospital in Humacao, August 1998
- Phase II Assessment; Hospital San Pablo asbestos survey, air emission permitting, April 1998
- Phase II Assessment at a PRIDCO property used as a former electroplating facility at Yabucoa. Soil borings, PCB sampling, asbestos survey, geophysical survey to assess buried containers, May 1998
- Phase II Assessment at San Francisco Hospital in Rio Piedras. Soil borings drilling, soil sampling, UST removal, and asbestos survey, air emission permits application, SPCC plan, April 1998
- Phase II Assessment; (Ranger American Facility) Soil sampling activities at Hato Rey and Ponce facilities, June 1998
- Phase III Assessment/Remediation activities at San Juan Gas Facility in Miramar. Dismantling of gas holder and treatment and disposal of tar material in tanks, closure of several concrete underground storage tanks including cleaning of tanks and fill with inert material., November 1998
- Phase I Assessment for Ranger American, of property in Rio Piedras, April 1998
- Phase I Assessment of the Instituto Oftalmico facilities in Santurce, January, 1998
- Phase I Assessment of the Former Villa Esperanza Resort in Vieques, 1997
- Phase I and Phase II Site Assessment - Confidential Manufacturing Facility, Guaynabo, Puerto Rico, December 1997.
- Phase I Assessment of the Former Fajardo Regional Hospital, December, 1997
- Phase I Assessment of the Santa Rosa Mall in Bayamon, September, 1997
- Septic System UIC Closure Plan - Baxter Sales Facility, Guaynabo, Puerto Rico, February 1997.
- Phase II assessment activities at National Can de PR Inc., consisting of drilling of soil borings (approx 60) and sampling at concrete trenches, dikes and other areas within the facility, August 1997
- Underground Injection Control Permitting - Parque Las Cavernas de Camuy, Camuy, Puerto Rico, November 1996.

- Phase I Environmental Site Assessment Air Liquid Facility, Cataño, Puerto Rico, October 1996.
- Phase I Environmental Site Assessment 3 General Gases Facilities, Cataño, Bayamón and Ponce, Puerto Rico, October 1996.
- Phase I Environmental Site Assessment - Peninsula de Cantera Proposed Development Project, Santurce, Puerto Rico, November 1996.
- Phase I Environmental Site Assessment Tropical Fruit Property, Guanica, Puerto Rico, November 1996.

RESUME OF
LUIS RAUL COLON MORALES

Project Engineer/Project Manager

EDUCATION

University of Puerto Rico
Mayaguez Campus - B. S., Civil Engineering, 2005, Magna Cum Laude, GPA 3.85

University of Florida
Gainesville – Master in Civil Engineering, Water Resources, 2007, Summa Cum Laude GPA 4.00

PROFESSIONAL AFFILIATIONS

College of Engineers and Surveyors of Puerto Rico (CIAPR)
American Society of Civil Engineers (ASCE)
National Groundwater Association

PROFESSIONAL REGISTRATIONS/CERTIFICATIONS

Professional Engineer (PE), License 21864, Puerto Rico

CAREER SUMMARY

Mr. Colón is a Project Engineer with the environmental consulting firm of Caribe Environmental Services since 2007. Mr. Colón is a registered Professional Engineer with the College of Engineers and Surveyors of Puerto Rico. Mr. Colón has been involved in a variety of water resources and environmental projects including surface and ground water hydrologic modeling and investigations as well as soil and groundwater contamination assessments. Mr. Colón is also continuously developing potentiometric and contaminant concentration surface maps as well as GIS Inventory databases. Also Mr. Colón has participated in the preparation of multiple environmental site assessments, environmental compliance audits and environmental permitting projects.

LIST OF PROJECTS

The following list shows a representative sample of Mr. Colón's professional work experience throughout his professional career.

ENVIRONMENTAL ENGINEERING

- Expert Witness – Blasina Lagoon Contamination, Municipio de Carolina V. Autoridad de Acueductos y Alcantarillados, Carolina, Puerto Rico – on-going.
- Soil Investigation, Baxter Healthcare Facility, Aibonito, Puerto Rico, on-going.

- Sampling activities, former Caguas Uniform facility, Caguas, Puerto Rico, on-going
- Environmental assessment, EFA Investment for Paseo Samaritano residential development, on-going
- Phase I and Groundwater sampling at Hospital Dr Pila, Ponce, Puerto Rico; on-going
- Phase I for Salichs Pou and Associates of former gas station at Toa Baja, Puerto Rico; October 2010
- Phase I Environmental assessment at Bacardi, Palo Seco facility; February 2011
- Phase I Environmental assessments of two sites (Arecibo and Carolina) for Battery Recycling; on-going
- Environmental Site Investigation, Shellfoam Facility, Puerto Rico Industrial Development Company (PRIDCO), Cidra, Puerto Rico, June 2010.
- Environmental Assessment for soil contamination, Becton Dickinson Affirm Expansion, Cayey, Puerto Rico, March 2010.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Canovanas, Canovanas, Puerto Rico, on-going.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Toa Baja, Toa Baja Puerto Rico, on-going.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Aguadilla, Aguadilla, Puerto Rico, on-going.
- Phase I ESA for the San Jorge Children's Hospital for First Bank, Santurce, Puerto Rico, June 2010.
- Environmental Audits and Permitting Compliance for the LANCO Group Facilities located in San Lorenzo, Cidra and Rio Piedras, on-going.
- Phase I ESA for a parcel of land owned by Doral Bank, Rincon, Puerto Rico, July 2010.
- Phase I ESA for a parcel of land owned by Doral Bank, Loiza, Puerto Rico, July 2010.
- Phase I ESA for former gasoline station owned by Banco Popular de PR, Corozal, July 2010
- Phase I ESA for former gasoline station owned by Banco Cooperativo de Puerto Rico, Ciales, on-going.
- Phase I Environmental Site Assessment, Groundwater Sampling and Environmental Audit, Patheon Facility for EDIC College, Caguas, February 2011
- Soil Sampling Investigation, PCB Horizon Facility, Puerto Rico Industrial Development Company (PRIDCO), San German, Puerto Rico, 2009.
- Soil Investigation According to an Administrative Order of Consent Issued by the EPA PRIDCO, San Germán, Puerto Rico, On-going
- Phase I ESA for the Dollar Rent a Car facility, owned by Empresas Alberic Colon, Ponce, Puerto Rico, 2009
- Phase I ESA for the former Gulf Gasoline Station as requested by First Bank, Camuy, Puerto Rico, 2009.
- Phase I ESA for the Hospital Episcopal San Lucas and Torre Media, as requested by First Bank, Ponce, Puerto Rico, 2009.
- Phase I and Phase II ESA for former Union Carbide Caribe Facility, as requested by Peerless Oil and Chemicals, Peñuelas/Guayanilla, Puerto Rico, 2009.
- Environmental Audit and Permitting Compliance, Papelera Puertorriqueña, Utuado, Puerto Rico, on-going

- Phase I ESA for the proposed Sun Microsystems facility, as requested by McConnell Valdez, Ponce, Puerto Rico, 2009
- Phase I and Limited Phase II ESA for the Biovail Laboratories facilities, Dorado, Puerto Rico, 2009.
- Phase I Environmental Site Assessment & Phase II Site Characterization First Bank, Cataño, Puerto Rico, 2008.
- Phase I Environmental Site Assessment Borinquen Memorial, Caguas, Puerto Rico, 2008.

HYDROLOGY AND HYDRAULICS

Surface Hydrology/Hydraulics

- Hydrologic/Hydraulic Study for the Turabo River, Caguas, Puerto Rico, as requested by the Puerto Rico Highway and Transportation Authority, on-going.
- Hydrologic/Hydraulic Study for the AD Bayamon site owned by Mendez & Co., Bayamon, Puerto Rico, on-going.
- Hydrologic/Hydraulic Study for a proposed Mixed-Uses Development Complex, LAIF LLC, Guaynabo, Puerto Rico, 2009
- Hydrologic Study Degetau Avenue Extension, Caguas, Puerto Rico, On-going
- Hydrologic/Hydraulic Study La Vereda Residential Development, Ceiba, Puerto Rico, 2008

- Hydrologic/Hydraulic Study Notre Dame Elementary School, Caguas, Puerto Rico, 2008
- Hydrologic/Hydraulic Study and Sinkholes Hydraulic Evaluation, Las Americas Technology Industrial Park, Moca, Puerto Rico, January 2007
- Hydrologic/Hydraulic Study Betteroads Cupey Facility, San Juan, Puerto Rico, 2007.
- Hydrologic and Hydraulic Study, Villas de Montecielo Residential Development, Guaynabo, Puerto Rico.
- Hydrologic and Hydraulic Study for the Degetau Avenue to the Turabo River and FEMA Conditional Letter of Map Revision Request, Caguas, Puerto Rico, June 2005.

Groundwater Hydrology/Hydrogeology

- Aquifer Investigation at the former Hanes Facility for the proposed Cervezas del Sur project, Ponce, Puerto Rico, on-going
- DNER Permitting of monitoring wells, former Patheon facility, Caguas, Puerto Rico, on-going.
- Groundwater study and slug/chemical testing, IPR Pharmaceuticals, Canóvanas, Puerto Rico, on-going
- Site Characterization of Soil and Groundwater, former Hospital Dr. Pila owned by Metro Pavia, Ponce, Puerto Rico, on-going.
- Site Characterization of Soil and Groundwater, Dense Non-Aqueous Phase Liquids (DNAPLs), Confidential Client, Carolina, Puerto Rico, July 2009
- Subsurface-Groundwater Contamination Assessment – PRHTA Site 36, Puerto Rico, On-Going
- Hydrologic/Hydraulic Study and Sinkholes Hydraulic Evaluation, Camaseyes Residential Area, Aguadilla, Puerto Rico, 2007
- Groundwater and deep well sampling Monitoring Event, IPR Pharmaceuticals, Canovanas, Puerto Rico, 2007.
- Hydrogeologic Characterization Assessment, Villas del Faro Punta Tuna Beach Resort, Maunabo, Puerto Rico, November 2001 (during summer part-time job)

GIS INVENTORY DATABASE

- Brownfield Inventory Database for Municipality of Aguadilla; on-going
- Brownfield Inventory Database for Municipality of Toa Baja; on-going
- Brownfield Inventory Database for Municipality of Canóvanas; on-going
- Location Inventory of sampling points for:
  - Soil Investigation, Baxter Healthcare facility, Aibonito, Puerto Rico; on-going
  - Phase I and Groundwater sampling at Hospital Dr Pila, Ponce, Puerto Rico; on-going
  - Environmental Site Investigation, Shellfoam Facility, Puerto Rico Industrial Development Company (PRIDCO), Cidra, Puerto Rico, June 2010
  - Phase I and Phase II ESA for former Union Carbide Caribe facility, as requested by Peerless Oil and Chemicals, Peñuelas/Guayanilla, Puerto Rico; 2009
  - Aquifer Investigation at the former Hanes facility for the proposed Cervezas del Sur project, Ponce, Puerto Rico; on-going

  - Groundwater study and slug/chemical testing, IPR Pharmaceuticals, Canóvanas, Puerto Rico; on-going
- Storm & Sanitary Water Sewers Location and/or Characteristics Identification, Expert Witness Contamination Assessment Municipio de Carolina vs. Autoridad de Acueductos y Alcantarillados, Carolina, On-Going.

SKILLS

Proficient with the following softwares:

- Microsoft's computer software, such as: Power Point, Excel and Word.
- Hydrologic and Hydraulic software, such as: HMS, HEC-RAS, Hydraflow Storm Sewer, HY-8
- Software that can be applied to groundwater modeling, such as: Rockworks 2006, Surfer, AQTESOLV and Modflow Packages.
- AutoCad
- Arc GIS.
- Virtual Basic Programming.

Subject: **PRIVILEGED AND CONFIDENTIAL**
Phase I Environmental Site Assessment Report
Community Development Block Grant – Disaster Recovery
PRDOH/Municipality of Yabucoa
Agreement No. CDBG-DR: 000378
Plot C [Finca 952 (Mercantil Fernandez)]
47 Luis Muñoz Rivera Street
Pueblo Ward
Yabucoa, Puerto Rico
CES Project No. 25-0002

Dear Mrs. Vazquez:

Caribe Environmental Services (CES) respectfully submits to your attention this Phase I Environmental Site Assessment report of the referenced property. One digital version in PDF format of the report is submitted for your use. These services were conducted in accordance with the scope of work described in our proposal PR25-0053 dated June 24, 2025.

For your information according to the ASTM Standard, this practice does not address whether requirements in addition to all appropriate inquiries have been met in order to qualify for the LLPs. For example, the duties specified in 42 U.S.C. §9607(b)(3)(a) and (b) and cited in Appendix X1 of the ASTM E1527-21 Standard, including the continuing obligation not to impede the integrity and effectiveness of activity and use limitations (AULs), or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations. After acquiring a property, to maintain the liability protections, landowners must comply with "continuing obligations" during their property ownership. We understand that the continuing obligations may include:

- Provide all legally required notices with respect to the discovery or release of a hazardous substance;

PRIVILEGED AND CONFIDENTIAL

- Exercise appropriate care with respect to the hazardous substances by taking reasonable steps to stop or prevent continuing or threatened future releases and exposures, and prevent or limit human and environmental exposure to previous releases;
- Provide full cooperation, assistance, and access to per- sons authorized to conduct response actions or natural resource restoration;
- Comply with land use restrictions and not impede the effectiveness of institutional controls; and
- Comply with information requests and subpoenas.

This is a legal evaluation which is beyond the scope of the Phase I assessment.

We appreciate the opportunity to provide our professional services to you and look forward to our continued working relationship. If you have any questions regarding the enclosed report, please do not hesitate to contact us at your convenience.

Respectfully yours,

CARIBE ENVIRONMENTAL SERVICES

Luis R. Colón Morales, P.E., M.E.

PRIVILEGED AND CONFIDENTIAL

1.0 SUMMARY

Caribe Environmental Services (CES) was retained by ABACUS Architecture, PSC (ABACUS) to conduct a Phase I Environmental Site Assessment (Phase I) of the PLOT C [FINCA 952 (Mercantil Fernández)] located at the 47 Luis Muñoz Rivera Street, within the Pueblo Ward of the Yabucoa Municipality in Puerto Rico. PLOT C [FINCA 952 (Mercantil Fernández)] covers an area of approximately 596.33 square meters (m²) (0.1517"*cuerdas*") and is improved with a vacant two-story plus basement concrete building. It is our understanding that PLOT C is part of a rehabilitation project that will convert this vacant property into a Social Center of Art and Music. From hereon the PLOT C [FINCA 952 (Mercantil Fernández)] will be referenced to as the Subject Property.

CES understands that at the time of the site reconnaissance, the land underlying the Subject Property was owned by the Municipality of Yabucoa but the vacant structure is registered in favor of Mercantil Martínez Fernández y Compañía. However, according to the information provided by the representative of the municipality, the structure was already acquired by the Municipality of Yabucoa. It is also our understanding that as part of the Community Development Block Grant – Disaster Recovery (CDBG-DR) program requirements, a Phase I is required to be conducted for PLOT C. Abacus requested a Phase I, as part of the funds acquisition process.

This Phase I was prepared in conformance with the scope and limitations of ASTM E1527-21 standard (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process). According to the Code of Federal Regulations (CFR), Volume 87, No. 240, dated December 15, 2022, US Environmental Protection Agency (EPA)'s final ruling accepts the new ASTM E1527-21 Standard as compliant with the All Appropriate Inquiry (AAI) Rule as set forth in 40 CFR Part 312. The new rule establishes that the ASTM E1527-21 Standard became effective on July 24, 2023, officially recognizing the new standard for Phase I Environmental Site Assessment.

The purpose of the Phase I was to evaluate environmental concerns or issues with respect to the range of contaminants within the scope of the Comprehensive Environmental Response and Liability Act (CERCLA) and petroleum products that maybe associated with the Subject Property, based upon readily available information and site observations. In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a property, the goal of the processes established by this practice is to identify *"Recognized Environmental Conditions (REC)"*, Historic RECs or Controlled RECs associated with the current and historical use of the property.

The term Recognized Environmental Condition (REC) means (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the

environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

The term Controlled Recognized Environmental Condition (CREC) means a Recognized Environmental Condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

The term historical recognized environmental condition (HREC) means a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meets unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

This Phase I may have identified *de minimis* condition. These are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

This Phase I investigation may identify issues of environmental concern not necessarily limited to those environmental issues required to be investigated in the ASTM E1527-21 Standard. Those issues are defined by the Standard as "business environmental risks (BER). BERs are defined by the standard as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated by the ASTM E1527-21 practice.

The scope of work for this study consisted of:

- A visual reconnaissance of the Subject Property and surroundings;
- Telephone interview with Mr. Luis Rivera of the Municipality of Yabucoa, designated owner representative;
- Submittal of User Questionnaire (Appendix X3 of ASTM E1527-21) to Arch. Mara Vázquez of ABACUS;

- Submittal of request of information letter to the Puerto Rico Department of Natural and Environmental Resources (DNER) Office;
- Review of readily available regulatory and technical information, including a review of geological, hydrogeological and hydrological information to establish environmental receptors at the site and in its vicinity;
- A review of available historical information, including historical aerial photographs, to ascertain historical use of the site and its immediate surroundings;
- A review of available information from public databases, local public offices and environment agencies (as reasonably available within timeframe);
- Preparation of a report outlining the findings and conclusion of the assessment.

A site reconnaissance was conducted by engineers Raúl Colón Vicenty and Luis R. Colón Morales on July 15, 2025. During the site reconnaissance, Architect Mara Vázquez, of ABACUS accompanied CES personnel. At the time of CES visit, the Subject Property was observed to consist of a vacant two-story plus basement concrete building observed to be in deteriorating conditions with no specific use.

We note that site conditions and regulatory requirements may change in the future. Therefore, the information included in this report, our findings, or recommendations presented are based upon information readily available and observations made at the time of the Site visit. Sampling and analysis of site, water, air or other materials were not performed as part of the Phase I assessment.

This assessment has revealed the following recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the Subject Property:

Recognized Environmental Conditions

- **Stained Surfaces at the Former Electrical Substation and Electrical Transformers**

  At the time of our site reconnaissance, no suspect PCBs containing equipment was observed installed at the Subject Property. However, during a previous site inspection conducted by CES on January 28, 2025 a vandalized electrical substation in deteriorated conditions was observed inside the building and three disconnected electrical transformers were observed at the 1st floor. According to the information provided by ABACUS, this substation and transformers were removed from the Subject Property. However, stain surfaces were still observed on the former electrical substation and disconnected electrical transformers surroundings which could have been the result of spills or releases from the transformers.

Part 761 of Title 40 of the Code of Federal Regulations (CFR) define PCBs as any chemical substance that is limited to the biphenyl molecule that has been chlorinated to varying degrees or any combination of substances which contains such substances. The regulations categorize PCB Transformers as: Non-PCB (less than 50 ppm), PCB-contaminated (50-500 ppm), and PCB (greater than 500 ppm). PCB-Contaminated Transformers contain PCBs at concentrations greater than or equal to 50 ppm and less than 500 ppm. Indoor solid surfaces and high-contact outdoor solid surfaces, defined as high contact residential/commercial surfaces under § 761.123, shall be cleaned to 10 µg/100 cm^2 (as measured by standard wipe tests). Soil contaminated by a PCB spill needs to be decontaminated to 10 ppm PCBs by weight provided that soil is excavated to a minimum depth of 10 inches. The excavated soil will be replaced with clean soil, i.e., containing less than 1 ppm PCBs, and the spill site will be restored (e.g., replacement of turf). We note that the DNER may have lower limits for the requirement of remediation of PCB impacted media.

Therefore, the observed stained areas at the former vandalized electrical substation area and the former storage area of the three disconnected electrical transformers area ***represents a REC*** for the Subject Property.

- **Asbestos Containing Materials (ACM) and Lead Based Paint (LBP)**

An asbestos-containing materials survey was conducted by Nortol Environmental & Occupational Safety, Inc. on January 28 and March 19, 2025. The survey indicates that Nortol identified asbestos-containing materials and bulk samples were collected and submitted for laboratory analysis. About 7,000 ft² of roofing sealer materials and about 4,000 ft² of vinyl floor tiles (and/or its mastic layer) resulted positive (>1%) to asbestos-containing material. The survey also classifies the asbestos-containing material as damaged. Also, a Lead Based Paint survey was conducted by Nortol Environmental & Occupational Safety, Inc. on on January 28 and March 19, 2025. The survey indicates that Lead-glazed ceramic wall tiles (which are regulated as LBP in Puerto Rico) were found in the bathrooms.

According to 40 CFR 302.4, Lead and Asbestos (friable forms only) is listed as a hazardous substance subject to CERCLA. Based on the observed deteriorated building conditions, the detected ACM and LBP may be easily detached from the building, or some have been already detached from the building and represents a release or threat of release into the environment. Therefore, until ACM and LBP is properly mitigated, this ***represents a REC*** for the Subject Property.

Controlled Recognized Environmental Conditions

- None

Significant Data Gaps

- None

In compliance with §312.31 (b) of the AAI final rule and §12.8 of the ASTM E1527-21, it is our opinion that additional appropriate investigation will be required to confirm the presence of petroleum products and/or hazardous substances associated with the abovementioned REC.

In addition, the following environmental concerns and/or findings associated with the site which may represent a business environmental risk, as defined by the ASTM Standard were identified:

- **Non-Hazardous Solid Wastes**

  At the time of our site reconnaissance, no solid wastes were observed generated at the Subject Property. However, significant accumulations of discarded materials were observed inside the building. No evidence of hazardous substances or petroleum products releases in connection with these wastes was observed. Therefore, the observed wastes ***do not represent*** a REC for the Subject Property. However, until all of the solid wastes are properly disposed of, *this represents a BER* for the Subject Property.

- **Hazardous Wastes**

  At the time of our site reconnaissance, no Hazardous Wastes generation or storage was observed. According to Mr. Rivera, he is not aware that hazardous wastes have been generated or stored at the Subject Property. Accumulations of a few discarded fluorescent lamps were observed either broken or inappropriately store inside the building. It is known that tubular fluorescent bulbs may contain amounts of metals such as mercury. The observed limited number of fluorescent lamps are considered as a *de minimis* condition and ***do not represent*** a REC for the Subject Property. However, until all of the observed discarded lamps are properly disposed of *this represents a BER* for the Subject Property.

- **Suspect Concrete Slab**

  A suspect concrete slab was observed on the basement. Mr. Rivera indicated he is not aware of what is the purposes of this slab and could not confirm if this slab is associated with an existing or former underground regulated structure such as a septic tank system. Should

this structure be associated with a regulated UIC, then it should be properly closed following the DNER UIC regulation. The uncertainty regarding this concrete slab *represents a BER* for the Subject Property.

Details about the scope, activities, findings and conclusions of this Phase I Environmental Site Assessment are described in the following sections of this Phase I report. This summary is provided for your convenience. It should not be construed as a separate document without reviewing the complete report, including the appendices.

PRIVILEGED AND CONFIDENTIAL

2.0 INTRODUCTION

2.1 PURPOSE

Caribe Environmental Services (CES) was retained by ABACUS Architecture, PSC (ABACUS) to conduct a Phase I Environmental Site Assessment (Phase I) of the PLOT C [FINCA 952 (Mercantil Fernández)] located at the 47 Luis Muñoz Rivera Street, within the Pueblo Ward of the Yabucoa Municipality in Puerto Rico. PLOT C [FINCA 952 (Mercantil Fernández)] covers an area of approximately 596.33 square meters (m²) (0.1517"*cuerdas*") and is improved with a vacant two-story plus basement concrete building. It is our understanding that PLOT C is part of a rehabilitation project that will convert this vacant property into a Social Center of Art and Music. From hereon the PLOT C [FINCA 952 (Mercantil Fernández)] will be referenced to as the Subject Property.

CES understands that at the time of the site reconnaissance, the land underlying the Subject Property was owned by the Municipality of Yabucoa but the vacant structure is registered in favor of Mercantil Martínez Fernández y Compañía. However, according to the information provided by the representative of the municipality, the structure was already acquired by the Municipality of Yabucoa. It is also our understanding that as part of the Community Development Block Grant – Disaster Recovery (CDBG-DR) program requirements, a Phase I is required to be conducted for PLOT C. Abacus requested a Phase I, as part of the funds acquisition process.

This Phase I was prepared in conformance with the scope and limitations of ASTM E1527-21 standard (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process). According to the Code of Federal Regulations (CFR), Volume 87, No. 240, dated December 15, 2022, US Environmental Protection Agency (EPA)'s final ruling accepts the new ASTM E1527-21 Standard as compliant with the All Appropriate Inquiry (AAI) Rule as set

forth in 40 CFR Part 312. The new rule establishes that the ASTM E1527-21 Standard became effective on July 24, 2023, officially recognizing the new standard for Phase I Environmental Site Assessment.

The purpose of the Phase I was to evaluate environmental concerns or issues with respect to the range of contaminants within the scope of the Comprehensive Environmental Response and Liability Act (CERCLA) and petroleum products that maybe associated with the Subject Property, based upon readily available information and site observations. In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a property, the goal of the processes established by this practice is to identify *"Recognized Environmental Conditions (REC)"*, Historic RECs or Controlled RECs associated with the current and historical use of the property.

The term Recognized Environmental Condition (REC) means (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

The term Controlled Recognized Environmental Condition (CREC) means a Recognized Environmental Condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

The term historical recognized environmental condition (HREC) means a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meets unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

This Phase I may have identified *de minimis* condition. These are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

This Phase I investigation may identify issues of environmental concern not necessarily limited to those environmental issues required to be investigated in the ASTM E1527-21 Standard. Those issues are defined by the Standard as "business environmental risks (BER). BERs are defined by the standard as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated by the ASTM E1527-21 practice.

2.2 DETAILED SCOPE OF SERVICES

The scope of work for this study consisted of:

- A visual reconnaissance of the Subject Property and surroundings;

- Telephone interview with Mr. Luis Rivera of the Municipality of Yabucoa, designated owner representative;
- Submittal of User Questionnaire (Appendix X3 of ASTM E1527-21) to Arch. Mara Vázquez of ABACUS;
- Submittal of request of information letter to the Puerto Rico Department of Natural and Environmental Resources (DNER) Office;
- Review of readily available regulatory and technical information, including a review of geological, hydrogeological and hydrological information to establish environmental receptors at the site and in its vicinity;
- A review of available historical information, including historical aerial photographs, to ascertain historical use of the site and its immediate surroundings;
- A review of available information from public databases, local public offices and environment agencies (as reasonably available within timeframe);
- Preparation of a report outlining the findings and conclusion of the assessment.

A site reconnaissance was conducted by engineers Raúl Colón Vicenty and Luis R. Colón Morales on July 15, 2025. During the site reconnaissance, Architect Mara Vázquez, of ABACUS accompanied CES personnel. At the time of CES visit, the Subject Property was observed to consist of a vacant two-story plus basement concrete building observed to be in deteriorating conditions with no specific use. The purpose of the field visit was to observe physical conditions of the Site and identify regulated or suspect facilities in the vicinity of the Subject Property.

Copies of historical aerial photographs obtained from the Puerto Rico Highway and Transportation Authority (PRHTA) were reviewed. The purpose of this review was to understand the historical land uses of the Subject Property. Aerial photographs available for the site were obtained for flight dates of January 30, 1937; January 9, 1951; February 11, 1965; March 24, 1977; March 16, 1988; and March 1990. In addition, high-resolution satellite photos were obtained from Google Earth Pro for: June 30, 2002; October 31, 2006; September 6, 2012; May 25, 2017; and May 13, 2024. Aerial photos for the 1940's decades were not available. The following published information (references) was also reviewed to gain an understanding of the site's natural setting:

- *Topographic Map of the Yabucoa Quadrangle by U.S. Geological Survey (2018)*
- *Topographic Map of the Yabucoa Quadrangle by U.S. Geological Survey, (1960) Photorevised 1982.*
- *Topographic Map of the Yabucoa Quadrangle U.S. Geological Survey (1946)*
- *Soil Survey Map of Humacao Area, Puerto Rico Eastern Part, U.S. Department of Agriculture Soil Conservation Survey; Survey Area Data: Version 15, September 10, 2024.*
- *Geologic Map of the Yabucoa and Punta Tuna Quadrangles, C.L. Rogers, C.M. Cram, M.H. Pease, Jr., and M.S. Tischler U.S. Geological Survey (1979)*
- *Flood Insurance Rate Maps, Panel 1795 of 2160 (Map Number 72000C1795J), by the Federal Emergency Management Agency (FEMA). Effective date April 13, 2018.*
- *Atlas of Ground-Water Resources in Puerto Rico and the US Virgin Islands. 1996. U.S. Geological Survey. Water Resources Investigations Report 94-4198.*
- *Google Earth Pro 7.3.4.8642 (64-bit) Thursday, May 12, 2022, 10:55:31 PM UTC*
- *http://www.jp.gobierno.pr/*
- *http://gis.jp.pr.gov/GeoLocalizador/index.htm?refresh=501*

The following database of standard environmental record sources prepared obtained from the U.S. Environmental Protection Agency (EPA), DNER or the Solid Waste Management Authority (SWMA) were reviewed to determine if the Subject Property was listed as a regulated facility, and if other potential regulated facilities or hazardous waste sites were located near the Subject Property. In addition, the environmental record sources prepared by Environmental Data Resource (EDR) were reviewed.

Database	**Search Radius**
Federal NPL site list (June 26, 2025)	1-mile
Federal Delisted NPL site list (June 26, 2025)	0.5 -mile
Federal CERCLIS list	
SEMS (dated June 26. 2025)	0.5-mile
Federal CERCLIS NFRAP site list	
SEMS Archived (dated June 26, 2025)	0.5-mile
Federal RCRA TSD Facilities list	
CORRACTS (dated June 2, 2025)	1-mile
Non-CORRACTS (dated June 2, 2025)	0.5 miles
Federal RCRA Generators list (dated June 2, 2025)	Property and adjoining properties

Federal Engineering Control Registries (January 29, 2025)	Property only
Federal Institutional Control Registries (January 29, 2025)	Property only
Federal Emergency Response Notification System (ERNS) list (dated June 10, 2025)	Property only
State UST Registration List (dated January 1, 2008)	Property and adjoining properties
State Leaking USTs List (dated 2024) (https://www.drna.pr.gov/public-record-for-lust-sites/)	0.5 miles
State Landfill and/or Solid Waste Disposal Site Lists (as of July 2012) http://www.ads.pr.gov/	0.5 miles
Federal, State, and tribal Brownfield sites (September 9, 2024)	0.5 miles

The following state and tribal environmental database record sources are recommended to be reviewed by the ASTM Practice E1527-21. However, they were not reviewed because Puerto Rico does not maintain a list (i.e. State NPL list) and/or they are not applicable (i.e. no Indian land is designated in Puerto Rico).

State and tribal lists of *hazardous waste* sites identified for investigation or remediation
State and tribal-equivalent NPL
State and tribal-equivalent CERCLIS
State and tribal institutional Control/Engineering Registries
State and tribal voluntary cleanup sites

In addition, the ASTM Standard suggests reviewing fire insurance maps and city directories. However, these sources are not available for Puerto Rico.

Also, the Environmental Protection Agency (EPA) Facility Registry Service (FRS), to verify if the Subject Property was included in the registry. The FRS is a database maintained by the EPA of facilities, sites or places of environmental interest subject to regulation. It provides quality facility data to support EPA's mission of protecting human health and the environment. The FRS includes

facilities listed in databases such as: NPL, Delisted NPL, CERCLIS, CERCLIS NFRAP, RCRA TSD, RCRA Generators, Brownfield, etc.

2.3 SIGNIFICANT ASSUMPTIONS

The Phase I was prepared in conformance with the scope and limitations of ASTM Practice E1527-21. No other significant assumptions were made or taken into consideration during the preparation of this Phase I report.

2.4 LIMITATIONS AND EXCEPTIONS

The opinions included in this report are based upon reasonably ascertainable information obtained during the course of the assessment, site observations, and interviews, and our understanding of applicable environmental regulations. No representations or warranties are made concerning the nature or quality of the air, soil, water, building materials or any other substances on the Property, other than the visual observations as stated in this report. Sites not listed on the reviewed regulatory agencies databases or hidden sources of potential liability cannot be detected by the methods used for the Phase I assessment.

The scope of work for this Phase I meets the requirements of the ASTM E1527-21. The ASTM E1527-21 Section 13.1.5 includes Non-Scope considerations such as; Asbestos-Containing Building Materials (ACM), Biological agents, Cultural and historic resources, Ecological resources, Endangered species, Health and safety, Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, Industrial hygiene, Lead-Based Paint (LBP), Lead in Drinking Water, Mold, Regulatory compliance, and Wetlands, that are not part of the required ASTM Standard scope of work. However, as requested by ABACUS, general observations regarding only one or more of the following non-Scope considerations are included

in this Phase I report; ACM, LBP, environmental permitting issues associated only with UST, AST, air emissions, UIC, used oil, bio-medical waste if identified by the environmental professional during the site reconnaissance, mold, and included the identification of the potential presence of wetlands, if during the site reconnaissance, this was observed by the environmental professional. Also, this Phase I does not include specialized studies such as sampling, ACM-LBP survey, or mold survey, among others.

In addition, the likely presence of per-and polyfluoroalkyl substances, also known as "PFAS", at the Subject Property area was assessed. PFAS are described, in the ASTM E1527-21 Standard, as "Substances Not Defined as Hazardous Substances". These and any other "emerging contaminants," where they are not identified as a hazardous substances by CERCLA, as interpreted by EPA regulations and the courts, are not included in the scope of the ASTM E1527-21 practice. However, on April 10, 2024, EPA announced the final National Primary Drinking Water Regulation (NPDWR) for six PFAS. With this rule, EPA is establishing legally enforceable levels for six PFAS known to occur individually and/or as mixtures in drinking water. EPA established legally enforceable levels, called Maximum Contaminant Levels (MCLs), for six PFAS in drinking water: perflouorooctanoic acid (PFOA), perfluorooctane sulfonate (PFOS), Perfluorohexanesulfonic acid (PFHxS), Perfluorononanoic acid (PFNA), and Hexafluoropropylene oxide-dimer acid (HFPO-DA) as contaminants with individual MCLs, and PFAS mixtures containing at least two or more of PFHxS, PFNA, HFPO-DA, and Perfluorobutanesulfonic acid (PFBS) using a Hazard Index MCL to account for the combined and co-occurring levels of these PFAS in drinking water. EPA also finalized health-based, non-enforceable Maximum Contaminant Level Goals (MCLGs) for these PFAS. We note that presently Puerto Rico does not have any regulations or guidance related to the impacts of PFAS or assessment requirements for PFAS. However, the Federal EPA PFAS regulations apply to Puerto Rico.

If additional information that might impact our conclusions becomes available, we reserve the right to review the information, reassess the potential concerns, and modify our opinions, if warranted.

In the preparation of this report, CES has relied upon documents and information provided by ABACUS and the property owner. In addition, CES has relied upon a computer search of government databases provided by EDR and the EPA FRS. Except as discussed in the report, CES did not attempt to independently verify the accuracy or completeness of that data but did not detect inconsistencies or omissions of a nature that might question the validity of the information. We note that the accuracy of the information provided in the databases is not warranted by EDR online services because these are controlled by the regulatory agencies.

CES understands that the data obtained from these databases are the most current data available. To the extent that the conclusions in this report are based in whole or in part on such information, they are contingent on its validity. CES assumes no responsibility for any consequence arising from any information or condition that was concealed, withheld, misrepresented or otherwise not fully disclosed or available to us.

The Phase I report may include observations and/or comments regarding possible issues of environmental compliance identified at the Subject Property. The inclusion of such information must not be interpreted as representative or indicative of the environmental compliance status of the facility. This Phase I investigation must not be construed as an environmental compliance or environmental audit investigation for the Site.

We note that Site conditions and regulatory requirements may change in the future. Therefore, the information included in this report, our findings, or recommendations presented are based upon information readily available and observations made at the time of the site visit.

PRIVILEGED AND CONFIDENTIAL

We note that any property boundary, feature location, or measurements included in this report are approximate, for illustration purposes only, and other than for the ease of use of this report, these shall not be used. Any property boundary, feature location, or measurement included in this report must not be assumed to be or interpreted as a certified building covering area, a survey foot-print area, or a certified property limit.

Although this assessment has attempted to identify potential for environmental impairment to the Subject Property, potential sources of contamination may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, and/or (5) deliberate concealment of detrimental information. It was not the purpose of this study to determine the actual presence, degree, or extent of contamination, if any, at the Site. This could require additional exploratory work, including sampling and laboratory analysis. Also, other than a general opinion and observation during the site reconnaissance, it was not the purpose of this study to provide asbestos and/or lead-based paint materials services.

For the purposes of this report, “migrate” and “migration” refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Therefore, this report may include an opinion or assessment of RECs associated to hazardous substances or petroleum products vapor migration issue with respect to the Subject Property. The ASTM E2600 Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions may have been used during this report only as a reference. However, it is not the intent of this study to conduct a Vapor Encroachment Screening study or to identify a Vapor Encroachment Condition, since that study was not part of the Phase I scope of work.

We note that a finding of no recognized environmental condition is not a warranty or guarantee that the property remains free from contamination. No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the Property. Performance of this practice is intended to reduce, but not to eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the Property.

This assessment has been undertaken and performed in a professional manner, in accordance with generally accepted practices, using the degree of skill and care ordinarily exercised by reputable environmental consultants under similar circumstances. No other warranty, expressed or implied is made.

An environmental site assessment meeting or exceeding this practice and for which the information was collected or updated within *1 year* prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction may be used provided that the following components of the inquiries were conducted or updated within *180 days* of the date of purchase or the date of the intended transaction: 1) interviews with owners, operators, and occupants; 2) searches for recorded environmental cleanup liens; 3) reviews of federal, tribal, state, and local government records; 4) visual inspections of the property and of adjoining properties; and 5) the declaration by the environmental professional responsible for the assessment or update.

2.5 USER RELIANCE

This report was prepared at the request and for the exclusive use of ABACUS Architecture, PSC, its agents, advisors, and legal representatives. No other party is entitled to rely on the conclusions, observations, specifications, or data contained herein without the express written consent of CES.

It should be emphasized that because conditions at the Subject Property can change over time, the use of this report by unauthorized third parties without written authorization from CES shall be at their own risk.

2.6 REPORT VIABILITY

This Phase I report is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the Subject Property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction).

The dates of the components included in this Phase I report are as follows:

Component	Date Conducted	Expiration Date
Interviews with Owner	July 16, 2025	January 12, 2026
Interviews with Occupant	Vacant	Vacant
Review of government records	July 23, 2025	January 18, 2026
Visual inspections	July 15, 2025	January 11, 2026
Environmental Professional Declaration	July 30, 2025	January 26, 2026

PRIVILEGED AND CONFIDENTIAL

3.0 SITE DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

The Subject Property is located at the 47 Luis Muñoz Rivera Street, within the Pueblo Ward of the Yabucoa Municipality in Puerto Rico. A Site Vicinity Map is provided in ***Appendix 1***. A Site Aerial Photograph, showing the Site's features, general settings, and surroundings is provided in ***Appendix 2***. The project site boundaries included in ***Appendix 2*** are approximate based upon the information provided to CES. ***Appendix 3*** presents general photographs of the site as observed during the site reconnaissance. The approximate coordinates of the center portion of the Subject Property are: 18°03'03.35"N; 65°52'44.50"W.

A title study prepared by Luis Angel Ortiz Carrasquillo; Abogado-Notario dated October 11, 2023 was provided for our review. The legal description as included in the title study is as follows:

> *"Solar: Mide 24 metros de frente por 35 metros de fondo. Colindancias: por su derecha entrando con casa de Emilia Ortiz viuda de Berrios; por la izquierda con casa de mampostería de Méndez Hermanos y Compañía Sociedad en Comandita; por el Frente, Sur con la calle Luis Muñoz Rivera y por sus fondos con la calle del Hueso hoy Mariano Martorell. (la medida del solar surge en la inscripción 1 y las colindancias en la inscripción 10)*
>
> *Enclava un local de una planta principal abierta que mide 69 pies de frente por 71 pies fondo, un sótano que cubre toda el área de la planta principal, un anexo de forma irregular que mide 29 pies de frente por 13 pies por el lado derecho 17 pies por el lado izquierdo y 29 pies por el fondo incluyendo además un callejón de 12 pies a la derecha del edificio el cual sirve de acceso al sótano y al anexo. (Esta edificación surge en la inscripción 14)."*

A copy of the Title Survey and land survey provided to us is included in ***Appendix 4***. This Phase I is limited only to PLOT C.

3.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The Subject Property consists of a lot improved with a vacant concrete two-story plus basement concrete building. The 2nd floor (street level) was observed empty and appears to have being used as the supermarket main area. The 1st floor was also observed empty and appears to have been used as the supermarket warehouse area. The basement area was observed empty and was much smaller than the upper levels. The structure was observed in deteriorating and in shell conditions.

The Subject Property appears to have been connected to the electric power utility grid operated by LUMA, and the potable water system and sanitary sewer system owned by PRASA. However, due to the observed deteriorated conditions, it is expected that none of the utilities may be functional. The Subject Property was not observed to have liquified petroleum gas (LPG) lines within its limits.

The Subject Property's grading is relatively flat. Photographs of the Subject Property and vicinity areas are included in ***Appendix 3***. As appropriate, selected site photographs are illustrated for orientation purposes only in ***Appendix 2.*** General views of the Subject Property and surroundings are shown in ***Photographs 1*** through ***9***.

3.3 CURRENT USE OF THE PROPERTY

The Subject Property is presently vacant and has no specific use.

3.4 DESCRIPTION OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SITE

A summary of the main structures and improvements observed at the Subject Property was included in *Section 3.2* above.

3.5 CURRENT USE OF ADJOINING PROPERTIES

The following are the properties adjoining the Subject Property and their respective uses.

North:	Residential Properties
West:	Vacant Commercial Property
East:	Vacant Mix-Use Property
South:	Muñoz Rivera Street and Parroquia Santos Ángeles Custodios

During our site reconnaissance, a visual inspection of the adjoining properties from the Subject Property's property limits was conducted. Based upon our site observations *no* evident accumulations, releases, threat of releases of hazardous or petroleum products were observed at the adjoining properties boundaries that could represent an environmental concern for the Subject Property.

PRIVILEGED AND CONFIDENTIAL

4.0 USER-PROVIDED INFORMATION

4.1 TITLE RECORDS

A title study of the Subject Property prepared by Luis Angel Ortiz Carrasquillo; Abogado-Notario dated October 11, 2023 was provided for our review. This title study does not indicate any environmental liens, environmental limitations, or concerns with respect to the Subject Property. A legal description of the Subject Property, as included in the title study, is presented in *Section 3.1* of this report.

4.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATION

In Puerto Rico claims against the title of the property and property restrictions including environmental liens and Activity And Use limitations are available from the Property Registrar's office part of the Puerto Rico Department of Justice. As part of the *User's Responsibilities*, ABACUS as the user must inform CES if environmental liens/AULs exists at the Subject Property.

CES does not need to review, assess, or otherwise evaluate the land title records or the user's conclusions as to whether AULs or environmental liens were identified. The environmental professional only needs to identify whether they received land title records from the user and whether the user identified AULs or environmental liens.

ABACUS as the user did not report to us any environmental liens or Activity and Use Limitations (AULs) associated with the Subject Property. In addition, ABACUS in their response to the User Questionnaire indicated that they are *unaware* of any environmental cleanup liens against the Subject Property.

4.3 SPECIALIZED KNOWLEDGE

According to information provided by ABACUS in their response to the User Questionnaire, ABACUS does *not* have specialized knowledge information related to conditions, events, and/or activities at the Subject Property that could constitute environmental concerns or issues to the Subject Property.

4.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Based upon information provided by ABACUS in their response to the User Questionnaire, ABACUS is *not* aware of any commonly known or reasonably ascertainable information about the Property that is material to recognized environmental conditions in connection with the Property.

4.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

According to information provided by ABACUS in their response to the User Questionnaire, ABACUS is *not* aware of any environmental issues that would affect the present value of the property.

4.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

- Owner of Subject Property — Municipio de Yabucoa
P.O. Box 97
Yabucoa, P.R. 00767-0097
- Occupant Information: — Vacant
- Property Manager: — Same as owner

4.7 REASON FOR PERFORMING PHASE I

According to information provided to CES, this Phase I was performed as part of the CDBG-DR program environmental requirements.

This practice is intended to permit a user to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bonafide prospective purchaser* limitations on CERCLA liability (*land owner liability protection of LLPs*): that is, the practice constitutes all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial and customary practice, as defined by 42 U.S.C.§9601(35)(B).

4.8 OTHER INFORMATION

Other than the documents and information discussed in this report, no additional user information was provided to CES by the user during the preparation of this Phase I.

PRIVILEGED AND CONFIDENTIAL

5.0 RECORDS REVIEW

5.1 STANDARD ENVIRONMENTAL RECORD SOURCES

CES reviewed Federal and Commonwealth environmental regulatory agency lists, prepared by EDR and/or provided by the EPA, DNER, and Solid Waste Management Agency (SWMA). A copy of the EDR report and databases obtained are included in ***Appendix 5*** of this Phase I report. In addition, FRS database reviewed for this report is included in ***Appendix 6.*** These databases include other facilities that are outside the ASTM E1527-21 required database search radius. Therefore, only those facilities that are within the required database search radius are evaluated in this Phase I report.

The information obtained during our site visit, and published information were reviewed and evaluated in relation to principal environmental regulations that may expose site owners and/or operators to potential liabilities. Our regulatory review findings are presented in the following subsections of this report.

5.1.1 Resource Conservation & Recovery Information System (RCRIS)

Hazardous solid wastes are regulated by the Puerto Rico Regulation for the Control of Hazardous Wastes, as well as by the Federal Resource Conservation and Recovery Act (RCRA), Subtitle C. RCRA regulates the management of hazardous wastes including its generation, transportation, and treatment/storage/disposal (T/S/D). The US Environmental Protection Agency (EPA) catalogs and compiles lists of facilities that are regulated under the RCRA Subtitle C and makes these available through the RCRA Information System (RCRIS).

A review of the RCRIS database indicated the following:

- According to the reviewed databases, the Subject Property is *not* listed as a RCRA generator.
- According to the reviewed databases, there are *no* adjoining facilities listed as a RCRA generator.
- There are *no* facilities located within a *one-mile radius* of the Subject Property listed as Corrective Action (CORRACT) TSD facilities.
- There are *no* facilities located within *one half-mile radius* of the Subject Property listed as Non-CORRACTS TSD facilities.

5.1.2 Superfund Enterprise Management System (SEMS)

The Superfund Enterprise Management System (SEMS) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

The Superfund Enterprise Management System (SEMS-ARCHIVE) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps

will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the Federal Facility and SEMS database revealed the following:

- The Subject Property is *not* listed as a FEDERAL FACILITY or SEMS site.
- There are *no* facilities listed as SEMS sites *within a one-half mile radius* of the Subject Property.
- There are *no* facilities listed as FEDERAL FACILITY sites *within a one-half mile radius* of the Subject Property.
- There are *no* facilities listed as a SEMS-ARCHIVE sites located *within a one-half mile radius* of the Subject Property.

5.1.3 National Priorities List (NPL)

CERCLA established the NPL or federal superfund sites list**.** These are contaminated facilities to which the EPA has assigned a high ranking in terms of their potential health effects. The CERCLIS database also includes NPL sites. A review of the CERCLIS database indicated the following:

- The Subject Property is *not* on the NPL.
- There are *no* NPL sites located within a *one-mile radius* of the Subject Property.
- There are *no* delisted NPL sites located within a *one-half-mile radius* of the Subject Property.

5.1.4 Emergency Response Notification System (ERNS)

The ERNS is a list of hazardous material spills reported to various state and federal agencies. Our review of the ERNS report found that the Subject Property is *not* listed in the ERNS.

5.1.5 Petroleum Underground Storage Tanks (USTs) List

Petroleum USTs are subject to regulation under RCRA Subtitle I, which is administered by the DNER. CES utilizes EDR as an environmental database. EDR in turn obtains USTs and LUSTs information from the Puerto Rico Department of Natural and Environmental Resources (DNER) UST Program Inventory. CES reviewed the EDR database as well as the DNER USTs/LUSTs inventory, including the Puerto Rico Planning Board webpage (http://gis.jp.pr.gov/itr/http://jcagnet.jp.pr.gov/) which provides spatial coordinates for UST and LUST facilities.

A review of the DNER UST Registration List indicated the following:

- The Subject Property is *not* listed as a UST facility.
- There are *no* UST adjoining facilities listed as a UST facility.

The identification of the USTs facilities was based on the addresses included in the DNER UST List and our understanding of the general site area. USTs facilities that were listed with an incorrect or incomplete address might have not been able to be properly located.

5.1.6 Leaking Underground Storage Tanks (LUSTs) List

The DNER LUST list identifies known releases and other information (i.e. closure report submittals, performance of integrity tests, etc.) by facility. CES utilizes EDR as an environmental database. EDR in turn obtains USTs and LUSTs information from the Puerto Rico Department of Natural and Environmental Resources (DNER) UST Program Inventory. CES reviewed the EDR database as well as the latest DNER LUSTs inventory (https://www.drna.pr.gov/public-record-for-lust-sites/) which includes the LUST facilities.

A review of the DNER LUST list revealed that:

- The subject property is *not* listed in the LUST list.
- The following LUST facilities are *listed* within a *one-half mile radius* of the Subject Property:

  - Esso CO-266 with DNER ID. 86-1367 located at Calle Cristobal Colón 65 at approximately 0.24 miles to the south of the Subject Property. This facility has not been released by the DNER.

  - Texaco #264 with DNER ID. 86-1722 located at Carr 182 Salida San Lorenzo at approximately 0.22 miles to the west of the Subject Property. This facility has not been released by the DNER.

  - Independiente/Gulf with DNER ID. 86-0381 located at Carr. 901 Km. 0.5 at approximately 0.49 miles to the southeast of the Subject Property. This facility has not been released by the DNER.

The identification of the LUSTs facilities was based on the addresses included in the DNER LUST List and our understanding of the general site area. LUSTs facilities that were listed with an incorrect or incomplete address might have not been able to be properly located.

5.1.7 Solid Waste Landfills

The PRSWMA has compiled a list of known active landfills on the island. Based upon this list and our site visit observations:

- There are *no* registered state landfill and/or solid waste disposal sites located *within a one half-mile radius* of the Site.
- *No* obvious signs of present landfill activity were observed at the Subject Property.

5.1.8 Federal, State, and Tribal Institutional Control/Engineering Control Registries

The Federal, State and Tribal Institutional Control/Engineering Control Registries (ICECR) are registries of sites or facilities listed as having legal or physical restrictions or limitations on the use of, or access to the site or facility: (1) to reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil or ground water on the *property*, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to *hazardous substances* and *petroleum products* in the soil or groundwater on the property.

Our review of the EDR report indicates that at the time of the preparation of this report, the site was *not* listed in the Federal, State, and Tribal Institutional Control/Engineering Control Registries.

5.1.9 Facility Index System

The Facility Index System (FINDS) contains both facility information and '*pointers*' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Our review of the FINDS list indicates that the Subject Property *is not* listed in the FINDS.

5.1.10 Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program. However, ICIS is a secure system only available to EPA and state users. The public should use the Enforcement and Compliance History Online (ECHO). ECHO is a Web-based tool that provides public users with compliance monitoring and enforcement data.

Our review of the ICIS/ECHO, indicates that at the time of the preparation of this report, the Subject Property was *not* listed in ICIS/ECHO databases.

5.1.11 Federal, State and Tribal Brownfield Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on Brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions.

Our review of the US Brownfields sites database indicates that:

- The Subject Property is *not* listed in this database.
- There are *no* facilities listed as Brownfield sites located within *one-half mile radius* of the Subject Property.

5.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

As required by the ASTM E1527-21 Standard if the property or any of the adjoining properties is identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing should be reviewed. The Subject Property is not listed in the reviewee data resources. To further investigate the potential listing of the Subject Property and adjoining properties, CES reviewed the information included in the EPA FRS.

Our review of this information is presented in the following sections.

5.2.1 EPA Facility Registry Service (FRS)

The EPA Facility Registry Service allows citizens to retrieve a list of facilities registered with EPA, by conducting a database search with user defined search criteria. EPA FRS is part of the EPA EnviroFacts database system, which is a single point of access to select U.S. EPA environmental data. The website provides access to several EPA databases to provide with information about environmental activities that may affect air, water, and land anywhere in the United States.

Our review of the EPA FRS report found that the Subject Property is *not* listed in the FRS.

5.3 PHYSICAL SETTING SOURCES

Physical setting sources provide information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of a site.

5.3.1 USGS Topographic Map

According to the Topographic Map of the Yabucoa and Punta Tuna Quadrangles, the elevation at the Subject Property is approximately 20 meters above mean sea level (MSL). Presently, the Subject Property is developed and the topography is relatively flat with sloping terrain towards the north. The closest surface water body to the Subject Property is Caño de Santiago located approximately 225 feet to the north of the Subject Property.

5.3.2 USGS Geologic Map

According to the Geologic Map of the Yabucoa and Punta Tuna Quadrangles, the Subject Property consists entirely of Tonalite Facies of Granodiorite of San Lorenzo {Upper Cretaceous} (Klt) which is composed of plagioclase, potassium feldspar, quartz, hornblende, augite, biotite, magnetite, minor myrmekite, and accessory sphene, apatite, and zircon. (Roger, Cram, Pease, and Tischler, 1979).

5.3.3 USDA NRCS Soil Survey

According to the *Soil Survey of the Humacao Area, Puerto Rico Eastern Part,* the Subject Property soils are classified as Urban land (Ul). Urban land are miscellaneous areas.

5.3.4 USGS Atlas of Ground-Water Resources and Aquifer Systems

According to the Atlas of Ground-Water Resources in Puerto Rico and the US Virgin Islands, groundwater in the alluvial aquifers flows east in the Humacao-Naguabo and Yabucoa basins, and southeast in the Maunabo basin, towards the coast. Ground water may flow toward or away from streams, depending on the hydraulic gradient between the stream and the adjacent aquifer. Rivers

in the Yabucoa and Maunabo alluvial valleys drain the alluvial aquifer. Discharge from the alluvial aquifers into the streams represent 27 to 50 percent of the annual river flow in Yabucoa and Maunabo basins, respectively.

According to "Principal aquifers of Puerto Rico and the U.S. Virgin Islands" by Robert A. Renken, January 11, 1998, U.S. Geological Survey, the Subject Property is located overlying Volcaniclastic-, igneous-, and sedimentary-rock aquifers.

The groundwater depth and flow direction were not measured during this assessment. However, based upon the expected hydrogeological setting of the area the groundwater is inferred to flow towards the north towards the Caño Santiago.

The depth and gradient of the water table likely vary seasonally with changes in precipitation and may change significantly over time in response to development, including impervious surfaces, storm water controls, and pumping wells (domestic, industrial or irrigation). Based upon our experience during other groundwater investigations conducted at similar areas in Puerto Rico, it is not uncommon to encounter perched or local groundwater conditions in which the groundwater flow direction may be different from the expected and regional groundwater flow direction.

5.3.5 Flooding Conditions

According to the *Flood Insurance Rate Map*, Panel 1795 of 2160 (Map Numbers 72000C1795J) dated April 13, 2018, the Subject Property is located outside the 1% (100-year) and 0.2% (500-year) annual flood chance boundaries.

5.3.6 Wetlands

Section 404 of the Clean Water Act (CWA) establishes a program to regulate the discharge of dredged or fill material into waters of the United States, including wetlands. Activities in waters of the United States regulated under this program include filling for development, water resource projects (such as dams and levees), infrastructure development (such as highways and airports), and mining projects. Section 404 requires a permit before dredged or fill material may be discharged into waters of the United States unless the activity is exempt from Section 404 regulation (e.g. certain farming and forestry activities).

To verify if the proposed project area, may be located within regulated wetlands, CES evaluated the National Wetlands Inventory (NWI) established by the US Fish and Wildlife Service (FWS). The NWI was developed to conduct a nationwide inventory of U.S. wetlands to provide biologists and others with information on the distribution and type of wetlands to aid in conservation efforts. To do this, the NWI developed a wetland classification system (Cowardin et al. 1979) that is now the official FWS wetland classification system and the Federal standard for wetland classification (adopted by the Federal Geographic Data Committee on July 29, 1996: 61 Federal Register 39465).

The NWI also developed techniques for mapping and recording the inventory findings. The NWI relies on trained image analysts to identify and classify wetlands and deep-water habitats from aerial imagery. As computerized mapping and geospatial technology evolved, NWI discontinued production of paper maps in favor of distributing data via online "mapping tools" where information can be viewed and downloaded. Today, FWS serves its data via an on-line data discovery "Wetlands Mapper". GIS users can access wetlands data through an online wetland mapping service or download data for various applications (maps, data analyses, and reports).

According to the US Fish and Wildlife Services national wetland inventory map, no wetlands are identified at the Subject Property. During our site reconnaissance we did not identify any wetland type vegetation in the Subject Property.

5.4 HISTORICAL USE INFORMATION ON THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

This report describes, to the extent possible, all identified uses, and justifies the earliest date identified for the subject property's first developed use, or back to 1940, whichever is earlier (for example, records showed no development of the subject property prior to the specific date).

According to the ASTM Standard, the following standard historical resources shall be reviewed if, based on the judgment of the environmental professional, they are reasonably ascertainable, likely to be useful, and applicable to the subject property: (1) aerial photographs, (2) fire insurance maps, (3) local street directories, and (4) historical topographic maps. In cases in which any of the preceding four standard historical resources are not reviewed, the environmental professional shall indicate in the report why such a review was not conducted.

In addition, the Property Tax Files obtained from Centro de Recaudaciones de Ingresos Municipales (CRIM) database, https://catastro.crimpr.net/cdprpc/, and use permits and Zoning/Land Use Records obtained from the Puerto Rico Planning Board online database (http://gis.jp.pr.gov/itr/), were review (if available).

According to the Sanborn Fire Insurance Maps Online Checklist published by the Sanborn Map Company, the maps are based upon the Library's 1981 publication Fire Insurance Maps in the Library of Congress. The online presentation includes entries from all 50 United States, as well as Canada, Mexico, Cuba sugar warehouses, and U.S. whiskey warehouses. However, Puerto Rico is

not included in this database. Therefore, the review of Sanborn fire insurance maps was considered not reasonably ascertainable and was not included as part of this Phase I.

According to the Library of the U.S. Congress (https://www.loc.gov/rr/genealogy/bib_guid/telephon.html), there are no current city directories for many major U.S. cities. It is our experience that there is no local street directories centralized digital record for Puerto Rico. Therefore, the review of city directories was considered not reasonably ascertainable and was not included as part of this Phase I.

5.4.1 Historical Aerial Photographs

In the 1937 photograph, the Subject Property and surrounding areas were already developed as part of the Yabucoa town core. A large square shaped building is observed located on the Subject Property. No details of the specific use that was given to the Subject Property at this time was available during the preparation of this Phase I. However, based on our experience with other similar facilities located at this time in other municipality town cores in Puerto Rico, it may have been used for residential and/or as a retail business. In addition, based on the information obtained from Mr. Luciano Rosario a longtime neighbor who has known the Subject Property for more than 60 years, he understands that the Subject Property was always used as a supermarket. The Yabucoa Town core public square and catholic church are observed to the south of the Subject Property. The Luis Muñoz Rivera Street is also observed to the south of the Subject Property.

In the *1951 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in the 1937. Based on the information obtained during this Phase I, it appears the that at this time the Subject Property was used as a supermarket.

In the *1965 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in 1951. Based on the information obtained during this Phase I, it appears the that at this time the Subject Property was used as a supermarket.

In the *1977 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in 1965. Based on the information obtained during this Phase I, it appears the that at this time the Subject Property was used as a supermarket.

In the *1988 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in the 1977. Based on the information obtained from the owner's representative and the interviewed neighbor, at this time the Subject Property was used as a supermarket.

In the *1990 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in 1988. Based on the information obtained from the owner's representative and the interviewed neighbor, at this time the Subject Property was used as a supermarket.

In the *2002 Google Earth*® aerial photograph*,* the Subject Property and adjoining properties' conditions are similar to those observed in 1990. Based on the information obtained from the owner's representative and the interviewed neighbor, at this time the Subject Property was used as a supermarket.

In the *2006 Google Earth*® aerial photograph*,* the Subject Property and adjoining properties' conditions are similar to those observed in 2002. Based on the information obtained from the owner's representative and the interviewed neighbor, at this time the Subject Property was already vacant and with no specific use.

The 2012 *Google Earth*® aerial photograph indicates that site conditions and surroundings are similar to those observed in the 2006 photograph. Based on the information obtained from the owner's representative and the interviewed neighbor, at this time the Subject Property was already vacant and with no specific use.

The 2017 *Google Earth*® aerial photograph indicates that site conditions and surroundings are similar to those observed in the 2012 photograph. Based on the information obtained from the owner's representative and the interviewed neighbor, at this time the Subject Property was already vacant and with no specific use.

In the *2024 Google Earth*® aerial photograph site and surrounding conditions are similar to those observed at the time of the site visit.

5.4.2 Historical USGS Topographic Maps

In the 1946 *Topographic Map* a small structure is shown at the Subject Property. The Subject Property is illustrated as an urban area which is part of the Yabucoa town core.

In the 1960 (rev 1982) *Topographic Map,* a small structure is shown at the Subject Property. The Subject Property is illustrated as an urban area which is part of the Yabucoa town core.

In the 2018 *Topographic Map,* a small structure is shown at the Subject Property. The Subject Property is illustrated as an urban area which is part of the Yabucoa town core.

5.4.3 Puerto Rico Planning Board Listed Uses and Permits

According to the Puerto Rico Planning Board online database (http://gis.jp.pr.gov/itr/), the following uses and permits are listed for the Subject Property and adjoining properties:

Property	Listed Permits Description
Subject Property	• VENTA DE PRODUCTOS DE BELLEZA Y SALON DE BELLEZA. • VENTA DE CARTERAS, ZAPATOS Y ACCESORIOS • HEAD START • BARBERIA • OFICINA PROGRAMA DE VISTA • ALMACEN SUPERMERCADO-CARNICERIA CON VENTA DE BEBIDAS ALCOHOLICAS SELLADAS • SUPERMERCADO CON VENTA DE BEBIDAS ALCOHOLICAS SELLADAS CARNICERIA Y VENTAS AL POR MAYOR DE PROVISION... • ESTABLECIMIENTO PARA VENTA DE TELAS Y ACCESORIOS DE COSTURAS
Adjoining Property North	• Not Available (various residential properties)
Adjoining Property South	• (PARROQUIA SANTOS ANGELES CUSTODIOS)
Adjoining Property East	• No Information Available
Adjoining Property West	• VENTA DE PRODUCTOS DE BELLEZA Y SALON DE BELLEZA. • VENTA DE CARTERAS, ZAPATOS Y ACCESORIOS • HEAD START • BARBERIA • OFICINA PROGRAMA DE VISTA • ALMACEN SUPERMERCADO-CARNICERIA CON VENTA DE BEBIDAS ALCOHOLICAS SELLADAS • ESTABLECIMIENTO PARA VENTA DE TELAS Y ACCESORIOS DE COSTURAS

5.4.4 Puerto Rico Property Municipal Tax Files

According to the CRIM database, https://catastro.crimpr.net/cdprpc/, the Subject Property and adjoining properties' cadastral identification numbers are:

Cadastral Identification	Owner	Previous Owner	Transaction Date
376-040-013-10-001 (Subject Property)	MARTINEZ FERNANDEZ Y CO	No Information Available	No Information Available
Various (North Adjoining Property)	Residential Properties	Residential Properties	Residential Properties
376-040-013-09-001 (East Adjoining Property)	MEDINA DE CARABALLO JOSEFINA	No Information Available	No Information Available
376-040-017-07-000 (South Adjoining Property)	IGLESIA CATOLICA SANTOS ANGELES CUSTODIO	IGLESIA CATOLICA	12/16/2015
376-040-013-10-002 (West Adjoining Property)	VILAR PORRATA ISMAEL DR	No Information Available	No Information Available

5.4.5 Land Use

According to the Puerto Rico Planning Board Zone Maps, the Subject Property is classified C-I: (Comercial Intermedio).

5.4.6 Historic Profile Interview

Interviews with one or more persons knowledgeable about the past uses of the Subject Property, Adjoining Properties, or the surrounding area may provide information about the past uses of the subject property and adjoining properties.

During the preparation of this report, Mr. Luis Rivera of the Municipality of Yabucoa who has known the project area and surroundings for more than 40 years was interviewed as the owner's representative. In addition, Mr. Luciano Rosario a longtime neighbor who has known the Subject

Property for more than 60 years, was interviewed. According to the information provided by Mr. Rivera and Mr. Rosario, the Subject Property was previously used as supermarket.

5.4.7 Historical Uses Summary

From the information provided by the owner representatives and neighbor, no environmental sensitive operations such as gasoline stations, industrial manufacturing, or dry-cleaning activities have been conducted at the Subject Property or adjoining properties.

We note that although there are gaps of greater than 5 years in the historical review of the Subject Property, during those gaps the subject property appears unchanged. Therefore, we understand that this gap *should not* represent a significant concern or gap for the Subject Property.

5.5 FIRE DEPARTMENT FILES REVIEW

In Puerto Rico, the DNER is the state agency that holds records regarding fuel tanks, hazardous materials, incidents, spills, violations or petroleum/chemical releases that can represent potential environmental concerns. Other departments, such as the Fire and Police departments, Planning Department and others typically do not contain information that are associated with environmental concerns that could be of use for the preparation of the Phase I report. According to the *Cuerpo de Bomberos de PR* (PR Fire Department) this agency does not maintain a digital record of environmental emergencies for individual facilities. They maintain a record of emergencies and activities that they conduct based on the date of occurrence of the incident. They do not keep records that would make reference to the location of the properties or the geographic area where the properties are located. Therefore, for purpose of the preparation of this Phase I such records are considered not practically reviewable.

PRIVILEGED AND CONFIDENTIAL

6.0 SITE RECONNAISSANCE

6.1 METHODOLOGY AND LIMITING CONDITIONS

A visual reconnaissance of the Subject Property and surrounding areas was performed by engineers Raúl Colón Vicenty and Luis R. Colón Morales of CES on July 15, 2025. CES observed accessible areas of the Subject Property to assess obvious visual indications of present or past activities or conditions that have or could have impacted the Subject Property.

The method used to observe the Subject Property consisted of walking along property perimeter boundaries and within the property limits. The site visit included the following visual inspections: the Subject Property by walking transects; the exterior perimeter of the property; the building interior. Site settings and conditions were documented with photographs as appropriate.

Site settings and conditions were documented with photographs as appropriate.

6.2 GENERAL SITE SETTING

At the time of CES visit, the Subject Property was observed to consist of a vacant two-story plus basement concrete building. Additional information and description of the Site's setting, characteristics, uses, and improvements are included in *Section 3.2* of this report. A Site Sketch, showing the Site's features, general settings, and surroundings are provided in ***Appendix 2***.

6.3 EXTERIOR AND INTERIOR OBSERVATIONS

The following sections describe observations made by CES personnel during the Site reconnaissance.

6.3.1 Potable Water, Wastewater, and Stormwater

At the time of the site reconnaissance, the Subject Property was observed to have potable water and wastewater infrastructure installed. Based on our observations and the information provided by the municipality's representative, the potable water is supplied to the Subject Property by the Puerto Rico Aqueduct and Sewer Authority (PRASA) potable water distribution system.

Based on the information provided by the municipality's representative, the wastewater previously generated included wastewater from the bathroom inside the building. Reportedly, the wastewater were discharged into the PRASA sanitary sewer system.

No signs of stains or releases were observed along the stormwater flow paths and drains.

6.3.2 Toxic Substances

6.3.2.1 Polychlorinated Biphenyl's

Prior to the 1979, PCBs entered the environment during their manufacture and use in the United States. Today PCBs can still be released into the environment from poorly maintained hazardous waste sites that contain PCBs, illegal or improper dumping of PCB wastes, leaks or releases from electrical transformers and hydraulic equipment containing PCBs and hydraulic equipment, and disposal of PCB-containing consumer products into municipal or other landfills not designed to handle hazardous waste. PCBs may also be released into the environment by the burning of some wastes in municipal and industrial incinerators.

At the time of our site reconnaissance, no suspect PCBs containing equipment was observed installed at the Subject Property. However, during a previous site inspection conducted by CES on

January 28, 2025 a vandalized electrical substation in deteriorated conditions was observed inside the building and three disconnected electrical transformers were observed at the 1st floor. According to the information provided by ABACUS, this substation and transformers were removed from the Subject Property. Stain surfaces were observed in the former electrical substation and disconnected electrical transformers surroundings which could be the result of spills or releases from the transformers (***Photographs 10*** and ***11***).

Part 761 of Title 40 of the Code of Federal Regulations (CFR) define PCBs as any chemical substance that is limited to the biphenyl molecule that has been chlorinated to varying degrees or any combination of substances which contains such substances. The regulations categorize PCB Transformers as: Non-PCB (less than 50 ppm), PCB-contaminated (50-500 ppm), and PCB (greater than 500 ppm). PCB-Contaminated Transformers contain PCBs at concentrations greater than or equal to 50 ppm and less than 500 ppm. Indoor solid surfaces and high-contact outdoor solid surfaces, defined as high contact residential/commercial surfaces under § 761.123, shall be cleaned to 10 µg/100 cm^2 (as measured by standard wipe tests). Soil contaminated by a PCB spill needs to be decontaminated to 10 ppm PCBs by weight provided that soil is excavated to a minimum depth of 10 inches. The excavated soil will be replaced with clean soil, i.e., containing less than 1 ppm PCBs, and the spill site will be restored (e.g., replacement of turf). We note that the DNER may have lower limits for the requirement of remediation of PCB impacted media.

6.3.2.2 Asbestos Containing Materials (ACM)

Building construction materials such as vinyl floor tiles (VFTs), acoustic ceiling tiles (ACTs), thermal system insulation (TSI), sprayed-on ceiling material, roofing material and others are known to have been manufactured with asbestos in the past. The scope of work of this Phase I was limited to visual observations of accessible areas and did not include the collection and laboratory analysis of bulk samples of suspect ACMs. Suspect ACMs may be present in inaccessible areas,

including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, interior of machinery or equipment, and water or sewer systems.

An asbestos-containing materials survey was conducted by Nortol Environmental & Occupational Safety, Inc. on January 28 and March 19, 2025. The survey indicates that Nortol identified asbestos-containing materials and bulk samples were collected and submitted for laboratory analysis. About 7,000 ft² of roofing sealer materials and about 4,000 ft² of vinyl floor tiles (and/or its mastic layer) resulted positive (>1%) to asbestos-containing material. The survey also classifies the asbestos-containing material as damaged.

6.3.2.3 Lead Based Paint (LBP)

Buildings constructed before 1978, are known to have been painted with lead-based paint. Lead from paint, chips, and dust can pose serious health hazards if not taken care of properly. A Lead Based Paint survey was conducted by Nortol Environmental & Occupational Safety, Inc. on on January 28 and March 19, 2025. The survey indicates that Lead-glazed ceramic wall tiles (which are regulated as LBP in Puerto Rico) were found in the bathrooms.

6.3.3 Non-Hazardous Solid Wastes

At the time of our site reconnaissance, no solid wastes were observed generated at the Subject Property. Accumulation of discarded materials were observed inside the building (***Photographs 12*** through ***16***). No evidence of hazardous substances or petroleum products releases in connection with these wastes was observed.

6.3.4 Used Oil

At the time of our site reconnaissance, no used oil generation or storage was observed.

6.3.5 Aboveground Storage Tanks (ASTs)

At the time of our site reconnaissance, no ASTs were observed.

6.3.6 Hazardous Wastes

At the time of our site reconnaissance, no Hazardous Wastes generation or storage was observed. According to Mr. Rivera, he is not aware that hazardous wastes have been generated or stored at the Subject Property. Accumulations of a few discarded fluorescent lamps (***Photographs 17, 18,*** and ***19***) were observed either broken or inappropriately store inside the building. It is known that tubular fluorescent bulbs may contain amounts of metals such as mercury.

6.3.7 Underground Storage Tanks (USTs)

At the time of our site reconnaissance, no visual evidence of USTs was identified at the Subject Property. According to Mr. Rivera, he is not aware that an UST is located at the Subject Property.

6.3.8 Air Emission Sources

At the time of our site reconnaissance, no Air Emission Sources were observed at the Subject Property.

6.3.9 Underground Injection Control (UIC) Units

At the time of our site reconnaissance, no visual evidence of UICs was identified on the Subject Property. According to Mr. Rivera, he is not aware that an UIC is located at the Subject Property.

6.3.10 Miscellaneous Containers with Chemicals, Petroleum, and Unknown Products

At the time of the site reconnaissance, no Miscellaneous Containers with Chemicals, Petroleum, and Unknown Products were observed at the Subject Property.

6.3.11 Drums, Totes, and Intermediate Bulk Containers

At the time of the site reconnaissance, no drums, totes or bulk containers were observed at the Subject Property.

6.3.12 Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances or Petroleum Products

At the time of the site reconnaissance, water pools or standing water areas were observed at the Subject Property.

6.3.13 Strong, Pungent, or Noxious Odors and Their Sources

At the time of our site reconnaissance, no suspect or pungent odors were perceived at the Subject Property.

6.3.14 Areas of Stained Soil, Concrete Floor and/or Pavement

Other than the stained surfaces described in Section 6.3.2.1, at the time of the site reconnaissance, no other Areas of Stained Floor, Concrete Floor and/or Pavement were observed at the Subject Property.

6.3.15 Stressed Vegetation

At the time of the site reconnaissance, no signs of stressed vegetation were observed at the Subject Property.

6.3.16 Drains and Sumps

At the time of the site reconnaissance, no drains or sumps were observed at the Subject Property.

6.3.17 Pits, Ponds, and Lagoons

At the time of the site reconnaissance, CES did not observe any pits, ponds or lagoons at the Subject Property.

6.3.18 Stains or Corrosion on Floors, Walls, or Ceilings

At the time of the site reconnaissance, other than water stains and mold, *no* areas of stained equipment, walls, or suspect corrosion were observed at the Subject Property.

6.3.19 Wells

At the time of the site reconnaissance, CES did not observe any wells at the Subject Property. According to Mr. Rivera, he is not aware of the presence of any wells located at the Subject Property.

6.3.20 Per- and Polyfluoroalkyl (PFAS)

According to EPA information, PFAS are widely used, long lasting chemicals, components of which break down very slowly over time. These are manufactured chemicals that have been used for more than 50 years. There are thousands of PFAS chemicals, and they are found in many different consumer, commercial, and industrial products (https://www.epa.gov/pfas). However, presently these chemicals are not listed as hazardous substances under CERCLA. We note that presently Puerto Rico does not have any regulations or guidance related to PFAS impacts or assessment requirements.

PFASs have been used to provide water, oil, and stain repellency to textiles, carpets, and leather; to create grease-proof and water-proof coatings for paper plates and food packaging; and to aid processing in fluoropolymer manufacturing among many other commercial and consumer applications. They also have been used in chrome plating, firefighting foams, liquid carpet and textile care treatments, and floor waxes and sealants (CECBP 2015).

PFAS chemicals have been widely used, among others, by the following industries:

- Aviation, aerospace & defense
- Household products
- Biocides
- Metal plating

- Cable & wiring
- Oil and mining production
- Construction products (paints and coatings)
- Paper and packaging
- Electronics
- Polymerization
- Fire-fighting
- Textiles, leather and apparel
- Food processing

The manufacture, use, and disposal of items from these industries can contribute to PFAS environmental occurrence. Additional information on potential commercial sources can be found in UNEP (2015), which provides in-depth information on the kinds of articles that might contain PFOS and related chemicals; lists the industries that use and produce the chemicals; describes the supply chain (suppliers, importers and exporters, producers, manufacturers, downstream users); and discusses product end-of-life and recycling relevant to waste, stockpiles, and contaminated sites.

Water resources (i.e., surface water and groundwater) are susceptible to contamination by PFAS release from manufacturing sites, industrial use, aircraft fire and emergency response training areas, and industrial or municipal waste sites where products are disposed of or applied. PFOA and other PFASs have been reported in wastewater and biosolids as a result of manufacturing activities, disposal of coated paper and other consumer products, and from washing stain-repellant fabrics (https://clu-in.org/contaminantfocus/default.focus/sec/Per-_and_Polyfluoroalkyl_Substances_(PFASs)/cat/Occurrence/).

According to the information available for the Subject Property, the disposal of PFAS within the property appears *unlikely*.

6.3.21 Heating/Cooling

The climate of Puerto Rico falls into the tropical climatic zone. Temperatures are moderate year-round, averaging near 80 °F (27 °C) in lower elevations and 70 °F (21 °C) in the mountains, for this reason no heating of the buildings is required. Cooling is typically provided by electrical cooling systems that do not require fuel (oil/gas) sources that may have been stored in aboveground or underground storage tanks.

6.3.22 Suspect Concrete Slab

A suspect concrete slab was observed on the basement (***Photograph 20***). Mr. Rivera indicated he is not aware of what is the purposes of this slab and could not confirm if this slab is associated with an existing or former underground regulated structure such as a septic tank system. Should this structure be associated with a regulated UIC, then it should be properly closed following the DNER UIC regulation

6.4 NON-SCOPE CONSIDERATIONS

No considerations outside the scope of the ASTM E1527-21 practice and the AAI Standards were assessed as part of this Phase I except for the general information provided for the following issues:

- Asbestos Containing Building Materials
- Lead-based paint
- Limited Regulatory Compliance Observations
- PFAS
- Wetlands

PRIVILEGED AND CONFIDENTIAL

7.0 INTERVIEWS

7.1 INTERVIEW WITH OWNER

CES conducted a telephone interview with Mr. Luis Rivera designated as the authorized representative of the Municipality of Yabucoa. During the interview, Mr. Rivera was questioned in relation to the following environmental concerns: (1) any pending, threatened or past litigation relevant to hazardous substances or petroleum products in, on or from the property or vicinity; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property or vicinity; and (3) any notices from any governmental entity regarding any possible violations of environmental laws or possible liability relating to hazardous substances or petroleum products in connection with the subject property or its surroundings.

Mr. Rivera stated that to the best of his knowledge, there are *no* environmental concerns that he is aware of associated with the Subject Property.

7.2 INTERVIEW WITH SITE OCCUPANTS

The Subject Property was vacant at the time of the site visit.

7.3 INTERVIEW WITH SITE MANAGER

Same as *Section 7.1*.

7.4 INTERVIEW WITH GOVERNMENT OFFICIALS

On July 15, 2025, CES submitted a letter to the DNER's inquiring about spills or environmental emergencies reported for the Sites, or assessments conducted at the Sites or nearby areas. However, no information was provided in the DNER response of an event that could have affected the Subject Property.

7.5 INTERVIEW WITH OTHERS

During the site visit, we could interview Mr. Luciano Rosario, a long-time neighbor. Mr. Rosario indicated that he has known the Subject Property for more than 60 years and, to the best of his knowledge, the Subject Property was previously used as a supermarket. No other persons were interviewed during the preparation of this Phase I report.

PRIVILEGED AND CONFIDENTIAL

8.0 FINDINGS AND OPINIONS

Based on the findings of our Phase I of the subject property, we offer the following comments and opinions relative to potential environmental concerns:

8.1 ON-SITE FINDINGS

- **Polychlorinated Biphenyl's**

  Prior to the 1979, PCBs entered the environment during their manufacture and use in the United States. Today PCBs can still be released into the environment from poorly maintained hazardous waste sites that contain PCBs, illegal or improper dumping of PCB wastes, leaks or releases from electrical transformers and hydraulic equipment containing PCBs and hydraulic equipment, and disposal of PCB-containing consumer products into municipal or other landfills not designed to handle hazardous waste. PCBs may also be released into the environment by the burning of some wastes in municipal and industrial incinerators.

  At the time of our site reconnaissance, no suspect PCBs containing equipment was observed installed at the Subject Property. However, during a previous site inspection conducted by CES on January 28, 2025 a vandalized electrical substation in deteriorated conditions was observed inside the building and three disconnected electrical transformers were observed at the 1st floor. According to the information provided by ABACUS, this substation and transformers were removed from the Subject Property. Stain surfaces were observed in the former electrical substation and disconnected electrical transformers surroundings which could be the result of spills or releases from the transformers.

  Part 761 of Title 40 of the Code of Federal Regulations (CFR) define PCBs as any chemical substance that is limited to the biphenyl molecule that has been chlorinated to varying degrees or any combination of substances which contains such substances. The regulations categorize PCB Transformers: Non-PCB (less than 50 ppm), PCB-contaminated (50-500 ppm), and PCB (greater than 500 ppm). PCB-Contaminated Transformers contain PCBs at concentrations greater than or equal to 50 ppm and less than 500 ppm. Indoor solid surfaces and high-contact outdoor solid surfaces, defined as high contact residential/commercial surfaces under § 761.123, shall be cleaned to 10 µg/100 cm^2 (as measured by standard wipe tests). Soil contaminated by a PCB spill needs to be decontaminated to 10 ppm PCBs by weight provided that soil is excavated to a minimum depth of 10 inches. The excavated soil will be replaced with clean soil, i.e., containing less than 1 ppm PCBs, and the spill

site will be restored (e.g., replacement of turf). We note that the DNER may have lower limits for the requirements for remediation of PCB impacted media.

Therefore, the observed stains observed on the former vandalized electrical substation area and the former three disconnected electrical transformers area ***represent a REC*** for the Subject Property.

- **Asbestos Containing Materials (ACM) and Lead Based Paint (LBP)**

  An asbestos-containing materials survey was conducted by Nortol Environmental & Occupational Safety, Inc. on January 28 and March 19, 2025. The survey indicates that Nortol identified asbestos-containing materials and bulk samples were collected and submitted for laboratory analysis. About 7,000 ft² of roofing sealer materials and about 4,000 ft² of vinyl floor tiles (and/or its mastic layer) resulted positive (>1%) to asbestos-containing material. The survey also classifies the asbestos-containing material as damaged. Also, a Lead Based Paint survey was conducted by Nortol Environmental & Occupational Safety, Inc. on on January 28 and March 19, 2025. The survey indicates that Lead-glazed ceramic wall tiles (which are regulated as LBP in Puerto Rico) were found in the bathrooms.

  According to 40 CFR 302.4, Lead and Asbestos (friable forms only) is listed as a hazardous substance subject to CERCLA. Based on the observed deteriorated building conditions, the detected ACM and LBP may be easily detached, or some has already been detached, from the building and represents a release or threat of release into the environment. Therefore, until ACM and LBP is properly mitigated, this ***represents a REC*** for the Subject Property.

- **Non-Hazardous Solid Wastes**

  At the time of our site reconnaissance, no solid wastes were observed generated at the Subject Property. Accumulation of discarded materials were observed inside the building. No evidence of hazardous substances or petroleum products releases in connection with these wastes was observed. Therefore, the observed wastes ***do not*** represent a REC for the Subject Property. However, until all of the solid wastes are properly disposed of, this *represents a BER* for the Subject Property.

- **Hazardous Wastes**

  At the time of our site reconnaissance, no Hazardous Wastes generation or storage was observed. According to Mr. Rivera, he is not aware that hazardous wastes have been generated or stored at the Subject Property. Accumulations of a few discarded fluorescent

lamps were observed either broken or inappropriately store inside the building. It is known that tubular fluorescent bulbs may contain amounts of metals such as mercury. The observed limited number of fluorescent lamps are considered as a *de minimis* condition and ***do not*** represent a REC for the Subject Property. However, until all of the observed discarded lamps are properly disposed of *this represents a BER* for the Subject Property.

- **Per- and Polyfluoroalkyl (PFAS)**

  According to EPA information, PFAS are widely used, long lasting chemicals, components of which break down very slowly over time. These are manufactured chemicals that have been used for more than 50 years. There are thousands of PFAS chemicals, and they are found in many different consumer, commercial, and industrial products (https://www.epa.gov/pfas). However, presently these chemicals are not listed as hazardous substances under CERCLA. We note that presently Puerto Rico does not have any regulations or guidance related to PFAS impacts or assessment requirements.

  PFASs have been used to provide water, oil, and stain repellency to textiles, carpets, and leather; to create grease-proof and water-proof coatings for paper plates and food packaging; and to aid processing in fluoropolymer manufacturing among many other commercial and consumer applications. They also have been used in chrome plating, firefighting foams, liquid carpet and textile care treatments, and floor waxes and sealants (CECBP 2015).

  According to the information available for the Subject Property, the disposal of PFAS within the property appears *unlikely*.

- **Suspect Concrete Slab**

  A suspect concrete slab was observed on the basement. Mr. Rivera indicated he is not aware of what is the purposes of this slab and could not confirm if this slab is associated with an existing or former underground regulated structure such as a septic tank system. Should this structure be associated with a regulated UIC, then it should be properly closed following the DNER UIC regulation. The uncertainty regarding this concrete slab *represents a BER* for the Subject Property.

8.2 OFF-SITE FINDINGS

- **Leaking Underground Storage Tanks (LUSTs) List**

  The following LUST facilities are *listed* within a *one-half mile radius* of the Subject Property:

  - Esso CO-266 with DNER ID. 86-1367 located at Calle Cristobal Colón 65 at approximately 0.24 miles to the south of the Subject Property. This facility has not been released by the DNER. Based on the hydrogeological setting of the area, this LUST facility appears to be located side-gradient from the Subject Property. Therefore, based on the distance from the Subject Property, this LUST facility does ***not*** represent a REC for the Subject Property.

  - Texaco #264 with DNER ID. 86-1722 located at Carr 182 Salida San Lorenzo at approximately 0.22 miles to the west of the Subject Property. This facility has not been released by the DNER. Based on the hydrogeological setting of the area, this LUST facility appears to be located side-gradient from the Subject Property. Therefore, based on the distance from the Subject Property, this LUST facility does ***not*** represent a REC for the Subject Property.

  - Independiente/Gulf with DNER ID. 86-0381 located at Carr. 901 Km. 0.5 at approximately 0.49 miles to the southeast of the Subject Property. This facility has not been released by the DNER. Based on the hydrogeological setting of the area, this LUST facility appears to be located side-gradient from the Subject Property. Therefore, based on the distance from the Subject Property, this LUST facility does ***not*** represent a REC for the Subject Property.

Our opinion regarding the potential concern that these off-sites facilities may represent for the Subject Property is based upon the requirements of the ASTM screening process. We note that even if there is the potential that contaminants from the above-mentioned off-sites facilities have reached groundwater or vapors underlying the Subject Property, information contained in EPA's Final Policy Toward Owners of Property Containing Contaminated Aquifers (60 FR 34790, July 3, 1995), provides ways to manage such unlikely scenario. In general, this policy states that the EPA will not take enforcement action against a property owner to require clean up or the payment of clean-up costs where: (1) hazardous substances have come to the property solely as a result of subsurface migration in an aquifer from a source outside the property, (2) the landowner did not

cause, contribute to, or aggravate to the source of contamination and (3) the person that caused the release is not an agent or employee of the landowner, and was not in a direct or indirect contractual relationship with the landowner. A complete copy of this EPA policy can be obtained at the EPA web-site such as (https://www.epa.gov/enforcement/guidance-owners-property-containing-contaminated-aquifers).

8.3 VAPOR MIGRATION

CES reviewed reasonably ascertainable information for the Subject Property and nearby properties limited to the standard environmental record sources discussed in Section 5.1 of this report, for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present and could impact the Subject Property.

Based on the review of available resources as documented in this report, CES ***did not*** identify a REC associated with a vapor-phase migration.

PRIVILEGED AND CONFIDENTIAL

9.0 DATA GAPS

According to the ASTM E1527-21, *a data gap* is defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance and interviews.

During the preparation of this Phase I report, no data gaps were identified, except for the following;

- **Interview with Government Officials –** On July 15, 2025, CES submitted a letter to the DNER's inquiring on spills or environmental emergencies reported for the Subject Property, or assessments conducted at the Sites or nearby areas. At the time this report was written no response from the DNER had been received. We understand that additional information provided by the DNER in response to this letter would not change significantly the opinions and conclusions included in this Phase I report. Therefore, this ***should not*** be considered as a significant data gap. However, CES reserves the right to change or modified this report as needed based upon any additional information provided by the DNER.

PRIVILEGED AND CONFIDENTIAL

10.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the PLOT C [FINCA 952 (Mercantil Fernández)] located at the 47 Luis Muñoz Rivera Street, within the Pueblo Ward of the Yabucoa Municipality in Puerto Rico. PLOT C [FINCA 952 (Mercantil Fernández)] covers an area of approximately 596.33 square meters (m²) (0.1517"*cuerdas*") and is improved with a vacant two-story plus basement concrete building. It is our understanding that PLOT C is part of a rehabilitation project that will convert this vacant property into a Social Center of Art and Music. Any exceptions to, or deletions from, this practice are described in *Section 2.4* of this report.

This assessment has revealed the following recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the Subject Property:

Recognized Environmental Conditions

- **Stained Surfaces at the Former Electrical Substation and Electrical Transformers**

  At the time of our site reconnaissance, no suspect PCBs containing equipment was observed installed at the Subject Property. However, during a previous site inspection conducted by CES on January 28, 2025 a vandalized electrical substation in deteriorated conditions was observed inside the building and three disconnected electrical transformers were observed at the 1st floor. According to the information provided by ABACUS, this substation and transformers were removed from the Subject Property. However, stain surfaces were still observed on the former electrical substation and disconnected electrical transformers surroundings which could have been the result of spills or releases from the transformers.

  Part 761 of Title 40 of the Code of Federal Regulations (CFR) define PCBs as any chemical substance that is limited to the biphenyl molecule that has been chlorinated to varying degrees or any combination of substances which contains such substances. The regulations categorize PCB Transformers as: Non-PCB (less than 50 ppm), PCB-contaminated (50-

500 ppm), and PCB (greater than 500 ppm). PCB-Contaminated Transformers contain PCBs at concentrations greater than or equal to 50 ppm and less than 500 ppm. Indoor solid surfaces and high-contact outdoor solid surfaces, defined as high contact residential/commercial surfaces under § 761.123, shall be cleaned to 10 µg/100 cm^2 (as measured by standard wipe tests). Soil contaminated by a PCB spill needs to be decontaminated to 10 ppm PCBs by weight provided that soil is excavated to a minimum depth of 10 inches. The excavated soil will be replaced with clean soil, i.e., containing less than 1 ppm PCBs, and the spill site will be restored (e.g., replacement of turf). We note that the DNER may have lower limits for the requirement of remediation of PCB impacted media.

Therefore, the observed stained areas at the former vandalized electrical substation area and the former storage area of the three disconnected electrical transformers area ***represents a REC*** for the Subject Property.

- **Asbestos Containing Materials (ACM) and Lead Based Paint (LBP)**

  An asbestos-containing materials survey was conducted by Nortol Environmental & Occupational Safety, Inc. on January 28 and March 19, 2025. The survey indicates that Nortol identified asbestos-containing materials and bulk samples were collected and submitted for laboratory analysis. About 7,000 ft² of roofing sealer materials and about 4,000 ft² of vinyl floor tiles (and/or its mastic layer) resulted positive (>1%) to asbestos-containing material. The survey also classifies the asbestos-containing material as damaged. Also, a Lead Based Paint survey was conducted by Nortol Environmental & Occupational Safety, Inc. on on January 28 and March 19, 2025. The survey indicates that Lead-glazed ceramic wall tiles (which are regulated as LBP in Puerto Rico) were found in the bathrooms.

  According to 40 CFR 302.4, Lead and Asbestos (friable forms only) is listed as a hazardous substance subject to CERCLA. Based on the observed deteriorated building conditions, the detected ACM and LBP may be easily detached from the building, or some have been already detached from the building and represents a release or threat of release into the environment. Therefore, until ACM and LBP is properly mitigated, this ***represents a REC*** for the Subject Property.

Controlled Recognized Environmental Conditions

- None

Significant Data Gaps

- None

In compliance with §312.31 (b) of the AAI final rule and §12.8 of the ASTM E1527-21, it is our opinion that additional appropriate investigation will be required to confirm the presence of petroleum products and/or hazardous substances associated with the abovementioned REC.

PRIVILEGED AND CONFIDENTIAL

11.0 DEVIATIONS

This Phase I was prepared in conformance with the scope and limitations of ASTM E1527-21 Standard Practice for Environmental Site Assessments. It is CES opinion that no significant deviations have occurred from ASTM E1527-21 Standard. Limitations and exceptions to our scope of services were discussed in *Section 2.4* of this report.

12.0 ADDITIONAL SERVICES

Our scope of services for this Phase I, as well as limitations and exceptions, are included in *Sections 2.2* and *2.4* of this report.

PRIVILEGED AND CONFIDENTIAL

13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The following personnel have prepared and/or reviewed this report for accuracy, content, and quality of presentation.

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

PRIVILEGED AND CONFIDENTIAL

14.0 QUALIFICATION(S) OF ENVIRONMENTAL PROFESSIONAL(S)

The Phase I assessment was performed by CES personnel experienced in these types of services. The site visits, documentation review, personnel interviews, and report preparation were performed by Engineer Luis Raúl Colón Morales. Eng. Colón Morales is a Professional Engineer with more than and 15 years in the environmental field. In accordance with CES quality assurance protocols the Phase I report was revised by Eng. Raúl Colón to comply with CES QA/QC Corporate policies. Mr. Colón also participate in the site visit and is a licensed professional engineer with more than 45 years of environmental work experience.

The resumes of Eng. Colón Morales and Eng. Félix are provided in ***Appendix 7*** of this report.

Urbana:

Solar: Mide 24 metros de frente por 35 metros de fondo. Colindancias: por su derecha entrando con casa de Emilia Ortiz viuda de Berrios; por la izquierda con casa de mampostería de Méndez Hermanos y Compañía Sociedad en Comandita; por el Frente, Sur con la calle Luis Muñoz Rivera y por sus fondos con la calle del Hueso hoy Mariano Martorell. **(la medida del solar surge en la inscripción 1 y las colindancias en la inscripción 10)**

Enclava un local de una planta principal abierta que mide 69 pies de frente por 71 pies fondo, un sótano que cubre toda el área de la planta principal, un anexo de forma irregular que mide 29 pies de frente por 13 pies por el lado derecho 17 pies por el lado izquierdo y 29 pies por el fondo incluyendo además un callejón de 12 pies a la derecha del edificio el cual sirve de acceso al sótano y al anexo. **(Esta edificación surge en la inscripción 14)**

TRACTO:

El terreno se inscribe a favor del Municipio de Yabucoa y la estructura que enclava se construyó con autorización el municipio. El Municipio se halla en posesión del solar por formar parte del área de terreno que le fue cedida para la fundación del pueblo sin que se sepa por quien ni en que fecha. Lo referido consta de una escritura otorgada en Yabucoa el 15 de mayo de 1901 ante el notario Antonio de Aldrey. Según surge de la inscripción 1.

CARGAS:

Por sí afecta a:

Arrendamiento sobre el edificio a favor de la Cooperativa de Consumidores Unidos de Puerto Rico (Uni-Coop) mediante escritura número 2 otorgada en San Juan el 27 de abril de 1978 ante el notario Rodrigo Otero Bigles, a un término de 5 años contados a partir de 60 días después de haber sido otorgado, prorrogable por un término adicional de 5 años a opción de la arrendataria, según surge de la inscripción 14 del 6 de febrero de 1979 y última de esta finca.

DOMINIO:

Inscrito el terreno a favor del Municipio de Yabucoa, según surge de la inscripción 1.

Inscrito el edificio a favor de la Mercantil Martínez Fernández y Compañía, Sociedad en Comandita, por el precio de $14,100.00 mediante Escritura Número 200 otorgada en Humacao el 16 de agosto de 1945 ante el notario Francisco Gonzalez Junior, según surge de la inscripción 11.

REVISADO EN SISTEMA KARIBE:

Embargos Estatales y Federales, Sentencias, Bitácora de Documentos pendientes: NINGUNO.

NOTA: No nos hacemos responsables por errores u omisiones en la entrada y búsqueda de datos en el Sistema Karibe.

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and

BUCKEYE CARIBBEAN TERMINALS LLC (Continued) **1026425306**

disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Environmental Interest/Information System:

The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Section Seven Tracking System (SSTS) tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed.

The FINDS: database may contain additional details for this site.
