Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.
Registry ID: 110044831572

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	F037
Waste Description:	Petroleum Refinery Primary Oil/Water/Solids Separation Sludge - Any Sludge Generated From The Gravitational Separation Of Oil/Water/Solids During The Storage Or Treatment Of Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Sludges Include, But Are Not Limited To, Those Generated In Oil/Water/Solids Separators; Tanks And Impoundments; Ditches And Other Conveyances; Sumps; And Storm Water Units Receiving Dry Weather Flow. Sludges Generated In Storm Water Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And K051 Wastes Are Exempted From This Listing.
Waste Code:	F038
Waste Description:	Petroleum Refinery Secondary (Emulsified) Oil/Water/Solids Separation Sludge - Any Sludge And/Or Float Generated From The Physical And/Or Chemical Separation Of Oil/Water/Solids In Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Wastes Include, But Are Not Limited To, All Sludges And Floats Generated In Induced Air Flotation (Iaf) Units, Tanks And Impoundments, And All Sludges Generated In Daf Units. Sludges Generated In Stormwater Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And F037, K048, And K051 Wastes Are Exempted From This Listing.
Waste Code:	K048
Waste Description:	Dissolved Air Flotation (Daf) Float From The Petroleum Refining Industry.
Waste Code:	K051
Waste Description:	Api Separator Sludge From The Petroleum Refining Industry.

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Site	Database(s)	EDR ID Number EPA ID Number

CHEMICAL SOLUTIONS LLC (Continued) **1026463146**

The Section Seven Tracking System (SSTS) tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and

Site	Database(s)	EDR ID Number EPA ID Number

OLEIN RECOVERY CORP. (SITE 1) (Continued) **1010450278**

disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
CEDRI is a web application used by EPA programs and various stakeholders to manage environmental data transmitted to EPA in order to meet EPA's reporting requirements.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Safe Drinking Water Information System contains information about public water systems and their violations of EPA's drinking water regulations.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. Environmental Interest/Information System:

THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters

Site	Database(s)	EDR ID Number EPA ID Number

PRASA WTP GUAYABOTA (Continued) **1013875905**

of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/26/2025

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

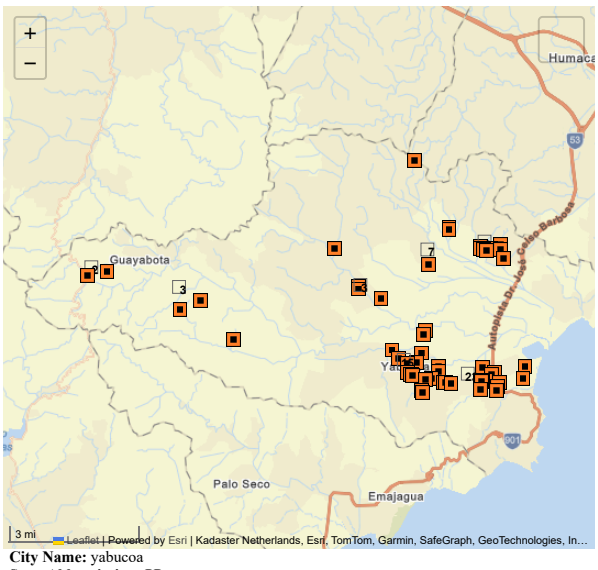
FRS Facility Query Results

Your selection returned 102 facilities which are listed below.
Results are sorted by State, City Name, and Facility Name



Map Legend

- Denotes a facility/site location
- Denotes a facility/site location that has been selected by clicking on the 'Magnifying Glass' in the tabular list of facilities/sites displayed below the map.
- Denotes a "Cluster" of facility/site locations. Double clicking on the cluster will automatically zoom the map in at that location. It may take muliple "Double Clicks" to expand all clusters at a particular location. Or just use the "Turn Clustering Off" button to expand the clusters into individual facility/site locations.
- In the tabular list of facilities/sites displayed below the map, a single click on the magnifying class will center and zoom the map to that facility.

APPENDIX 7

RESUMES OF ENVIRONMENTAL PROFESSIONALS

RESUME OF
RAÚL COLÓN VICENTY
PRINCIPAL ENGINEER

EDUCATION

University of Puerto Rico
Mayaguez Campus - B. S., Civil Engineering, 1975
Mayaguez Campus - M. S., Civil Engineering, 1977

PROFESSIONAL AFFILIATIONS

College of Engineers and Surveyors of Puerto Rico
American Institute of Hydrology
American Society of Civil Engineers
Environmental Assessment Association
National Groundwater Association

PROFESSIONAL REGISTRATIONS/CERTIFICATIONS

Professional Engineer in Puerto Rico, License 8119
Professional Hydrologist, AIH, Certification No. 674
Certified Environmental Specialist, Environmental Assessment Association, Certification No. 13969
Certified Environmental Consultant, Environmental Assessment Association, Certification No.13969

CAREER SUMMARY

Mr. Colón has more than 45 years of experience in Water Resources and Environmental Engineering. Mr. Colon is a registered Engineer with the College of Engineers and Surveyors of Puerto Rico and a certified Professional Hydrologist with the American Institute of Hydrology. Mr. Colón has been involved in a variety of water resources and environmental projects including surface and ground water hydrologic investigations as well as soil and groundwater contamination assessments and remediation projects. Mr. Colón has also conducted several groundwater/soil pollution investigations associated with hydrocarbon products and Dense Non-Aqueous Phase Liquids (DNAPLs). He has conducted dam safety investigations, hydrologic/hydraulic studies for a variety of projects, bridge scouring evaluations, sediment transport studies, real time flood forecasting projects in Puerto Rico and the United States, due diligence site evaluations, environmental site assessments, environmental compliance audits, environmental permitting projects and hazardous waste characterizations. Mr. Colón is very familiar with the Federal Emergency Management (FEMA) Flood Insurance Program, since its beginnings in the late 1970's. He conducted several Flood Insurance Studies in Puerto Rico and the United States. These studies included the hydrologic and hydraulic evaluations as well as the preparation of the base maps used by FEMA for the development of the flood maps and flood insurance rate maps published in the Flood Insurance Studies. Eng. Colón has participated in several expert witness cases and has been named as the Court Special Commissioner in three court cases in the Mayaguez, Carolina and Aguadilla Courts.

CONTINUING EDUCATION SEMINARS

"PFAS Transport, Fate, and Remediation: Understanding and Managing Per- and Polyfluoroalkyl Substances in Soil, Surface Water, and Groundwater", October 16-17, 2024, 8 A.M. to 5 P.M. (2 Days), Eric McWayne, National Environmental Management Academy.

"Planes de Control Temporero de Tráfico para Carreteras", UPR Mayaguez Centro de Transferencia de Tecnología en Transportación, August 1-2, 2018

"ASTM 1527-13 Standard for Environmental Site Assessments for Commercial Real Estate", ASTM Technical Training and E- Learning, October 7-8, 2014

"EPA's 2012 Construction General Permit (CGP)", US EPA Stormwater Program's Webcast Series, March 15, 2012

"Two Experts Share Data on Vapor Intrusion in the Real World", Environmental Data Resources, Inc., February 7, 2012

"The Remediation Course, 38 hour continuing education course", Princeton Groundwater, Inc., October 24-28, 2011

"Debida Diligencia Ambiental y Efectos en la Compraventa y Ocupación de Propiedades en Puerto Rico", CIAPR and AIDIS, August 11, 2011

"Nuevo Sistema de Permisos: Reglamento Conjunto de Permisos para Obras de Construcción y Usos de Terrenos", CIAPR, March 18, 2011.

"Cambios Recientes a Leyes y Reglamentos Ambientales y Propuestas Inmediatas de Energia Verde", CIAPR and AIDIS, October 29, 2009.

"Plan para Agilizar los Permisos en Puerto Rico", CIAPR and AIDIS, June 25, 2009.

2008 Final NPDES General Permit for Storm Water Discharges from Industrial Activities, CIAPR and AIDIS, November 20, 2008.

Assessment of Vapor Intrusion into Structures on Property Involved in Real Estate Transactions, ASTM International, April 29, 2008

HEC-RAS for Unsteady Flow Applications, American Society of Civil Engineers, Atlanta, GA, September 12-14, 2007.

Streambank Stabilization for Restoration and Flood Control Projects, July 25-27, 2007, American Society of Civil Engineers, Charlotte North Carolina.

"Implantación del Nuevo Permiso General Consolidado de la Junta de Calidad Ambiental de Puerto Rico", College of Engineers and Surveyors of Puerto Rico, San Juan, Puerto Rico, April 30, 2007.

Fundamentals of Spray Polyurethane Foam and Covering Systems for the Independent Inspector, Spray Polyurethane Foam Alliance, Tampa, Florida, February 22, 2007.

Environmental Site Assessments for Commercial Real Estate, ASTM Standard E-1527-05 and EPA All Appropriate Inquiry Rule, ASTM Training Course, Orlando, Florida, April 25-26, 2006.

Storm Water Management and Site Solution Workshop, College of Engineers and Surveyors of Puerto Rico, San Juan, Puerto Rico, April 6, 2006.

Design and Implementation of Effective Soil Gas Monitoring and Sampling Programs, The Nielsen Environmental Field School, Columbus, Ohio, November 29, 2005.

"Como queda el Ambiente con la Nueva Ley Núm. 416 sobre Política Pública Ambiental", Collage of Engineers and Surveyors of Puerto Rico, San Juan, Puerto Rico, April 28, 2005.

Hydrologic Modeling Using HEC-HMS Computer Model, American Society of Civil Engineers, San Diego, California, February 24-25, 2005

Micropurge Low-Flow Purging and Groundwater Sampling, The Nielsen Environmental Field School, Tampa Florida, March 12, 2004

Risk-Based Corrective Action at Petroleum Release Sites, ASTM Standard E1739, Sponsored by the ASTM, Lansing, Michigan, May 13-14, 2003.

Hydrogeology of Fracture Rock: Characterization, Monitoring, Assessment and Remediation, Niagara Falls, NY, December 2-5, 2002.

"Reglamentación Actual para el Tratamiento de las Aguas de Escorrentías", College of Engineers and Surveyors of Puerto Rico, San Juan, Puerto Rico, November 26, 2002.

National Pollutant Discharge Elimination System – Storm Water Regulations and NPDES Permit Seminar, Sponsored by the Environmental Protection Agency (EPA), San Juan, Puerto Rico, November 8, 2002.

Improving Hydrogeologic Analysis of Fracture Bedrock Systems, 2002 Workshop, University of Massachusetts (UMASS), Amherst, Massachusetts, June 18 and 19, 2002.

Highway Traffic Noise Workshop, Sponsored by The Federal Highway Administration and the P.R. Highway and Transportation Authority, San Juan Puerto Rico, June 12-14, 2001

EPA Storm Water Management Model (SWMM) Training Course, Sponsored by Camp Dresser & McKee, Edison New Jersey, May 3-5, 2001

"Seminario sobre Nuevo Permiso Federal para Descargas de Aguas de Escorrentia y Desarrollos Recientes en Reglamentación Ambiental", AIDIS/CIAPR, San Juan, Puerto Rico, May 2, 2000.

Phase II Environmental Site Assessment Process - ASTM E 1903 Standard Guide, ASTM Technical & Professional Training, New York, NY, September 14-15, 1999

Environmental Site Characterization, ASTM Technical and Professional Training in the Performance, Use and Application of ASTM Standards, Orlando Florida, August 13-14, 1998

Field Based Site Characterization Technologies - Short Course, U.S. Environmental Protection Agency's Technology Innovation Office, Westborough, MA, March 30, 1998

HEC-RAS for Experienced HEC-2 Users, Center for Research in Water Resources, The University of Texas at Austin, March 23-25, 1998.

EPA Brownfields Workshop, Sponsored by PRIDCO, San Juan, Puerto Rico, January 29, 1998.

Brownfields 97 Conference, Sponsored by the EPA, Kansas City, Mo., September 3-5, 1997.

Sedimentation in Stream Networks Training Seminar Using the HEC-6 Computer Model, by William A. Thomas, Mobile Boundary hydraulics, May 3 - 5, 1995

Fundamentals of Puerto Rico Environmental Law Compliance, Government Institutes Inc., April 1992.

Project Management, Law Environmental, Inc., Kennesaw, Georgia, May 1989.

Liability and Loss Prevention, Law Environmental Inc.; December 1988.

OSHA Health and Safety 40 Hrs. Training and OSHA Refresher Courses on a yearly basis, April 1988.

Mitigation of Hazard Due to Extreme Natural Events in America; University of Puerto Rico - Mayaguez Campus; January 20-22, 1987.

Unsteady Flow Modeling Using DAMBRK and DWOPER Computer Models - University of Texas at Austin; October 6-10, 1986.

Computer Applications in Water Resources; Sponsored by the ASCE; Buffalo, New York; June 1985.

Dam Safety Seminar, Application of DAMBRK and HEC-1 Models in the Analysis of Flood Waves Produced by Dam Failure; Sponsored by the Federal Emergency Management Agency (FEMA); Atlanta, Georgia; May 1984.

Project Management for Architectural and Engineering Firms; Sponsored by the Institute of Chemical Engineers, College of Engineers and Surveyors of P. R. - April 1981.

Pumps and Piping Systems; Design and Maintenance, Sponsored by the Institute of Mechanical Engineers, College of Engineers and Surveyors of P.R.; March 1981

Flood Plain Hydraulics by Application of HEC-2 Model; University of Texas at Austin; April 1979.

Small Wastewater Treatment Systems and Sludge Treatment and Disposal; Sponsored by the Environmental Protection Agency (EPA); San Juan, Puerto Rico; February 1978.

LIST OF PROFESSIONAL PUBLICATIONS

Colón R., Wallace J.R., Olson R.W. and Massey K. L.,"Flood Forecasting - An Alternate Response for PMF at the Saluda Dam, Proceedings of the American Power Conference, Chicago, Illinois, April 1989.
Editor for the Puerto Rico Water Resources Association Bulletin, 1988.

Raúl Colón and George F. McMahon, "BRASS Model: Application to Savannah River Reservoir System", ASCE - Journal of Water Resources Planning and Management, Vol. 113, No. 2 March 1987.

Raúl Colón; Robert Olson and James R. Wallace; "Increasing Revenues of Existing Hydro Power Reservoirs", A Law Environmental professional publication, September 1987.

Bras, R. L. and Colon R., "Time Average Areal Mean of Precipitation: Estimation and Network Design, Water Resources Research, Volume 14 - No. 5, October 1978.

LIST OF TECHNICAL PRESENTATIONS

Seminario Ambiental (Legal y Técnico) "Debida Diligencia Ambiental y Efectos en la Compraventa y Ocupación de Propiedades en Puerto Rico", CIAPR and AIDIS, August 2011 and July 2012.

Site Assessment Techniques and Technologies for Brownfields, Brownfields Pilot Program, Technical Session, Sponsored by PR Industrial Development Company, February 3, 1999

Flood Forecasting - An Alternate Response for PMF at the Saluda Dam";5lth Power Conference, Chicago, Illinois; April 25, 1989.

Dam Safety Studies - A General Overview; Presentation given at the College of Engineers and Surveyor s of Puerto Rico; Sponsored by APRA; February 3, 1989

Flood Forecasting- Basic Elements; Presentation given at the Puerto Rico' s Fourth Hurricane Conference; Sponsored by the Department of Natural Resources; Caribe Hilton Hotel; June 15, 1988.

Moderator for the APRA Seminar; "Hazardous Wastes in Puerto Rico: Impact in Water Resources, College of Engineers and Surveyors of Puerto Rico; April 15, 1988.

Bolivia's Rio Mamore and Rio Parapeti: Flood Forecasting and Sedimentation Control Projects presentation given to the Puerto Rico' s Speleology Society, March 4, 1988, San Juan, Puerto Rico.

Dynamics of Ground Water Contamination - A typical case study for Puerto Rico, presentation given to the P. R. Industrial Development Company as part of a Real Estate Transactions Seminar, February 1988.

Dynamics and Control of Aquifer Contamination - APRA Symposium June 1987, San Juan, Puerto Rico.

Brass Model Applications - presentation given as part of the Seminar: Unsteady Flow Modeling Using DAMBRK and DWOPER Computer Models, October 6-10, 1986, Austin, Texas.

Basin Runoff and Stream flow Simulation Model Workshop; presentation given to the Army Corps of Engineers Savannah District, October 16, 1984, Savannah, Georgia.

LIST OF PROJECTS

The following list shows a representative sample of Mr. Colón's professional work experience throughout his professional career.

EXPERT WITNESS PROJECTS

- Expert Witness consultation - Papelera Puertorriqueña Superfund Site, Utuado Puerto Rico, ongoing.
- Expert Witness consultation – San German Superfund Site, San German Puerto Rico, ongoing.
- Expert Witness consultation – Cabo Rojo Superfund Site, Cabo Rojo Puerto Rico, ongoing.
- Expert Witness - CIVIL CASE NO. 07-CIV-10470 MTBE PRODUCTS LIABILITY LITIGATION COMMONWEALTH OF PUERTO RICO, ET.AL V. SHELL OIL CO., ET.AL – on going
- Expert Witness - Informe Estudio Hidrológico-Hidráulico, Demanda Caso Vertedero de Toa Alta, Toa Alta, Puerto Rico, Caso Civil: DDP12-0278(402) – May 2024
- Expert Witness – MTBE Case - CIVIL CASE NO. 07-CIV-10470, MTBE PRODUCTS LIABILITY LITIGATION, COMMONWEALTH OF PUERTO RICO, ET.AL V. SHELL OIL CO., ET.AL – On going
- Expert Witness consultation – Cidra Superfund Site, Cidra Puerto Rico, 2015.
- Expert Witness – Court Special Commissioner Aguadilla Court– Anel Guzman Urbina V. Victor Bellaflores Hernandez, Aguadilla – July 2012
- Expert Witness – Court Special Commissioner Carolina Court - Blasina Lagoon Contamination, Municipio de Carolina V. Autoridad de Acueductos y Alcantarillados, Carolina – June 2010.
- Expert Witness – Court Special Commissioner Mayaguez Court – PCB Horizon Hazardous Wastes Site, San German Puerto Rico, PRIDCO v. PCB Horizon, July 2008.
- Expert Consultation Groundwater Contamination with Dense Non-Aqueous Phase Liquids (DNAPLs), Puerto Rico Industrial Development Company GE Palmer, Rio Grande, Puerto Rico, 2010.
- Expert Witness – MAPFRE PRAICO Insurance Company V. Sucesion de Jesus Guzman, et. al., Bayamon (McV/Shell/Sol).
- Expert Witness - Supermercados Econo Facundo V. Esso, Site Contamination Assessment in Carolina, 2007.
- Expert Witness Court Case - Loco Dam 1987 Flood Impact on Agricultural Properties Downstream, Guanica, Puerto Rico, March 2007.
- Expert Witness – Eloina Colon v Shell Company Puerto Rico, Mayaguez, January 2007.
- Expert Witness Court Case - Palmas Doradas Developers V. Treasury Point, Dorado, Groundwater Impact by Sanitary Waste Waters, October 2006.

- Expert Witness Court Case – Rio Guamani Guayama Flood, Villa Monte Río y la Academia Regional Adventista del Sur V. Municipio de Guayama, Guayama, June 2006.
- Expert Witness Court Case - Isla del Rio Corco Tallaboa site, Peñuelas, Puerto Rico, December 2005.
- Expert Witness - Hydrologic and Hydraulic Study, Undeveloped lot, Proposed Toyota Facility, Cataño, Puerto Rico, November 2004.
- Expert Witness Court Case - Iglesia Defensores de la Fe, Bayamón Puerto Rico, Surface Hydrology/Hydraulics, October 2004.
- Expert Witness – Felix Albert hydrologic/hydraulic impacts of construction activities adjacent to his residence, Guaynabo, Puerto Rico, November 2003.
- Expert Witness, WORA TV Hacienda Igualdad, Guanica, Puerto Rico, March 2003
- Expert Witness - Alta Vista Development Court Case V. Orchid Paradise, Mayaguez, Surface Hydrology/Hydraulics, March 2003.
- Expert Witness - Hydrogeologic Impacts of Proposed Regional Landfill in Salinas, Puerto Rico, 2002.

HYDROLOGY AND HYDRAULICS

Surface Hydrology/Hydraulics

- Hydrologic Assessments for bridges in Puerto Rico impacted by the Irma and Maria Hurricanes, Project PR ST FEMA PR Contract C3, On-going
- Hydrologic/Hydraulic Study for the proposed Flamboyán Village Residential project, Caguas, Puerto Rico, On-going
- Hydrologic/Hydraulic Study for the proposed Rio Village Residential project, Trujillo Alto, Puerto Rico, On-going
- Hydrologic/Hydraulic Study for locations in Isabela, Las Marias, and Barranquitas, Puerto Rico for the Landslides and Road Damage PRHTA Emergency Relief Program, On-going
- Hydrologic/Hydraulic Study for the AES Guayama facility, Guayama, Puerto Rico, On-going
- Hydrologic/Hydraulic Study for the Bacardi facility, Guaynabo, Puerto Rico, 2017
- Hydrologic/Hydraulic Study for the Cayey Municipal Landfill, Cayey, Puerto Rico, January 2017
- Hydrologic/Hydraulic Study for the proposed One Planet Solar Farm, Vega Baja, UNIPRO, 2015.
- Hydrologic/Hydraulic Study for the Cooper Vision industrial facility, Juana Diaz, Puerto Rico, December 2015
- Hydrologic/Hydraulic Study for the proposed commercial development to be located in Caguas, Puerto Rico, July 2014
- Hydrologic/Hydraulic Study for the Quebrada Prieta and Pueblo Indio Sectors as requested by FEMA, Canovanas, Puerto Rico, June 2013
- Preliminary Hydrologic/Hydraulic Evaluation for the Solar PV Generating Plant Project, San German, Puerto Rico, July 2013
- Hydrologic/Hydraulic Study for the Alternate Temporary Channel/Rio La Plata Flood Control Project, Dorado, Puerto Rico, Construcciones Jose Carro, S.E., October 2011
- Hydrologic/Hydraulic Study for the Turabo River, Caguas, Puerto Rico, as requested by the Puerto Rico Highway and Transportation Authority, September 2012.

- Hydrologic/Hydraulic Study for the AD Bayamon site owned by Mendez & Co., Bayamon, Puerto Rico, 2008.
- Hydrologic/Hydraulic Study for a proposed Mixed-Uses Development Complex, LAIF LLC, Guaynabo, Puerto Rico, 2009
- Hydrologic/Hydraulic Study for a proposed Universal Insurance facility as requested by Sierra Cardona Ferrer, Hatillo, Puerto Rico, 2007.
- Hydrologic/Hydraulic Study, Villa Franca Residential Development, Palmas del Mar, Humacao, Puerto Rico, 2007.
- Hydrologic/Hydraulic Study and Sinkholes Hydraulic Evaluation, Las Americas Technology Industrial Park, Moca, Puerto Rico, January 2007.
- Hydrologic/Hydraulic Study for a Camaseyes parcel of land, Aguadilla, Puerto Rico, 2007.
- Hydrologic/Hydraulic Study for La Vereda Residential Development, Chupacallos Ward, Ceiba, Puerto Rico, 2007.
- Hydrologic/Hydraulic Study for the proposed Redemptorists Fathers Notre Dame School, Caguas, Puerto Rico, 2007.
- Hydrologic and Hydraulic Study for the Degetau Avenue to the Turabo River and FEMA Conditional Letter of Map Revision Request, Caguas, Puerto Rico, June 2005.
- Hydrologic/Hydraulic Study Betteroads Cupey Facility, San Juan, Puerto Rico, April 2006.
- Hydrologic/Hydraulic Study Jardin Central Residential Development, Humacao, Puerto Rico, June 2005.
- Hydrologic/Hydraulic Study La Hacienda Residential Development, Caguas Puerto Rico, October 2004.
- Hydrologic/Hydraulic Study Villa Franca Residential Development, Palmas del Mar, Humacao, Puerto Rico, January 2004.
- Hydrologic and Hydraulic Study for the IPR Pharmaceuticals new facilities, Canovanas, Puerto Rico, July 2004.
- Hydrologic and Hydraulic Study, Ariel Rivera Supermarket, Jayuya, Puerto Rico, June 2002
- Hydrologic and Hydraulic Study, Sun Bay Recreational Complex, Vieques, Puerto Rico, March 2003
- Hydrologic and Hydraulic Study, Villas de Montecielo Residential Development, Guaynabo, Puerto Rico, September 2009.
- Hydrologic and Hydraulic Study, Blasina Estates Residential Development, Carolina, Puerto Rico, October 2001.
- Hydrologic and Hydraulic Study, Aventura Residential Development, Gurabo, Puerto Rico, December 2003
- Sinkhole Hydrologic and Hydraulic Study, School Development, Florida, Puerto Rico, November 1999
- Sinkhole Hydrologic and Hydraulic Study, Residential Development, Barceloneta, Puerto Rico, November 1999
- Sinkhole Hydraulic Capacity Study, School Development, Isabela, Puerto Rico, December 1999
- Hydrologic and Hydraulic Study, School Development, Culebra, Puerto Rico, October 1999
- Hydrologic and Hydraulic Study, Paseo del Prado Residential Development, Barceloneta, Puerto Rico, January 1999
- Hydrologic and Hydraulic Study, Commercial and Residential Complex Development, Bayamon, Puerto Rico, July 1999

- Hydraulic and Bridge Scouring Study, Tren Urbano Bridge Over Bayamón River, January 2005.
- Hydrologic and Hydraulic Study, Tren Urbano Dowels Manufacturing Facility, Bayamón, June 1997
- Unsteady Flow Hydraulic Study, San Juan Emergency Center Complex, Caño Martin Peña, Santurce, Puerto Rico, January 1998
- Hydrologic Study PR-10 Road Sinkholes 2N, 5N, 6 and 7 Utuado, Puerto Rico, December 1996
- Hydraulic and Sediment Transport Study, - PR-151 Bridge Over Jacaguas River, Villalba, Puerto Rico, January 1996
- Hydrologic/Hydraulic Study PR Road 140 Relocation Project - Cancel Creek, Bayamón, Puerto Rico, August 1995
- Unsteady State Flow Modeling - Piñero Avenue Site, Rio Piedras, Puerto Rico, March 1995
- Sinkhole Capacity Evaluation - Proposed Public School Development, Florida, Puerto Rico, September 1994
- Hydrologic/Hydraulic Study - Valle Húcares Residential Development, Juana Diaz, Puerto Rico, July 1994
- Hydrologic Study for Sinkhole Area - Proposed Police Station Development, Florida, Puerto Rico, July 1994
- Hydrologic/Hydraulic Study - Elite Valley Development, Mayaguez, Puerto Rico, March 1993
- Hydrologic/Hydraulic Study - La Matilde Residential Development, Ponce, Puerto Rico, August 1993
- Hydrologic Study Hacienda Lubamex, Manati, Puerto Rico, October 1993
- Hydrologic Study Sinkhole at PR De Diego Expressway, Bayamón, Puerto Rico, December 1993
- Preliminary and Final Design Embankment and Spillway Rehabilitation Project Carite Dam, Puerto Rico Electric Power Authority, Cayey - Guayama, Puerto Rico, April 1989
- Hydrologic/Hydraulic Studies for Drainage System Design - PR Road 9, Ponce, Puerto Rico, August 1992
- Hydrologic/Hydraulic Study - Los Caobos Residential Development, Ponce, Puerto Rico, April 1992
- Wave Height Study - Proposed COGENTRIX C0- Generation Facility, Mayaguez, Puerto Rico, December 1992
- Unsteady Flow Hydraulic Simulation Tivoli Building Complex Development, Hato Rey, Puerto Rico, May 1992
- Real Time Flood Forecasting BRASS Model for the Carraiso Dam, Trujillo Alto, Puerto Rico, March 1991
- Dam Safety Investigation - Carite Dam, Puerto Rico Electric Power Authority, Cayey - Guayama, Puerto Rico, April 1989
- Preliminary and Final Design Melania Dam Rehabilitation Project, Guayama, Puerto Rico; November 1989
- Unsteady State Hydraulic Study for Parque de Loyola Development Hato Rey, Puerto Rico, May 1989
- Unsteady Flow Hydraulic Simulation San Ignacio Building Complex Development, Hato Rey, Puerto Rico, May 1989

- Melania Reservoir Dam Safety Investigation and Dam Rehabilitation Project, Guayama, Puerto Rico; December 1988.
- Unsteady State Flow Simulation Study for the Caguas Central Federal Bank Building Complex, Pueblo Viejo Suburb, Guaynabo, Puerto Rico; June 1988.
- Unsteady State Hydraulic Study for Luis Muñoz Marin Park Phase II- San Juan, Puerto Rico, December 1987.
- Flood Forecasting System Strategy - Rio Mamore Watershed - Bolivia, South America, December 1987.
- Erosion Control Management Plan for the Rio Parapeti Watershed - Bolivia, South America, December 1987.
- Basin Runoff and Streamflow Computer Model Simulation -Clarks Hill Reservoir Drainage Basin, Savannah River, Georgia - South Carolina; September 1984
- Basin Runoff and Streamflow Computer Model Database Development - Hartwell Reservoir Drainage Basin, Savannah River, Georgia - South Carolina - North Carolina; December 1983
- Savannah River Dam Safety Plan, June 1985.
- Flood Frequency Evaluation for the Etowah River Downstream of the Allatoona Dam, Bartow County, Georgia, 1985.
- Flood plain Study for Trobridge Development, Fulton County, Georgia; September 1985.
- Bridge Sizing Study for Turkey Creek - Rivermist Development, Gwinnett County, Georgia, March 1984.
- Hydrologic Study for Overlook at Riverview II - Cobb County, Georgia; June 1983
- Wave Height Study and Dune Enhancement Program f or Broadmoor Towers II-Baldwin County, Alabama; June 1984.
- Hydrologic Study for Weatherstone Development - Dekalb County, Georgia; May 1983
- Hydrologic Study for Townsend Place Condominiums Greystone Office Condominiums - Fulton County, Georgia; October 1983.
- Flood Insurance Study - Unincorporated Areas Chatham County, Georgia; Federal Emergency Management Agency; February 1984.
- Hydrologic Study for Martin' s Landing Condominiums - Fulton County, Georgia; May 1983
- Hydrologic Study for Morgan' s Ferry - Fulton County, Georgia; January 1983.
- Wave Heights Study for Perdido Key Beach Condominiums - Baldwin County, Alabama; October 1983.
- Unsteady Flow Modeling Ocmulgee River - Bibb, Jones Counties, Georgia; August 1986.
- Hydrologic Study for Indian Trail Development - Gwinnett County, Georgia; May 1983.
- V-Zone Location and Delineation for Perdido Key Hilton Hotel Site - Baldwin County, Alabama; February 1984.
- Flood Insurance Study - Unincorporated Areas Charleston County, South Carolina; Federal Emergency Management Agency; May 1984.
- Flood Control Study Lawson' s Fork Creek - Spartanburg, South Carolina; February 1986
- Hydrologic Study for Long Island Square, Phase II - Fulton County, Georgia; June 1983.
- Flood Plain Study for Boy Scout Lake Apartments - Richmond County, Georgia; March 1984.
- Bridge Sizing Study for Bear Creek, South Fulton Highway - Fulton County, Georgia; May 1986.
- Drainage Study for Beltway 8 - Houston Texas; December 1985.

- Flood Insurance Studies for Eleven Water sheds in Puerto Rico Including Jacaguas, Piedras, Culebrinas, Camuy, Blanco, Daguao, Mameyes, Fajardo, Inabon, and Anton Ruiz Rivers; Federal Emergency Management Agency; 1979 to 1982.

Groundwater Hydrology/Hydrogeology

- Groundwater Sampling, Brownfields Hazardous and Petroleum sites at the Enlace del Caño Martin Peña, San Juan, Puerto Rico, On-going
- Groundwater Sampling at Metro Pavia Hato Rey Hospital, San Juan, Puerto Rico, 2019
- Groundwater Sampling, Parking Lot Identified as Parcel B, Martin Peña Sector, Santurce Ward, San Juan, Puerto Rico, December 2018
- Groundwater Sampling, Silo No. 2, Central Mercedita Property, Ponce, Puerto Rico, May 2017
- Groundwater Sampling, Former Puerta de Tierra Public Housing Development, San Juan, Puerto Rico, July 2016
- Groundwater Sampling, Former Las Gladiolas Public Housing Development, San Juan, Puerto Rico, February 2016
- Assessment of Dense Non-Aqueous Phase Liquids (DNAPLs) in Groundwater, Former Biovail Facility, Carolina, Puerto Rico, 2016.
- Groundwater Sampling, Choice Liberty facilities in various locations in Puerto Rico, 2016.
- Site Characterization of Soil and Groundwater, former Hospital Dr. Pila owned by Metro Pavia, Ponce, Puerto Rico, 2012
- Site Characterization of Soil and Groundwater, Patheon Facility for EDIC College, Caguas, 2011.
- Groundwater Study, IPR Pharmaceuticals, Canovanas, Puerto Rico, December 2010.
- Site Characterization of Soil and Groundwater, Dense Non-Aqueous Phase Liquids (DNAPLs), Confidential Client, Carolina, Puerto Rico, July 2009
- Aquifer Investigation at the former Hanes Facility for the proposed Cervezas del Sur project, Ponce, Puerto Rico, 2009.
- Groundwater and deep well sampling at the IPR Canovanas Facility, Canovanas, Puerto Rico, 2007.
- Groundwater and Clean-up Verification Sampling at the former Shell Yabucoa facility, Yabucoa, Puerto Rico, 2007.
- Hydrogeologic Characterization Assessment, Quality Electroplating Facility, Caguas, Puerto Rico, January 2007.
- Preliminary Hydrogeologic Investigation, Baños de Coamo, Thermal Springs, Coamo, Puerto Rico, January 2005.
- Hydrogeologic Characterization Assessment, Villas del Faro Punta Tuna Beach Resort, Maunabo, Puerto Rico, November 2001
- Hydrogeologic and Groundwater Characterization Assessment - Former Manufactured Gas Plant (MGP) Facility, Miramar, San Juan, Puerto Rico, June 1997.
- Sinkhole Hydraulic Capacity Evaluation - Sinkholes 2N and 5N PR-10 Road, Utuado, Puerto Rico, March 1997.
- Subsurface and Groundwater Contamination Assessment - Air Liquid Facility, Cataño, Puerto Rico, October 1996
- Subsurface and Groundwater Contamination Assessment - General Gases Facility, Bayamón, Puerto Rico, October 1996

- Preliminary Subsurface Site Assessment - Former Fortiflex Manufacturing Facility, Bayamón, Puerto Rico
- Hydrogeologic Assessment and Groundwater Characterization - Former Metal Finishing Facility, Toa Baja, Puerto Rico, June 1996
- Subsurface and Groundwater Contamination Assessment ACERVO Transportation and Maintenance Facility, Hato Rey, Puerto Rico, January 1996
- Dye Tracing Study - PR-10 Five Sinkholes Connection to Los Chorros, Utuado, Puerto Rico, February 1991
- Preliminary Subsurface Assessment at Three Gasoline Service Stations - PR Road No.2 Expansion Project, Arecibo, Puerto Rico, July 1995
- Remedial Action Plan Preparation and Plan Implementation - Diesel Spill Hewlett Packard Facility, Aguadilla, Puerto Rico, August 1995
- Preliminary Hydrogeologic Assessment Former Manufactured Gas Plant Site, Miramar, San Juan, Puerto Rico, July 1994.
- Hydrogeologic and Groundwater Contamination Assessment Leaseway Properties in Ponce and Cataño, Puerto Rico, December 1994
- Evaluation of Potential Aquifer Development - Baxter Healthcare Corp. Carolina Facility, Carolina, Puerto Rico, September 1994
- Groundwater Sampling and Analysis - Rayo Farm Site, Pfizer Pharmaceuticals, Barceloneta, Puerto Rico, July 1994
- Groundwater Resources Availability Evaluation - US Postal Office, Hato Rey Puerto Rico, March 1994
- Remedial Action Plan Preparation and Plan Implementation PCE Remediation Project-Former Pharmaseal Facility, Baxter Healthcare Corp., Toa Alta, Puerto Rico, April 1994
- Subsurface Investigation Underground Storage Tank Area - Palmas del Mar Resort, Humacao, Puerto Rico, September 1994
- Groundwater Production Wells Data Search and Evaluation - Metal Finishing Facility Surroundings, Toa Baja, Puerto Rico, June 1994
- Corrective Action Plan for Hydrocarbon Affected Soils, Former Baxter V. Muller Facility, Sabana Grande, Puerto Rico, October 1991
- Subsurface Investigation and UST Closure - Baxter Healthcare Facility, Maricao, Puerto Rico, June 1992
- Preliminary Hydrogeologic Assessment and Final Hydrogeologic and Groundwater Characterization - Several Navy s Sites, Roosevelt Roads Base, Ceiba, Puerto Rico, April 1992
- Subsurface Investigation and Remedial Action Implementation - Kayser Roth Facility, Arecibo Puerto Rico, November 1990
- Subsurface Characterization and Remedial Action - U.S. Coast Guard Air Station Borinquen, Aguadilla, Puerto Rico, July 1989
- Preliminary Subsurface Assessment Program f or the Jesus Ramirez Esso Service Center, June 1989.
- Hydrogeologic Assessment Chevron-Gulf Facility, Caguas, Puerto Rico, April 1987
- Final Hydrogeologic Assessment Chevron Facility No. 54270100, Cayey, Puerto Rico, January 1989
- Hydrogeologic Assessment and Ground Water Monitoring Program, Seven-up Bottling Co. Inc. Minillas Industrial Park, Bayamón Puerto Rico, July 1989

- Remedial Action Plan for Gulf Service Station Facility No. G-121-11, Mayagüez, Puerto Rico, May 1988
- Remedial Action Plan Gulf Service Station Facility No. G-123-11, Hormigueros, Puerto Rico, December 1988
- Analysis of Irrigation Alternatives, La Gorce Gulf Country Club - City of Miami Beach, Florida, June 1982.
- Dyer Boulevard Sanitary Landfill - Hydrogeologic Investigation, Phase III, August 1982.
- Test of Second Artesian and Floridan Aquifers - Engineering Report Prepared for City of Venice, September 1982

ENVIRONMENTAL ENGINEERING

- Phase I Environmental Site Assessments for Commercial/Industrial facilities in Puerto Rico, Pavia Hospital and First Medical facilities, on-going.
- Phase I and Phase II Environmental Site Assessments for various Choice Liberty facilities in Puerto Rico, on-going.
- Phase I Environmental Site Assessments for Commercial/Industrial/Residential Developments in Puerto Rico, CPG Financial, on-going.
- Phase I Environmental Site Assessments for Commercial/Industrial/Residential Developments in Puerto Rico, Oriental Bank, on-going.
- Phase I and Phase II Environmental Site Assessments for Commercial/Industrial/Residential Developments in Puerto Rico, First Bank, on-going.
- Phase I and Phase II Environmental Site Assessments for the Las Gladiolas Public Housing, McCormack Baron Puerto Rico Developer, 2017.
- Phase I and Phase II Environmental Site Assessments for the Puerto de Tierra Public Housing, McCormack Baron Puerto Rico Developer, 2017.
- Phase I and Phase II Environmental Site Assessments for the Carioca Palo Seco Site, Cataño, 2015.
- Phase I Environmental Site Assessments for Commercial/Industrial/Residential Developments in Puerto Rico, Blackpoint/Doral Bank, 2014.
- Phase I and Phase II Environmental Site Assessments for Hermanos Melendez Hospital Complex and Puerto Rico Childrens Hospital located at Bayamon, October 2014.
- Phase I Environmental Site Assessment at Commercial Property in St. Thomas, USVI, November 2011.
- Phase I and Phase II Environmental Site Assessment for the Ramallo Brothers Printing facility, Caguas, Puerto Rico, November 2010.
- Phase I Environmental Site Assessments for six airports facilities in the Dominican Republic, 2008
- Phase II Environmental Site Assessments at the Las Americas and Gregorio Luperon Airports Facilities, Dominican Republic, November 2014.
- Phase I Environmental Site Assessment for the Former Westernbank Plaza Building, Hato Rey, San Juan, Ferraiuoli LLC, 2012.
- Soil Investigation, Baxter Healthcare Facility, Aibonito, Puerto Rico, 2012.
- Phase I Environmental Site Assessment for the BBA Aviation/Signature Flight Support Facility at the Princess Juliana International Airport, St. Maarten, Netherlands Antilles, September 2011.

- Phase I Environmental Site Assessments for various schools as part of the Schools for the 21 Century Project, as requested by the Autoridad para el Financiamiento de la Infraestructura, September 2011.
- Environmental Site Investigation, Shellfoam Facility, Puerto Rico Industrial Development Company (PRIDCO), Cidra, Puerto Rico, June 2010.
- Soil Sampling Investigation, PCB Horizon Facility, Puerto Rico Industrial Development Company (PRIDCO), San German, Puerto Rico, 2009.
- Phase I and Phase II ESA for various locations at the Peninsula de Cantera, San Juan, Puerto Rico, on-going.
- Environmental Assessment for soil contamination, Becton Dickinson Affirm Expansion, Cayey, Puerto Rico, March 2010.
- Environmental Assessments and Permitting Compliance for the PR Maritime Transportation Authority facilities around Puerto Rico, including Vieques and Culebra, 2012.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Canovanas, Puerto Rico, on-going.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Toa Baja, Puerto Rico, December 2018.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Aguadilla, Puerto Rico, November 2018.
- Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Caguas, Puerto Rico, 2017.
- Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Salinas, Puerto Rico, 2017.
- Phase I ESA for the San Jorge Children's Hospital for First Bank, Santurce, Puerto Rico, June 2010.
- Environmental Audits and Permitting Compliance for the LANCO Group Facilities located in San Lorenzo, Cidra and Rio Piedras, on-going.
- Phase I ESA for a parcel of land owned by Doral Bank, Rincon, Puerto Rico, July 2010.
- Phase I ESA for a parcel of land owned by Doral Bank, Loiza, Puerto Rico, July 2010.
- Phase I ESA for former gasoline station owned by Banco Popular de PR, Corozal, 2011.
- Phase I ESA for former gasoline station owned by Banco Cooperativo de Puerto Rico, Ciales, 2012.
- Phase I Environmental Site Assessment and Environmental Audit, Patheon Facility for EDIC College, Caguas, 2011.
- Environmental Assessments of parcel of lands for the proposed Capobella Tourist Development, Republica Dominicana, January 2010
- Transaction Screening for the Buffalo Wings facility at the Luis Muñoz Marin International Airport, Carolina, Puerto Rico, December 2009.
- Phase I ESA for the Dollar Rent a Car facility, owned by Empresas Alberic Colon, Ponce, Puerto Rico, 2009
- Phase I ESA for the former Gulf Gasoline Station as requested by First Bank, Camuy, Puerto Rico, 2009.
- Phase I ESA for the Hospital Episcopal San Lucas and Torre Media, as requested by First Bank, Ponce, Puerto Rico, 2009.
- Phase I and Phase II ESA for former Union Carbide Caribe Facility, as requested by Peerless Oil and Chemicals, Peñuelas/Guayanilla, Puerto Rico, 2009.

- Environmental Audit and Permitting Compliance, Papelera Puertorriqueña, Utuado, Puerto Rico, 2009.
- Phase I ESA for the proposed Sun Microsystems facility, as requested by McConnell Valdez, Ponce, Puerto Rico, 2009.
- Baseline Assessment for the Texaco Farm Tank, as requested by Peerless Oil and Chemicals, Guayanilla, Puerto Rico, 2009.
- Phase I and Limited Phase II ESA for the Biovail Laboratories facilities, Dorado, Puerto Rico, 2009.
- Environmental Road Map and Permitting Compliance at the Hanes facility for the proposed Cervezas del Sur project, Ponce, Puerto Rico, 2011.
- Phase I ESA for a parcel of land for a proposed Walgreens Facility, Bayamon, Puerto Rico, 2008.
- Environmental Assessments and Remediation for the ACERVO Facility for the proposed Villas El Paraiso Project, Hato Rey, Puerto Rico, 2008.
- Phase I and Phase II ESA for the former Schering Plough manufacturing facility, Manati, Puerto Rico, 2008, Environmental Coordination, Observation and documentation of the activities conducted at the Puerto de Ponce, as requested by an Administrative Order of the EPA, Municipality of Ponce, Puerto Rico, 2008.
- Environmental Assessment, proposed American Micro Steel facility, Guayanilla, Puerto Rico, 2008.
- Phase I ESA for various facilities around Puerto Rico owned by the Banco Gubernamental de Fomento para Puerto Rico, 2009.
- Environmental Assessment and Remediation at the Warner Chilcott Facility, Fajardo, Puerto Rico, 2008.
- Phase I ESA for various facilities owned by Ponce Resources to be transferred to Schnitzer Corporation, 2008.
- Phase I ESA for 15 facilities around Puerto Rico owned by Empresas Alberic Colon, 2008.
- Environmental Assessment and Remediation at the former Junco Steel Facility, ENTECH, Guaynabo, Puerto Rico, 2008.
- Phase I ESA and Soil Assessment at the former Filtertek Facility, for a proposed Camera Mundi project, Caguas, Puerto Rico, 2008.
- Phase I ESA for 6 airports facilities at various Dominican Republic, owned by AERODOM, 2008.
- Environmental Audit at the Hertz Facility, Carolina, Puerto Rico, 2008.
- Phase I ESA for two parcels of land, First Bank, Manati, Puerto Rico, 2008.
- Phase I for a former PRIDCO facility for a proposed Curtis Instrument project, Luquillo, Puerto Rico, 2008.
- Environmental Assessment, Environmental Audit and Permitting compliance for a proposed Model Offset Printing expansion, Humacao, Puerto Rico, 2008.
- Phase I ESA of former Empresas Santana facilities at the Luis Muñoz Marin International Airport and Base Muñiz, Carolina, Puerto Rico, 2008.
- Phase I ESA for four facilities owned by Borinquen Memorial Funeral Home, First Bank, various locations in Puerto Rico, 2008.
- Phase I ESA for the San Juan Marriott Hotel & Casino, First Bank, San Juan, Puerto Rico, 2008.
- Phase I and Phase II ESA for the Aguas Puras project at the PRASA Treatment Plant, First Bank, Bayamon, Puerto Rico, 2008.

- Designated Project Coordinator "Administrative Settlement Agreement and Order on Consent for Removal Action, The Ponce Intercontinental Hotel Asbestos Dump Site, Ponce, Puerto Rico, Index No. CERCLA-02-2007-2018, October 2007.
- Designated Project Coordinator "Administrative Agreement and Order on Consent for a removal Action The Aguakem Chemical Site, Ponce, Puerto Rico, Index No. CERCLA-02-2007-2017, November 2017.
- Phase I ESA for a parcel of land for a proposed Home Depot facility, Ponce, Puerto Rico, 2007.
- Phase I ESA for the Imacaca facility as requested by Banco Popular, Bayamon, Puerto Rico, 2007.
- Phase I ESA for the La Fuente Motel as requested by First Bank, Caguas, Puerto Rico, 2007.
- Environmental Assessment for a proposed Universal Insurance facility as requested by Sierra Cardona Ferrer, Hatillo, Puerto Rico, 2007.
- Phase I ESA, Environmental Assessment and Permitting compliance for the proposed Becton Dickinson Biosciences facility, Cayey, Puerto Rico, 2007.
- Technical Consultant for Shell Puerto Rico, Luis Muñoz Marin International Airport, EPA Consent Order, Carolina Puerto Rico, July 2006.
- Phase II Site Characterization Shell Puerto Rico Former Gasoline Station, Mayaguez, Puerto Rico, August 2005.
- Phase II Site Characterization Shell Puerto Rico Gasoline Station, Ponce, Puerto Rico, March 2005.
- Phase II Site Characterization Almetco Facility, Canovanas, Puerto Rico, April 2008.
- Assessment and Remediation Activities, EPA Brownfields Program, Hato Rey Electroplating PRIDCO Facility, Hato Rey, Puerto Rico, September 2005.
- Assessment and Remediation Activities, EPA Brownfields Program, National Circuit PRIDCO Facility, Fajardo, Puerto Rico, September 2005.
- Phase II - Soil Assessment at Property to be Acquired by Junco Steel, Vega Baja, Puerto Rico, June 2005.
- Soil Assessment Cardinal Health Facility, Humacao, Puerto Rico, August 2005.
- Remedial Action Plans Preparation for the ACERVO Facility (Villas del Paraiso Residential Development), Hato Rey, Puerto Rico, February 2004
- Environmental Sampling Assessment, Taller Bufalo, Barceloneta, Puerto Rico, October 2003
- Closure of Septic Tank System, US Navy, Vieques, Puerto Rico, 2007.
- Phase I Environmental Site Assessment, El Mundo Broadcasting 10 properties in various locations in Puerto Rico, April 2003
- Phase I Environmental Site Assessment, Proposed Home Depot facility, Arecibo, Puerto Rico, 2003
- Phase I, Phase II, and Remediation Activities, Saint Luke's Memorial Hospital, Former Hospital Regional de Ponce, Ponce, Puerto Rico, September 2003
- NPDES Storm Water Pollution Prevention Plan and Permitting, Las Cascadas Residential Development, Toa Alta, Puerto Rico, November 2012.
- Assessment and Remediation Activities, EPA Superfund Program, Metal Finishing Toa Baja Facility, Toa Baja, Puerto Rico, February 2004
- Corps of Engineers and Environmental Permits, Torre Cibeles Residential Development, Hato Rey, Puerto Rico, April 2004.
- Phase II Environmental Assessment Activities, Covadonga Road Connector, San Juan, Puerto Rico, January 2004

- Technical Assistance, Former San Juan Gas Facility, San Juan, Puerto Rico, December 2000
- Phase I Environmental Site Assessment, Former Digital Facility, San German, Puerto Rico, December 2002
- Environmental Impact Statement, Aventura Residential Development, Gurabo, Puerto Rico, April 2006.
- Environmental Assessment, Ext. Degetau Improvements, Caguas, Puerto Rico, 2007.
- Environmental Assessment, Periferal Avenue Construction, Caguas, Puerto Rico, September 2007.
- Phase II Environmental Site Assessment (Soil and Groundwater, Septic Tank Characterization, PCB Testing, Asbestos and Lead-based Paint Limited Surveys, ACERVO Facility, Hato Rey, Puerto Rico, February 2002
- Phase I Environmental Site Assessment, Undeveloped property, Guayama, Puerto Rico, January 2003
- Phase I Environmental Site Assessment, San Juan and Carolina properties, January 2003
- Environmental Assessment, Isla Grande Site 36 Site, San Juan, Puerto Rico, January 2010.
- Underground Injection Control System Closure, Former Mayaguez Filter Facility, Mayaguez, Puerto Rico, January 2005.
- Phase II Environmental Assessment Activities, PR 122 Gulf Station, San Germán, Puerto Rico, 2003.
- Phase I Environmental Site Assessment, Plaza Tropical Facility, Bayamon, Puerto Rico, January 2003
- Phase I and Phase II Assessments, Revitalizacion Centro Urbano de Santurce, San Juan, Puerto Rico, February 2003.
- NPDES and CES Permits, Monticielo Residential Development, Caguas, Puerto Rico, January 2003.
- NPDES Permit, Coatings industrial facility, Bayamon, Puerto Rico, November 2002.
- Environmental Monitoring, Cidra River, Adjuntas, Puerto Rico, December 2002.
- Phase I Environmental Site Assessment, Beckton Dickinson Facility, Juncos, Puerto Rico, October 2002.
- NPDES Permitting, Laderas de San Juan Residential Development, San Juan, Puerto Rico, October 2004.
- Environmental Consulting Services, Mendez & Co. Carlos Malave Site, Cataño, Puerto Rico, February 2006.
- Environmental Impact Statement, Los Machos Beach Improvements, Ceiba, Puerto Rico, 2002.
- Phase II Environmental Assessment, Bard Undeveloped Lot, Humacao, Puerto Rico, November 2002.
- Phase I Environmental Site Assessment, Leaseway facilities, Cataño and Toa Baja Site, Puerto Rico, September 2002.
- Phase I Environmental Site Assessment, Mountain Union Telecommunication Towers, various location in Puerto Rico, November 2002.
- Environmental Evaluation Widening of PR-901, Yabucoa, Puerto Rico, August 1998.
- Environmental Evaluation PR-20 Toll Plaza, Guaynabo, Puerto Rico, October 1998.
- Environmental Analysis ERIKA Manufacturing Facility, Fajardo, Puerto Rico, November 1998.
- Phase I and Phase II Assessments for Yauco, Guayama and San Pablo Medical Facilities, From 1997 to 1998.

- Phase I and Phase II Site Assessment - Confidential Manufacturing Facility, Guaynabo, Puerto Rico, December 1997.
- Septic System UIC Closure Plan - Baxter Sales Facility, Guaynabo, Puerto Rico, February 1997.
- Underground Injection Control Permitting - Parque Las Cavernas de Camuy, Camuy, Puerto Rico, November 1996.
- Phase I Environmental Site Assessment Air Liquid Facility, Cataño, Puerto Rico, October 1996.
- Phase I Environmental Site Assessment 3 General Gases Facilities, Cataño, Bayamón and Ponce, Puerto Rico, October 1996.
- Phase I Environmental Site Assessment - Peninsula de Cantera Proposed Development Project, Santurce, Puerto Rico, November 1996.
- Phase I Environmental Site Assessment Tropical Fruit Property, Guanica, Puerto Rico, November 1996.
- PDES Storm Water Pollution Prevention Plans for 12 Ready Mix Concrete and 5 Aggregates Facilities Throughout the Island, September 1996.
- NPDES Storm Water Permitting - Comprehensive Site Compliance Evaluation - Intel Facility, Las Piedras, Puerto Rico, January 1996.
- Environmental Permitting Coordination and Management - Super Aqueduct PRASA Project, North Coast of Puerto Rico, From January to July 1996.
- Phase I Environmental Site Assessment - Caribbean Containers Inc., Arecibo, Puerto Rico, April 1996.
- NPDES Storm Water Permitting - Comprehensive Site Compliance Evaluation - Bumble Bee Facility, Mayaguez, Puerto Rico, May 1996.
- Storm Water Pollution Prevention Plan - Arecibo Coliseum Development, Arecibo, Puerto Rico, May 1996.
- Baseline Environmental Evaluation - PR Highway 22 Corridor - Hatillo to Hormigueros, February 1996.
- CEST Plan Arecibo Coliseum Development, Arecibo, Puerto Rico, May 1995.

RESUME OF
LUIS RAUL COLON MORALES

Project Engineer/Project Manager

EDUCATION

University of Puerto Rico
Mayaguez Campus - B. S., Civil Engineering, 2005, Magna Cum Laude, GPA 3.85

University of Florida
Gainesville – Master in Civil Engineering, Water Resources, 2007, Summa Cum Laude GPA 4.00

PROFESSIONAL AFFILIATIONS

College of Engineers and Surveyors of Puerto Rico (CIAPR)
American Society of Civil Engineers (ASCE)
National Groundwater Association

PROFESSIONAL REGISTRATIONS/CERTIFICATIONS

Professional Engineer (PE), License 21864, Puerto Rico

CAREER SUMMARY

Mr. Colón is a Project Engineer with the environmental consulting firm of Caribe Environmental Services since 2007. Mr. Colón is a registered Professional Engineer with the College of Engineers and Surveyors of Puerto Rico. Mr. Colón has been involved in a variety of water resources and environmental projects including surface and ground water hydrologic modeling and investigations as well as soil and groundwater contamination assessments. Mr. Colón is also continuously developing potentiometric and contaminant concentration surface maps as well as GIS Inventory databases. Also Mr. Colón has participated in the preparation of multiple environmental site assessments, environmental compliance audits and environmental permitting projects.

LIST OF PROJECTS

The following list shows a representative sample of Mr. Colón's professional work experience throughout his professional career.

ENVIRONMENTAL ENGINEERING

- Expert Witness – Blasina Lagoon Contamination, Municipio de Carolina V. Autoridad de Acueductos y Alcantarillados, Carolina, Puerto Rico – on-going.
- Soil Investigation, Baxter Healthcare Facility, Aibonito, Puerto Rico, on-going.

- Sampling activities, former Caguas Uniform facility, Caguas, Puerto Rico, on-going
- Environmental assessment, EFA Investment for Paseo Samaritano residential development, on-going
- Phase I and Groundwater sampling at Hospital Dr Pila, Ponce, Puerto Rico; on-going
- Phase I for Salichs Pou and Associates of former gas station at Toa Baja, Puerto Rico; October 2010
- Phase I Environmental assessment at Bacardi, Palo Seco facility; February 2011
- Phase I Environmental assessments of two sites (Arecibo and Carolina) for Battery Recycling; on-going
- Environmental Site Investigation, Shellfoam Facility, Puerto Rico Industrial Development Company (PRIDCO), Cidra, Puerto Rico, June 2010.
- Environmental Assessment for soil contamination, Becton Dickinson Affirm Expansion, Cayey, Puerto Rico, March 2010.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Canovanas, Canovanas, Puerto Rico, on-going.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Toa Baja, Toa Baja Puerto Rico, on-going.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Aguadilla, Aguadilla, Puerto Rico, on-going.
- Phase I ESA for the San Jorge Children's Hospital for First Bank, Santurce, Puerto Rico, June 2010.
- Environmental Audits and Permitting Compliance for the LANCO Group Facilities located in San Lorenzo, Cidra and Rio Piedras, on-going.
- Phase I ESA for a parcel of land owned by Doral Bank, Rincon, Puerto Rico, July 2010.
- Phase I ESA for a parcel of land owned by Doral Bank, Loiza, Puerto Rico, July 2010.
- Phase I ESA for former gasoline station owned by Banco Popular de PR, Corozal, July 2010
- Phase I ESA for former gasoline station owned by Banco Cooperativo de Puerto Rico, Ciales, on-going.
- Phase I Environmental Site Assessment, Groundwater Sampling and Environmental Audit, Patheon Facility for EDIC College, Caguas, February 2011
- Soil Sampling Investigation, PCB Horizon Facility, Puerto Rico Industrial Development Company (PRIDCO), San German, Puerto Rico, 2009.
- Soil Investigation According to an Administrative Order of Consent Issued by the EPA PRIDCO, San Germán, Puerto Rico, On-going
- Phase I ESA for the Dollar Rent a Car facility, owned by Empresas Alberic Colon, Ponce, Puerto Rico, 2009
- Phase I ESA for the former Gulf Gasoline Station as requested by First Bank, Camuy, Puerto Rico, 2009.
- Phase I ESA for the Hospital Episcopal San Lucas and Torre Media, as requested by First Bank, Ponce, Puerto Rico, 2009.
- Phase I and Phase II ESA for former Union Carbide Caribe Facility, as requested by Peerless Oil and Chemicals, Peñuelas/Guayanilla, Puerto Rico, 2009.
- Environmental Audit and Permitting Compliance, Papelera Puertorriqueña, Utuado, Puerto Rico, on-going

- Phase I ESA for the proposed Sun Microsystems facility, as requested by McConnell Valdez, Ponce, Puerto Rico, 2009
- Phase I and Limited Phase II ESA for the Biovail Laboratories facilities, Dorado, Puerto Rico, 2009.
- Phase I Environmental Site Assessment & Phase II Site Characterization First Bank, Cataño, Puerto Rico, 2008.
- Phase I Environmental Site Assessment Borinquen Memorial, Caguas, Puerto Rico, 2008.
- Phase I Environmental Site Assessment Leaseway, Cataño, Puerto Rico, 2008.
- Phase I ESA of former Empresas Santana facilities at the Luis Muñoz Marin International Airport and Base Muñiz, Carolina, Puerto Rico, 2008.
- Phase I and Phase II ESA for the Aguas Puras project at the PRASA Treatment Plant, First Bank, Bayamon, Puerto Rico, 2008.
- Phase I Environmental Site Assessment (4 SITES) Alberic Colon, San Juan, Puerto Rico, 2008.
- Phase I Environmental Site Assessment Banco Gubernamental de Fomento, San Juan, Guaynabo & Ponce, Puerto Rico, 2008.
- Site Characterization of Soil and Groundwater, Dense Non-Aqueous Phase Liquids (DNAPLs), Confidential Client, Carolina, Puerto Rico.
- Assessment of Dense Non-Aqueous Phase Liquids (DNAPLs) in Groundwater, Confidential Client, Carolina, Puerto Rico.
- NPDES Storm Water Management Plan, Peerless Oil and Chemical, Peñuelas & Guayanilla, Puerto Rico,
  Ongoing
- NPDES Storm Water Management Plan, Quality Electroplating, Caguas, Puerto Rico, January 2009.
- NPDES Storm Water Management Plan, University of Puerto Rico, Aguadilla Campus.
- NPDES Storm Water Management Plan, University of Puerto Rico, Humacao Campus.
- NPDES Storm Water Management Plan, University of Puerto Rico, Carolina Campus.
- Consumption of Energy Analysis, Ext. Degetau Improvements, Caguas, Puerto Rico, 2007
- Erosion and Sedimentation Control Plan UPR Bayamón, Bayamón, Puerto Rico, 2007

HYDROLOGY AND HYDRAULICS

Surface Hydrology/Hydraulics

- Hydrologic/Hydraulic Study for the Turabo River, Caguas, Puerto Rico, as requested by the Puerto Rico Highway and Transportation Authority, on-going.
- Hydrologic/Hydraulic Study for the AD Bayamon site owned by Mendez & Co., Bayamon, Puerto Rico, on-going.
- Hydrologic/Hydraulic Study for a proposed Mixed-Uses Development Complex, LAIF LLC, Guaynabo, Puerto Rico, 2009
- Hydrologic Study Degetau Avenue Extension, Caguas, Puerto Rico, On-going
- Hydrologic/Hydraulic Study La Vereda Residential Development, Ceiba, Puerto Rico, 2008

SKILLS

Proficient with the following softwares:

- Microsoft's computer software, such as: Power Point, Excel and Word.
- Hydrologic and Hydraulic software, such as: HMS, HEC-RAS, Hydraflow Storm Sewer, HY-8
- Software that can be applied to groundwater modeling, such as: Rockworks 2006, Surfer, AQTESOLV and Modflow Packages.
- AutoCad
- Arc GIS.
- Virtual Basic Programming.

Subject: **PRIVILEGED AND CONFIDENTIAL**
Phase I Environmental Site Assessment Report
Community Development Block Grant – Disaster Recovery
PRDOH/Municipality of Yabucoa
Agreement No. CDBG-DR: 000378
Plot D [Finca 54 (Dentista)]
53 Luis Muñoz Rivera Street
Pueblo Ward
Yabucoa, Puerto Rico
CES Project No. 24-0002

Dear Mr. Rodriguez:

Caribe Environmental Services (CES) respectfully submits to your attention this Phase I Environmental Site Assessment report of the referenced property. One digital version in PDF format of the report is submitted for your use. These services were conducted in accordance with the scope of work described in our proposal PR24-0129 dated January 14, 2025.

For your information according to the ASTM Standard, this practice does not address whether requirements in addition to all appropriate inquiries have been met in order to qualify for the LLPs. For example, the duties specified in 42 U.S.C. §9607(b)(3)(a) and (b) and cited in Appendix X1 of the ASTM E1527-21 Standard, including the continuing obligation not to impede the integrity and effectiveness of activity and use limitations (AULs), or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations. After acquiring a property, to maintain the liability protections, landowners must comply with "continuing obligations" during their property ownership. We understand that the continuing obligations may include:

- Provide all legally required notices with respect to the discovery or release of a hazardous substance;

PRIVILEGED AND CONFIDENTIAL

- Exercise appropriate care with respect to the hazardous substances by taking reasonable steps to stop or prevent continuing or threatened future releases and exposures, and prevent or limit human and environmental exposure to previous releases;
- Provide full cooperation, assistance, and access to per- sons authorized to conduct response actions or natural resource restoration;
- Comply with land use restrictions and not impede the effectiveness of institutional controls; and
- Comply with information requests and subpoenas.

This is a legal evaluation which is beyond the scope of the Phase I assessment.

We appreciate the opportunity to provide our professional services to you and look forward to our continued working relationship. If you have any questions regarding the enclosed report, please do not hesitate to contact us at your convenience.

Respectfully yours,

CARIBE ENVIRONMENTAL SERVICES

Luis R. Colón Morales, P.E., M.E.
Project Engineer

Valentín Félix, P.E.

1.0 SUMMARY

Caribe Environmental Services (CES) was retained by ABACUS Architecture, PSC (ABACUS) to conduct a Phase I Environmental Site Assessment (Phase I) of the Plot D [Finca 54 (Dentista)] located at the 53 Luis Muñoz Rivera Street, within the Pueblo Ward of the Yabucoa Municipality in Puerto Rico. Plot D [Finca 54 (Dentista)] covers an area of approximately 363.4611 square meters (m^2) (0.0925 "*cuerdas*") and is improved with an estimated 2,700 square feet (ft^2) vacant single-story structure. It is our understanding that Plot D is part of a rehabilitation project that will convert this vacant property into a Social Sports Center. From hereon the Plot D [Finca 54 (Dentista)] will be referenced to as the Subject Property.

CES understands that at the time of the site reconnaissance, the Subject Property was owned by Mr. Ramón Sepulveda Abreu. It is also our understanding that as part of the Community Development Block Grant – Disaster Recovery (CDBG-DR) program requirements, a Phase I was requested to be conducted for Plot D since it will involve the acquisition of the Subject Property. ABACUS requested a Phase I assessment of the Subject Property.

This Phase I was prepared in conformance with the scope and limitations of ASTM E1527-21 standard (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process). According to the Code of Federal Regulations (CFR), Volume 87, No. 240, dated December 15, 2022, US Environmental Protection Agency (EPA)'s final ruling accepts the new ASTM E1527-21 Standard as compliant with the All Appropriate Inquiry (AAI) Rule as set forth in 40 CFR Part 312. The new rule establishes that the ASTM E1527-21 Standard became effective on July 24, 2023, officially recognizing the new standard for Phase I Environmental Site Assessment.

The purpose of the Phase I was to evaluate environmental concerns or issues with respect to the range of contaminants within the scope of the Comprehensive Environmental Response and Liability Act (CERCLA) and petroleum products that maybe associated with the Subject Property, based upon readily available information and site observations. In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a property, the goal of the processes established by this practice is to identify *"Recognized Environmental Conditions (REC)"*, Historic RECs or Controlled RECs associated with the current and historical use of the property.

The term Recognized Environmental Condition (REC) means (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of

hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

The term Controlled Recognized Environmental Condition (CREC) means a Recognized Environmental Condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

The term historical recognized environmental condition (HREC) means a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meets unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

This Phase I may have identified *de minimis* condition. These are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

This Phase I investigation may identify issues of environmental concern not necessarily limited to those environmental issues required to be investigated in the ASTM E1527-21 Standard. Those issues are defined by the Standard as "business environmental risks (BER). BERs are defined by the standard as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated by the ASTM E1527-21 practice.

The scope of work for this study consisted of:

- A visual reconnaissance of the Subject Property and surroundings;
- Telephone interview with Mr. Luis Rivera of the Municipality of Yabucoa, designated prospective purchaser representative;
- Submittal of User Questionnaire (Appendix X3 of ASTM E1527-21) to Arch. Luis Rodriguez of ABACUS;
- Submittal of request of information letter to the Puerto Rico Department of Natural and Environmental Resources (DNER) Office;

- Review of readily available regulatory and technical information, including a review of geological, hydrogeological and hydrological information to establish environmental receptors at the site and in its vicinity;
- A review of available historical information, including historical aerial photographs, to ascertain historical use of the site and its immediate surroundings;
- A review of available information from public databases, local public offices and environment agencies (as reasonably available within timeframe);
- Preparation of a report outlining the findings and conclusion of the assessment.

A site reconnaissance was conducted by engineer Luis R. Colón Morales on January 28, 2025. During the site reconnaissance, Architect Mara Vázquez, of ABACUS accompanied CES personnel. At the time of CES visit, the Subject Property was observed to consist of a vacant one-story structure observed to be in deteriorated conditions with no specific use.

We note that site conditions and regulatory requirements may change in the future. Therefore, the information included in this report, our findings, or recommendations presented are based upon information readily available and observations made at the time of the Site visit. Sampling and analysis of site, water, air or other materials were not performed as part of the Phase I assessment.

This assessment has revealed ***no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps*** in connection with the Subject Property.

However, the following environmental concerns and/or findings associated with the site which may represent a business environmental risk, as defined by the ASTM Standard were identified:

- **Asbestos Containing Materials (ACM) and Lead Based Paint (LBP)**

  Based upon the year the building was constructed; the presence of ACMs and LBP cannot be discarded. However, to properly assess the presence of ACM and LBP, a survey is needed to be conducted.

Details about the scope, activities, findings and conclusions of this Phase I Environmental Site Assessment are described in the following sections of this Phase I report. This summary is provided for your convenience. It should not be construed as a separate document without reviewing the complete report, including the appendices.

PRIVILEGED AND CONFIDENTIAL

2.0 INTRODUCTION

2.1 PURPOSE

Caribe Environmental Services (CES) was retained by ABACUS Architecture, PSC (ABACUS) to conduct a Phase I Environmental Site Assessment (Phase I) of the Plot D [Finca 54 (Dentista)] located at the 53 Luis Muñoz Rivera Street, within the Pueblo Ward of the Yabucoa Municipality in Puerto Rico. Plot D [Finca 54 (Dentista)] covers an area of approximately 363.4611 square meters (m²) (0.0925 "*cuerdas*") and is improved with an estimated 2,700 square feet (ft²) vacant single-story structure. It is our understanding that Plot D is part of a rehabilitation project that will covert this vacant property into a Social Sports Center. From hereon the Plot D [Finca 54 (Dentista)] will be referenced to as the Subject Property.

CES understands that at the time of the site reconnaissance, the Subject Property was owned by Mr. Ramón Sepulveda Abreu. It is also our understanding that as part of the Community Development Block Grant – Disaster Recovery (CDBG-DR) program requirements, a Phase I was requested to be conducted for Plot D since it will involve the acquisition of the Subject Property. ABACUS requested a Phase I assessment of the Subject Property.

This Phase I was prepared in conformance with the scope and limitations of ASTM E1527-21 standard (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process). According to the Code of Federal Regulations (CFR), Volume 87, No. 240, dated December 15, 2022, US Environmental Protection Agency (EPA)'s final ruling accepts the new ASTM E1527-21 Standard as compliant with the All Appropriate Inquiry (AAI) Rule as set forth in 40 CFR Part 312. The new rule establishes that the ASTM E1527-21 Standard became effective on July 24, 2023, officially recognizing the new standard for Phase I Environmental Site Assessment.

PRIVILEGED AND CONFIDENTIAL

The purpose of the Phase I was to evaluate environmental concerns or issues with respect to the range of contaminants within the scope of the Comprehensive Environmental Response and Liability Act (CERCLA) and petroleum products that maybe associated with the Subject Property, based upon readily available information and site observations. In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a property, the goal of the processes established by this practice is to identify *"Recognized Environmental Conditions (REC)"*, Historic RECs or Controlled RECs associated with the current and historical use of the property.

The term Recognized Environmental Condition (REC) means (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

The term Controlled Recognized Environmental Condition (CREC) means a Recognized Environmental Condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

The term historical recognized environmental condition (HREC) means a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meets unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use

limitations). A historical recognized environmental condition is not a recognized environmental condition.

This Phase I may have identified *de minimis* condition. These are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

This Phase I investigation may identify issues of environmental concern not necessarily limited to those environmental issues required to be investigated in the ASTM E1527-21 Standard. Those issues are defined by the Standard as "business environmental risks (BER). BERs are defined by the standard as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated by the ASTM E1527-21 practice.

2.2 DETAILED SCOPE OF SERVICES

The scope of work for this study consisted of:

- A visual reconnaissance of the Subject Property and surroundings;
- Telephone interview with Mr. Luis Rivera of the Municipality of Yabucoa, designated prospective purchaser representative;
- Submittal of User Questionnaire (Appendix X3 of ASTM E1527-21) to Arch. Luis Rodriguez of ABACUS;
- Submittal of request of information letter to the Puerto Rico Department of Natural and Environmental Resources (DNER) Office;
- Review of readily available regulatory and technical information, including a review of geological, hydrogeological and hydrological information to establish environmental receptors at the site and in its vicinity;

- A review of available historical information, including historical aerial photographs, to ascertain historical use of the site and its immediate surroundings;
- A review of available information from public databases, local public offices and environment agencies (as reasonably available within timeframe);
- Preparation of a report outlining the findings and conclusion of the assessment.

A site reconnaissance was conducted by engineer Luis R. Colón Morales on January 28, 2025. During the site reconnaissance, Architect Mara Vázquez, of ABACUS accompanied CES personnel. At the time of CES visit, the Subject Property was observed to consist of a vacant one-story structure in neglected conditions with no specific use. The purpose of the field visit was to observe physical conditions of the Site and identify regulated or suspect facilities in the vicinity of the Subject Property.

Copies of historical aerial photographs obtained from the Puerto Rico Highway and Transportation Authority (PRHTA) were reviewed. The purpose of this review was to understand the historical land uses of the Subject Property. Aerial photographs available for the site were obtained for flight dates of January 30, 1937; January 9, 1951; February 11, 1965; March 24, 1977; March 16, 1988; and March 1990. In addition, high-resolution satellite photos were obtained from Google Earth Pro for: June 30, 2002; October 31, 2006; September 6, 2012; May 25, 2017; and May 13, 2024. Aerial photos for the 1940's decades were not available. The following published information (references) was also reviewed to gain an understanding of the site's natural setting:

- *Topographic Map of the Yabucoa Quadrangle by U.S. Geological Survey (2018)*
- *Topographic Map of the Yabucoa Quadrangle by U.S. Geological Survey, (1960) Photorevised 1982.*
- *Topographic Map of the Yabucoa Quadrangle U.S. Geological Survey (1946)*
- *Soil Survey Map of Humacao Area, Puerto Rico Eastern Part, U.S. Department of Agriculture Soil Conservation Survey; Survey Area Data: Version 15, September 10, 2024.*
- *Geologic Map of the Yabucoa and Punta Tuna Quadrangles, C.L. Rogers, C.M. Cram, M.H. Pease, Jr., and M.S. Tischler U.S. Geological Survey (1979)*

- *Flood Insurance Rate Maps, Panel 1795 of 2160 (Map Number 72000C1795J), by the Federal Emergency Management Agency (FEMA). Effective date April 13, 2018.*
- *Atlas of Ground-Water Resources in Puerto Rico and the US Virgin Islands. 1996. U.S. Geological Survey. Water Resources Investigations Report 94-4198.*
- *Google Earth Pro 7.3.4.8642 (64-bit) Thursday, May 12, 2022, 10:55:31 PM UTC*
- *http://www.jp.gobierno.pr/*
- *http://gis.jp.pr.gov/GeoLocalizador/index.htm?refresh=501*

The following database of standard environmental record sources prepared obtained from the U.S. Environmental Protection Agency (EPA), DNER or the Solid Waste Management Authority (SWMA) were reviewed to determine if the Subject Property was listed as a regulated facility, and if other potential regulated facilities or hazardous waste sites were located near the Subject Property. In addition, the environmental record sources prepared by Environmental Data Resource (EDR) were reviewed.

Database	**Search Radius**
Federal NPL site list (December 19, 2024)	1-mile
Federal Delisted NPL site list (December 19, 2024)	0.5 -mile
Federal CERCLIS list	
SEMS (dated December 19, 2024)	0.5-mile
Federal CERCLIS NFRAP site list	
SEMS Archived (dated December 19, 2024)	0.5-mile
Federal RCRA TSD Facilities list	
CORRACTS (dated September 16, 2024)	1-mile
Non-CORRACTS (dated September 16, 2024)	0.5 miles
Federal RCRA Generators list (dated September 16, 2024)	Property and adjoining properties
Federal Engineering Control Registries (November 4, 2024)	Property only
Federal Institutional Control Registries (November 4, 2024)	Property only
Federal Emergency Response Notification System (ERNS) list (dated December 3, 2024)	Property only
State UST Registration List (dated January 1, 2008)	Property and adjoining properties
State Leaking USTs List (dated 2024) (https://www.drna.pr.gov/public-record-for-lust-sites/)	0.5 miles

State Landfill and/or Solid Waste Disposal Site Lists (as of July 2012) http://www.ads.pr.gov/	0.5 miles
Federal, State, and tribal Brownfield sites (September 9, 2024)	0.5 miles

The following state and tribal environmental database record sources are recommended to be reviewed by the ASTM Practice E1527-21. However, they were not reviewed because Puerto Rico does not maintain a list (i.e. State NPL list) and/or they are not applicable (i.e. no Indian land is designated in Puerto Rico).

State and tribal lists of *hazardous waste* sites identified for investigation or remediation
State and tribal-equivalent NPL
State and tribal-equivalent CERCLIS
State and tribal institutional Control/Engineering Registries
State and tribal voluntary cleanup sites

In addition, the ASTM Standard suggests reviewing fire insurance maps and city directories. However, these sources are not available for Puerto Rico.

Also, the Environmental Protection Agency (EPA) Facility Registry Service (FRS), to verify if the Subject Property was included in the registry. The FRS is a database maintained by the EPA of facilities, sites or places of environmental interest subject to regulation. It provides quality facility data to support EPA's mission of protecting human health and the environment. The FRS includes facilities listed in databases such as: NPL, Delisted NPL, CERCLIS, CERCLIS NFRAP, RCRA TSD, RCRA Generators, Brownfield, etc.

2.3 SIGNIFICANT ASSUMPTIONS

The Phase I was prepared in conformance with the scope and limitations of ASTM Practice E1527-21. No other significant assumptions were made or taken into consideration during the preparation of this Phase I report.

2.4 LIMITATIONS AND EXCEPTIONS

The opinions included in this report are based upon reasonably ascertainable information obtained during the course of the assessment, site observations, and interviews, and our understanding of applicable environmental regulations. No representations or warranties are made concerning the nature or quality of the air, soil, water, building materials or any other substances on the Property, other than the visual observations as stated in this report. Sites not listed on the reviewed regulatory agencies databases or hidden sources of potential liability cannot be detected by the methods used for the Phase I assessment.

The scope of work for this Phase I meets the requirements of the ASTM E1527-21. The ASTM E1527-21 Section 13.1.5 includes Non-Scope considerations such as; Asbestos-Containing Building Materials (ACM), Biological agents, Cultural and historic resources, Ecological resources, Endangered species, Health and safety, Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, Industrial hygiene, Lead-Based Paint (LBP), Lead in Drinking Water, Mold, Regulatory compliance, and Wetlands, that are not part of the required ASTM Standard scope of work. However, as requested by ABACUS, general observations regarding only one or more of the following non-Scope considerations are included in this Phase I report; ACM, LBP, environmental permitting issues associated only with UST, AST, air emissions, UIC, used oil, bio-medical waste if identified by the environmental professional during the site reconnaissance, mold, and included the identification of the potential

presence of wetlands, if during the site reconnaissance, this was observed by the environmental professional. Also, this Phase I does not include specialized studies such as sampling, ACM-LBP survey, or mold survey, among others.

In addition, the likely presence of per-and polyfluoroalkyl substances, also known as "PFAS", at the Subject Property area was assessed. PFAS are described, in the ASTM E1527-21 Standard, as "Substances Not Defined as Hazardous Substances". These and any other "emerging contaminants," where they are not identified as a hazardous substances by CERCLA, as interpreted by EPA regulations and the courts, are not included in the scope of the ASTM E1527 practice. However, on April 10, 2024, EPA announced the final National Primary Drinking Water Regulation (NPDWR) for six PFAS. With this rule, EPA is establishing legally enforceable levels for six PFAS known to occur individually and/or as mixtures in drinking water. EPA established legally enforceable levels, called Maximum Contaminant Levels (MCLs), for six PFAS in drinking water: perflouorooctanoic acid (PFOA), perfluorooctane sulfonate (PFOS), Perfluorohexanesulfonic acid (PFHxS), Perfluorononanoic acid (PFNA), and Hexafluoropropylene oxide-dimer acid (HFPO-DA) as contaminants with individual MCLs, and PFAS mixtures containing at least two or more of PFHxS, PFNA, HFPO-DA, and Perfluorobutanesulfonic acid (PFBS) using a Hazard Index MCL to account for the combined and co-occurring levels of these PFAS in drinking water. EPA also finalized health-based, non-enforceable Maximum Contaminant Level Goals (MCLGs) for these PFAS. We note that presently Puerto Rico does not have any regulations or guidance related to the impacts of PFAS or assessment requirements for PFAS. However, the Federal EPA PFAS regulations apply to Puerto Rico.

If additional information that might impact our conclusions becomes available, we reserve the right to review the information, reassess the potential concerns, and modify our opinions, if warranted.

PRIVILEGED AND CONFIDENTIAL

In the preparation of this report, CES has relied upon documents and information provided by ABACUS and the municipality representative. In addition, CES has relied upon a computer search of government databases provided by EDR and the EPA FRS. Except as discussed in the report, CES did not attempt to independently verify the accuracy or completeness of that data but did not detect inconsistencies or omissions of a nature that might question the validity of the information. We note that the accuracy of the information provided in the databases is not warranted by EDR online services because these are controlled by the regulatory agencies.

CES understands that the data obtained from these databases are the most current data available. To the extent that the conclusions in this report are based in whole or in part on such information, they are contingent on its validity. CES assumes no responsibility for any consequence arising from any information or condition that was concealed, withheld, misrepresented or otherwise not fully disclosed or available to us.

The Phase I report may include observations and/or comments regarding possible issues of environmental compliance identified at the Subject Property. The inclusion of such information must not be interpreted as representative or indicative of the environmental compliance status of the facility. This Phase I investigation must not be construed as an environmental compliance or environmental audit investigation for the Site.

We note that Site conditions and regulatory requirements may change in the future. Therefore, the information included in this report, our findings, or recommendations presented are based upon information readily available and observations made at the time of the site visit.

We note that any property boundary, feature location, or measurements included in this report are approximate, for illustration purposes only, and other than for the ease of use of this report, these shall not be used. Any property boundary, feature location, or measurement included in this report

must not be assumed to be or interpreted as a certified building covering area, a survey foot-print area, or a certified property limit.

Although this assessment has attempted to identify potential for environmental impairment to the Subject Property, potential sources of contamination may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, and/or (5) deliberate concealment of detrimental information. It was not the purpose of this study to determine the actual presence, degree, or extent of contamination, if any, at the Site. This could require additional exploratory work, including sampling and laboratory analysis. Also, other than a general opinion and observation during the site reconnaissance, it was not the purpose of this study to provide asbestos and/or lead-based paint materials services.

For the purposes of this report, "migrate" and "migration" refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Therefore, this report may include an opinion or assessment of RECs associated to hazardous substances or petroleum products vapor migration issue with respect to the Subject Property. The ASTM E2600 Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions may have been used during this report only as a reference. However, it is not the intent of this study to conduct a Vapor Encroachment Screening study or to identify a Vapor Encroachment Condition, since that study was not part of the Phase I scope of work.

We note that a finding of no recognized environmental condition is not a warranty or guarantee that the property remains free from contamination. No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the Property. Performance of this practice is intended to reduce, but not to

eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the Property.

This assessment has been undertaken and performed in a professional manner, in accordance with generally accepted practices, using the degree of skill and care ordinarily exercised by reputable environmental consultants under similar circumstances. No other warranty, expressed or implied is made.

An environmental site assessment meeting or exceeding this practice and for which the information was collected or updated within *1 year* prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction may be used provided that the following components of the inquiries were conducted or updated within *180 days* of the date of purchase or the date of the intended transaction: 1) interviews with owners, operators, and occupants; 2) searches for recorded environmental cleanup liens; 3) reviews of federal, tribal, state, and local government records; 4) visual inspections of the property and of adjoining properties; and 5) the declaration by the environmental professional responsible for the assessment or update.

2.5 USER RELIANCE

This report was prepared at the request and for the exclusive use of ABACUS Architecture, PSC, its agents, advisors, and legal representatives. No other party is entitled to rely on the conclusions, observations, specifications, or data contained herein without the express written consent of CES. It should be emphasized that because conditions at the Subject Property can change over time, the use of this report by unauthorized third parties without written authorization from CES shall be at their own risk.

2.6 REPORT VIABILITY

This Phase I report is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the Subject Property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction).

The dates of the components included in this Phase I report are as follows:

Component	Date Conducted	Expiration Date
Interviews with Owner	Not Available	Not Available
Interviews with municipality representativeowner	January 28, 2025	July 27, 2025
Review of government records	February 20, 2025	August 19, 2025
Visual inspections	January 28, 2025	July 27, 2025
Environmental Professional Declaration	March 31, 2025	September 27, 2025

PRIVILEGED AND CONFIDENTIAL

3.0 SITE DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

The Subject Property is located at the 53 Luis Muñoz Rivera Street, within the Pueblo Ward of the Yabucoa Municipality in Puerto Rico. A Site Vicinity Map is provided in ***Appendix 1***. A Site Aerial Photograph, showing the Site's features, general settings, and surroundings is provided in ***Appendix 2***. The project site boundaries included in ***Appendix 2*** are approximate based upon the information provided to CES. ***Appendix 3*** presents general photographs of the site as observed during the site reconnaissance. The approximate coordinates of the center portion of the Subject Property are: 18°03'02.28"N; 65°52'46.67"W.

A title study prepared by Luis Angel Ortiz Carrasquillo; Abogado-Notario dated October 11, 2023 was provided for our review. The legal description as included in the title study is as follows:

> *"Urbana: Solar radicado en la calle Luis Muñoz Rivera número 51 del término municipal de Yabucoa, con una cabida superficial de 363.4611 metros cuadrados. En lindes por el Norte, en 16.004 metros con Pablo de Jesús y 0.180 metros con Sucesión Colón; por el Sur, en 15.950 metros con la calle en que radica; por el Este, en 22.782 metros con Pablo de Jesús y por el Oeste, en 8.57 metros con la Sucesión Colón."*

A copy of the Title Survey and land survey provided to us is included in ***Appendix 4***. This Phase I is limited only to Plot D.

3.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The Subject Property consists of a lot improved with a vacant concrete one-story structure with an estimated gross building area of about 2,700 ft². The structure was observed to be in deteriorated

conditions. The Subject Property appears to have been connected to the electric power utility grid operated by LUMA, and the potable water system and sanitary sewer system owned by PRASA. However, due to the observed deteriorated conditions, it is expected that none of the utilities may be functional. The Subject Property was not observed to have liquified petroleum gas (LPG) lines within its limits.

The Subject Property's grading is relatively flat. Photographs of the Subject Property and vicinity areas are included in ***Appendix 3***. As appropriate, selected site photographs are illustrated for orientation purposes only in ***Appendix 2.*** General views of the Subject Property and surroundings are shown in ***Photographs 1*** through ***11***.

3.3 CURRENT USE OF THE PROPERTY

The Subject Property is presently vacant and has no specific use.

3.4 DESCRIPTION OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SITE

A summary of the main structures and improvements observed at the Subject Property was included in *Section 3.2* above.

3.5 CURRENT USE OF ADJOINING PROPERTIES

The following are the properties adjoining the Subject Property and their respective uses.

North: Residential Properties
West: Open Space

East: Vacant Mix-Use Property
South: Luis Muñoz Rivera Street, Parroquia Santos Ángeles Custodios and Attorney at law office

During our site reconnaissance, a visual inspection of the adjoining properties from the Subject Property's property limits was conducted. Based upon our site observations *no* evident accumulations, releases, threat of releases of hazardous or petroleum products were observed at the adjoining properties boundaries that could represent an environmental concern for the Subject Property.

PRIVILEGED AND CONFIDENTIAL

4.0 USER-PROVIDED INFORMATION

4.1 TITLE RECORDS

A title study of the Subject Property prepared by Luis Angel Ortiz Carrasquillo; Abogado-Notario dated October 11, 2023 was provided for our review. This title study does not indicate any environmental liens, environmental limitations, or concerns with respect to the Subject Property. A legal description of the Subject Property, as included in the title study, is presented in *Section 3.1* of this report.

4.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATION

In Puerto Rico claims against the title of the property and property restrictions including environmental liens and Activity And Use limitations are available from the Property Registrar's office part of the Puerto Rico Department of Justice. As part of the *User's Responsibilities*, ABACUS as the user must inform CES if environmental liens/AULs exists at the Subject Property.

CES does not need to review, assess, or otherwise evaluate the land title records or the user's conclusions as to whether AULs or environmental liens were identified. The environmental professional only needs to identify whether they received land title records from the user and whether the user identified AULs or environmental liens.

ABACUS as the user did not report to us any environmental liens or Activity and Use Limitations (AULs) associated with the Subject Property. In addition, ABACUS in their response to the User Questionnaire indicated that they are *unaware* of any environmental cleanup liens against the Subject Property.

4.3 SPECIALIZED KNOWLEDGE

According to information provided by ABACUS in their response to the User Questionnaire, ABACUS does *not* have specialized knowledge information related to conditions, events, and/or activities at the Subject Property that could constitute environmental concerns or issues to the Subject Property.

4.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Based upon information provided by ABACUS in their response to the User Questionnaire, ABACUS is *not* aware of any commonly known or reasonably ascertainable information about the Property that is material to recognized environmental conditions in connection with the Property.

4.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

According to information provided by ABACUS in their response to the User Questionnaire, ABACUS is *not* aware of any environmental issues that would affect the present value of the property.

4.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

- Owner of Subject Property — Ramon Sepulveda Abreu
53 Luis Muñoz Rivera Street
Pueblo Ward
Yabucoa, Puerto Rico 00767
- Occupant Information: — Vacant
- Property Manager: — Same as owner

4.7 REASON FOR PERFORMING PHASE I

According to information provided to CES, this Phase I was performed as part of the CDBG-DR program environmental requirements.

This practice is intended to permit a user to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bonafide prospective purchaser* limitations on CERCLA liability (*land owner liability protection of LLPs*): that is, the practice constitutes all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial and customary practice, as defined by 42 U.S.C.§9601(35)(B).

4.8 OTHER INFORMATION

Other than the documents and information discussed in this report, no additional user information was provided to CES by the user during the preparation of this Phase I.

PRIVILEGED AND CONFIDENTIAL

5.0 RECORDS REVIEW

5.1 STANDARD ENVIRONMENTAL RECORD SOURCES

CES reviewed Federal and Commonwealth environmental regulatory agency lists, prepared by EDR and/or provided by the EPA, DNER, and Solid Waste Management Agency (SWMA). A copy of the EDR report and databases obtained are included in ***Appendix 5*** of this Phase I report. In addition, FRS database reviewed for this report is included in ***Appendix 6.*** These databases include other facilities that are outside the ASTM E1527-21 required database search radius. Therefore, only those facilities that are within the required database search radius are evaluated in this Phase I report.

The information obtained during our site visit, and published information were reviewed and evaluated in relation to principal environmental regulations that may expose site owners and/or operators to potential liabilities. Our regulatory review findings are presented in the following subsections of this report.

5.1.1 Resource Conservation & Recovery Information System (RCRIS)

Hazardous solid wastes are regulated by the Puerto Rico Regulation for the Control of Hazardous Wastes, as well as by the Federal Resource Conservation and Recovery Act (RCRA), Subtitle C. RCRA regulates the management of hazardous wastes including its generation, transportation, and treatment/storage/disposal (T/S/D). The US Environmental Protection Agency (EPA) catalogs and compiles lists of facilities that are regulated under the RCRA Subtitle C and makes these available through the RCRA Information System (RCRIS).

A review of the RCRIS database indicated the following:

- According to the reviewed databases, the Subject Property is *not* listed as a RCRA generator.
- According to the reviewed databases, there are *no* adjoining facilities listed as a RCRA generator.
- There are *no* facilities located within a *one-mile radius* of the Subject Property listed as Corrective Action (CORRACT) TSD facilities.
- There are *no* facilities located within *one half-mile radius* of the Subject Property listed as Non-CORRACTS TSD facilities.

5.1.2 Superfund Enterprise Management System (SEMS)

The Superfund Enterprise Management System (SEMS) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

The Superfund Enterprise Management System (SEMS-ARCHIVE) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps

will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the Federal Facility and SEMS database revealed the following:

- The Subject Property is *not* listed as a FEDERAL FACILITY or SEMS site.
- There are *no* facilities listed as SEMS site *within a one-half mile radius* of the Subject Property.
- There are *no* facilities listed as FEDERAL FACILITY sites *within a one-half mile radius* of the Subject Property.
- There are *no* facilities listed as a SEMS-ARCHIVE site located *within a one-half mile radius* of the Subject Property.

5.1.3 National Priorities List (NPL)

CERCLA established the NPL or federal superfund sites list**.** These are contaminated facilities to which the EPA has assigned a high ranking in terms of their potential health effects. The CERCLIS database also includes NPL sites. A review of the CERCLIS database indicated the following:

- The Subject Property is *not* on the NPL.
- There are *no* NPL sites located within a *one-mile radius* of the Subject Property.
- There are *no* delisted NPL sites located within a *one-half-mile radius* of the Subject Property.

5.1.4 Emergency Response Notification System (ERNS)

The ERNS is a list of hazardous material spills reported to various state and federal agencies. Our review of the ERNS report found that the Subject Property is *not* listed in the ERNS.

5.1.5 Petroleum Underground Storage Tanks (USTs) List

Petroleum USTs are subject to regulation under RCRA Subtitle I, which is administered by the DNER. CES utilizes EDR as an environmental database. EDR in turn obtains USTs and LUSTs information from the Puerto Rico Department of Natural and Environmental Resources (DNER) UST Program Inventory. CES reviewed the EDR database as well as the DNER USTs/LUSTs inventory, including the Puerto Rico Planning Board webpage (http://gis.jp.pr.gov/itr/http://jcagnet.jp.pr.gov/) which provides spatial coordinates for UST and LUST facilities.

A review of the DNER UST Registration List indicated the following:

- The Subject Property is *not* listed as a UST facility.
- There are *no* UST adjoining facilities listed as a UST facility.

The identification of the USTs facilities was based on the addresses included in the DNER UST List and our understanding of the general site area. USTs facilities that were listed with an incorrect or incomplete address might have not been able to be properly located.

5.1.6 Leaking Underground Storage Tanks (LUSTs) List

The DNER LUST list identifies known releases and other information (i.e. closure report submittals, performance of integrity tests, etc.) by facility. CES utilizes EDR as an environmental database. EDR in turn obtains USTs and LUSTs information from the Puerto Rico Department of Natural and Environmental Resources (DNER) UST Program Inventory. CES reviewed the EDR database as well as the latest DNER LUSTs inventory (https://www.drna.pr.gov/public-record-for-lust-sites/) which includes the LUST facilities.

A review of the DNER LUST list revealed that:

- The subject property is *not* listed in the LUST list.
- The following LUST facilities are *listed* within a *one-half mile radius* of the Subject Property:

  - Esso CO-266 with DNER ID. 86-1367 located at Calle Cristobal Colón 65 at approximately 0.26 miles to the south of the Subject Property. This facility has not been released by the DNER.

  - Texaco #264 with DNER ID. 86-1722 located at Carr 182 Salida San Lorenzo at approximately 0.21 miles to the west of the Subject Property. This facility has not been released by the DNER.

  - Independiente/Gulf with DNER ID. 86-0381 located at Carr. 901 Km. 0.5 at approximately 0.50 miles to the southeast of the Subject Property. This facility has not been released by the DNER.

The identification of the LUSTs facilities was based on the addresses included in the DNER LUST List and our understanding of the general site area. LUSTs facilities that were listed with an incorrect or incomplete address might have not been able to be properly located.

5.1.7 Solid Waste Landfills

The PRSWMA has compiled a list of known active landfills on the island. Based upon this list and our site visit observations:

- There are *no* registered state landfill and/or solid waste disposal sites located *within a one half-mile radius* of the Site.
- *No* obvious signs of present landfill activity were observed at the Subject Property.

5.1.8 Federal, State, and Tribal Institutional Control/Engineering Control Registries

The Federal, State and Tribal Institutional Control/Engineering Control Registries (ICECR) are registries of sites or facilities listed as having legal or physical restrictions or limitations on the use of, or access to the site or facility: (1) to reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil or ground water on the *property*, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to *hazardous substances* and *petroleum products* in the soil or groundwater on the property.

Our review of the EDR report indicates that at the time of the preparation of this report, the site was *not* listed in the Federal, State, and Tribal Institutional Control/Engineering Control Registries.

5.1.9 Facility Index System

The Facility Index System (FINDS) contains both facility information and '*pointers*' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Our review of the FINDS list indicates that the Subject Property *is not* listed in the FINDS.

5.1.10 Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program. However, ICIS is a secure system only available to EPA and state users. The public should use the Enforcement and Compliance History Online (ECHO). ECHO is a Web-based tool that provides public users with compliance monitoring and enforcement data.

Our review of the ICIS/ECHO, indicates that at the time of the preparation of this report, the Subject Property was *not* listed in ECHO database.

5.1.11 Federal, State and Tribal Brownfield Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on Brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions.

Our review of the US Brownfields sites database indicates that:

- The Subject Property is *not* listed in this database.
- There are *no* facilities listed as Brownfield sites located within *one-half mile radius* of the Subject Property.

5.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

As required by the ASTM E1527-21 Standard if the property or any of the adjoining properties is identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing should be reviewed. The Subject Property is not listed in the reviewee data resources. To further investigate the potential listing of the Subject Property and adjoining properties, CES reviewed the information included in the EPA FRS.

Our review of this information is presented in the following sections.

5.2.1 EPA Facility Registry Service (FRS)

The EPA Facility Registry Service allows citizens to retrieve a list of facilities registered with EPA, by conducting a database search with user defined search criteria. EPA FRS is part of the EPA EnviroFacts database system, which is a single point of access to select U.S. EPA environmental data. The website provides access to several EPA databases to provide with information about environmental activities that may affect air, water, and land anywhere in the United States.

Our review of the EPA FRS report found that the Subject Property is *not* listed in the FRS.

5.3 PHYSICAL SETTING SOURCES

Physical setting sources provide information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of a site.

5.3.1 USGS Topographic Map

According to the Topographic Map of the Yabucoa and Punta Tuna Quadrangles, the elevation at the Subject Property is approximately 21 meters above mean sea level (MSL). Presently, the Subject Property is developed and the topography is relatively flat with sloping terrain towards the north. The closest surface water body to the Subject Property is Caño de Santiago located approximately 235 feet to the north of the Subject Property.

5.3.2 USGS Geologic Map

According to the Geologic Map of the Yabucoa and Punta Tuna Quadrangles, the Subject Property consists entirely of Tonalite Facies of Granodiorite of San Lorenzo {Upper Cretaceous} (Klt) which is composed of plagioclase, potassium feldspar, quartz, hornblende, augite, biotite, magnetite, minor myrmekite, and accessory sphene, apatite, and zircon. (Roger, Cram, Pease, and Tischler, 1979).

5.3.3 USDA NRCS Soil Survey

According to the *Soil Survey of the Humacao Area, Puerto Rico Eastern Part,* the Subject Property soils are classified as Urban land (Ul). Urban land are miscellaneous areas.

5.3.4 USGS Atlas of Ground-Water Resources and Aquifer Systems

According to the Atlas of Ground-Water Resources in Puerto Rico and the US Virgin Islands, groundwater in the alluvial aquifers flows east in the Humacao-Naguabo and Yabucoa basins, and southeast in the Maunabo basin, towards the coast. Ground water may flow toward or away from streams, depending on the hydraulic gradient between the stream and the adjacent aquifer. Rivers

in the Yabucoa and Maunabo alluvial valleys drain the alluvial aquifer. Discharge from the alluvial aquifers into the streams represent 27 to 50 percent of the annual river flow in Yabucoa and Maunabo basins, respectively.

According to "Principal aquifers of Puerto Rico and the U.S. Virgin Islands" by Robert A. Renken, January 11, 1998, U.S. Geological Survey, the Subject Property is located overlying Volcaniclastic-, igneous-, and sedimentary-rock aquifers.

The groundwater depth and flow direction were not measured during this assessment. However, based upon the expected hydrogeological setting of the area the groundwater is inferred to flow towards the north towards the Caño Santiago.

The depth and gradient of the water table likely vary seasonally with changes in precipitation and may change significantly over time in response to development, including impervious surfaces, storm water controls, and pumping wells (domestic, industrial or irrigation). Based upon our experience during other groundwater investigations conducted at similar areas in Puerto Rico, it is not uncommon to encounter perched or local groundwater conditions in which the groundwater flow direction may be different from the expected and regional groundwater flow direction.

5.3.5 Flooding Conditions

According to the *Flood Insurance Rate Map*, Panel 1795 of 2160 (Map Numbers 72000C1795J) dated April 13, 2018, the Subject Property is located outside the 1% (100-year) and 0.2% (500-year) annual flood chance boundaries.

5.3.6 Wetlands

Section 404 of the Clean Water Act (CWA) establishes a program to regulate the discharge of dredged or fill material into waters of the United States, including wetlands. Activities in waters of the United States regulated under this program include filling for development, water resource projects (such as dams and levees), infrastructure development (such as highways and airports), and mining projects. Section 404 requires a permit before dredged or fill material may be discharged into waters of the United States unless the activity is exempt from Section 404 regulation (e.g. certain farming and forestry activities).

To verify if the proposed project area, may be located within regulated wetlands, CES evaluated the National Wetlands Inventory (NWI) established by the US Fish and Wildlife Service (FWS). The NWI was developed to conduct a nationwide inventory of U.S. wetlands to provide biologists and others with information on the distribution and type of wetlands to aid in conservation efforts. To do this, the NWI developed a wetland classification system (Cowardin et al. 1979) that is now the official FWS wetland classification system and the Federal standard for wetland classification (adopted by the Federal Geographic Data Committee on July 29, 1996: 61 Federal Register 39465).

The NWI also developed techniques for mapping and recording the inventory findings. The NWI relies on trained image analysts to identify and classify wetlands and deep-water habitats from aerial imagery. As computerized mapping and geospatial technology evolved, NWI discontinued production of paper maps in favor of distributing data via online "mapping tools" where information can be viewed and downloaded. Today, FWS serves its data via an on-line data discovery "Wetlands Mapper". GIS users can access wetlands data through an online wetland mapping service or download data for various applications (maps, data analyses, and reports).

According to the US Fish and Wildlife Services national wetland inventory map, no wetlands are identified at the Subject Property. During our site reconnaissance we did not identify any wetland type vegetation in the Subject Property.

5.4 HISTORICAL USE INFORMATION ON THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

This report describes, to the extent possible, all identified uses, and justifies the earliest date identified for the subject property's first developed use, or back to 1940, whichever is earlier (for example, records showed no development of the subject property prior to the specific date).

According to the ASTM Standard, the following standard historical resources shall be reviewed if, based on the judgment of the environmental professional, they are reasonably ascertainable, likely to be useful, and applicable to the subject property: (1) aerial photographs, (2) fire insurance maps, (3) local street directories, and (4) historical topographic maps. In cases in which any of the preceding four standard historical resources are not reviewed, the environmental professional shall indicate in the report why such a review was not conducted.

In addition, the Property Tax Files obtained from Centro de Recaudaciones de Ingresos Municipales (CRIM) database, https://catastro.crimpr.net/cdprpc/, and use permits and Zoning/Land Use Records obtained from the Puerto Rico Planning Board online database (http://gis.jp.pr.gov/itr/), were review (if available).

According to the Sanborn Fire Insurance Maps Online Checklist published by the Sanborn Map Company, the maps are based upon the Library's 1981 publication Fire Insurance Maps in the Library of Congress. The online presentation includes entries from all 50 United States, as well as Canada, Mexico, Cuba sugar warehouses, and U.S. whiskey warehouses. However, Puerto Rico is

not included in this database. Therefore, the review of Sanborn fire insurance maps was considered not reasonably ascertainable and was not included as part of this Phase I.

According to the Library of the U.S. Congress (https://www.loc.gov/rr/genealogy/bib_guid/telephon.html), there are no current city directories for many major U.S. cities. It is our experience that there is no local street directories centralized digital record for Puerto Rico. Therefore, the review of city directories was considered not reasonably ascertainable and was not included as part of this Phase I.

5.4.1 Historical Aerial Photographs

In the *1937 photograph*, the Subject Property and surrounding areas were observed to be already developed as part of the Yabucoa town core. A small square shaped building is observed located on the Subject Property. No details of the specific use that was given to the Subject Property at this time was available during the preparation of this Phase I. However, based on our experience with other similar facilities located at this time in other municipality town cores in Puerto Rico, it may have been used for residential and/or as a retail business. The Yabucoa Town core public square and catholic church is observed to the south of the Subject Property. The Luis Muñoz Rivera Street is also observed to the south of the Subject Property.

In the *1951 photograph*, the Subject Property and adjoining properties' conditions are similar to those observed in the 1937. No details of the specific use that was given to the Subject Property at this time was available during the preparation of this Phase I. However, based on our experience with other similar facilities located at this time in other municipality town cores in Puerto Rico, it may have been used for residential and/or as a retail business.

In the *1965 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in 1951. No details of the specific use that was given to the Subject Property at this time was available during the preparation of this Phase I. However, based on our experience with other similar facilities located at this time in other municipality town cores in Puerto Rico, it may have been used for residential and/or as a retail business.

In the *1977 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in 1965. No details of the specific use that was given to the Subject Property at this time was available during the preparation of this Phase I. However, based on our experience with other similar facilities located at this time in other municipality town cores in Puerto Rico, it may have been used for residential and/or as a retail business.

In the *1988 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in the 1977. Based on the information obtained from the municipality of Yabucoa representative, at this time it is likely that the Subject Property was used as a dental office.

In the *1990 photograph,* the Subject Property and adjoining properties' conditions are similar to those observed in 1988. Based on the information obtained from the municipality of Yabucoa representative, at this time it is likely that the Subject Property was used as a dental office.

In the *2002 Google Earth*® aerial photograph, the Subject Property and adjoining properties' conditions are similar to those observed in 1990. Based on the information obtained from the municipality of Yabucoa representative, at this time it is likely that the Subject Property was used as a dental office.

In the *2006 Google Earth*® aerial photograph, the Subject Property and adjoining properties' conditions are similar to those observed in 2002, except that the adjoining property to the west has

been demolished and now is an open space. Based on the information obtained from the municipality of Yabucoa representative, at this time it is likely that the Subject Property was used as a dental office.

In the 2012 *Google Earth*® aerial photograph, the site conditions and surroundings are similar to those observed in the 2006 photograph. Based on the information obtained from the municipality of Yabucoa representative, at this time it is likely that the Subject Property was used as a dental office.

In the 2017 *Google Earth*® aerial photograph, the site conditions and surroundings are similar to those observed in the 2012 photograph. Based on the information obtained from the municipality of Yabucoa representative, at this time it is likely that the Subject Property was vacant.

In the *2024 Google Earth*® aerial photograph site and surrounding conditions are similar to those observed at the time of the site visit.

5.4.2 Historical USGS Topographic Maps

In the 1946 *Topographic Map* a small structure is shown at the Subject Property. The Subject Property is illustrated as an urban area that is part of the Yabucoa town core.

In the 1960 (rev 1982) *Topographic Map,* a small structure is shown at the Subject Property. The Subject Property is illustrated as an urban area that is part of the Yabucoa town core.

In the 2018 *Topographic Map,* a small structure is shown at the Subject Property. The Subject Property is illustrated as an urban area that is part of the Yabucoa town core.

5.4.3 Puerto Rico Planning Board Listed Uses and Permits

According to the Puerto Rico Planning Board online database **(**http://gis.jp.pr.gov/itr/), the following uses and permits are listed for the Subject Property and adjoining properties:

Property	Listed Permits Description
Subject Property	• OFICINA DENTAL • TIENDA DE TELAS • PERMISO DE USO PARA VIDEO CLUB
Adjoining Property North	• Not Available (various residential properties)
Adjoining Property South	• (PARROQUIA SANTOS ANGELES CUSTODIOS) • GUACHITO'S BAKE & DELI • ESTUDIO LEGAL LUIS A. ORTIZ CARRASQUILLO • SALON DE BELLEZA
Adjoining Property East	• TEMPLO DE IGLESIA • BARBERIA • OFICINA ADMINISTRATIVA Y SERVICIOS MEDICOS • VENTA DE ROPA DE BEBES Y ASSESORIOS
Adjoining Property West	• Not Information Available

5.4.4 Puerto Rico Property Municipal Tax Files

According to the CRIM database, https://catastro.crimpr.net/cdprpc/, the Subject Property and adjoining properties' cadastral identification numbers are:

Cadastral Identification	Owner	Previous Owner	Transaction Date
376-040-013-12-001 (Subject Property)	SEPULVEDA ABREU RAMON	DEL CAMPO FERNANDEZ	9/4/1992
Various (North Adjoining Property)	Residential Properties	Residential Properties	Residential Properties
376-040-013-05-001 (East Adjoining Property)	DE JESUS RIVERA PABLO	No Information Available	No Information Available
376-040-017-07-000 (South Adjoining Property)	IGLESIA CATOLICA SANTOS ANGELES CUSTODIO	IGLESIA CATOLICA	12/16/2015

376-040-021-08-001 (South Adjoining Property)	ORTIZ MORALES LUIS ANGEL	No Information Available	No Information Available
376-040-013-13-001 (West Adjoining Property)	MUNICIPIO DE YABUCOA	No Information Available	No Information Available

5.4.5 Land Use

According to the Puerto Rico Planning Board Zone Maps, the Subject Property is classified C-I: (Comercial Intermedio).

5.4.6 Historic Profile Interview

Interviews with one or more persons knowledgeable about the past use of the Subject Property, Adjoining Properties, or the surrounding area may provide information about the past uses of the subject property and adjoining properties.

During the preparation of this report, Mr. Luis Rivera of the Municipality of Yabucoa who has known the project area and surroundings for more than 40 years was interviewed as the prospective buyer's representative. According to the information provided by Mr. Rivera, the Subject Property was previously used as a dental office.

5.4.7 Historical Uses Summary

In summary, the historical records available to CES indicate that the Subject Property has been used for offices purposes for many years. From the information provided by the prospective buyer's representative, no environmental sensitive operations such as gasoline stations, industrial manufacturing, or dry-cleaning activities have been conducted at the Subject Property.

We note that although there are gaps of greater than 5 years in the historical review of the Subject Property, during those gaps the subject property appears unchanged. Therefore, we understand that this gap *should not* represent a significant concern or gap for the Subject Property.

5.5 FIRE DEPARTMENT FILES REVIEW

In Puerto Rico, the DNER is the state agency that holds records regarding fuel tanks, hazardous materials, incidents, spills, violations or petroleum/chemical releases that can represent potential environmental concerns. Other departments, such as the Fire and Police departments, Planning Department and others typically do not contain information that are associated with environmental concerns that could be of use for the preparation of the Phase I report. According to the *Cuerpo de Bomberos de PR* (PR Fire Department) this agency does not maintain a digital record of environmental emergencies for individual facilities. They maintain a record of emergencies and activities that they conduct based on the date of occurrence of the incident. They do not keep records that would make reference to the location of the properties or the geographic area where the properties are located. Therefore, for purpose of the preparation of this Phase I such records are considered not practically reviewable.

PRIVILEGED AND CONFIDENTIAL

6.0 SITE RECONNAISSANCE

6.1 METHODOLOGY AND LIMITING CONDITIONS

A visual reconnaissance of the Subject Property and surrounding areas was performed by engineer Luis R. Colón Morales of CES on January 28, 2025. CES observed accessible areas of the Subject Property to assess obvious visual indications of present or past activities or conditions that have or could have impacted the Subject Property.

The method used to observe the Subject Property consisted of walking along property perimeter boundaries and within the property limits. The site visit included the following visual inspections: the Subject Property by walking transects; the exterior perimeter of the property; the building interior. Site settings and conditions were documented with photographs as appropriate.

6.2 GENERAL SITE SETTING

At the time of CES's visit, the Subject Property was observed to consist of a vacant one-story structure. Additional information and description of the Site's setting, characteristics, uses, and improvements are included in *Section 3.2* of this report. A Site Sketch, showing the Site's features, general settings, and surroundings are provided in ***Appendix 2***.

6.3 EXTERIOR AND INTERIOR OBSERVATIONS

The following sections describe observations made by CES personnel during the Site reconnaissance.

6.3.1 Potable Water, Wastewater, and Stormwater

At the time of the site reconnaissance, the Subject Property was observed to have potable water and wastewater infrastructure installed. Based on our observations and the information provided by the municipality's representative, the potable water is supplied to the Subject Property by the Puerto Rico Aqueduct and Sewer Authority (PRASA) potable water distribution system.

Based on the information provided by the municipality's representative, the wastewater previously generated included wastewater from the bathroom inside the building. Reportedly, the wastewater were discharged into the PRASA sanitary sewer system.

No signs of stains or releases were observed along the stormwater flow paths and drains.

6.3.2 Toxic Substances

6.3.2.1 Polychlorinated Biphenyl's

Prior to the 1979, PCBs entered the environment during their manufacture and use in the United States. Today PCBs can still be released into the environment from poorly maintained hazardous waste sites that contain PCBs, illegal or improper dumping of PCB wastes, leaks or releases from electrical transformers and hydraulic equipment containing PCBs and hydraulic equipment, and disposal of PCB-containing consumer products into municipal or other landfills not designed to handle hazardous waste. PCBs may also be released into the environment by the burning of some wastes in municipal and industrial incinerators.

At the time of our site reconnaissance, no suspect PCBs containing equipment was observed installed at the Subject Property.

6.3.2.2 Asbestos Containing Materials (ACM)

Building construction materials such as vinyl floor tiles (VFTs), acoustic ceiling tiles (ACTs), thermal system insulation (TSI), sprayed-on ceiling material, roofing material and others are known to have been manufactured with asbestos in the past. The scope of work of this Phase I was limited to visual observations of accessible areas and did not include the collection and laboratory analysis of bulk samples of suspect ACMs. Suspect ACMs may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, interior of machinery or equipment, and water or sewer systems.

Based upon the year the building was constructed; the presence of ACMs cannot be discarded. ACTs were observed inside the building (***Photographs 3, 4, 7, 10,*** and ***11***). However, to determine the presence of ACMs in the Subject Property, an ACM survey would be required.

6.3.2.3 Lead Based Paint (LBP)

Buildings constructed before 1978, are known to have been painted with lead-based paint. Lead from paint, chips, and dust can pose serious health hazards if not taken care of properly. Based upon the year the building was constructed; the presence of LBP cannot be discarded. However, to determine the presence of LBP in the Subject Property, a LBP survey would be required.

6.3.3 Non-Hazardous Solid Wastes

At the time of our site reconnaissance, no solid wastes were observed generated at the Subject Property. Minor accumulation of discarded materials was observed inside the building (***Photographs 3, 4, 7, 8, 10,*** and ***11***).

6.3.4 Used Oil

At the time of our site reconnaissance, no used oil generation or storage was observed.

6.3.5 Aboveground Storage Tanks (ASTs)

At the time of our site reconnaissance, no ASTs were observed.

6.3.6 Hazardous Wastes

At the time of our site reconnaissance, no Hazardous Wastes generation or storage was observed. According to Mr. Rivera, he is not aware that hazardous wastes have been generated or stored at the Subject Property.

6.3.7 Underground Storage Tanks (USTs)

At the time of our site reconnaissance, no visual evidence of USTs was identified at the Subject Property. According to Mr. Rivera, he is not aware that an UST is located at the Subject Property.

6.3.8 Air Emission Sources

At the time of our site reconnaissance, no Air Emission Sources were observed at the Subject Property.

6.3.9 Underground Injection Control (UIC) Units

At the time of our site reconnaissance, no visual evidence of UICs was identified on the Subject Property. According to Mr. Rivera, he is not aware that an UIC is located at the Subject Property.

6.3.10 Miscellaneous Containers with Chemicals, Petroleum, and Unknown Products

At the time of the site reconnaissance, no Miscellaneous Containers with Chemicals, Petroleum, and Unknown Products were observed at the Subject Property.

6.3.11 Drums, Totes, and Intermediate Bulk Containers

At the time of the site reconnaissance, no drums, totes or bulk containers were observed at the Subject Property.

6.3.12 Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances or Petroleum Products

At the time of the site reconnaissance, no water pools or standing water areas were observed at the Subject Property.

6.3.13 Strong, Pungent, or Noxious Odors and Their Sources

At the time of our site reconnaissance, no suspect or pungent odors were perceived at the Subject Property.

6.3.14 Areas of Stained Soil, Concrete Floor and/or Pavement

At the time of the site reconnaissance, no Areas of Stained Floor, Concrete Floor and/or Pavement were observed at the Subject Property.

6.3.15 Stressed Vegetation

At the time of the site reconnaissance, no signs of stressed vegetation were observed at the Subject Property.

6.3.16 Drains and Sumps

At the time of the site reconnaissance, no drains or sumps were observed at the Subject Property.

6.3.17 Pits, Ponds, and Lagoons

At the time of the site reconnaissance, CES did not observe any pits, ponds or lagoons at the Subject Property.

6.3.18 Stains or Corrosion on Floors, Walls, or Ceilings

At the time of the site reconnaissance, other than water stains and mold, *no* areas of stained equipment, walls, or suspect corrosion were observed at the Subject Property.

6.3.19 Wells

At the time of the site reconnaissance, CES did not observe any wells at the Subject Property.

According to Mr. Rivera, he is not aware of any well located at the Subject Property.

6.3.20 Per- and Polyfluoroalkyl (PFAS)

According to EPA information, PFAS are widely used, long lasting chemicals, components of which break down very slowly over time. These are manufactured chemicals that have been used for more than 50 years. There are thousands of PFAS chemicals, and they are found in many different consumer, commercial, and industrial products (https://www.epa.gov/pfas). However, presently these chemicals are not listed as hazardous substances under CERCLA. We note that presently Puerto Rico does not have any regulations or guidance related to PFAS impacts or assessment requirements.

PFASs have been used to provide water, oil, and stain repellency to textiles, carpets, and leather; to create grease-proof and water-proof coatings for paper plates and food packaging; and to aid processing in fluoropolymer manufacturing among many other commercial and consumer applications. They also have been used in chrome plating, firefighting foams, liquid carpet and textile care treatments, and floor waxes and sealants (CECBP 2015).

PFAS chemicals have been widely used, among others, by the following industries:

- Aviation, aerospace & defense
- Household products
- Biocides
- Metal plating
- Cable & wiring
- Oil and mining production
- Construction products (paints and coatings)
- Paper and packaging
- Electronics
- Polymerization

- Fire-fighting
- Textiles, leather and apparel
- Food processing

The manufacture, use, and disposal of items from these industries can contribute to PFAS environmental occurrence. Additional information on potential commercial sources can be found in UNEP (2015), which provides in-depth information on the kinds of articles that might contain PFOS and related chemicals; lists the industries that use and produce the chemicals; describes the supply chain (suppliers, importers and exporters, producers, manufacturers, downstream users); and discusses product end-of-life and recycling relevant to waste, stockpiles, and contaminated sites.

Water resources (i.e., surface water and groundwater) are susceptible to contamination by PFAS release from manufacturing sites, industrial use, aircraft fire and emergency response training areas, and industrial or municipal waste sites where products are disposed of or applied. PFOA and other PFASs have been reported in wastewater and biosolids as a result of manufacturing activities, disposal of coated paper and other consumer products, and from washing stain-repellant fabrics (https://clu-in.org/contaminantfocus/default.focus/sec/Per-_and_Polyfluoroalkyl_Substances_(PFASs)/cat/Occurrence/).

According to the information available for the Subject Property, the disposal of PFAS within the property appears *unlikely*.

6.3.21 Heating/Cooling

The climate of Puerto Rico falls into the tropical climatic zone. Temperatures are moderate year-round, averaging near 80 °F (27 °C) in lower elevations and 70 °F (21 °C) in the mountains, for this reason no heating of the buildings is required. Cooling is typically provided by electrical

cooling systems that do not require fuel (oil/gas) sources that may have been stored in aboveground or underground storage tanks.

6.4 NON-SCOPE CONSIDERATIONS

No considerations outside the scope of the ASTM E1527-21 practice and the AAI Standards were assessed as part of this Phase I except for the general information provided for the following issues:

- Asbestos Containing Building Materials
- Lead-based paint
- Limited Regulatory Compliance Observations
- PFAS
- Wetlands

7.0 INTERVIEWS

7.1 INTERVIEW WITH OWNER

During the preparation of this Phase I, no owner representative was available to be interviewed.

7.2 INTERVIEW WITH SITE OCCUPANTS

The Subject Property was vacant at the time of the site visit.

7.3 INTERVIEW WITH SITE MANAGER

Same as *Section 7.2*.

7.4 INTERVIEW WITH GOVERNMENT OFFICIALS

On October 29, 2024, CES submitted a letter to the DNER's inquiring about spills or environmental emergencies reported for the Sites, or assessments conducted at the Sites or nearby areas. However, no information was provided in the DNER response of an event that could have affected the Subject Property.

7.5 INTERVIEW WITH OTHERS

CES conducted a telephone interview with Mr. Luis Rivera designated as the authorized prospective buyer's representative from the Municipality of Yabucoa. Mr. Rivera has known the project area and surroundings for more than 40 years. During the interview, Mr. Rivera was questioned in relation to the following environmental concerns: (1) any pending, threatened or past

litigation relevant to hazardous substances or petroleum products in, on or from the property or vicinity; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property or vicinity; and (3) any notices from any governmental entity regarding any possible violations of environmental laws or possible liability relating to hazardous substances or petroleum products in connection with the subject property or its surroundings.

Mr. Rivera stated that to the best of his knowledge, there are *no* environmental concerns that he is aware of associated with the Subject Property.

PRIVILEGED AND CONFIDENTIAL

8.0 FINDINGS AND OPINIONS

Based on the findings of our Phase I of the subject property, we offer the following comments and opinions relative to potential environmental concerns:

8.1 ON-SITE FINDINGS

- **Asbestos Containing Materials (ACM) and Lead Based Paint (LBP)**

  Based upon the year the building was constructed; the presence of ACMs and LBP cannot be discarded. However, to properly assess the presence of ACM and LBP, a survey needs to be conducted.

- **Non-Hazardous Solid Wastes**

  At the time of our site reconnaissance, no solid wastes were observed generated at the Subject Property. Minor accumulation of discarded materials was observed inside the building. The observed wastes ***do not*** represent a REC for the Subject Property.

- **Per- and Polyfluoroalkyl (PFAS)**

  According to EPA information, PFAS are widely used, long lasting chemicals, components of which break down very slowly over time. These are manufactured chemicals that have been used for more than 50 years. There are thousands of PFAS chemicals, and they are found in many different consumer, commercial, and industrial products (https://www.epa.gov/pfas). However, presently these chemicals are not listed as hazardous substances under CERCLA. We note that presently Puerto Rico does not have any regulations or guidance related to PFAS impacts or assessment requirements.

  PFASs have been used to provide water, oil, and stain repellency to textiles, carpets, and leather; to create grease-proof and water-proof coatings for paper plates and food packaging; and to aid processing in fluoropolymer manufacturing among many other commercial and consumer applications. They also have been used in chrome plating, firefighting foams, liquid carpet and textile care treatments, and floor waxes and sealants (CECBP 2015).

  According to the information available for the Subject Property, the disposal of PFAS within the property appears *unlikely*.

8.2 OFF-SITE FINDINGS

- **Leaking Underground Storage Tanks (LUSTs) List**

  The following LUST facilities are *listed* within a *one-half mile radius* of the Subject Property:

  - Esso CO-266 with DNER ID. 86-1367 located at Calle Cristobal Colón 65 at approximately 0.26 miles to the south of the Subject Property. This facility has not been released by the DNER. Based on the hydrogeological setting of the area, this LUST facility appears to be located side-gradient from the Subject Property. Therefore, based on the distance from the Subject Property, this LUST facility ***does not*** represent a REC for the Subject Property.

  - Texaco #264 with DNER ID. 86-1722 located at Carr 182 Salida San Lorenzo at approximately 0.21 miles to the west of the Subject Property. This facility has not been released by the DNER. Based on the hydrogeological setting of the area, this LUSTfacility appears to be located side-gradient from the Subject Property. Therefore, based on the distance from the Subject Property, this LUST facility ***does not*** represent a REC for the Subject Property.

  - Independiente/Gulf with DNER ID. 86-0381 located at Carr. 901 Km. 0.5 at approximately 0.50 miles to the southeast of the Subject Property. This facility has not been released by the DNER. Based on the hydrogeological setting of the area, this LUST facility appears to be located side-gradient from the Subject Property. Therefore, based on the distance from the Subject Property, this LUST facility ***does not*** represent a REC for the Subject Property.

Our opinion regarding the potential concern that these off-sites facilities may represent for the Subject Property is based upon the requirements of the ASTM screening process. We note that even if there is the potential that contaminants from the above-mentioned off-sites facilities have reached groundwater or vapors underlying the Subject Property, information contained in EPA's Final Policy Toward Owners of Property Containing Contaminated Aquifers (60 FR 34790, July 3, 1995), provides ways to manage such unlikely scenario. In general, this policy states that the EPA will not take enforcement action against a property owner to require clean up or the payment of clean-up costs where: (1) hazardous substances have come to the property solely as a result of subsurface migration in an aquifer from a source outside the property, (2) the landowner did not

cause, contribute to, or aggravate to the source of contamination and (3) the person that caused the release is not an agent or employee of the landowner, and was not in a direct or indirect contractual relationship with the landowner. A complete copy of this EPA policy can be obtained at the EPA web-site such as (https://www.epa.gov/enforcement/guidance-owners-property-containing-contaminated-aquifers).

8.3 VAPOR MIGRATION

CES reviewed reasonably ascertainable information for the Subject Property and nearby properties limited to the standard environmental record sources discussed in Section 5.1 of this report, for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present and could impact the Subject Property.

Based on the review of available resources as documented in this report, CES ***did not*** identify a REC associated with a vapor-phase migration.

PRIVILEGED AND CONFIDENTIAL

9.0 DATA GAPS

According to the ASTM E1527-21, *a data gap* is defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance and interviews.

During the preparation of this Phase I report, no data gaps were identified, except for the following;

- **Interview with Government Officials -** On October 29, 2024, CES submitted a letter to the DNER's inquiring on spills or environmental emergencies reported for the Subject Property, or assessments conducted at the Sites or nearby areas. At the time this report was written no response from the DNER had been received. We understand that additional information provided by the DNER in response to this letter would not change significantly the opinions and conclusions included in this Phase I report. Therefore, this ***should not*** be considered as a significant data gap. However, CES reserves the right to change or modified this report as needed based upon any additional information provided by the DNER.

- **Interview with owner:** The objective of this interview is to obtain information indicating potential recognized environmental conditions in connection with the property. During the preparation of this Phase I, no contact information of Mr. Ramon Sepulveda Abreu was provided to us. Therefore, we were not able to interview the owner. Based upon the reported uses and our observations, we understand that interviewing the owner would not change significantly the opinions and conclusions included in this Phase I report and therefore ***does not*** present a significant data gap. However, Caribe Environmental Services reserves the right to change or modified this report as needed based upon any additional information obtained.

PRIVILEGED AND CONFIDENTIAL

10.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the Plot D [Finca 54 (Dentista)] located at the 53 Luis Muñoz Rivera Street, within the Pueblo Ward of the Yabucoa Municipality in Puerto Rico. Plot D [Finca 54 (Dentista)] covers an area of approximately 363.4611 square meters (m^2) (0.0925 "*cuerdas*") and is improved with an estimated 2,700 square feet (ft^2) vacant single-story structure. It is our understanding that Plot D is part of a rehabilitation project that will covert this vacant property into a Social Sports Center. Any exceptions to, or deletions from, this practice are described in *Section 2.4* of this report.

This assessment has revealed ***no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps*** in connection with the Subject Property.

PRIVILEGED AND CONFIDENTIAL

11.0 DEVIATIONS

This Phase I was prepared in conformance with the scope and limitations of ASTM E1527-21 Standard Practice for Environmental Site Assessments. It is CES opinion that no significant deviations have occurred from ASTM E1527-21 Standard. Limitations and exceptions to our scope of services were discussed in *Section 2.4* of this report.

PRIVILEGED AND CONFIDENTIAL

12.0 ADDITIONAL SERVICES

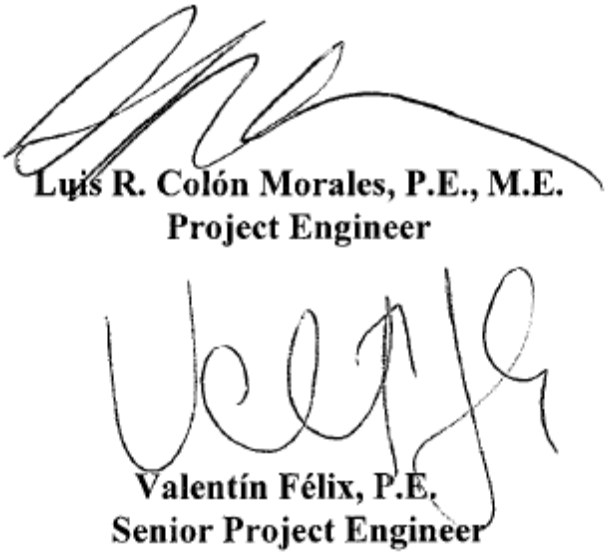
Our scope of services for this Phase I, as well as limitations and exceptions, are included in *Sections 2.2* and *2.4* of this report.

PRIVILEGED AND CONFIDENTIAL

13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The following personnel have prepared and/or reviewed this report for accuracy, content, and quality of presentation.

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.



Luis R. Colón Morales, P.E., M.E.
Project Engineer

Valentín Félix, P.E.

14.0 QUALIFICATION(S) OF ENVIRONMENTAL PROFESSIONAL(S)

The Phase I assessment was performed by CES personnel experienced in these types of services. The site visits, documentation review, personnel interviews, and report preparation were performed by Engineer Luis Raúl Colón Morales. Eng. Colón Morales is a Professional Engineer with more than and 15 years in the environmental field. In accordance with CES quality assurance protocols the Phase I report was revised by Eng. Valentin Felix Flores to comply with CES QA/QC Corporate policies Mr. Felix Flores is a licensed professional engineer with more than 40 years of environmental work experience.

The resumes of Eng. Colón Morales and Eng. Felix Flores are provided in ***Appendix 7*** of this report.

P.O. Box 458 Yabucoa, PR 00767 | (787) 559-4883; (787) 893-6937| laocestudiolegal@gmail.com

ESTUDIO DE TITULO
FINCA 54 Yabucoa
Inscrita al folio 23 Tomo 2
Número de Catastro: 376-040-013-12-001

DESCRIPCIÓN:

Urbana: Solar radicado en la calle Luis Muñoz Rivera número 51 del término municipal de Yabucoa, con una cabida superficial de 363.4611 metros cuadrados. En lindes por el Norte, en 16.004 metros con Pablo de Jesús y 0.180 metros con Sucesión Colón; por el Sur, en 15.950 metros con la calle en que radica; por el Este, en 22.782 metros con Pablo de Jesús y por el Oeste, en 8.57 metros con la Sucesión Colón.

CARGAS:

Por sí

Hipoteca en garantía de pagare a favor del Portador por la suma principal de $70,000.00. Interés: 10 3/4 % anual. Vencimiento: A la presentación. Tasación: $70,000.00. Constituida mediante escritura numero 84 otorgada en Humacao el 1 de junio de 1987 ante el notario Julio Cesar Rivera, según surge de la inscripción 14.

Esta hipoteca debe ser cancelada por prescripción mediante Instancia jurada ante notario por parte interesada.

DOMINIO:

Inscrita a favor de la Sociedad Legal de Gananciales compuesta por **Ramón Sepúlveda Abreu e Isabel Álamo Vázquez**, mayores de edad, médicos y vecinos de Humacao.

A) Quienes adquirieron el terreno por compra al Municipio de Yabucoa por el precio de $47,249.94 mediante escritura número 5 otorgada en Yabucoa, Puerto Rico, el 28 de febrero de 2005, ante el notario Israel Delgado Ramos, según surge de la inscripción 16.
B) **Según inscripción 15**: Habían adquirido el usufructo de esta finca y la estructura que enclava en dicho solar por compra a Rafael del Campo Fernandez y su esposa Nivea Esther Rivera Rodríguez por el precio de $110,000.00 mediante la escritura numero 35 otorgada en Humacao el 4 de septiembre de 1992 ante el notario Israel Delgado Ramos.

OBSERVACIONES:

1) La descripción de la finca es la última, ya que fue mensurada y rectificada su cabida en aumento mediante la misma escritura de compraventa del terreno con la cual se acompañaron los siguientes documentos complementarios: Certificación de Mensura: Jurada y suscrita por el agrimensor Reinaldo Rivera, Licencia número 8436 bajo el testimonio 7118 del 4 de abril de 2005 ante el notario Israel Delgado Ramos; Aprobación Venta de Solar en Yabucoa, Caso 99-75-A-639-HGT del 18 de marzo de 1999 ante Ingeniero Luis A. Martínez Pueyo y Certificación del Municipio de Yabucoa del 28 de febrero de 2005 por Dolores Delgado Feliciano, según surge de la inscripción 16 y última en esta finca.

REVISADO EN SISTEMA KARIBE:

Embargos Estatales y Federales, Sentencias, Bitácora de Documentos pendientes: NINGUNO.

NOTA: No nos hacemos responsables por errores u omisiones en la entrada y búsqueda de datos en el Sistema Karibe.

SR. RAMÓN SEPÚLVEDA ABREU Y SRA. ISABEL ÁLAMO VÁZQUEZ
51 CALLE LUIS MUÑOZ RIVERA
YABUCOA, PR 00767
376-040-013-12-001

RE: AVISO AL PROPIETARIO

Estimado Sr. Ramón Sepúlveda Abreu y Sra. Isabel Álamo Vázquez:

El Municipio de Yabucoa ("MUNICIPIO") está interesado en adquirir una propiedad que le pertenece localizada en #51 Calle Luis Muñoz Rivera, Yabucoa, PR 00767 para un proyecto propuesto que puede recibir asistencia financiera del Departamento de la Vivienda y Desarrollo Urbano ("HUD" por sus siglas en inglés) bajo el Programa de Subvención en Bloque para el Desarrollo Comunitario para la Recuperación Ante Desastres ("CDBG-DR" por sus siglas en inglés) bajo el Programa de Revitalización de la Ciudad.

El propósito de este aviso es informarle sobre los derechos en virtud de una Ley Federal conocida como la Ley de Políticas de Adquisición de Bienes Inmuebles y Asistencia de Reubicación Uniforme ("URA"-siglas en inglés). Se adjunta un folleto titulado," Cuando una Agencia Pública Adquiere su Propiedad". Este folleto proporciona información útil sobre la adquisición pública de bienes inmuebles (bienes raíces) bajo URA. En esta etapa, su propiedad está bajo consideración para la adquisición. Este aviso no es una oferta contractual ni un compromiso de compra de su propiedad.

Si su propiedad es seleccionada para la adquisición, bajo URA, tendrá derecho a recibir una compensación justa por su propiedad. Para determinar el monto de la compensación justa que se le ofrecerá, se requerirá una tasación de la propiedad. En tal caso, un tasador se comunicará con usted para brindarle la oportunidad de acompañarlo en la inspección de la propiedad. Le convendría acompañar al tasador/a durante la inspección de la propiedad para que pueda señalar las características únicas de su propiedad que deben tenerse en cuenta en el proceso de valoración y para que también pueda responder cualquier pregunta que pueda tener el tasador/a.

En estos momentos, le solicitamos que informe sobre cualquier inquilino/a residencial o comercial ocupando la propiedad. Esto no es un aviso para desalojar la propiedad ni obligar a los inquilinos/as a salir de la propiedad por razones que no sean incumplimiento del contrato de arrendamiento por escrito.

Para su información, el Municipio de Yabucoa posee autoridad de dominio eminente para adquirir la propiedad necesaria para este proyecto, sin embargo, nuestro objetivo es intentar negociar acuerdos amistosos para todas las adquisiciones antes de su uso. Si las negociaciones fracasan, la adquisición bajo dominio eminente puede ser considerado.

Si tiene alguna pregunta sobre este aviso o el proyecto propuesto, comuníquese a la Oficina de Programas Federales Municipal a federalesyabucoa@gmail.com o a través de (787)893-3000.

Cordialmente,

Aida Iliana Santiago Cruz

YABUCOA, PR 00767
376-040-013-12-001

RE: NOTICE TO OWNER

Dear Mr. Ramón Sepúlveda Abreu and Mrs. Isabel Álamo Vázquez,

The Municipality of Yabucoa ("MUNICIPALITY") is interested in acquiring property owned by it located at #51 Calle Luis Muñoz Rivera, Yabucoa, PR 00767 for a proposed project that may receive financial assistance from the Department of Housing and Urban Development ("HUD") under the Community Development Block Grant for Disaster Recovery ("CDBG-DR") Program under the City Revitalization Program.

The purpose of this notice is to inform you of your rights under a federal law known as the Uniform Relocation Acquisition and Relocation Assistance ("URA") Policy Act. Enclosed is a brochure entitled, "When a Public Agency Acquires Its Property." This brochure provides useful information about the public acquisition of real estate (real estate) under URA. At this stage, your property is under consideration for acquisition. This notice is not a contractual offer or commitment to purchase your property.

If your property is selected for acquisition, under URA, you will be entitled to receive fair compensation for your property. To determine the amount of fair compensation that will be offered to you, an appraisal of the property will be required. In such a case, an appraiser will contact you to provide you with the opportunity to accompany you on the property inspection. It would be in your best interest to accompany the appraiser during the property inspection so that he/she can point out the unique features of your property that need to be considered in the appraisal process and so that he/she can also answer any questions the appraiser may have.

At this time, we ask that you report any residential or commercial tenants occupying the property. This is not a notice to vacate the property or force tenants to leave the property for reasons other than a breach of the written lease agreement.

The Municipality of Yabucoa possesses eminent domain authority to acquire the property necessary for this project, however, our goal is to attempt to negotiate amicable agreements for all acquisitions prior to use. If negotiations fail, acquisition under eminent domain may be considered.

If you have any questions about this notice or the proposed project, please contact the Municipal Federal Programs Office at, federalesyabucoa@gmail.com, or through (787) 893-3000.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

YABUCOA, PR 00767

ICIS:
Enforcement Action ID: PR000A200123134
FRS ID: 110007342795
Action Name: Not reported
Facility Name: PREPA YABUCOA GAS TURBINE POWER BLOCK
Facility Address: RD 3 KM 86.5 BO. CANDELERO
YABUCOA, PR 00767
Enforcement Action Type: Notice of Violation
Facility County: YABUCOA
Program System Acronym: AIR
Enforcement Action Forum Desc: Administrative - Informal
EA Type Code: NOV
Facility SIC Code: 4911
Federal Facility ID: Not reported
Latitude in Decimal Degrees: 18.106453
Longitude in Decimal Degrees: -65.824499
Permit Type Desc: Not reported
Program System Acronym: PR0000007215100003
Facility NAICS Code: 221112
Tribal Land Code: Not reported

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The National Pollutant Discharge Elimination System (NPDES) module of

Site	Database(s)	EDR ID Number EPA ID Number

OLEIN RECOVERY CORP (Continued) **1010450278**

the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

Site	Database(s)	EDR ID Number EPA ID Number

CHEMICAL SOLUTIONS LLC (Continued) **1026463146**

storers, and disposers of hazardous waste.
The Section Seven Tracking System (SSTS) tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed.

The FINDS: database may contain additional details for this site.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Safe Drinking Water Information System contains information about public water systems and their violations of EPA's drinking water regulations.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System

Site	Database(s)	EDR ID Number EPA ID Number

CENTRAL ROIG SUGAR MILLS (Continued) **1015993314**

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Safe Drinking Water Information System contains information about public water systems and their violations of EPA's drinking water regulations.

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Environmental Interest/Information System:

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The FINDS: database may contain additional details for this site. Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the

Site	Database(s)	EDR ID Number EPA ID Number

PRASA WTP GUAYABOTA (Continued) **1013875905**

Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.

The FINDS: database may contain additional details for this site.
Please contact your EDR Account Executive for more information

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The FINDS: database may contain additional details for this site.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

NO SITES FOUND

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

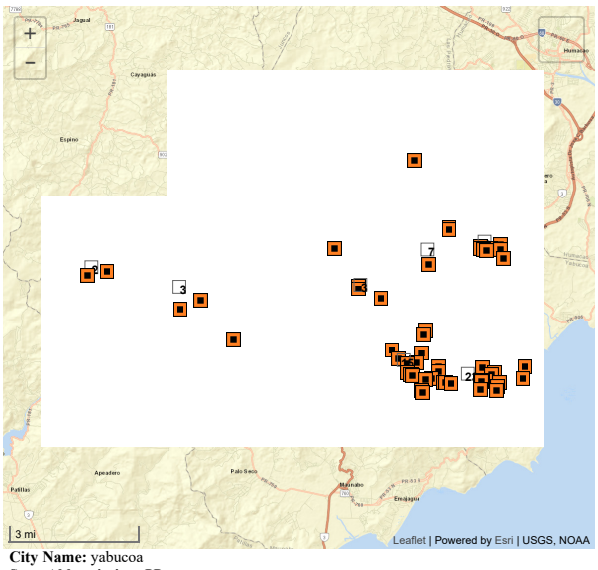
FRS Facility Query Results

Your selection returned 102 facilities which are listed below.
Results are sorted by State, City Name, and Facility Name



Map Legend

- Denotes a facility/site location
- Denotes a facility/site location that has been selected by clicking on the 'Magnifying Glass' in the tabular list of facilities/sites displayed below the map.
- Denotes a "Cluster" of facility/site locations. Double clicking on the cluster will automatically zoom the map in at that location. It may take muliple "Double Clicks" to expand all clusters at a particular location. Or just use the "Turn Clustering Off" button to expand the clusters into individual facility/site locations.
- In the tabular list of facilities/sites displayed below the map, a single click on the magnifying class will center and zoom the map to that facility.

APPENDIX 7

RESUMES OF ENVIRONMENTAL PROFESSIONALS

Resume of: Valentín Félix Flores, P.E.

Title: Chemical/Environmental Engineer

Profession: Senior Chemical/Environmental Engineer

Education: Graduate Studies towards M.S. in Engineering Administration,
George Washington University
B.S. Chemical Engineering, UPR Mayagüez, 1981

Professional Registrations/ Certifications:

- Professional Engineer (Puerto Rico License Number 16628)
- Certified Environmental Manager (CEM) and Certified Environmental Specialist (CES) at the Environmental Assessment Association (Certification Nos. 14841)

Professional Memberships and Associations:

- College of Engineers and Land Surveyors of Puerto Rico (CIAPR)
- Instituto de Ingenieros Ambientales (CIAPR)
- Environmental Assessment Association
- National Groundwater Association
- Asociacion Interamericana de Ingenieria Sanitaria y Ciencias del Ambiente (AIDIS)

Career Summary:

Mr. Félix has been a Principal Engineer with the environmental consulting firm of Caribe Environmental Services (CES) Inc. in Caguas Puerto Rico, since August, 1996. Mr. Félix is a chemical/environmental engineer with over 30 years of experience, and some of his duties include; marketing, preparation of proposals, coordination, execution, and management of environmental projects, and reports preparation.

Prior to joining CES, Mr. Félix was the Technical Operations Manager of the Law Environmental-Caribe office in San Juan Puerto Rico. He was responsible for the allocation of resources and technical aspects, coordination and execution of Branch projects. He was the Underground Storage Tanks (UST) Department Manager since January 1990 when he joined Law Environmental-Caribe. As UST Department Manager he managed numerous geologic and hydrogeologic assessment projects for pharmaceutical, local and federal government agencies, and industry. These projects involved initial site assessments soil borings and monitoring wells installation, soil and ground water sampling, extent of contamination determination, remedial action plans preparation and execution and USTs removal.

He also managed numerous Phase I assessment, lead paint removal, and other miscellaneous environmental assessment projects. Prior to joining Law in 1990, Mr. Felix worked as the Environmental Compliance Branch Manager at the Naval Ordnance Station, Indian Head, Maryland. He was responsible for the plant environmental permits compliance, NPDES Sampling and Reporting, Discharge Monitoring Reports, PCBs and Hazardous Wastes annual inventories, preliminary environmental assessments review. He was a member of the base Emergency Response Team.

Technical Experience:

PERMITTING/ENVIRONMENTAL AUDITS/ REGULATORY COMPLIANCE

Mr. Félix has worked with environmental projects related to permitting and regulatory compliance. He has dealt extensively with the P.R Environmental Quality Board EQB) Programs with permitting and compliance issues. He has conducted many regulatory compliance audits for industries in Puerto Rico. These projects typically involve conducting an evaluation of facility processes and chemicals handling, storage, and disposal practices and documentation for regulatory compliance. He has participated in numerous regulatory compliance audit of plants in Puerto Rico. The audits typically consist of the evaluation of plant processes, documentation and other recordkeeping to verify compliance with applicable environmental regulations such as RCRA, SARA Title III, TSCA, and other local regulatory agency. Mr. Félix has conducted numerous assessment of industrial facilities for compliance with SARA Title III requirements. He has dealt extensively with the preparation of air emission sources permit applications, Underground Storage Tanks and Underground Injection Facility closure plans preparation and execution.

Conducted environmental audits under the EPA's Voluntary Auditing Program for the following medical facilities: San Pablo Bayamon, San Pablo del Este Fajardo, Caribbean Pediatrics, San Juan Capestrano, Ojos Clinic, Centro Cardiovascular de PR y el Caribe, San Juan Bautista Medical Center.

Other audits included the Papelera Puertorriqueña Utuado, Lanco San Lorenzo facility, the Enco Cidra facility.

GEOLOGIC/HYDROGEOLOGIC ASSESSMENT

Mr. Félix has been managing throughout his career hydrogeologic assessment projects for pharmaceutical, local and federal government agencies, and industry, involving soil and groundwater contamination assessment. These projects typically involve soil borings installation for initial site assessments, monitoring wells installation, soil sampling, wells development and ground water sampling, determination of soil and groundwater extent of contamination, determination of groundwater flow direction.

He has prepared and executed remedial action plans for remediation projects. He is very familiar with field sampling and screening techniques such as Ultraviolet Fluorescence Spectrometer (UVF), X-Ray Fluorescence (XRF), and HAZCAT screening, used to expedite site assessment projects.

Mr. Félix was the project manager for a large assessment project for a former Manufactured Gas Plant (MGP) in Puerto Rico.

UNDERGROUND/ABOVEGROUND STORAGE TANKS

Mr. Felix has managed over 25 projects involving the closure/removal of Underground Storage Tanks (USTs), including the preparation of Closure Plans with sampling requirements, execution of sampling activities and Closure Reports preparation. He managed a Navy contract to conduct groundwater/USTs studies and remedial design documents preparation for various locations in the Commonwealth of Puerto Rico. He was responsible for the negotiation of delivery orders, preparation of Health and Safety and Sampling Plans, overseeing the execution of field activities, reports preparation and overall management of the contract. Under this contract he managed the execution of: Various Site Checks, Site Characterizations, Corrective Action Plans Preparation, Preparation of design drawings and specifications for the removal of over forty five USTs, at the Navy facilities in Puerto Rico.

Mr. Félix executed and managed a Fuel Oil Spill Investigation and Site Assessment at the Kayser Roth facility in Arecibo, Puerto Rico. This project involved the detection of the release source, drilling of soil borings and soil sampling to determine extent of contamination, preparation of a Remedial Action Plan (RAP) which was approved by the Puerto Rico Environmental Quality Board (EQB). The RAP which involved fuel oil contaminated soil excavation, removal and disposal was also executed and a Final Report prepared.

Mr. Félix managed a Six 50,000 gal. Tank Farm Assessment at the U.S.C.G. Air Station Borinquen in Aguadilla, Puerto Rico. This project involved the tanks integrity testing, drilling of soil borings, soil gas survey, installation of over 20 monitoring wells, geologic/hydrogeologic assessment to determine extent of contamination, preparation and execution of a Contamination Assessment Plan which was approved by the P.R Environmental Quality Board. In addition, Mr. Felix prepared a Contamination Assessment Plan (CAP) for a two-USTs site within the Air Station Borinquen. The CAP was reviewed and approved by the P.R. Environmental Quality Board. Mr. Félix managed the execution of the CAP and prepared the Final Report which was submitted to the U.S.C.G. and eventually to the Local Regulatory Agency for approval.

Mr. Félix managed the execution of a Site Assessment and Closure of nine USTs at the Union Carbide Grafito plant in Yabucoa, Puerto Rico. This project consisted of assessing various Underground, on-ground and aboveground storage tanks sites to confirm the presence of hydrocarbons in soil and groundwater. Soil borings were drilled and monitoring wells installed. Nine USTs were permanently closed by removing the tanks and hydrocarbon affected soils surrounding the tank areas.

Mr. Félix has been managing throughout his career UST related projects (tanks removal, geologic and hydrogeologic assessments, tanks testing, for petroleum, pharmaceuticals and other industries in Puerto Rico.

He has also prepared many Spill Prevention Countermeasure and Control (SPCC) Plans as required by 40 CFR 112.

HEALTH AND SAFETY

Mr. Félix has vast experience with Hazardous Waste Operations and Emergency Response as required by the Occupational Health and Safety Agency (OSHA) under 29 CFR 1910.120. He has acquired this experience through numerous courses and seminars involving the management of hazardous materials and wastes, and through field experience managing projects involving hazardous materials/wastes.

Mr. Félix has extensive knowledge preparing Health and Safety Plans for projects involving primarily the removal of Underground Storage Tanks (USTs), USTs Assessment Projects, lead paint removal, geologic and hydrogeologic assessments, contaminated soil removal and disposal. As Hazardous Materials Program Manager at the Naval Ordnance Station, Mr. Felix obtained vast experience with health and safety issues related to hazardous materials identification, exposure, storage, handling, compatibility, labeling and disposal activities in accordance with 40 CFR 265. Mr. Felix has been assigned as the Health and Safety Officer in many of the projects where he has been involved.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENTS

Mr. Félix has executed and managed over 150 projects involving Phase I Environmental Site Assessments, primarily for real estate transactions for facilities in Puerto Rico, St. Thomas and the Dominican Republic. These Phase I site assessments typically involve interviews with facility/property personnel, conducting site reconnaissance, review of property history, surrounding land use, regulatory compliance review, hazardous materials handling, EPA databases review, and EQB Programs files review. He managed the execution of a fast track project involving Phase I Assessments of over twenty five facilities purchased by a U.S. based furniture factory. He has also managed Phase II Assessment projects involving the installation of soil borings, and monitoring wells, asbestos and lead based paint surveys, soil, groundwater, wastes, and other media sampling. He has also conducted cleanup and remediation activities at various of these sites as part of Phase III activities. Mr. Félix conducts Phase I Assessments following the AAI Rule and the ASTM E1527-05 Standard and qualifies as environmental professional as defined by the AAI Rule. As a member of the Environmental Assessment Association, Mr. Félix stays abreast of the constantly changing environmental rules and regulations that impact the execution of Phase I and Phase II projects in accordance with the most recent versions of the ASTM Standard.

REMEDIATION/ HAZARDOUS WASTES CHARACTERIZATION

Mr. Felix managed a project where EPA's issued an Administrative Order of Consent (AOC) in May 2001 for removal action under CERCLA to conduct cleanup and remedial activities at the CIP facility in Caguas, PR.. Mr. Felix was responsible for the preparation of EPA required documentation (Quality Assurance Project Plan (QAPP) Sampling Plan (SP) and Health and Safety Plan (HSP) and managed field/assessment activities. Documents were approved by the EPA and implemented. Final report was submitted to EPA, which changed site's qualification to No Further Remedial Action Planned (NFRAP).

Mr. Félix was the project manager and field supervisor of a waste characterization project for the Puerto Rico Industrial Development Company (PRIDCO) abandoned industrial facility. The facility had unidentified abandoned hazardous and toxic wastes. The project consisted of an initial site entry to identify the need for emergency response activities, inventory of wastes, field chemistry screening (HAZCAT) to identify compatible waste groups, segregation of compatible groups, laboratory analysis, and reporting. Mr. Felix has also prepared requests for proposals for remediation contractors, evaluated contractors proposals and has managed the remediation activities by the selected contractor. Mr. Felix has also provided technical assistance and has served as the liaison between the client and the regulatory agency to comply with the environmental regulations.

Worked on EPA required documentation (Quality Assurance Project Plan (QAPP) Sampling Plan (SP) and Health and Safety Plan (HSP) and managed field/assessment activities for a project at the Metal Finishing Toa Baja. After review of the submitted documents, EPA changed the site's classification from a potential National Priority List Site to a No Further Remedial Action Planned.

Managed a Phase III Assessment/Remediation activities project which consisted of: drums/containers sampling and disposal; characterization, removal and disposal of waste waters and/or sludge in process tanks and sumps; cleaning of sumps and surfaces potentially affected with regulated metals, cleanup verification by sampling and analysis, and; characterization and disposal of waste wasters generated from cleaning activities from properties/ lots formerly owned by PRIDCO, within the Panamerican Grain Facilities in Cataño.

Managed a Phase III Assessment activities/Remediation at Former Electronics facility in Guanica. Waste characterization using the HAZCAT system: inventory, sampling, field screening, waste grouping, laboratory analysis of waste group samples, technical guidance during waste consolidation in preparation for transportation and disposal by PRIDCO's contractor. Field screening, sampling, characterization and disposal of abandoned chemical containers.

AIR EMISSION PERMITTING

Mr. Felix has worked on over 50 air emission permit projects involving the preparation of construction and operation permit applications for various commercial and industrial facilities in P.R. These projects involve the assessment of the facilities to identify the air emission sources, preparation of the applications including the emissions computations, stamping by professional engineer and submittal to Environmental Quality Board.

OSHA PROCESS HAZARD ANALYSIS

Mr. Félix conducted a Process Hazard Analysis (PHA) for seven processes of the Caribbean Refrescos (Coca Cola) facility in Cidra, Puerto Rico, as required by OSHA Process Safety Management under 29 CFR 1910.119.

Career History:

Nov. 2010 – Present	Principal Engineer, Caribe Environmental Services, Inc.
Aug. 1996 – Nov. 2010	Partner/Principal Engr. Caribe Environmental Services, Inc.
Jan. 1990 - Aug. 1996	Manager Law Environmental-Caribe, San Juan, Puerto Rico
Jan 1981 - Dec. 1989	Naval Ordnance Station, Indian Head, Maryland

CONTINUING EDUCATION SEMINARS

2010

- "Phase I and Phase II Assessments, Congreso and Expo Convencion, College of Engineers and Surveyors of Puerto Rico, San Juan, Puerto Rico, August 6, 2010

- "Creando Oportunidades de Negocios en Latinoamérica y el Caribe", El Centro de Desarrollo de Pequeñas Empresas y Tecnología, San Juan, Puerto Rico, Mayo 20, 2010

- "Taller Comprensivo Sobre la Nueva Ley para la Reforma y Agilizacion del Proceso de Permisos (Ley #161), College of Engineers and Surveyors of Puerto Rico, March 12, 2010.

2009

- "Plan para Agilizar los Permisos en Puerto Rico", College of Engineers and Surveyors of Puerto Rico and AIDIS, June 25, 2009.

2008

- "Introducción a la Inspección de Calderas y Recipientes a Presion", College of Engineers and Surveyors of Puerto Rico, November 20, 2008

2008 Final NPDES General Permit for Storm Water Discharges from Industrial Activities, CIAPR and AIDIS, November 20, 2008.

2007

- "Implantación del Nuevo Permiso General Consolidado de la Junta de Calidad Ambiental de Puerto Rico", College of Engineers and Surveyors of Puerto Rico, San Juan, Puerto Rico, April 30, 2007.

2006

- Environmental Site Assessments for Commercial Real Estate, ASTM Standard E-1527-05 and EPA All Appropriate Inquiry Rule, ASTM Training Course, Orlando, Florida, April 25-26, 2006.

- "DOT HAZMAT Function Specifics" Manifests Completion" (49 CFR 172.200 and 40 CFR 260-265), Environmental Training & Professional Services, San Juan, Puerto Rico, August 18, 2006.

- "DOT HAZMAT General Awareness & Familiarization Training" (49 CFR 172.700), Environmental Training & Professional Services, San Juan, Puerto Rico, August 17, 2006.

2005

- "Actualizandonos con la Reglamentacion Ambiental" College of Engineers and Surveyors of Puerto Rico, San Juan, Puerto Rico, November 4, 2005.

OSHA Health and Safety 40 Hrs. Training and OSHA Refresher Courses on a yearly basis, since April 1988.

LIST OF PROJECTS

The following list shows a representative sample of Mr. Félix's professional work experience throughout his professional career.

HYDROGEOLOGY

- Site Characterization of Soil and Groundwater, former Hospital Dr. Pila owned by Metro Pavia, Ponce, Puerto Rico, on-going.
- Site Characterization of Soil and Groundwater, Dense Non-Aqueous Phase Liquids (DNAPLs), Confidential Client, Carolina, Puerto Rico, July 2009
- Assessment of Dense Non-Aqueous Phase Liquids (DNAPLs) in Groundwater, Confidential Client, Carolina, Puerto Rico, On-going.
- Groundwater and deep well sampling at the IPR Canovanas Facility, Canovanas, Puerto Rico, 2007.
- Groundwater and Clean-up Verification Sampling at the former Shell Yabucoa facility, Yabucoa, Puerto Rico, 2007.
- Hydrogeologic and Groundwater Characterization Assessment - Former Manufactured Gas Plant (MGP) Facility, Miramar, San Juan, Puerto Rico, June 1997.
- Subsurface and Groundwater Contamination Assessment - Air Liquid Facility, Cataño, Puerto Rico, October 1996
- Subsurface and Groundwater Contamination Assessment - General Gases Facility, Bayamón, Puerto Rico, October 1996
- Preliminary Subsurface Site Assessment - Former Fortiflex Manufacturing Facility, Bayamón, Puerto Rico
- Hydrogeologic Assessment and Groundwater Characterization - Former Metal Finishing Facility, Toa Baja, Puerto Rico, June 1996
- Subsurface and Groundwater Contamination Assessment ACERVO Transportation and Maintenance Facility, Hato Rey, Puerto Rico, January 1996

ENVIRONMENTAL ENGINEERING

- Soil Investigation, Baxter Healthcare Facility, Aibonito, Puerto Rico, on-going.
- Environmental Site Investigation, Shellfoam Facility, Puerto Rico Industrial Development Company (PRIDCO), Cidra, Puerto Rico, On-going.
- Environmental Assessment for soil contamination, Becton Dickinson Affirm Expansion, Cayey, Puerto Rico, March 2010.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Canovanas, Canovanas, Puerto Rico, on-going.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Toa Baja, Toa Baja Puerto Rico, on-going.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Aguadilla, Aguadilla, Puerto Rico, on-going.
- Environmental Audits and Permitting Compliance for the LANCO Group Facilities located in San Lorenzo, Cidra and Rio Piedras, on-going.
- Phase I and Phase II ESA for former Union Carbide Caribe Facility, as requested by Peerless Oil and Chemicals, Peñuelas/Guayanilla, Puerto Rico, 2009.
- Environmental Audit and Permitting Compliance, Papelera Puertorriqueña, Utuado, Puerto Rico, 2009.
- Baseline Assessment for the Texaco Farm Tank, as requested by Peerless Oil and Chemicals, Guayanilla, Puerto Rico, 2009.
- Environmental Assessments and Remediation for the ACERVO Facility for the proposed Villas El Paraiso Project, Hato Rey, Puerto Rico, 2008.
- Phase I and Phase II ESA for the former Schering Plough manufacturing facility, Manati, Puerto Rico, 2008.
- Phase I ESA for various facilities around Puerto Rico owned by the Banco Gubernamental de Fomento para Puerto Rico, 2009.
- Phase I ESA for 15 facilities around Puerto Rico owned by Empresas Alberic Colon, 2008.
- Phase I ESA for 6 airports facilities at various Dominican Republic, owned by AERODOM, 2008.
- Phase I ESA of former Empresas Santana facilities at the Luis Muñoz Marin International Airport and Base Muñiz, Carolina, Puerto Rico, 2008.
- Phase I ESA for four facilities owned by Borinquen Memorial Funeral Home, First Bank, various locations in Puerto Rico, 2008.
- Phase I for Hogar Manuel Mediavilla of a 11,861 square meter undeveloped lot, Humacao, January 2008
- Phase I and Phase II Environmental Site Assessments for the former Schering Plough Facilities, Manati, 2008
- Phase I and Phase II ESA for the Aguas Puras project at the PRASA Treatment Plant, First Bank, Bayamon, Puerto Rico, 2008.

- Phase I Assessment of the 6.5 lot adjacent to the Manati Medical Center, Manati, January 2007
- RCRA Hazardous Waste Environmental Audit/Inspection for the UPR, Humacao Campus, Humacao, Puerto Rico, April 2007
- RCRA Hazardous Waste Environmental Audit/Inspection for the UPR Arecibo Campus, Arecibo, April 2007
- Environmental Audit of the Quadrel Leasing Toa Baja facility, Toa Baja, Puerto Rico, 2007
- RCRA Hazardous Waste Environmental Audit/Inspection for the UPR, Bayamon Campus, Bayamon, Puerto Rico, March 2007
- Phase I Assessment for Banco Gubernamental de Fomento of the undeveloped lot adjacent to the Westin Rio Mar, Rio Grande, December 2007
- Phase I Assessment of the Empresas Santana facilities at the LMM International Airport, Carolina, November 2007
- Phase I Assessment of a 63 cuerdas lot for the former Ochoa Poultry, Salinas, September 2007
- Phase I Assessment of the Mr. Quicks Bayamon Facility, October 2007
- Phase I Assessment of a property at the Pajaros Ward, Bayamon, July 2007
- Environmental audit of the Centro Cardiovascular de PR medical facility, Rio Piedras, Puerto Rico, February 2006
- Phase II Site Characterization Shell Puerto Rico Former Gasoline Station, Mayaguez, Puerto Rico, August 2005.
- Assessment and Remediation Activities, EPA Brownfields Program, Hato Rey Electroplating PRIDCO Facility, Hato Rey, Puerto Rico, September 2005.
- Assessment and Remediation Activities, EPA Brownfields Program, National Circuit PRIDCO Facility, Fajardo, Puerto Rico, September 2005.
- Soil Assessment Cardinal Health Facility, Humacao, Puerto Rico, August 2005.
- Remedial Action Plans Preparation for the ACERVO Facility (Villas del Paraiso Residential Development), Hato Rey, Puerto Rico, February 2004
- Environmental audits of the following medical facilities: San Pablo Bayamon, San Pablo del Este Fajardo, Caribbean Pediatrics, San Juan Capestrano and Ojos Clinic, June 2004
- Environmental Sampling Assessment, Taller Bufalo, Barceloneta, Puerto Rico, October 2003
- Closure of Septic Tank System, US Navy, Vieques, Puerto Rico.
- Phase I Environmental Site Assessment, Proposed Home Depot facility, Arecibo, Puerto Rico, 2003
- Phase I, Phase II, and Remediation Activities, Saint Luke's Memorial Hospital, Former Hospital Regional de Ponce, Ponce, Puerto Rico, September 2003
- Assessment and Remediation Activities, EPA Superfund Program, Metal Finishing Toa Baja Facility, Toa Baja, Puerto Rico, February 2004
- Technical Assistance, Former San Juan Gas Facility, San Juan, Puerto Rico, December 2000
- Phase III Assessment activities at Former Electronics facility in Guanica. Waste characterization using the HAZCAT system: inventory, sampling, field screening, waste

grouping, laboratory analysis of waste group samples, field screening, sampling, characterization and disposal of abandoned chemical containers. May 2000.

- Phase II Environmental Site Assessment (Soil and Groundwater, Septic Tank Characterization, PCB Testing, Asbestos and Lead-based Paint Limited Surveys, ACERVO Facility, Hato Rey, Puerto Rico, February 2002
- Phase III Assessment/Remediation activities Project: drums/containers sampling and disposal; characterization, removal and disposal of waste waters and/or sludge in process tanks and sumps; cleaning of sumps and surfaces potentially affected with regulated metals, cleanup verification by sampling and analysis, and; characterization and disposal of waste wasters generated from cleaning activities from properties/ lots formerly owned by PRIDCO, within the Panamerican Grain Facilities in Cataño. June 2003.
- Phase I Environmental Site Assessment, Undeveloped property, Guayama, Puerto Rico, January 2003
- Phase I Environmental Site Assessment, San Juan and Carolina properties, January 2003
- Environmental Assessment, Isla Grande Site 36 Site, San Juan, Puerto Rico, January 2010.
- Phase II Assessment activities at the former ACERVO Facilities for the proposed Villas El Paraiso residential development, Hato Rey, 2007
- Environmental audits under the EPA Voluntary Environmental Auditing Program of the Caguas and Humacao medical facilities, Caguas and Humacao, Puerto Rico, June 2006
- Environmental audit under the EPA Voluntary Environmental Auditing Program of the San Juan Bautista Medical Center facility, Caguas, Puerto Rico
- Environmental audit under the EPA Voluntary Environmental Auditing Program of the Centro Cardiovascular de PR y el Caribe medical facility, Rio Piedras, Puerto Rico, February 2006
- Underground Injection Control System Closure, Former Mayaguez Filter Facility, Mayaguez, Puerto Rico, January 2005.
- Hazardous Waste Management and Characterization at the former Hato Rey Electroplating, Hato Rey, September 2005
- Phase II assessment at Sprint Store, Fajardo, August 2005
- Phase II assessment for Alberic Colon at Carolina Day & Night site, May 2005
- Phase I for Home Depot of an Undeveloped Lot, Hatillo, October 2005
- Phase I Environmental Site Assessment, Plaza Tropical Facility, Bayamon, Puerto Rico, January 2003
- Phase I Assessment for ParaPiezas Corp of the San Juan Properties Inc. Site, Rio Cañas Ward, Caguas, January 2004
- Environmental audits under the EPA Voluntary Auditing Program of the following medical facilities: San Pablo Bayamon, San Pablo del Este Fajardo, Caribbean Pediatrics, San Juan Capestrano, and Ojos Clinic, June 2004
- Phase II Assessment for Hewlett Packard for the proposed Las Americas Technology Park, Moca, October 2004
- Phase II assessment for Pfizer Caguas, outside property, December 2004
- Phase I Assessment for the Cayetano Coll y Toste Hospital, PR129, Arecibo, May 2004

- Phase I Assessment for the Dr. Susoni Hospital, PR129, Arecibo, May 2004
- Environmental assessment and remedial activities, confidential site in Caguas, EPA's AOC was issued in May 2001 for removal action under CERCLA to conduct cleanup and remedial activities. QA/QC plans were prepared and approved by the EPA and implemented. Final report was submitted to EPA, which changed site's qualification to No Further Remedial Action Planned (NFRAP).
- Phase I and Phase II Assessments, Revitalización Centro Urbano de Santurce, San Juan, Puerto Rico, February 2003.
- Phase I Assessment for Reichard & Escalera Law Firm of the Makro Facility, PR Road 834, Guaynabo July 2003
- Phase I Assessment for CAS Management of the Alejandro Otero Lopez Hospital, Manati, September 2003
- Phase II Assessment of the El Mundo WKAQ Broadcasting facility, Cataño, May 2003
- Phase I Assessment of Plaza Tropical at PR167, Bayamon, February 2003
- Air permitting and other environmental consulting services for various Mendez & Co. Facilities in Guaynabo, Añasco, and Cataño, Puerto Rico, since 1996 and on-going..
- Phase II Environmental Assessment, Bard Undeveloped Lot, Humacao, Puerto Rico, November 2002.
- Phase II Assessment; soil borings drilling, concrete sampling, hazardous waste drums/containers sampling at wood treating facility at lots formerly owned by PRIDCO, within the Panamerican Grain Facilities, April 2002
- Phase I Environmental Site Assessment, Leaseway facilities, Cataño and Toa Baja Site, Puerto Rico, September 2002.
- Phase I Environmental Site Assessment, Mountain Union Telecommunication Towers, various location in Puerto Rico, November 2002.
- Phase I Assessment for the San Juan Capestrano Hospital, Rio Piedras, January 2001
- Phase I Assessment for Lifetime properties located at Mayaguez and Hato Rey, March 2001
- Phase I Assessment and Asbestos Survey of the Humacao Regional Hospital, Humacao, January 2001
- Puerto Rico Hospital; Environmental Evaluation document, for the expansion of the Customed Facility, in Fajardo, and air permitting of Ethylene Oxide facility September 2001
- Phase II Assessment activities Biovail Laboratories Carolina:. Soil borings drilling and monitoring wells installation. Soil and groundwater sampling, asbestos survey and lead based paint survey,. June 2001
- Phase I Assessment for Mr. Ian Simmons of Vieques track of land, Vieques, August 2000
- Phase I Assessment of Centro de Diagnostico y Tratamiento de Arecibo, July 2000
- PhaseII Assessment of an industrial building formerly occupied by General Electric in Rio Piedras. Asbestos Survey, PCB sampling, wastes sampling and disposal, February 2000
- Phase II Assessment activities at Underground Storage Tank areas at the Cabo Rojo CDT and the Hospital de San German. Soil borings drilling and soil sampling, June 2000
- Phase I Assessment of the Cabo Rojo CDT and the Hospital de San German, January 1999

- Phase III Assessment at a former electroplating facility at Yabucoa. Implemented limited remedial activities at the facility to achieve EPA action levels for identified metals and EQB cleanup levels for hydrocarbon affected soils. Remedial activities included soil removal and cleanup of floor surfaces affected with regulated metals, followed by cleanup verification by sampling and analysis. Cleanup goals and/or action levels were achieved with the remedial activities implemented, October 1998
- Phase II Assessment: Hospital Regional de Fajardo, asbestos survey, PCB sampling, installation of soil borings, soil sampling, closure of 5 USTs, December 1999
- Phase II Assessment activities including: Sampling and Closure of Septic Tank from Former printing industrial facility (Vieques Graphics) in Vieques, March 1999
- Phase I and Phase II Assessments for Yauco, Guayama and San Pablo Medical Facilities, From 1997 to 1998.
- Phase I Assessment of a property in Bayamón to be acquired by Goya, December 1998
- Phase I Assessment of the HIMA Hospital in Caguas, and the Font Martello Hospital in Humacao, August 1998
- Phase II Assessment; Hospital San Pablo asbestos survey, air emission permitting, April 1998
- Phase II Assessment at a PRIDCO property used as a former electroplating facility at Yabucoa. Soil borings, PCB sampling, asbestos survey, geophysical survey to assess buried containers, May 1998
- Phase II Assessment at San Francisco Hospital in Rio Piedras. Soil borings drilling, soil sampling, UST removal, and asbestos survey, air emission permits application, SPCC plan, April 1998
- Phase II Assessment; (Ranger American Facility) Soil sampling activities at Hato Rey and Ponce facilities, June 1998
- Phase III Assessment/Remediation activities at San Juan Gas Facility in Miramar. Dismantling of gas holder and treatment and disposal of tar material in tanks, closure of several concrete underground storage tanks including cleaning of tanks and fill with inert material., November 1998
- Phase I Assessment for Ranger American, of property in Rio Piedras, April 1998
- Phase I Assessment of the Instituto Oftalmico facilities in Santurce, January, 1998
- Phase I Assessment of the Former Villa Esperanza Resort in Vieques, 1997
- Phase I and Phase II Site Assessment - Confidential Manufacturing Facility, Guaynabo, Puerto Rico, December 1997.
- Phase I Assessment of the Former Fajardo Regional Hospital, December, 1997
- Phase I Assessment of the Santa Rosa Mall in Bayamon, September, 1997
- Septic System UIC Closure Plan - Baxter Sales Facility, Guaynabo, Puerto Rico, February 1997.
- Phase II assessment activities at National Can de PR Inc., consisting of drilling of soil borings (approx 60) and sampling at concrete trenches, dikes and other areas within the facility, August 1997
- Underground Injection Control Permitting - Parque Las Cavernas de Camuy, Camuy, Puerto Rico, November 1996.

- Phase I Environmental Site Assessment Air Liquid Facility, Cataño, Puerto Rico, October 1996.
- Phase I Environmental Site Assessment 3 General Gases Facilities, Cataño, Bayamón and Ponce, Puerto Rico, October 1996.
- Phase I Environmental Site Assessment - Peninsula de Cantera Proposed Development Project, Santurce, Puerto Rico, November 1996.
- Phase I Environmental Site Assessment Tropical Fruit Property, Guanica, Puerto Rico, November 1996.

RESUME OF
LUIS RAUL COLON MORALES

Project Engineer/Project Manager

EDUCATION

University of Puerto Rico
Mayaguez Campus - B. S., Civil Engineering, 2005, Magna Cum Laude, GPA 3.85

University of Florida
Gainesville – Master in Civil Engineering, Water Resources, 2007, Summa Cum Laude GPA 4.00

National Groundwater Association

PROFESSIONAL REGISTRATIONS/CERTIFICATIONS

Professional Engineer (PE), License 21864, Puerto Rico

CAREER SUMMARY

Mr. Colón is a Project Engineer with the environmental consulting firm of Caribe Environmental Services since 2007. Mr. Colón is a registered Professional Engineer with the College of Engineers and Surveyors of Puerto Rico. Mr. Colón has been involved in a variety of water resources and environmental projects including surface and ground water hydrologic modeling and investigations as well as soil and groundwater contamination assessments. Mr. Colón is also continuously developing potentiometric and contaminant concentration surface maps as well as GIS Inventory databases. Also Mr. Colón has participated in the preparation of multiple environmental site assessments, environmental compliance audits and environmental permitting projects.

LIST OF PROJECTS

The following list shows a representative sample of Mr. Colón's professional work experience throughout his professional career.

ENVIRONMENTAL ENGINEERING

- Expert Witness – Blasina Lagoon Contamination, Municipio de Carolina V. Autoridad de Acueductos y Alcantarillados, Carolina, Puerto Rico – on-going.
- Soil Investigation, Baxter Healthcare Facility, Aibonito, Puerto Rico, on-going.

- Sampling activities, former Caguas Uniform facility, Caguas, Puerto Rico, on-going
- Environmental assessment, EFA Investment for Paseo Samaritano residential development, on-going
- Phase I and Groundwater sampling at Hospital Dr Pila, Ponce, Puerto Rico; on-going
- Phase I for Salichs Pou and Associates of former gas station at Toa Baja, Puerto Rico; October 2010
- Phase I Environmental assessment at Bacardi, Palo Seco facility; February 2011
- Phase I Environmental assessments of two sites (Arecibo and Carolina) for Battery Recycling; on-going
- Environmental Site Investigation, Shellfoam Facility, Puerto Rico Industrial Development Company (PRIDCO), Cidra, Puerto Rico, June 2010.
- Environmental Assessment for soil contamination, Becton Dickinson Affirm Expansion, Cayey, Puerto Rico, March 2010.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Canovanas, Canovanas, Puerto Rico, on-going.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Toa Baja, Toa Baja Puerto Rico, on-going.
- Site Inventories and Environmental Assessments for Brownfields Petroleum and Hazardous Sites for the Municipality of Aguadilla, Aguadilla, Puerto Rico, on-going.
- Phase I ESA for the San Jorge Children's Hospital for First Bank, Santurce, Puerto Rico, June 2010.
- Environmental Audits and Permitting Compliance for the LANCO Group Facilities located in San Lorenzo, Cidra and Rio Piedras, on-going.
- Phase I ESA for a parcel of land owned by Doral Bank, Rincon, Puerto Rico, July 2010.
- Phase I ESA for a parcel of land owned by Doral Bank, Loiza, Puerto Rico, July 2010.
- Phase I ESA for former gasoline station owned by Banco Popular de PR, Corozal, July 2010
- Phase I ESA for former gasoline station owned by Banco Cooperativo de Puerto Rico, Ciales, on-going.
- Phase I Environmental Site Assessment, Groundwater Sampling and Environmental Audit, Patheon Facility for EDIC College, Caguas, February 2011
- Soil Sampling Investigation, PCB Horizon Facility, Puerto Rico Industrial Development Company (PRIDCO), San German, Puerto Rico, 2009.
- Soil Investigation According to an Administrative Order of Consent Issued by the EPA PRIDCO, San Germán, Puerto Rico, On-going
- Phase I ESA for the Dollar Rent a Car facility, owned by Empresas Alberic Colon, Ponce, Puerto Rico, 2009
- Phase I ESA for the former Gulf Gasoline Station as requested by First Bank, Camuy, Puerto Rico, 2009.
- Phase I ESA for the Hospital Episcopal San Lucas and Torre Media, as requested by First Bank, Ponce, Puerto Rico, 2009.
- Phase I and Phase II ESA for former Union Carbide Caribe Facility, as requested by Peerless Oil and Chemicals, Peñuelas/Guayanilla, Puerto Rico, 2009.
- Environmental Audit and Permitting Compliance, Papelera Puertorriqueña, Utuado, Puerto Rico, on-going

- Phase I ESA for the proposed Sun Microsystems facility, as requested by McConnell Valdez, Ponce, Puerto Rico, 2009
- Phase I and Limited Phase II ESA for the Biovail Laboratories facilities, Dorado, Puerto Rico, 2009.
- Phase I Environmental Site Assessment & Phase II Site Characterization First Bank, Cataño, Puerto Rico, 2008.
- Phase I Environmental Site Assessment Borinquen Memorial, Caguas, Puerto Rico, 2008.
- Phase I Environmental Site Assessment Leaseway, Cataño, Puerto Rico, 2008.
- Phase I ESA of former Empresas Santana facilities at the Luis Muñoz Marin International Airport and Base Muñiz, Carolina, Puerto Rico, 2008.
- Phase I and Phase II ESA for the Aguas Puras project at the PRASA Treatment Plant, First Bank, Bayamon, Puerto Rico, 2008.
- Phase I Environmental Site Assessment (4 SITES) Alberic Colon, San Juan, Puerto Rico, 2008.
- Phase I Environmental Site Assessment Banco Gubernamental de Fomento, San Juan, Guaynabo & Ponce, Puerto Rico, 2008.
- Site Characterization of Soil and Groundwater, Dense Non-Aqueous Phase Liquids (DNAPLs), Confidential Client, Carolina, Puerto Rico.
- Assessment of Dense Non-Aqueous Phase Liquids (DNAPLs) in Groundwater, Confidential Client, Carolina, Puerto Rico.
- NPDES Storm Water Management Plan, Peerless Oil and Chemical, Peñuelas & Guayanilla, Puerto Rico,
  Ongoing
- NPDES Storm Water Management Plan, Quality Electroplating, Caguas, Puerto Rico, January 2009.
- NPDES Storm Water Management Plan, University of Puerto Rico, Aguadilla Campus.
- NPDES Storm Water Management Plan, University of Puerto Rico, Humacao Campus.
- NPDES Storm Water Management Plan, University of Puerto Rico, Carolina Campus.
- Consumption of Energy Analysis, Ext. Degetau Improvements, Caguas, Puerto Rico, 2007
- Erosion and Sedimentation Control Plan UPR Bayamón, Bayamón, Puerto Rico, 2007

HYDROLOGY AND HYDRAULICS

Surface Hydrology/Hydraulics

- Hydrologic/Hydraulic Study for the Turabo River, Caguas, Puerto Rico, as requested by the Puerto Rico Highway and Transportation Authority, on-going.
- Hydrologic/Hydraulic Study for the AD Bayamon site owned by Mendez & Co., Bayamon, Puerto Rico, on-going.
- Hydrologic/Hydraulic Study for a proposed Mixed-Uses Development Complex, LAIF LLC, Guaynabo, Puerto Rico, 2009
- Hydrologic Study Degetau Avenue Extension, Caguas, Puerto Rico, On-going
- Hydrologic/Hydraulic Study La Vereda Residential Development, Ceiba, Puerto Rico, 2008

- Hydrologic/Hydraulic Study Notre Dame Elementary School, Caguas, Puerto Rico, 2008
- Hydrologic/Hydraulic Study and Sinkholes Hydraulic Evaluation, Las Americas Technology Industrial Park, Moca, Puerto Rico, January 2007
- Hydrologic/Hydraulic Study Betteroads Cupey Facility, San Juan, Puerto Rico, 2007.
- Hydrologic and Hydraulic Study, Villas de Montecielo Residential Development, Guaynabo, Puerto Rico.
- Hydrologic and Hydraulic Study for the Degetau Avenue to the Turabo River and FEMA Conditional Letter of Map Revision Request, Caguas, Puerto Rico, June 2005.

Groundwater Hydrology/Hydrogeology

- Aquifer Investigation at the former Hanes Facility for the proposed Cervezas del Sur project, Ponce, Puerto Rico, on-going
- DNER Permitting of monitoring wells, former Patheon facility, Caguas, Puerto Rico, on-going.
- Groundwater study and slug/chemical testing, IPR Pharmaceuticals, Canóvanas, Puerto Rico, on-going
- Site Characterization of Soil and Groundwater, former Hospital Dr. Pila owned by Metro Pavia, Ponce, Puerto Rico, on-going.
- Site Characterization of Soil and Groundwater, Dense Non-Aqueous Phase Liquids (DNAPLs), Confidential Client, Carolina, Puerto Rico, July 2009
- Subsurface-Groundwater Contamination Assessment – PRHTA Site 36, Puerto Rico, On-Going
- Hydrologic/Hydraulic Study and Sinkholes Hydraulic Evaluation, Camaseyes Residential Area, Aguadilla, Puerto Rico, 2007
- Groundwater and deep well sampling Monitoring Event, IPR Pharmaceuticals, Canovanas, Puerto Rico, 2007.
- Hydrogeologic Characterization Assessment, Villas del Faro Punta Tuna Beach Resort, Maunabo, Puerto Rico, November 2001 (during summer part-time job)

GIS INVENTORY DATABASE

- Brownfield Inventory Database for Municipality of Aguadilla; on-going
- Brownfield Inventory Database for Municipality of Toa Baja; on-going
- Brownfield Inventory Database for Municipality of Canóvanas; on-going
- Location Inventory of sampling points for:
  - Soil Investigation, Baxter Healthcare facility, Aibonito, Puerto Rico; on-going
  - Phase I and Groundwater sampling at Hospital Dr Pila, Ponce, Puerto Rico; on-going
  - Environmental Site Investigation, Shellfoam Facility, Puerto Rico Industrial Development Company (PRIDCO), Cidra, Puerto Rico, June 2010
  - Phase I and Phase II ESA for former Union Carbide Caribe facility, as requested by Peerless Oil and Chemicals, Peñuelas/Guayanilla, Puerto Rico; 2009
  - Aquifer Investigation at the former Hanes facility for the proposed Cervezas del Sur project, Ponce, Puerto Rico; on-going

  - Groundwater study and slug/chemical testing, IPR Pharmaceuticals, Canóvanas, Puerto Rico; on-going
- Storm & Sanitary Water Sewers Location and/or Characteristics Identification, Expert Witness Contamination Assessment Municipio de Carolina vs. Autoridad de Acueductos y Alcantarillados, Carolina, On-Going.
- Location and Characteristics Identification of Water Wells, Groundwater Investigation, Cervezas del Sur, Ponce, Puerto Rico, 2009

"Cambios Recientes a Leyes y Reglamentos Ambientales y Propuestas Inmediatas de Energia Verde", CIAPR and AIDIS, October 29, 2009.

Seminar about "2008 Final NPDES General Permit For Stormwater Discharges From Industrial Activities", Asociacion Interamericana De Ingenieria Sanitaria Y Ciencias Del Ambiente, November 20, 2008

Hydrologic Modeling Using HEC-HMS Computer Model, American Society of Civil Engineers, Orlando, Florida, January, 2008

"Taller sobre Sistema de Información Geográfica: Puerto Rico Interactivo y el Expediente Digital", Puerto Rico Planning Board and College of Engineers and Surveyors of Puerto Rico, Hato Rey, Puerto Rico, May 11, 2007.

SKILLS

Proficient with the following softwares:

- Microsoft's computer software, such as: Power Point, Excel and Word.
- Hydrologic and Hydraulic software, such as: HMS, HEC-RAS, Hydraflow Storm Sewer, HY-8
- Software that can be applied to groundwater modeling, such as: Rockworks 2006, Surfer, AQTESOLV and Modflow Packages.
- AutoCad
- Arc GIS.
- Virtual Basic Programming.

I. INTRODUCTION

As part of the environmental due diligence, this survey is intended to assess the general presence, quantity, and location of LBP and lead-glazed ceramic components above allowable levels at *Tres (3) Centros Sociales en el Municipio de Yabucoa - Social Sport Center project* located at (*Lat: 18.050426, Lon: -65.879631) Yabucoa, P.R.*

The LBP survey, conforming to Housing Urban Development (HUD) Guidelines for the Evaluation and Control of Lead Based Paint in Housing, was conducted on January 28, 2025, by Mr. Sixto Suárez (Lead inspector number: LBPI-33923-399) from Nortol. Copy of Nortol's registration with the PRDNER as registered corporation is included in **Attachment 1**. Inspector's credential(s) is included in **Attachment 2.** Nortol's survey areas and report are limited to the details provided in Section II part D.

Based on the results of the survey, 87 XRF readings were performed using an XRF analyzer on identified and accessible surfaces in the interior and/or exterior of the subject structure. LBP was not identified above the regulatory level of greater than or equal to 1.0 mg/cm^2 in the SOW.

There is concrete, metal, and wood structural components. The floors have vinyl or ceramic tiles, painted or bare concrete. Also, ceramic tiles are present on some walls.

II. LEAD BASED PAINT SURVEY REPORT

A. Lead Based Paint Findings:

LBP was not found in the project accessed components. Data from XRF analyzer testing is included in **Attachment 3**. **Attachment 4** includes Representative Pictures\Photograph Log of the structure. Certification for non-presence of lead-based paints or lead-glazes is provided in **Attachment 5.**

B. Survey Protocol and Sampling Procedure:

The survey was conducted following the *HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing (as Revised, Chapter 7)*. The technique used for assessing the painted components was the XRF instrument. The following guidelines were used to perform LBP testing:

1. Achieve inventory of painted surfaces.
2. Select areas to be assessed.
3. Perform XRF testing.
4. Review and evaluate the data.

5. Report findings

The XRF instrument was set at Standard Paint Mode showing reading "Positive" or "Negative" with a 95% confident reading. The result is reported in mg/cm^2. **Attachment 6** includes the XRF Performance Characteristic Sheet (PCS) of the analyzer.

The **letters A, B, C**, and **D** used in the survey refers to:

A ⇒ Main entrance side orientation (to street)
B ⇒ Left side orientation
C ⇒ Rear side orientation
D ⇒ Right side orientation

C. Lead Based Paint Background and Regulatory Review:

Overexposure to lead is one of the most common situations found in industry. It is also a major potential public health risk. Lead poisoning is the leading environmentally induced illness in children. At greatest risk are children under the age of six because they are undergoing rapid neurological and physical development. In general population, lead may be present at hazardous concentrations in food, water, and air. Sources include LBP, urban soil, dust, and drinking water.

Lead is commonly added to industrial paints because of its characteristic to resist corrosion. Industries with particularly high potential exposures include construction work involving welding, cutting, brazing, blasting, etc., on lead paint surfaces; most smelter operations either as a trace contaminant or as a major product; secondary lead smelters where lead is recovered from batteries; radiator repair shops; and firing ranges. Oral ingestion may represent a major route of exposure in contaminated workplaces. Once in the blood, lead is distributed primarily among three routes - blood, soft tissue (kidney, bone marrow, liver, and brain) and mineralizing tissue (bones and teeth).

Hazard of lead in paint has been defined by the Department of Housing and Urban Development as 1.0 mg/cm^2 as measured by an XRF instrument, or Atomic Absorption Spectroscopy (AAS); or 0.5% by weight (or 5,000 ppm) as measured by AAS, or Inductive Coupled Plasma (ICP). The same level was adopted by EPA regulations published in 1992, under Title X.

Although OSHA regulations for occupational lead exposure have been in effect since 1971 for the construction and general industries, the agency recognized the need to provide better protection and revised the regulations for general industry in 1978. The 1978 lead standard, however,

excluded the construction industry from coverage because of insufficient information regarding lead use in construction.

In 1990, NIOSH set a national goal to eliminate worker exposures resulting in blood lead concentrations greater than 25 micrograms per deciliter (25 µg/dl) of whole blood. Consequently, OSHA began developing a proposal for a comprehensive standard regulating occupational exposure to lead in construction. In October 1992, the Congress passed Section 1031 of Title X of the Housing and Community Development Act of 1992 (P. L. 102-550) requiring OSHA to issue an interim final lead standard for the construction industry, effective until OSHA issues a final standard. The interim final rule, published on May 4, 1993, amends the OSHA standards for occupational health and environmental controls in Subpart D of Title 29 CFR 1926 by adding a new section 1926.62, containing employee protection requirements for construction workers exposed to lead.

On July 1998, the PRDNER - former PR Environmental Quality Board regulations regarding to LBP was created to issue activity permits, accredit institutions, and certificate persons involved in LBP activities in Puerto Rico. Local regulations require all lead to be managed as a special waste. On July 2019 this regulation was replaced by the new *Reglamento para el Manejo Adecuado de Actividades de Pintura con Base de Plomo*. To obtain a demolition permit in Puerto Rico is necessary to include a certification (OGP-PGC-010 or equivalent) stating that there is no LBP in the project.

D. Survey Areas – Extent of Survey Coverage:

The survey included a detailed structure inspection providing a general sense of the overall location, type, quantity, and condition of LBP and LBP ceramic components. The LBP survey was performed to ready accessible components and surfaces. If any suspect coated surface or ceramic components, that could contain lead, are encountered underneath current installed tiles or other construction material during demolition and/or renovation activities, which differ from materials tested during the LBP survey, these should be assumed to be Lead containing until testing/analysis confirmed otherwise. The survey was unobtrusive as samples were not taken where doing so would have resulted in objectionable damage to surfaces. Therefore, the survey did not include destructive, intrusive and/or exploratory testing.

Areas Not Included in Survey and Service Constraints: All professional opinions presented in this report are based on information made available either by review of data provided by others or data gathered by Nortol personnel. Nortol affirms that data gathered and presented by Nortol in this report was collected in an appropriate manner in accordance with accepted methods and practices. Any energized utilities/services, including electricity, water and heat were assumed to

be active. Materials associated with these items were determined to not be safely accessible and were not sampled. The survey did not include access or inspection of confined spaces or subsurface/underground areas including piping, conduits, building footings and soils (surficial or otherwise).

III. CONCLUSION

LBP survey was conducted for the project identified with the header ID. LBP or lead-glaze was not identified above the regulatory level of greater than or equal to 1.0 mg/cm^2 at the subject structure. In addition, lead containing ceramic components were not identified to contain lead above the regulatory level.

Data from XRF analyzer testing results is included in **Attachment 3**. **Attachment 4** includes Representative Pictures\Photograph Log of the structure. Certification for non-presence of lead-based paints or lead-glazes is provided in **Attachment 5.**

Any conditions or materials that could not be visually identified or were out-of-the SOW, were not inspected and may differ from those conditions or materials noted. It was not within the scope of the activity to remove surface materials to investigate portions of the structure or materials that may lay beneath the surface. Nortol's selection of sample locations and frequency of sampling was based on Nortol's observations and the assumption that similar materials in the same area are homogeneous in content.

The report is designed to aid the building owner, architect, construction manager, general contractors, and potential asbestos or lead abatement contractors in locating LBP or lead-glaze. Under no circumstances is the report to be utilized solely as a bidding document or as a project specification document.

TRES (3) CENTROS SOCIALES EN EL MUNICIPIO DE YABUCOA - SOCIAL SPORT CENTER -
LBP SURVEY PHOTO LOG

Built circa: Not available at the moment of the inspection

Tuesday, January 28, 2025

Prepared For ABACUS Architecture PSC

Lat: 18.050426, Lon: -65.879631

FRONT VIEW:

(18.0506369, -65.8796239)

LOCATION:

(18.0506369, -65.8796239)

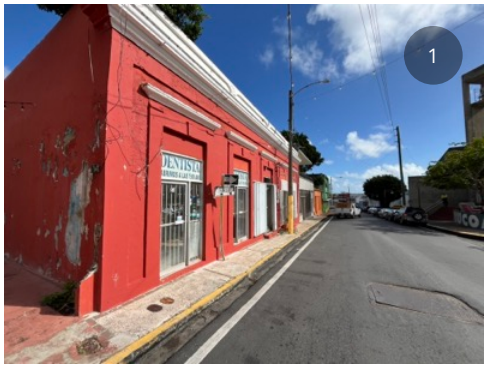
SCOPE OF WORK:

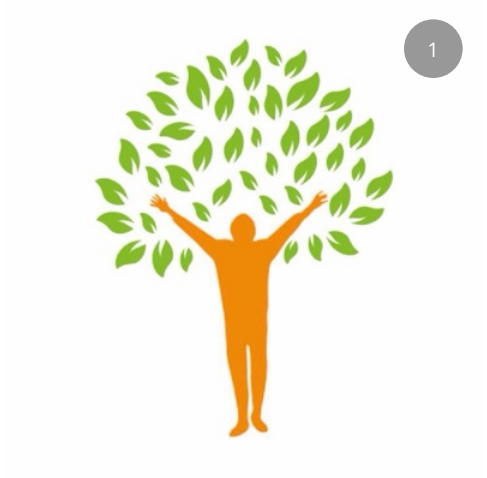
Full Inspection A/L.

Survey excludes roof area.

Job Id: LBP/ASB-2025-040

EXTERIOR GENERAL VIEWS:

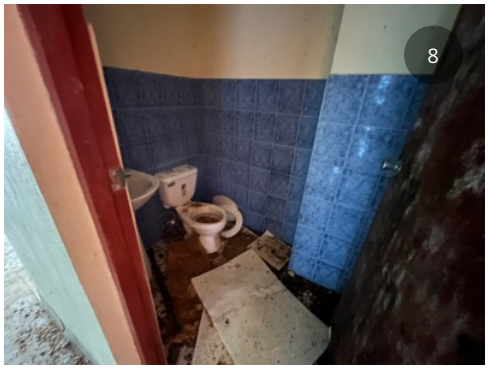


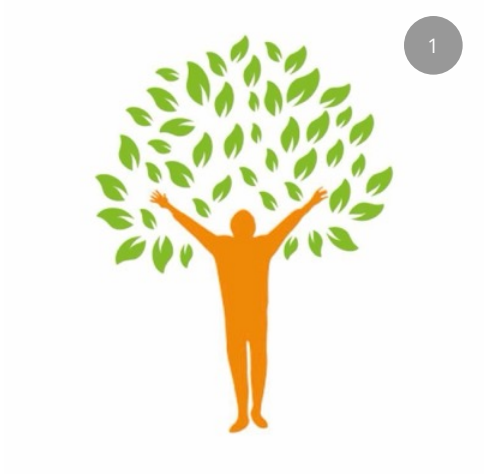


GENERAL VIEWS: ROOF

There was NO ACCESS to the roof. Roof area was exclude of the survey.

INTERIOR GENERAL VIEWS:





IS THERE ANY AREA WITHOUT ACCESS?

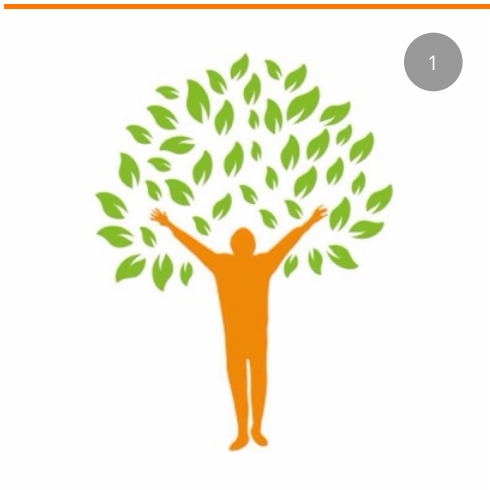
No.

IS THERE ANY VISIBLE INDICATION OF MOLD?

Yes, mold was found visible at the moment of the inspection.

ARE THERE SIGNS OF POOR HOUSEKEEPING ON SITE? (MOUNDS OF RUBBLE, GARBAGE, STORM DEBRIS, SOLID WASTE, PETROLEUM PRODUCTS, PAINT, PESTICIDES, CLEANING FLUIDS, VEHICLE BATTERIES, ABANDONED VEHICLES, PITS, POOLS, PONDS OF HAZARDOUS SUBSTANCES, ETC.)

Yes, mounds of rubble, bird excrement and material waste.



ARE ANY ADDITIONAL SITE HAZARDS OBSERVED?

Not found at the moment of the inspection.

1

LBP DETECTED?

No LBP detected at the moment of the inspection.

XRF Performance Characteristic Sheet

Performance Characteristic Sheet

EFFECTIVE DATE: **September 1, 2022**

MANUFACTURER AND MODEL:

Make: ***Heuresis***
Models: ***Model Pb200i, Pb200e***
Source: ***^{57}Co, 5 mCi (nominal – new source)***

FIELD OPERATION GUIDANCE

OPERATING PARAMETERS:

Action Level 1.0 mg/cm^2

XRF CALIBRATION CHECK LIMITS:

0.8 to 1.2 mg/cm^2 (inclusive)

SUBSTRATE CORRECTION:

Not applicable

INCONCLUSIVE RANGE OR THRESHOLD:

ACTION LEVEL MODE READING DESCRIPTION	SUBSTRATE	THRESHOLD (mg/cm^2)
Results not corrected for substrate bias on any substrate	Brick Concrete Drywall Metal Plaster Wood	1.0 1.0 1.0 1.0 1.0 1.0

BACKGROUND INFORMATION

EVALUATION DATA SOURCE AND DATE:

This sheet is supplemental information to be used in conjunction with Chapter 7 of the HUD *Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing* ("HUD Guidelines"). Performance parameters shown on this sheet are calculated using test results on building components in the HUD archive. Testing was conducted on 146 test samples in November 2015, with two separate instruments running software version 2.1-2 in Action Level test mode. The actual source strength of each instrument on the day of testing was approximately 2.0 mCi; source ages were approximately one year.

OPERATING PARAMETERS

Performance parameters shown in this sheet are applicable only when properly operating the instrument using the manufacturer's instructions and procedures described in Chapter 7 of the HUD Guidelines.

XRF CALIBRATION CHECK:

The calibration of the XRF instrument should be checked using the paint film nearest 1.0 mg/cm^2 in the NIST Standard Reference Material (SRM) used (e.g., for NIST SRM 2579, use the 1.02 mg/cm^2 film).

If the average (rounded to 1 decimal place) of three readings is outside the acceptable calibration check range, follow the manufacturer's instructions to bring the instrument into control before XRF testing proceeds.

SUBSTRATE CORRECTION VALUE COMPUTATION:

Chapter 7 of the HUD Guidelines provides guidance on correcting XRF results for substrate bias. Supplemental guidance for using the paint film nearest 1.0 mg/cm^2 for substrate correction is provided:

XRF results are corrected for substrate bias by subtracting from each XRF result a correction value determined separately in each house for single-family housing or in each development for multifamily housing, for each substrate. The correction value is an average of XRF readings taken over the NIST SRM paint film nearest to 1.0 mg/cm^2 at test locations that have been scraped bare of their paint covering. Compute the correction values as follows:

> Using the same XRF instrument, take three readings on a bare substrate area covered with the NIST SRM paint film nearest 1 mg/cm^2. Repeat this procedure by taking three more readings on a second bare substrate area of the same substrate covered with the NIST SRM.
>
> Compute the correction value for each substrate type where XRF readings indicate substrate correction is needed by computing the average of all six readings as shown below.
>
> <u>For each substrate type</u> (the 1.02 mg/cm^2 NIST SRM is shown in this example; use the actual lead loading of the NIST SRM used for substrate correction):
>
> Correction value = (1st + 2nd + 3rd + 4th + 5th + 6th *Reading*)/6 - 1.02 mg/cm^2
>
> Repeat this procedure for each substrate requiring substrate correction in the house or housing development.

EVALUATING THE QUALITY OF XRF TESTING:

Randomly select ten testing combinations for retesting from each house or from two randomly selected units in multifamily housing.

Conduct XRF re-testing at the ten testing combinations selected for retesting.

Determine if the XRF testing in the units or house passed or failed the test by applying the steps below. Compute the Retest Tolerance Limit by the following steps:

Determine XRF results for the original and retest XRF readings. Do not correct the original or retest results for substrate bias. In single-family and multi-family housing, a result is defined as a single reading. Therefore, there will be ten original and ten retest XRF results for each house or for the two selected units.

Calculate the average of the original XRF result and the retest XRF result for each testing combination.

Square the average for each testing combination.

Add the ten squared averages together. Call this quantity C.

Multiply the number C by 0.0072. Call this quantity D.

Add the number 0.032 to D. Call this quantity E.

Take the square root of E. Call this quantity F.

Multiply F by 1.645. The result is the Retest Tolerance Limit.

Compute the average of all ten original XRF readings.

Compute the average of all ten re-test XRF readings.

Find the absolute difference of the two averages.

If the difference is less than the Retest Tolerance Limit, the inspection has passed the retest. If the difference of the overall averages equals or exceeds the Retest Tolerance Limit, this procedure should be repeated with ten new testing combinations. If the difference of the overall averages is equal to or greater than the Retest Tolerance Limit a second time, then the inspection should be considered deficient.

Use of this procedure is estimated to produce a spurious result approximately 1% of the time. That is, results of this procedure will call for further examination when no examination is warranted in approximately 1 out of 100 dwelling units tested.

TESTING TIMES:

In the Action Level paint test mode, the instrument takes the longest time to complete readings close to the Federal standard of 1.0 mg/cm^2. The table below shows the mean and standard deviation of actual reading times by reading level for paint samples during the November 2015 archive testing. The tested instruments reported readings to one decimal place. No significant differences in reading times by substrate were observed. These times apply only to instruments with the same source strength as those tested (2.0 mCi). Instruments with stronger sources will have shorter reading times and those with weaker sources, longer reading times, than those in the table.

Mean and Standard Deviation of Reading Times in Action Level Mode by Reading Level		
Reading (mg/cm^2)	**Mean Reading Time (seconds)**	**Standard Deviation (seconds)**
< 0.7	3.48	0.47
0.7	7.29	1.92
0.8	13.95	1.78
0.9 – 1.2	15.25	0.66
1.3 – 1.4	6.08	2.50
≥ 1.5	3.32	0.05

CLASSIFICATION OF RESULTS:

XRF results are classified as **positive** if they are **greater than or equal** to the stated threshold for the instrument (1.0 mg/cm^2), and *negative* if they are *less than* the threshold.

DOCUMENTATION:

A report titled *Methodology for XRF Performance Characteristic Sheets* (EPA 747-R-95-008) provides an explanation of the statistical methodology used to construct the data in the sheets, and provides empirical results from using the recommended inconclusive ranges or thresholds for specific XRF instruments. The report may be downloaded at http://www2.epa.gov/lead/methodology-xrf-performance-characteristic-sheets-epa-747-r-95-008-september-1997.

This XRF Performance Characteristic Sheet (PCS) was developed by QuanTech, Inc., under a contract with the XRF manufacturer.

I. INTRODUCTION

As part of the environmental due diligence, this survey is intended to assess the general presence, quantity, and location of LBP and lead-glazed ceramic components above allowable levels at the *Tres (3) Centros Sociales en el Municipio de Yabucoa - **Social Center For Arts And Music** project* located at (*Lat: 18.050781, Lon: -65.878976 & Lat: 18.05073344, Lon: -65.8793214) Yabucoa, P.R*.

The LBP survey, conforming to Housing Urban Development (HUD) Guidelines for the Evaluation and Control of Lead Based Paint in Housing, was conducted on January 28, & March 19, 2025, by Mr. Sixto Suárez (Lead inspector number: LBPI-08923-114) from Nortol. Copy of Nortol's registration with the PRDNER as registered corporation is included in **Attachment 1**. Inspector's credential(s) is included in **Attachment 2.** Nortol's survey areas and report are limited to the details provided in Section II part D.

Based on the results of the survey, 157 XRF readings were performed using an XRF analyzer on the identified and accessible surfaces in the interior and/or exterior of the subject structure. **Lead-glazed ceramic wall tiles (which are regulated as LBP in Puerto Rico) were found in the bathrooms. See Attachment 3, diagram in Attachment 5 and pictures in Attachment 6 (page 6-March 19, 2025, photolog) for additional information**.

There are concrete and metal structural components. The floors have vinyl or terrazzo tiles, painted or bare concrete. Also, ceramic tiles are present on some walls.

II. LEAD BASED PAINT SURVEY REPORT

A. Lead Based Paint Findings:

LBP was found in some of the project accessed components. Data from XRF analyzer testing is included in **Attachment 3 and 4** with positive readings marked in red or bold. **Attachment 5** includes the approximated location of identified LBP or lead-glazes at the subject structure. Representative Pictures\Photograph Log of identified LBP surfaces and/or lead-glazed ceramic components within the structure are provided in **Attachment 6.**

B. Survey Protocol and Sampling Procedure:

The survey was conducted following the *HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing (1997 Revision, Chapter 7)*. The technique used for assessing the painted components was the XRF instrument. The following guidelines were used to perform LBP testing:

1. Achieve inventory of painted surfaces

2. Select areas to be assessed.
3. Perform XRF testing.
4. Review and evaluate the data.
5. Report on findings

The XRF instrument was set at Standard Paint Mode showing reading "Positive" or "Negative" with a 95% confident reading. The result is reported in mg/cm^2. **Attachment 7** includes the XRF Performance Characteristic Sheet (PCS) of the analyzer.

The **letters A, B, C**, and **D** used in the survey refer to:

A ⇒ Main entrance side orientation (to street)
B ⇒ Left side orientation
C ⇒ Rear side orientation
D ⇒ Right side orientation

C. Lead Based Paint Background and Regulatory Review:

Overexposure to lead is one of the most common situations found in industry. It is also a major potential public health risk. Lead poisoning is the leading environmentally induced illness in children. At greatest risk are children under the age of six because they are undergoing rapid neurological and physical development. In general population, lead may be present at hazardous concentrations in food, water, and air. Sources include LBP, urban soil, dust, and drinking water.

Lead is commonly added to industrial paints because of its characteristic to resist corrosion. Industries with particularly high potential exposures include construction work involving welding, cutting, brazing, blasting, etc., on lead paint surfaces; most smelter operations either as a trace contaminant or as a major product; secondary lead smelters where lead is recovered from batteries; radiator repair shops; and firing ranges. Oral ingestion may represent a major route of exposure in contaminated workplaces. Once in the blood, lead is distributed primarily among three routes - blood, soft tissue (kidney, bone marrow, liver, and brain) and mineralizing tissue (bones and teeth).

Hazard of lead in paint has been defined by the Department of Housing and Urban Development as greater than or equal to 1.0 mg/cm^2 as measured by an XRF instrument, or Atomic Absorption Spectroscopy (AAS); or 0.5% by weight (or 5,000 ppm) as measured by AAS, or Inductive Coupled Plasma (ICP). The same level was adopted by EPA regulations published in 1992, under Title X.

Although OSHA regulations for occupational lead exposure have been in effect since 1971 for the construction and general industries, the agency recognized the need to provide better protection and revised the regulations for general industry in 1978. The 1978 lead standard, however, excluded the construction industry from coverage because of insufficient information regarding lead use in construction.

In 1990, NIOSH set a national goal to eliminate worker exposures resulting in blood lead concentrations greater than 25 micrograms per deciliter (25 µg/dl) of whole blood. Consequently, OSHA began developing a proposal for a comprehensive standard regulating occupational exposure to lead in construction. In October 1992, Congress passed Section 1031 of Title X of the Housing and Community Development Act of 1992 (P. L. 102-550) requiring OSHA to issue an interim final lead standard for the construction industry, effective until OSHA issues a final standard. The interim final rule, published on May 4, 1993, amends the OSHA standards for occupational health and environmental controls in Subpart D of Title 29 CFR 1926 by adding a new section 1926.62, containing employee protection requirements for construction workers exposed to lead.

On July 1998, the PRDNER - former PR Environmental Quality Board regulations regarding to LBP was created to issue activity permits, accredit institutions, and certificate persons involved in LBP activities in Puerto Rico. Local regulations require all lead to be managed as a special waste. On August 2019 this regulation was replaced by the new *Reglamento para el Manejo Adecuado de Actividades de Pintura con Base de Plomo*. To obtain a demolition permit in Puerto Rico it is necessary to include a certification (OGP-PGC-010 or equivalent) stating that there is no LBP in the project.

D. Survey Areas – Extent of Survey Coverage:

The survey included a detailed structure inspection providing a general sense of the overall location, type, quantity, and condition of LBP and lead-glazed ceramic components. The LBP survey was performed to ready accessible components and surfaces. If any suspect coated surface or ceramic components that could contain lead are encountered underneath current installed tiles or other construction material during demolition and/or renovation activities which differ from materials tested during the LBP survey, these should be assumed to be Lead containing until testing/analysis confirmed otherwise. The survey was unobtrusive as samples were not taken where doing so would have resulted in objectionable damage to the surface. Therefore, the survey did not include destructive, intrusive and/or exploratory testing.

Areas Not Included in Survey and Service Constraints: All professional opinions presented in this report are based on information made available either by review of the data provided by others

or data gathered by Nortol's personnel. Nortol affirms that data gathered and presented by Nortol in this report was collected in an appropriate manner in accordance with accepted methods and practices. Any energized utilities/services, including electricity, water and heat were assumed to be active. Materials associated with these items were determined to not be safely accessible and were not sampled. The survey did not include access or inspection of confined spaces or subsurface/underground areas including piping, conduits, building footings and soils (surficial or otherwise).

III. CONCLUSION

LBP survey was conducted for the project identified with the header ID. LBP or lead-glaze was identified above the regulatory level of greater than or equal to 1.0 mg/cm^2 at selective areas of the subject structure.

Data from XRF analyzer testing is included in **Attachment 3 and 4** with positive readings marked in red or bold. **Attachment 5** includes the approximated location of identified LBP or lead-glazes at the subject structure. Representative Pictures\Photograph Log of identified LBP surfaces and/or lead-glazed ceramic components within the structure are provided in **Attachment 6.**

An LBP mitigation project shall be done prior to any demolition when lead is present in painted components. The LBP abatement project shall be in accordance with the PRDNER applicable regulations which include accredited personnel, special enclosure/work practices and permits for abatement and waste disposal (***or metal recycling as first option***). If demolition is not proposed, no further action is required other than compliance with federal and local regulations applicable to child-care facilities. Also applies to comply with proper communication to the maintenance employees and contractors following OSHA "Hazard Communication" to avoid unforeseeable damages on the LBP.

Any conditions or materials that could not be visually identified or were out-of-the SOW, were not inspected and may differ from those conditions or materials noted. It was not within the scope of the activity to remove surface materials to investigate portions of the structure or materials that may lay beneath the surface. Nortol's selection of sample locations and frequency of sampling was based on Nortol's observations and the assumption that similar materials in the same area are homogeneous in content.

The report is designed to aid the building owner, architect, construction manager, general contractors, and potential lead abatement contractors in locating LBP or lead-glaze. Under no circumstances is the report to be utilized solely as a bidding document or as a project specification document.

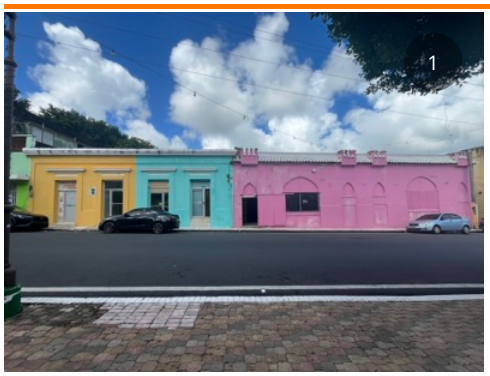
TRES (3) CENTROS SOCIALES EN EL MUNICIPIO DE YABUCOA - SOCIAL CENTER FOR ARTS AND MUSIC -LBP SURVEY PHOTO LOG

Built circa: Not available at the moment of the inspection

January 28 & March 19, 2025

Prepared For ABACUS Architecture PSC

Lat: 18.050781, Lon: -65.878976 & Lat: 18.05073344, Lon: -65.8793214



FRONT VIEW:

(18.0508827, -65.8790842)

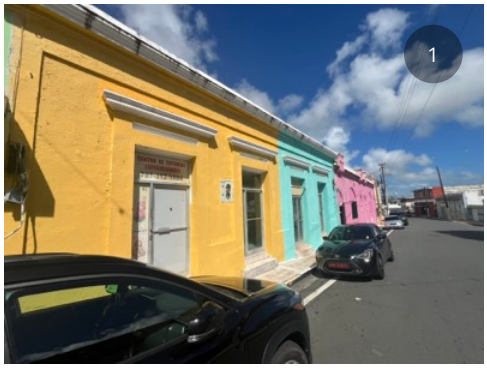
LOCATION:

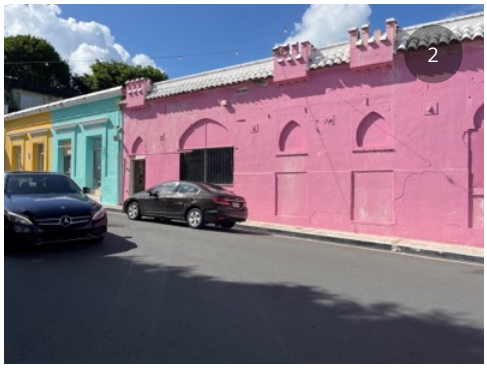
(18.0508827, -65.8790842)

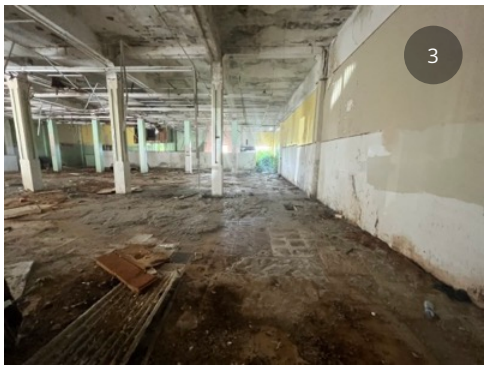
SCOPE OF WORK:
Full Inspection A/L

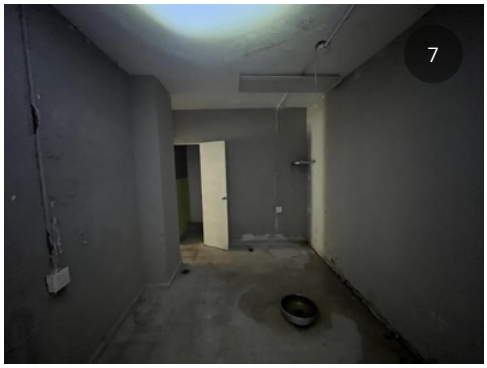
Job Id: LBP/ASB-2025-042

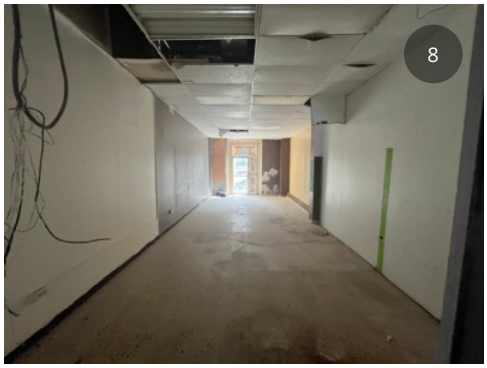
GENERAL VIEWS:

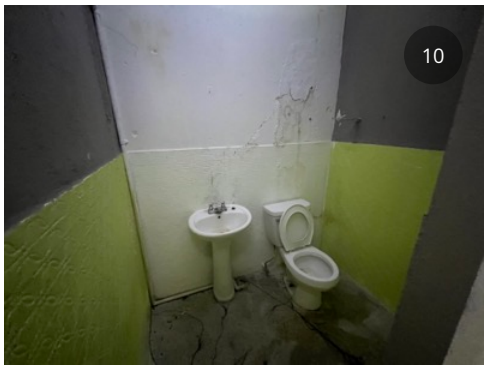




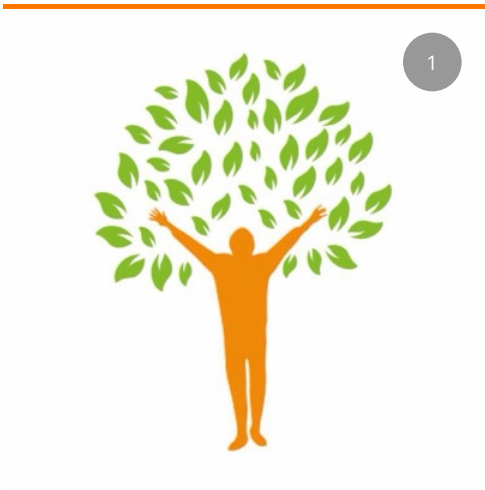








GENERAL VIEWS: ROOF



IS THERE ANY AREA WITHOUT ACCESS?

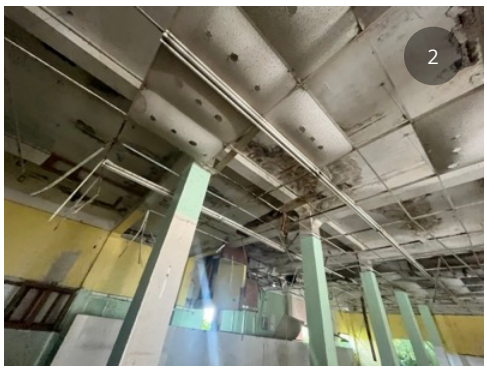
No.

IS THERE ANY VISIBLE INDICATION OF MOLD?

Yes, mold was found visible at the moment of the inspection.

ARE THERE SIGNS OF POOR HOUSEKEEPING ON SITE? (MOUNDS OF RUBBLE, GARBAGE, STORM DEBRIS, SOLID WASTE, PETROLEUM PRODUCTS, PAINT, PESTICIDES, CLEANING FLUIDS, VEHICLE BATTERIES, ABANDONED VEHICLES, PITS, POOLS, PONDS OF HAZARDOUS SUBSTANCES, ETC.)

Yes, mounds of rubble, garbage and hanging material from ceiling.



ARE ANY ADDITIONAL SITE HAZARDS OBSERVED?

Yes, found holes in the floor.

LBP DETECTED?

During this first visit no LBP was detected at the moment of the inspection. However during the second visit, lead-glazed ceramic wall tiles were found in the bathrooms. See next photolog.

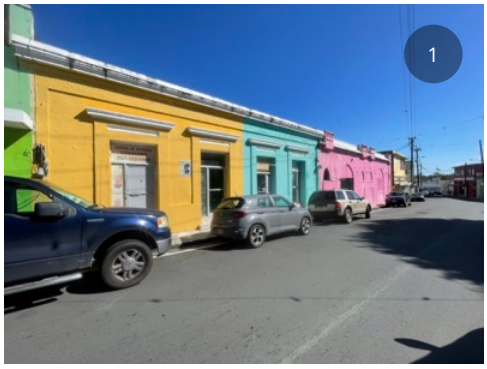
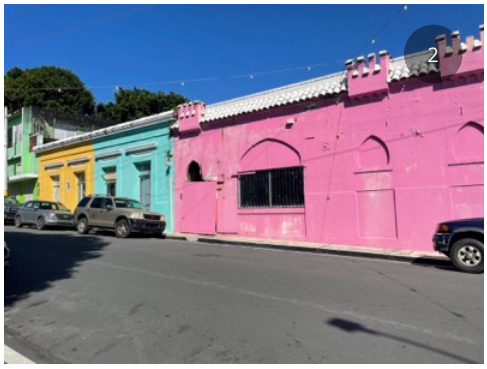
SCOPE OF WORK:
Full Inspection A/L

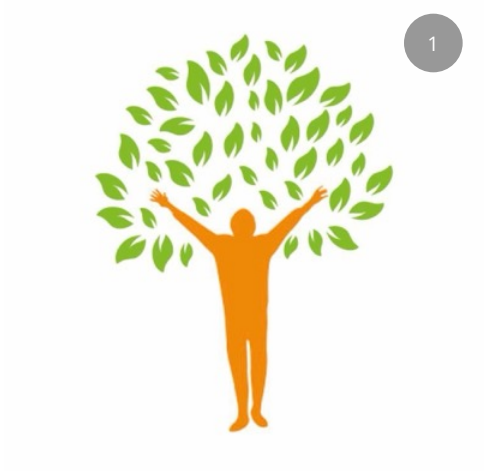
Job Id: LBP/ASB-2025-042

EXTERIOR GENERAL VIEWS:





INTERIOR GENERAL VIEWS:



IS THERE ANY AREA WITHOUT ACCESS?

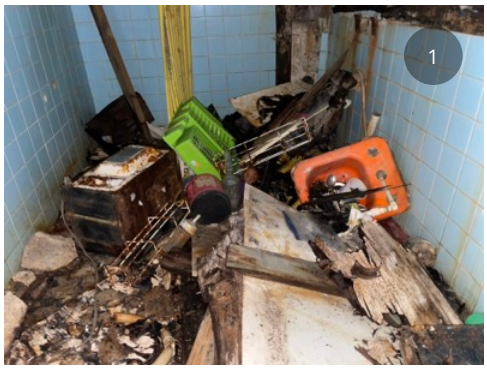
No.

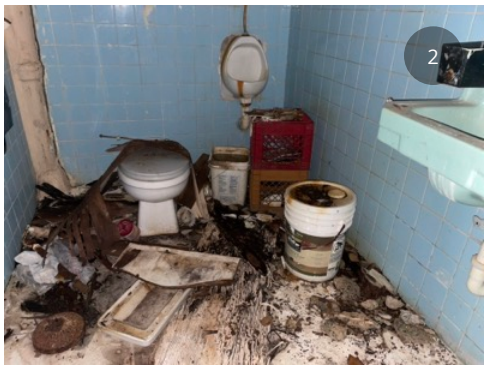
IS THERE ANY VISIBLE INDICATION OF MOLD?

Yes, mold was found visible at the moment of the inspection.

ARE THERE SIGNS OF POOR HOUSEKEEPING ON SITE? (MOUNDS OF RUBBLE, GARBAGE, STORM DEBRIS, SOLID WASTE, PETROLEUM PRODUCTS, PAINT, PESTICIDES, CLEANING FLUIDS, VEHICLE BATTERIES, ABANDONED VEHICLES, PITS, POOLS, PONDS OF HAZARDOUS SUBSTANCES, ETC.)

Yes, mounds of wasted material.





ARE ANY ADDITIONAL SITE HAZARDS OBSERVED?

Not found at the moment of the inspection.

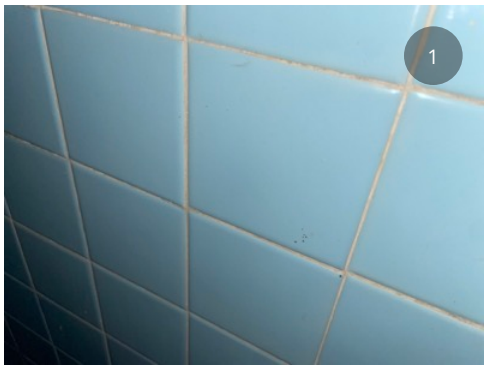
LBP DETECTED? BATHROOM 1

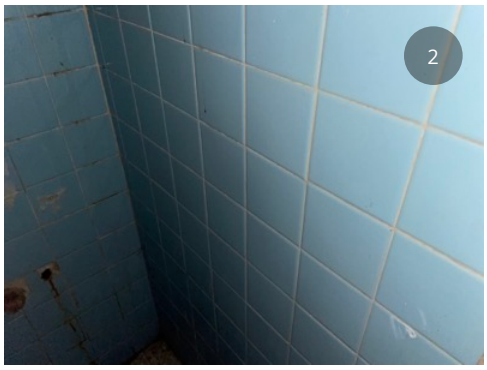
Interior, Reading #4, blue lead glazed ceramic wall tiles, Side A, 3 mg/cm2. (Qty. 15 SF Approx.)

Interior, Reading #5, blue lead glazed ceramic wall tiles, Side B, 2.9 mg/cm2. (Qty. 35 SF Approx.)

Interior, Reading #6, blue lead glazed ceramic wall tiles, Side C, 2.4 mg/cm2. (Qty. 20 SF Approx.)

Interior, Reading #7, blue lead glazed ceramic wall tiles, Side D, 2.9 mg/cm2. (Qty. 35 SF Approx.)





LBP DETECTED? BATHROOM 2

Interior, Reading #16, blue lead glazed ceramic wall tiles, Side A, 3.1 mg/cm2. (Qty. 15 SF Approx.)

Interior, Reading #17, blue lead glazed ceramic wall tiles, Side B, 2.5 mg/cm2. (Qty. 35 SF Approx.)

Interior, Reading #18, blue lead glazed ceramic wall tiles, Side C, 2.8 mg/cm2. (Qty. 20 SF Approx.)

Interior, Reading #19, blue lead glazed ceramic wall tiles, Side D, 2.9 mg/cm2. (Qty. 35 SF Approx.)

XRF Performance Characteristic Sheet

Performance Characteristic Sheet

EFFECTIVE DATE: **September 1, 2022**

MANUFACTURER AND MODEL:

Make: ***Heuresis***
Models: ***Model Pb200i, Pb200e***
Source: ***^{57}Co, 5 mCi (nominal – new source)***

FIELD OPERATION GUIDANCE

OPERATING PARAMETERS:

Action Level 1.0 mg/cm^2

XRF CALIBRATION CHECK LIMITS:

0.8 to 1.2 mg/cm^2 (inclusive)

SUBSTRATE CORRECTION:

Not applicable

INCONCLUSIVE RANGE OR THRESHOLD:

ACTION LEVEL MODE READING DESCRIPTION	SUBSTRATE	THRESHOLD (mg/cm^2)
Results not corrected for substrate bias on any substrate	Brick Concrete Drywall Metal Plaster Wood	1.0 1.0 1.0 1.0 1.0 1.0

BACKGROUND INFORMATION

EVALUATION DATA SOURCE AND DATE:

This sheet is supplemental information to be used in conjunction with Chapter 7 of the HUD *Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing* ("HUD Guidelines"). Performance parameters shown on this sheet are calculated using test results on building components in the HUD archive. Testing was conducted on 146 test samples in November 2015, with two separate instruments running software version 2.1-2 in Action Level test mode. The actual source strength of each instrument on the day of testing was approximately 2.0 mCi; source ages were approximately one year.

OPERATING PARAMETERS

Performance parameters shown in this sheet are applicable only when properly operating the instrument using the manufacturer's instructions and procedures described in Chapter 7 of the HUD Guidelines.

XRF CALIBRATION CHECK:

The calibration of the XRF instrument should be checked using the paint film nearest 1.0 mg/cm^2 in the NIST Standard Reference Material (SRM) used (e.g., for NIST SRM 2579, use the 1.02 mg/cm^2 film).

If the average (rounded to 1 decimal place) of three readings is outside the acceptable calibration check range, follow the manufacturer's instructions to bring the instrument into control before XRF testing proceeds.

SUBSTRATE CORRECTION VALUE COMPUTATION:

Chapter 7 of the HUD Guidelines provides guidance on correcting XRF results for substrate bias. Supplemental guidance for using the paint film nearest 1.0 mg/cm^2 for substrate correction is provided:

XRF results are corrected for substrate bias by subtracting from each XRF result a correction value determined separately in each house for single-family housing or in each development for multifamily housing, for each substrate. The correction value is an average of XRF readings taken over the NIST SRM paint film nearest to 1.0 mg/cm^2 at test locations that have been scraped bare of their paint covering. Compute the correction values as follows:

> Using the same XRF instrument, take three readings on a bare substrate area covered with the NIST SRM paint film nearest 1 mg/cm^2. Repeat this procedure by taking three more readings on a second bare substrate area of the same substrate covered with the NIST SRM.
>
> Compute the correction value for each substrate type where XRF readings indicate substrate correction is needed by computing the average of all six readings as shown below.
>
> <u>For each substrate type</u> (the 1.02 mg/cm^2 NIST SRM is shown in this example; use the actual lead loading of the NIST SRM used for substrate correction):
>
> Correction value = (1st + 2nd + 3rd + 4th + 5th + 6th *Reading*)/6 - 1.02 mg/cm^2
>
> Repeat this procedure for each substrate requiring substrate correction in the house or housing development.

EVALUATING THE QUALITY OF XRF TESTING:

Randomly select ten testing combinations for retesting from each house or from two randomly selected units in multifamily housing.

Conduct XRF re-testing at the ten testing combinations selected for retesting.

Determine if the XRF testing in the units or house passed or failed the test by applying the steps below. Compute the Retest Tolerance Limit by the following steps:

Determine XRF results for the original and retest XRF readings. Do not correct the original or retest results for substrate bias. In single-family and multi-family housing, a result is defined as a single reading. Therefore, there will be ten original and ten retest XRF results for each house or for the two selected units.

Calculate the average of the original XRF result and the retest XRF result for each testing combination.

Square the average for each testing combination.

Add the ten squared averages together. Call this quantity C.

Multiply the number C by 0.0072. Call this quantity D.

Add the number 0.032 to D. Call this quantity E.

Take the square root of E. Call this quantity F.

Multiply F by 1.645. The result is the Retest Tolerance Limit.

Compute the average of all ten original XRF readings.

Compute the average of all ten re-test XRF readings.

Find the absolute difference of the two averages.

If the difference is less than the Retest Tolerance Limit, the inspection has passed the retest. If the difference of the overall averages equals or exceeds the Retest Tolerance Limit, this procedure should be repeated with ten new testing combinations. If the difference of the overall averages is equal to or greater than the Retest Tolerance Limit a second time, then the inspection should be considered deficient.

Use of this procedure is estimated to produce a spurious result approximately 1% of the time. That is, results of this procedure will call for further examination when no examination is warranted in approximately 1 out of 100 dwelling units tested.

TESTING TIMES:

In the Action Level paint test mode, the instrument takes the longest time to complete readings close to the Federal standard of 1.0 mg/cm^2. The table below shows the mean and standard deviation of actual reading times by reading level for paint samples during the November 2015 archive testing. The tested instruments reported readings to one decimal place. No significant differences in reading times by substrate were observed. These times apply only to instruments with the same source strength as those tested (2.0 mCi). Instruments with stronger sources will have shorter reading times and those with weaker sources, longer reading times, than those in the table.

Mean and Standard Deviation of Reading Times in Action Level Mode by Reading Level		
Reading (mg/cm^2)	**Mean Reading Time (seconds)**	**Standard Deviation (seconds)**
< 0.7	3.48	0.47
0.7	7.29	1.92
0.8	13.95	1.78
0.9 – 1.2	15.25	0.66
1.3 – 1.4	6.08	2.50
≥ 1.5	3.32	0.05

CLASSIFICATION OF RESULTS:

XRF results are classified as **positive** if they are **greater than or equal** to the stated threshold for the instrument (1.0 mg/cm^2), and *negative* if they are *less than* the threshold.

DOCUMENTATION:

A report titled *Methodology for XRF Performance Characteristic Sheets* (EPA 747-R-95-008) provides an explanation of the statistical methodology used to construct the data in the sheets, and provides empirical results from using the recommended inconclusive ranges or thresholds for specific XRF instruments. The report may be downloaded at http://www2.epa.gov/lead/methodology-xrf-performance-characteristic-sheets-epa-747-r-95-008-september-1997.

This XRF Performance Characteristic Sheet (PCS) was developed by QuanTech, Inc., under a contract with the XRF manufacturer.

I. INTRODUCTION

As part of the environmental due diligence, this survey is intended to assess the general presence, quantity, and location of LBP and lead-glazed ceramic components above allowable levels at the *Tres (3) Centros Sociales en El Municipio de Yabucoa* - ***Cultural Social Center*** project located at (*Lat: 18.050577, Lon: -65.87938*) *Yabucoa, P.R*.

The LBP survey, conforming to Housing Urban Development (HUD) Guidelines for the Evaluation and Control of Lead Based Paint in Housing, was conducted on January 28, & March 19, 2025, by Mr. Sixto Suárez (Lead inspector number: LBPI-08923-114) from Nortol. Copy of Nortol's registration with the PRDNER as registered corporation is included in **Attachment 1**. Inspector's credential(s) is included in **Attachment 2.** Nortol's survey areas and report are limited to the details provided in Section II part D.

Based on the results of the survey, 73 XRF readings were performed using an XRF analyzer on the identified and accessible surfaces in the interior and/or exterior of the subject structure. **LBP was found in the interior walls. See Attachment 3, diagram in Attachment 5 and pictures in Attachment 6 (page 6) for additional information**.

There are concrete and metal structural components. The floors have vinyl, terrazzo, or ceramic tiles, painted or bare concrete. Also, ceramic tiles are present on some walls.

II. LEAD BASED PAINT SURVEY REPORT

A. Lead Based Paint Findings:

LBP was found in some of the project accessed components. Data from XRF analyzer testing is included in **Attachment 3 and 4** with positive readings marked in red or bold. **Attachment 5** includes the approximated location of identified LBP or lead-glazes at the subject structure. Representative Pictures\Photograph Log of identified LBP surfaces and/or lead-glazed ceramic components within the structure are provided in **Attachment 6.**

B. Survey Protocol and Sampling Procedure:

The survey was conducted following the *HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing (1997 Revision, Chapter 7)*. The technique used for assessing the painted components was the XRF instrument. The following guidelines were used to perform LBP testing:

1. Achieve inventory of painted surfaces
2. Select areas to be assessed.

3. Perform XRF testing.
4. Review and evaluate the data.
5. Report on findings

The XRF instrument was set at Standard Paint Mode showing reading "Positive" or "Negative" with a 95% confident reading. The result is reported in mg/cm^2. **Attachment 7** includes the XRF Performance Characteristic Sheet (PCS) of the analyzer.

The **letters A, B, C**, and **D** used in the survey refer to:

A ⇒ Main entrance side orientation (to street)
B ⇒ Left side orientation
C ⇒ Rear side orientation
D ⇒ Right side orientation

C. Lead Based Paint Background and Regulatory Review:

Overexposure to lead is one of the most common situations found in industry. It is also a major potential public health risk. Lead poisoning is the leading environmentally induced illness in children. At greatest risk are children under the age of six because they are undergoing rapid neurological and physical development. In general population, lead may be present at hazardous concentrations in food, water, and air. Sources include LBP, urban soil, dust, and drinking water.

Lead is commonly added to industrial paints because of its characteristic to resist corrosion. Industries with particularly high potential exposures include construction work involving welding, cutting, brazing, blasting, etc., on lead paint surfaces; most smelter operations either as a trace contaminant or as a major product; secondary lead smelters where lead is recovered from batteries; radiator repair shops; and firing ranges. Oral ingestion may represent a major route of exposure in contaminated workplaces. Once in the blood, lead is distributed primarily among three routes - blood, soft tissue (kidney, bone marrow, liver, and brain) and mineralizing tissue (bones and teeth).

Hazard of lead in paint has been defined by the Department of Housing and Urban Development as greater than or equal to 1.0 mg/cm^2 as measured by an XRF instrument, or Atomic Absorption Spectroscopy (AAS); or 0.5% by weight (or 5,000 ppm) as measured by AAS, or Inductive Coupled Plasma (ICP). The same level was adopted by EPA regulations published in 1992, under Title X.

Although OSHA regulations for occupational lead exposure have been in effect since 1971 for the construction and general industries, the agency recognized the need to provide better protection

and revised the regulations for general industry in 1978. The 1978 lead standard, however, excluded the construction industry from coverage because of insufficient information regarding lead use in construction.

In 1990, NIOSH set a national goal to eliminate worker exposures resulting in blood lead concentrations greater than 25 micrograms per deciliter (25 µg/dl) of whole blood. Consequently, OSHA began developing a proposal for a comprehensive standard regulating occupational exposure to lead in construction. In October 1992, Congress passed Section 1031 of Title X of the Housing and Community Development Act of 1992 (P. L. 102-550) requiring OSHA to issue an interim final lead standard for the construction industry, effective until OSHA issues a final standard. The interim final rule, published on May 4, 1993, amends the OSHA standards for occupational health and environmental controls in Subpart D of Title 29 CFR 1926 by adding a new section 1926.62, containing employee protection requirements for construction workers exposed to lead.

On July 1998, the PRDNER - former PR Environmental Quality Board regulations regarding to LBP was created to issue activity permits, accredit institutions, and certificate persons involved in LBP activities in Puerto Rico. Local regulations require all lead to be managed as a special waste. On August 2019 this regulation was replaced by the new *Reglamento para el Manejo Adecuado de Actividades de Pintura con Base de Plomo*. To obtain a demolition permit in Puerto Rico is necessary to include a certification (OGP-PGC-010 or equivalent) stating that there is no LBP in the project.

D. Survey Areas – Extent of Survey Coverage:

The survey included a detailed structure inspection providing a general sense of the overall location, type, quantity, and condition of LBP and lead-glazed ceramic components. The LBP survey was performed to ready accessible components and surfaces. If any suspect coated surface or ceramic components that could contain lead are encountered underneath current installed tiles or other construction material during demolition and/or renovation activities which differ from materials tested during the LBP survey, these should be assumed to be Lead containing until testing/analysis confirmed otherwise. The survey was unobtrusive as samples were not taken where doing so would have resulted in objectionable damage to the surface. Therefore, the survey did not include destructive, intrusive and/or exploratory testing.

Areas Not Included in Survey and Service Constraints: All professional opinions presented in this report are based on information made available either by review of the data provided by others or data gathered by Nortol's personnel. Nortol affirms that data gathered and presented by Nortol in this report was collected in an appropriate manner in accordance with accepted

methods and practices. Any energized utilities/services, including electricity, water and heat were assumed to be active. Materials associated with these items were determined to not be safely accessible and were not sampled. The survey did not include access or inspection of confined spaces or subsurface/underground areas including piping, conduits, building footings and soils (surficial or otherwise).

III. CONCLUSION

An LBP survey was conducted for the project identified with the header ID. LBP or lead-glaze was identified above the regulatory level of greater than or equal to 1.0 mg/cm^2 at selective areas of the subject structure.

Data from XRF analyzer testing is included in **Attachment 3 and 4** with positive readings marked in red or bold. **Attachment 5** includes the approximated location of identified LBP or lead-glazes at the subject structure. Representative Pictures\Photograph Log of identified LBP surfaces and/or lead-glazed ceramic components within the structure are provided in **Attachment 6.**

An LBP mitigation project shall be done prior to any demolition when lead is present in painted components. The LBP abatement project shall be in accordance with the PRDNER applicable regulations which include accredited personnel, special enclosure/work practices and permits for abatement and waste disposal (***or metal recycling as first option***). If demolition is not proposed, no further action is required other than compliance with federal and local regulations applicable to child-care facilities. Also applies to comply with proper communication to the maintenance employees and contractors following OSHA "Hazard Communication" to avoid unforeseeable damages on the LBP.

Any conditions or materials that could not be visually identified or were out-of-the SOW, were not inspected and may differ from those conditions or materials noted. It was not within the scope of the activity to remove surface materials to investigate portions of the structure or materials that may lay beneath the surface. Nortol's selection of sample locations and frequency of sampling was based on Nortol's observations and the assumption that similar materials in the same area are homogeneous in content.

The report is designed to aid the building owner, architect, construction manager, general contractors, and potential lead abatement contractors in locating LBP or lead-glaze. Under no circumstances is the report to be utilized solely as a bidding document or as a project specification document.

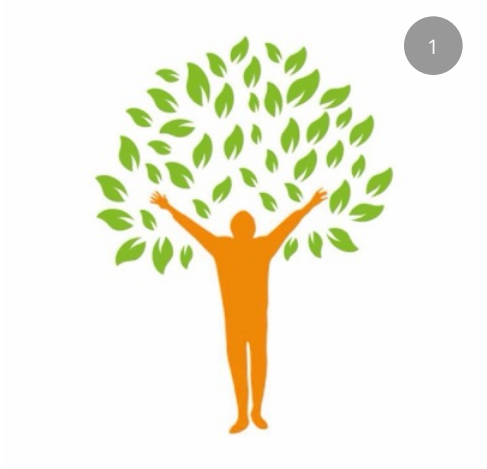
Job Id: LBP/ASB-2025-041

GENERAL VIEWS:



GENERAL VIEWS: ROOF

There was NO ACCESS to the roof.

IS THERE ANY AREA WITHOUT ACCESS?

Yes, there was NO ACCESS to lower level.

Access was possible on second visit, March 19, 2025

IS THERE ANY VISIBLE INDICATION OF MOLD?

Yes, mold was found visible at the moment of the inspection.

ARE THERE SIGNS OF POOR HOUSEKEEPING ON SITE? (MOUNDS OF RUBBLE, GARBAGE, STORM DEBRIS, SOLID WASTE, PETROLEUM PRODUCTS, PAINT, PESTICIDES, CLEANING FLUIDS, VEHICLE BATTERIES, ABANDONED VEHICLES, PITS, POOLS, PONDS OF HAZARDOUS SUBSTANCES, ETC.)

Yes, material waste, garbage, bad vegetation and hanging ceiling material.

ARE ANY ADDITIONAL SITE HAZARDS OBSERVED?

Not found at the moment of the inspection.

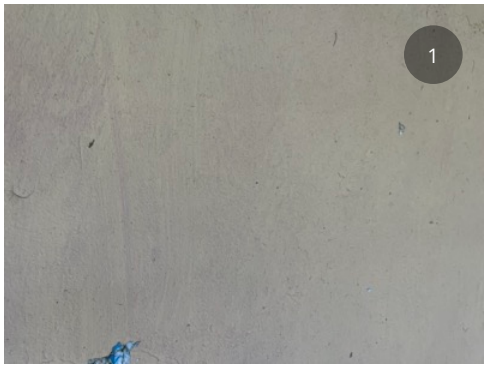
LBP DETECTED? OPEN SPACE 1

Interior, Readings #91, beige concrete wall, side A, 6.2 mg/cm2. (Qty. 300 SF Approx.)

Interior, Readings #92, beige concrete wall, side B, 5 mg/cm2. (Qty. 450 SF Approx.)

Interior, Readings #93, beige concrete wall, side C, 9 mg/cm2. (Qty. 280 SF Approx.)

Interior, Readings #94, beige concrete wall, side D, 6.9 mg/cm2. (Qty. 450 SF Approx.)



LBP DETECTED? OPEN SPACE 2

Interior, Readings #98, beige concrete wall, side A, 12.5 mg/cm2. (Qty. 280 SF Approx.)

Interior, Readings #99, beige concrete wall, side B, 10.3 mg/cm2. (Qty. 200 SF Approx.)

Interior, Readings #100, beige concrete wall, side C, 8.7 mg/cm2. (Qty. 250 SF Approx.)

Interior, Readings #101, beige concrete wall, side D, 11.1 mg/cm2. (Qty. 200 SF Approx.)

XRF Performance Characteristic Sheet

Performance Characteristic Sheet

EFFECTIVE DATE: **September 1, 2022**

MANUFACTURER AND MODEL:

Make: ***Heuresis***
Models: ***Model Pb200i, Pb200e***
Source: ***^{57}Co, 5 mCi (nominal – new source)***

FIELD OPERATION GUIDANCE

OPERATING PARAMETERS:

Action Level 1.0 mg/cm^2

XRF CALIBRATION CHECK LIMITS:

0.8 to 1.2 mg/cm^2 (inclusive)

SUBSTRATE CORRECTION:

Not applicable

INCONCLUSIVE RANGE OR THRESHOLD:

ACTION LEVEL MODE READING DESCRIPTION	SUBSTRATE	THRESHOLD (mg/cm^2)
Results not corrected for substrate bias on any substrate	Brick Concrete Drywall Metal Plaster Wood	1.0 1.0 1.0 1.0 1.0 1.0

BACKGROUND INFORMATION

EVALUATION DATA SOURCE AND DATE:

This sheet is supplemental information to be used in conjunction with Chapter 7 of the HUD *Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing* ("HUD Guidelines"). Performance parameters shown on this sheet are calculated using test results on building components in the HUD archive. Testing was conducted on 146 test samples in November 2015, with two separate instruments running software version 2.1-2 in Action Level test mode. The actual source strength of each instrument on the day of testing was approximately 2.0 mCi; source ages were approximately one year.

OPERATING PARAMETERS

Performance parameters shown in this sheet are applicable only when properly operating the instrument using the manufacturer's instructions and procedures described in Chapter 7 of the HUD Guidelines.

XRF CALIBRATION CHECK:

The calibration of the XRF instrument should be checked using the paint film nearest 1.0 mg/cm^2 in the NIST Standard Reference Material (SRM) used (e.g., for NIST SRM 2579, use the 1.02 mg/cm^2 film).

If the average (rounded to 1 decimal place) of three readings is outside the acceptable calibration check range, follow the manufacturer's instructions to bring the instrument into control before XRF testing proceeds.

SUBSTRATE CORRECTION VALUE COMPUTATION:

Chapter 7 of the HUD Guidelines provides guidance on correcting XRF results for substrate bias. Supplemental guidance for using the paint film nearest 1.0 mg/cm^2 for substrate correction is provided:

XRF results are corrected for substrate bias by subtracting from each XRF result a correction value determined separately in each house for single-family housing or in each development for multifamily housing, for each substrate. The correction value is an average of XRF readings taken over the NIST SRM paint film nearest to 1.0 mg/cm^2 at test locations that have been scraped bare of their paint covering. Compute the correction values as follows:

> Using the same XRF instrument, take three readings on a bare substrate area covered with the NIST SRM paint film nearest 1 mg/cm^2. Repeat this procedure by taking three more readings on a second bare substrate area of the same substrate covered with the NIST SRM.
>
> Compute the correction value for each substrate type where XRF readings indicate substrate correction is needed by computing the average of all six readings as shown below.
>
> <u>For each substrate type</u> (the 1.02 mg/cm^2 NIST SRM is shown in this example; use the actual lead loading of the NIST SRM used for substrate correction):
>
> Correction value = (1st + 2nd + 3rd + 4th + 5th + 6th *Reading*)/6 - 1.02 mg/cm^2
>
> Repeat this procedure for each substrate requiring substrate correction in the house or housing development.

EVALUATING THE QUALITY OF XRF TESTING:

Randomly select ten testing combinations for retesting from each house or from two randomly selected units in multifamily housing.

Conduct XRF re-testing at the ten testing combinations selected for retesting.

Determine if the XRF testing in the units or house passed or failed the test by applying the steps below. Compute the Retest Tolerance Limit by the following steps:

Determine XRF results for the original and retest XRF readings. Do not correct the original or retest results for substrate bias. In single-family and multi-family housing, a result is defined as a single reading. Therefore, there will be ten original and ten retest XRF results for each house or for the two selected units.

Calculate the average of the original XRF result and the retest XRF result for each testing combination.

Square the average for each testing combination.

Add the ten squared averages together. Call this quantity C.

Multiply the number C by 0.0072. Call this quantity D.

Add the number 0.032 to D. Call this quantity E.

Take the square root of E. Call this quantity F.

Multiply F by 1.645. The result is the Retest Tolerance Limit.

Compute the average of all ten original XRF readings.

Compute the average of all ten re-test XRF readings.

Find the absolute difference of the two averages.

If the difference is less than the Retest Tolerance Limit, the inspection has passed the retest. If the difference of the overall averages equals or exceeds the Retest Tolerance Limit, this procedure should be repeated with ten new testing combinations. If the difference of the overall averages is equal to or greater than the Retest Tolerance Limit a second time, then the inspection should be considered deficient.

Use of this procedure is estimated to produce a spurious result approximately 1% of the time. That is, results of this procedure will call for further examination when no examination is warranted in approximately 1 out of 100 dwelling units tested.

TESTING TIMES:

In the Action Level paint test mode, the instrument takes the longest time to complete readings close to the Federal standard of 1.0 mg/cm^2. The table below shows the mean and standard deviation of actual reading times by reading level for paint samples during the November 2015 archive testing. The tested instruments reported readings to one decimal place. No significant differences in reading times by substrate were observed. These times apply only to instruments with the same source strength as those tested (2.0 mCi). Instruments with stronger sources will have shorter reading times and those with weaker sources, longer reading times, than those in the table.

Mean and Standard Deviation of Reading Times in Action Level Mode by Reading Level		
Reading (mg/cm^2)	**Mean Reading Time (seconds)**	**Standard Deviation (seconds)**
< 0.7	3.48	0.47
0.7	7.29	1.92
0.8	13.95	1.78
0.9 – 1.2	15.25	0.66
1.3 – 1.4	6.08	2.50
≥ 1.5	3.32	0.05

CLASSIFICATION OF RESULTS:

XRF results are classified as **positive** if they are **greater than or equal** to the stated threshold for the instrument (1.0 mg/cm^2), and *negative* if they are *less than* the threshold.

DOCUMENTATION:

A report titled *Methodology for XRF Performance Characteristic Sheets* (EPA 747-R-95-008) provides an explanation of the statistical methodology used to construct the data in the sheets, and provides empirical results from using the recommended inconclusive ranges or thresholds for specific XRF instruments. The report may be downloaded at http://www2.epa.gov/lead/methodology-xrf-performance-characteristic-sheets-epa-747-r-95-008-september-1997.

This XRF Performance Characteristic Sheet (PCS) was developed by QuanTech, Inc., under a contract with the XRF manufacturer.

I. INTRODUCTION

As part of the environmental due diligence, this survey is intended to assess the general presence, quantity, and location of suspected asbestos-containing materials (SACM) at the *Tres (3) Centros Sociales en el Municipio de Yabucoa - **Social Center for Arts And Music** project* located at (*Lat: 18.050781, Lon: -65.878976 & Lat: 18.05073344, Lon: -65.8793214) Yabucoa, P.R*.

The SACM survey was conducted on January 28, & March 19, 2025, by Mr. Sixto Suárez (ACM inspector num. ASB-1024-0484-SI) from Nortol. Inspector's credential(s) is included in **Attachment 1.** Nortol's survey areas and report are limited to the details provided in Section II part D.

Nortol identified SACM and bulk sample(s) were collected and submitted for laboratory analysis. **About 7,000 Ft2 of roofing sealer materials and about 4,000 Ft2 of vinyl floor tiles (and/or its mastic layer) resulted positive (>1%) to asbestos containing material.** The table of asbestos summary findings is included as **Attachment 2.** Additional related information is in **Attachments 3, 4 & 6**.

There are concrete and metal structural components. The floors have vinyl or terrazzo tiles, painted or bare concrete. Also, ceramic tiles are present on some walls.

II. ASBESTOS SURVEY REPORT

A. Survey Protocol:

This activity was conducted following the latest protocol for assessing materials suspected of containing asbestos as defined by the U.S. Environmental Protection Agency (EPA). It involved a visual walk-through inspection of the accessible areas of the building to develop an inventory of suspect ACM homogeneous materials. During the sampling activities, suspected ACM was touched and observed by the inspector to determine its friability and physical condition. A friable material is defined as a material that when dry, can be crumbled, or reduced to powder by hand pressure. The friability of a material causally relates to the potential of the asbestos fibers to be released. The inspector assessed the suspect ACM according to their physical condition and potential damage.

B. Sampling Procedure:

The technique used for sampling the suspected accessible materials was designed to minimize possible fiber release and in turn possible contamination of surrounding areas. Representative suspected material samples were collected in accordance with the EPA's AHERA/ASHARA

guidelines and procedures presented in the *Guide for Controlling Asbestos Containing Materials in Building (EPA 560-6-85-024, June 1985)* and characterized following the *National Emission Standard for Hazardous Air Pollution (NESHAP)*, subpart M-Asbestos, 40 CFR Part 61-Standard for Demolition and Renovation. Samples of the homogeneous accessible materials were collected in quantities enough to determine asbestos content and then placed in airtight bags. The bagged samples were properly collected, labeled, and identified. A Chain of Custody form was completed for collected bulk samples which were analyzed by an independent laboratory using PLM method. The laboratory utilizes dispersion staining techniques according to US EPA method 600/M4-82-020 incorporating visual estimates of identified material percentages.

C. Regulatory Review:

According to NESHAP's standards (40 CFR 61.141), Asbestos Containing Building Materials are classified into three categories: Category I - Nonfriable asbestos-containing material (ACM), Category II – other Nonfriable ACM, and Regulated asbestos-containing material (RACM). ACMs are classified into three categories according to EPA-AHERA/ASHARA's standards (40 CFR Part 763): Surfacing material, Thermal System Insulation (TSI) and Miscellaneous material.

Once the inspector has identified the ACM in a building, he or she must perform a physical assessment of TSI and friable material. Under § 763.88 of the AHERA Rule, the physical assessment of ACBM involve classifying the material into one of the following seven Categories: Damaged or significantly damaged TSI ACM; Damaged friable surfacing ACM; Significantly damaged friable surfacing ACM; Damaged or significantly damaged friable miscellaneous ACM; ACBM with potential for damage; ACBM with potential for significant damage; and Any remaining friable ACBM or friable suspected ACBM.

The PRDNER- former Environmental Quality Board (Regulation for the Control of Atmospheric Pollution-Rule 422) enacted in 1995, required all commercial and public building, including industries to identify asbestos containing building materials in their structures and take appropriate actions to control the release of asbestos fiber. Asbestos inspection is part of the permitting application process for any future project in the buildings which may include renovation or demolition activities regulated by the PR State/Municipal Offices. To obtain demolition permits in Puerto Rico it is necessary to include a certification (OGP-PGC-009 or equivalent) stating that there is no asbestos containing material in the project.

D. Survey Areas – Extent of Survey Coverage:

The survey included a detailed structure inspection providing a general sense of the overall location, type, quantity, and condition of potential ACMs present. The survey was thorough in that interior or exterior accessible functional spaces were inspected, and bulk samples were

taken of suspect materials observed. The presence of asbestos in suspect materials was assumed or presumed in some cases without bulk samples being collected or analyzed (when applicable). This was necessary for locations where materials were inaccessible or areas that were unsafe to access (e.g., elevated heights, energized equipment, confined spaces, etc.). For those areas that were not safely accessible, suspect materials observed or presumed to be present were documented and assumed as ACM. The survey did not include intrusive and/or exploratory testing.

Areas Not Included in Survey and Service Constraints: All professional opinions presented in this report are based on information made available either by review of data provided by others or data gathered by Nortol personnel. Nortol affirms that data gathered and presented by Nortol in this report was collected in an appropriate manner in accordance with accepted methods and practices. Any energized utilities/services, including electricity, water and heat were assumed to be active. Materials associated with these items were determined to not be safely accessible and were not sampled. Suspect ACMs associated with these items should be assumed ACM until the systems can be de-energized and safely sampled. The survey did not include access or inspection of confined spaces or subsurface/underground areas including piping, conduits, building footings and soils (surficial or otherwise).

E. Findings

Nortol identified a total of **4** HA, of which **16** suspect ACM bulk samples were collected and submitted for laboratory analysis. Based upon laboratory analyses, Nortol identified three (3) HA that was confirmed to be ACM (>1% of asbestos by weight). The bulk samples collected from the remaining HAs as part of this survey were reported by the laboratory as “None Detected” or <1%. The client always has the alternative to request alternative analysis methods (i.e. TEM or Point counting) to get a more precise result. Furthermore, no additional suspect material was observed during the visual assessment that needed to be assumed as ACM. The table of asbestos summary findings is included as **Attachment 2.**

Attachment 3 includes Representative Pictures\Photograph Log, while the laboratory results, and field chain of custody are included as **Attachment 4**. Laboratory Certificates are included in Attachment **5**. Basic diagrams with the approximated sampling locations are included as Attachment **6.**

III. CONCLUSION

ACM survey was conducted for the project identified with the header ID. Nortol identified SACM and bulk samples were collected and submitted for laboratory analysis. Findings are described in Section II part E and a table of asbestos summary is also included as **Attachment 2.**

Removal of Asbestos Containing Materials has the widest applicability. It also is the only truly permanent solution since no building or equipment containing asbestos can be demolished or renovated without first removing the ACM. If a proposed demolition plan is in schedule, please refer to 29 CFR 1926.1101 Construction Industry Standards, National Emissions Standards for Hazardous Air Pollutants (NESHAP) (40 CFR 61), and the DRNA (former Environmental Quality Board) Rule 422 for procedures concerning to asbestos abatement prior to commencement of any renovation and/or demolition activity.

Any conditions or materials that could not be visually identified or were out-of-the SOW, were not inspected and may differ from those conditions or materials noted. It was not within the scope of the activity to remove surface materials to investigate portions of the structure or materials that may lay beneath the surface. Nortol's selection of sample locations and frequency of sampling was based on Nortol's observations and the assumption that similar materials in the same area are homogeneous in content.

The report is designed to aid the building owner, architect, construction manager, general contractors, and potential asbestos or lead abatement contractors in locating ACM. Under no circumstances is the report to be utilized solely as a bidding document or as a project specification document.

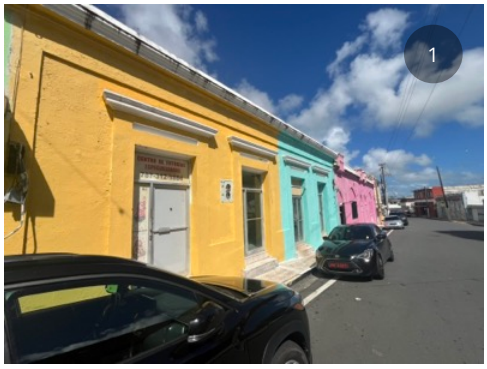
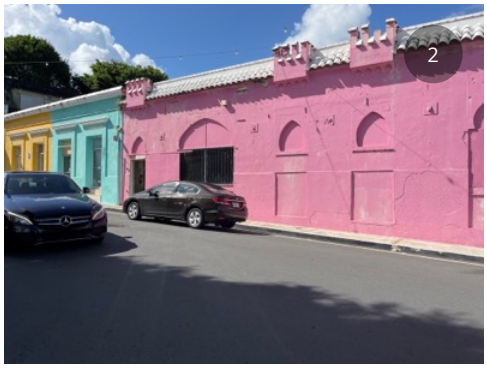
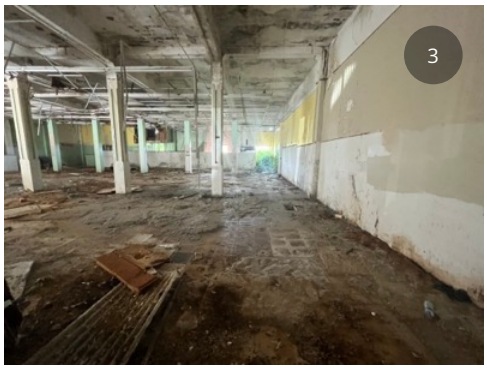
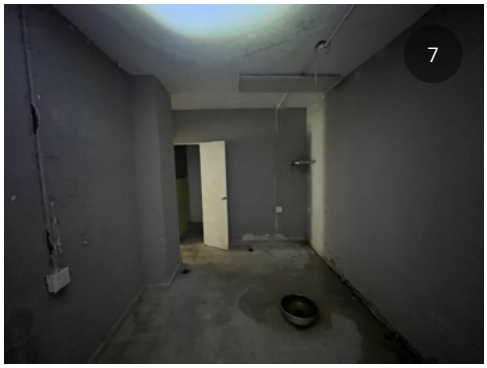
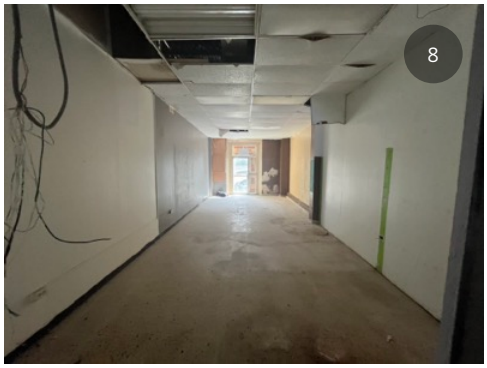
GENERAL VIEWS:

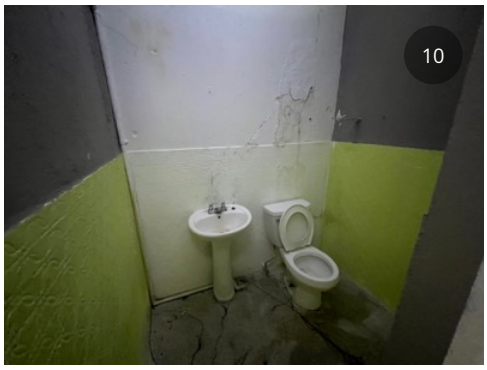






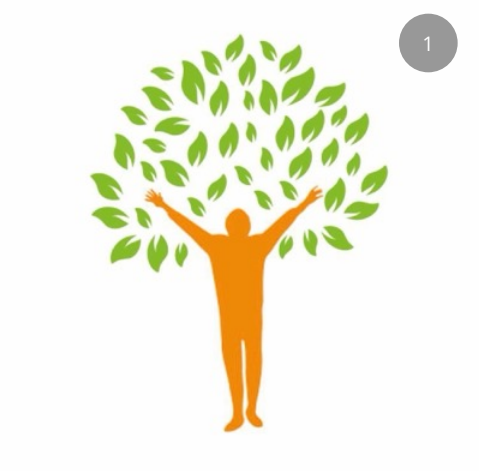






GENERAL VIEWS: ROOF

SACM roof membrane was found visible at the moment of the inspection.



IS THERE ANY AREA WITHOUT ACCESS?

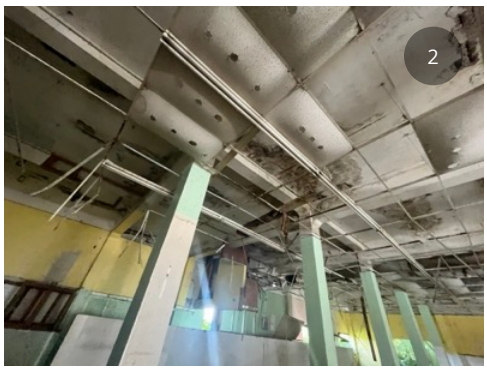
There was NO ACCESS to lower level.

IS THERE ANY VISIBLE INDICATION OF MOLD?

Yes, mold was found visible at the moment of the inspection.

ARE THERE SIGNS OF POOR HOUSEKEEPING ON SITE? (MOUNDS OF RUBBLE, GARBAGE, STORM DEBRIS, SOLID WASTE, PETROLEUM PRODUCTS, PAINT, PESTICIDES, CLEANING FLUIDS, VEHICLE BATTERIES, ABANDONED VEHICLES, PITS, POOLS, PONDS OF HAZARDOUS SUBSTANCES, ETC.)

Yes, mounds of rubble, garbage and hanging material from ceiling.



ARE ANY ADDITIONAL SITE HAZARDS OBSERVED?

Yes, found holes in the floor.

WINDOW/DOOR CAULKING:

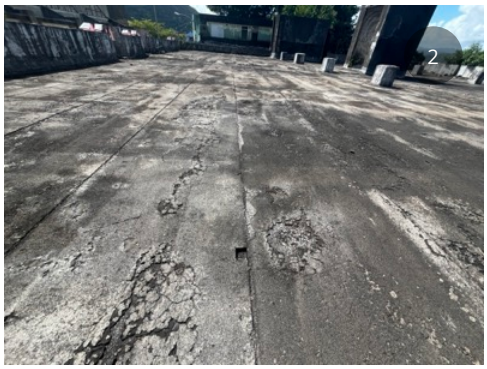
SACM caulking was not found visible at the moment of the inspection.

SACM VISIBLE? ROOF

4 SACM samples were taken from black roof membrane. (Qty. 7,000 SF Approx.)

Condition: Damaged

CSAM-HA1-SS-01, 02, 03 & 04 Asbestos was detected in the analyses



SACM VISIBLE? OPEN SPACE 1

3 SACM samples were taken from beige vinyl floor tiles. (Qty. 4,000 SF Approx.)

Condition: Damaged

CSAM-HA2-SS-05, 06 & 07 Asbestos was detected in the analyses

SACM VISIBLE? OPEN SPACE 1, 2 & 3

6 SACM samples were taken from white ceiling tiles. (Qty. 5,500 SF Approx.)

Condition: Damaged

CSAM-HA3-SS-08, 09, 10, 11, 12 & 13 Asbestos was not detected in the analyses

Orestes Mendez

Dates of Analysis:
Asbestos PLM: 02-03-2025

Service SOPs: Asbestos PLM (EPA 40CFR App E to Sub E of Part 763 & EPA METHOD 600/R-93-116, SOP EM-AS-S-1267)
NVLAP Lab Code 200738-0

All samples were received in acceptable condition unless noted in the Report Comments portion in the body of the report. The results relate only to the samples as received and tested. The results include an inherent uncertainty of measurement associated with estimating percentages by polarized light microscopy. Measurement uncertainty data for sample results with >1% asbestos concentration can be provided when requested.

Eurofins Built Environment Testing East, LLC ("the Company"), a member of the Eurofins Built Environment Testing group of companies, shall have no liability to the client or the client's customer with respect to decisions or recommendations made, actions taken or courses of conduct implemented by either the client or the client's customer as a result of or based upon the Test Results. In no event shall the Company be liable to the client with respect to the Test Results except for the Company's own willful misconduct or gross negligence nor shall the Company be liable for incidental or consequential damages or lost profits or revenues to the fullest extent such liability may be disclaimed by law, even if the Company has been advised of the possibility of such damages, lost profits or lost revenues. In no event shall the Company's liability with respect to the Test Results exceed the amount paid to the Company by the client therefor.

Composite Non-Asbestos Content:	3% Cellulose 3% Glass Fibers
Sample Composite Homogeneity:	Moderate

The test report shall not be reproduced except in full, without written approval of the laboratory. The report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the federal government. The Company reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified.

All components not quantified as asbestos content and non-asbestos content are considered to be non-fibrous matrix components. Matrix components may include, but are not limited to, gypsum, paint, silicate minerals, vinyl, binder, calcium carbonate, tar, and foam.

Inhomogeneous samples are separated into homogeneous subsamples and analyzed individually. ND means no fibers were detected. When detected, the minimum detection and reporting limit is less than 1% unless point counting is performed. Floor tile samples may contain large amounts of interference material and it is recommended that the sample be analyzed by gravimetric point count analysis to lower the detection limit and to aid in asbestos identification.
‡ A "Version" indicated by -"x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".

Sample Composite Homogeneity:	Good

The test report shall not be reproduced except in full, without written approval of the laboratory. The report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the federal government. The Company reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified.

All components not quantified as asbestos content and non-asbestos content are considered to be non-fibrous matrix components. Matrix components may include, but are not limited to, gypsum, paint, silicate minerals, vinyl, binder, calcium carbonate, tar, and foam.

Inhomogeneous samples are separated into homogeneous subsamples and analyzed individually. ND means no fibers were detected. When detected, the minimum detection and reporting limit is less than 1% unless point counting is performed. Floor tile samples may contain large amounts of interference material and it is recommended that the sample be analyzed by gravimetric point count analysis to lower the detection limit and to aid in asbestos identification.
‡ A "Version" indicated by -"x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".

All samples were received in acceptable condition unless noted in the Report Comments portion in the body of the report. The results relate only to the samples as received and tested. The results include an inherent uncertainty of measurement associated with estimating percentages by polarized light microscopy. Measurement uncertainty data for sample results with >1% asbestos concentration can be provided when requested.

I. INTRODUCTION

As part of the environmental due diligence, this survey is intended to assess the general presence, quantity, and location of suspected asbestos-containing materials (SACM) at *Tres (3) Centros Sociales en el Municipio de Yabucoa - Social Sport Center project* located at (*Lat: 18.050426, Lon: -65.879631) Yabucoa, P.R.*

The SACM survey was conducted on January 28, 2025, by Mr. Sixto Suárez (ACM inspector num. ASB-1024-0484-SI) from Nortol. Inspector's credential is included in **Attachment 1.** Nortol's survey areas and report are limited to the details provided in Section II part D.

Nortol identified SACM and bulk samples were collected and submitted for laboratory analysis. The bulk sample's results were reported by the laboratory as "None Detected" or <1%. Table of asbestos summary findings is included as **Attachment 2.**

There is concrete, metal, and wood structural components. The floors have vinyl or ceramic tiles, painted or bare concrete. Also, ceramic tiles are present on some walls.

II. ASBESTOS SURVEY REPORT

A. Survey Protocol:

This activity was conducted following the latest protocol for assessing materials suspected of containing asbestos as defined by the U.S. Environmental Protection Agency (EPA). It involved a visual walk-through inspection of the accessible areas of the building to develop an inventory of suspect ACM homogeneous materials. During the sampling activities, suspected ACM (if any) was touched and observed by the inspector to determine its friability and physical condition. A friable material is defined as a material that when dry, can be crumbled, or reduced to powder by hand pressure. The friability of a material causally relates to the potential of the asbestos fibers to be released. The inspector assessed the suspect ACM according to their physical condition and potential damage.

B. Sampling Procedure:

The technique used for sampling the suspected accessible materials was designed to minimize possible fiber release and in turn possible contamination of surrounding areas. Representative suspected material samples were collected in accordance with the EPA's AHERA/ASHARA guidelines and procedures presented in the *Guide for Controlling Asbestos Containing Materials in Building (EPA 560-6-85-024, June 1985)* and characterized following the *National Emission Standard for Hazardous Air Pollution (NESHAP)*, subpart M-Asbestos, 40 CFR Part 61-Standard for

Demolition and Renovation. Samples of the homogeneous accessible materials were collected in quantities enough to determine asbestos content, and then placed in airtight bags. The bagged samples were properly collected, labeled, and identified. A Chain of Custody form was completed for collected bulk samples which were analyzed by an independent laboratory using PLM method. The laboratory utilizes dispersion staining techniques according to US EPA method 600/M4-82-020 incorporating visual estimates of identified material percentages.

C. Regulatory Review:

According to NESHAP's standards (40 CFR 61.141), Asbestos Containing Building Materials are classified into three categories: Category I - Nonfriable asbestos-containing material (ACM), Category II – other Nonfriable ACM, and Regulated asbestos-containing material (RACM). ACMs are classified into three categories according to EPA-AHERA/ASHARA's standards (40 CFR Part 763): Surfacing material, Thermal System Insulation (TSI) and Miscellaneous material.

Once the inspector has identified the ACM in a building, he or she must perform a physical assessment of TSI and friable material. Under § 763.88 of the AHERA Rule, the physical assessment of ACBM involve classifying the material into one of the following seven Categories: Damaged or significantly damaged TSI ACM; Damaged friable surfacing ACM; Significantly damaged friable surfacing ACM; Damaged or significantly damaged friable miscellaneous ACM; ACBM with potential for damage; ACBM with potential for significant damage; and Any remaining friable ACBM or friable suspected ACBM.

The PRDNER- former Environmental Quality Board (Regulation for the Control of Atmospheric Pollution-Rule 422) enacted in 1995, required all commercial and public building, including industries to identify asbestos containing building materials in their structures and take appropriate actions to control the release of asbestos fiber. Asbestos inspection is part of the permitting application process for any future project in the buildings which may include renovation or demolition activities regulated by the PR State/Municipal Offices. To obtain demolition permits in Puerto Rico is necessary to include a certification (OGP-PGC-009 or equivalent) stating that there is no asbestos containing material in the project.

D. Survey Areas – Extent of Survey Coverage:

The survey included a detailed structure inspection providing a general sense of the overall location, type, quantity, and condition of potential ACMs present. The survey was thorough in the interior or exterior accessible functional spaces, and bulk samples were taken of suspect materials observed. The presence of asbestos in suspect materials was assumed or presumed in some cases without bulk samples being collected or analyzed (when applicable). This was necessary for locations where materials were inaccessible or areas that were unsafe to access

(e.g., elevated heights, energized equipment, confined spaces, etc.). For those areas that were not safely accessible, suspect materials observed or presumed to be present were documented and assumed as ACMs. The survey did not include intrusive and/or exploratory testing.

Areas Not Included in Survey and Service Constraints: All professional opinions presented in this report are based on information made available either by review of data provided by others or data gathered by Nortol personnel. Nortol affirms that data gathered and presented by Nortol in this report was collected in an appropriate manner in accordance with accepted methods and practices. Any energized utilities/services, including electricity, water and heat were assumed to be active. Materials associated with these items were determined to not be safely accessible and were not sampled. Suspect ACMs associated with these items should be assumed ACM until the systems can be de-energized and safely sampled. The survey did not include access or inspection of confined spaces or subsurface/underground areas including piping, conduits, building footings and soils (surficial or otherwise).

E. Findings

Nortol identified a total of **2** HA, of which **10** suspect ACM bulk samples were collected and submitted for laboratory analysis. The bulk samples collected as part of this survey were reported by the laboratory as "None Detected" or <1%. The client has always the alternative to request alternative analysis methods (i.e., TEM or Point counting) to get a more precise result. Furthermore, no additional suspect material was observed during the visual assessment that needed to be assumed as ACM. Table of asbestos summary findings is included as **Attachment 2.**

Attachment 3 includes Representative Pictures\Photograph Log, while the laboratory results, and field chain of custody are included as **Attachment 4**. Laboratory Certificates are included in **Attachment 5**. A basic diagram with the approximated sampling locations is included as **Attachment 6.** Certification of Non-Presence of Asbestos (PGC-009) is included as **Attachment 7.**

III. CONCLUSION

ACM survey was conducted for the project identified with the header ID. Nortol identified SACMs and bulk samples were collected and submitted for laboratory analysis. Findings are described in Section II part E. Table of asbestos summary is also included as **Attachment 2.**

Any conditions or materials that could not be visually identified or were out-of-the SOW, were not inspected and may differ from those conditions or materials noted. It was not within the scope of the activity to remove surface materials to investigate portions of the structure or materials that may lay beneath the surface. Nortol's selection of sample locations and frequency of sampling was based on Nortol's observations and the assumption that similar materials in the same area are homogeneous in content.

The report is designed to aid the building owner, architect, construction manager, general contractors, and potential asbestos or lead abatement contractors in locating ACM. Under no circumstances is the report to be utilized solely as a bidding document or as a project specification document.

ACM SURVEY PHOTO LOG

Built circa: Not available at the moment of the inspection

Tuesday, January 28, 2025

Prepared For ABACUS Architecture PSC

Lat: 18.050426, Lon: -65.879631

FRONT VIEW:

(18.0506369, -65.8796239)

LOCATION:

(18.0506369, -65.8796239)

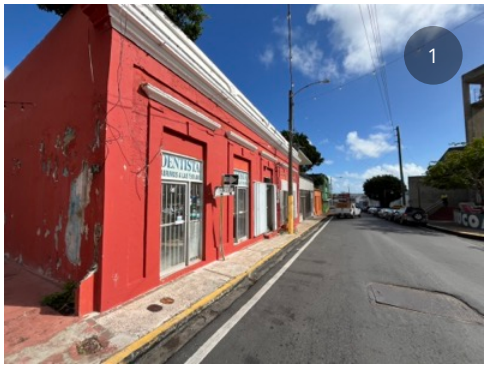
SCOPE OF WORK:

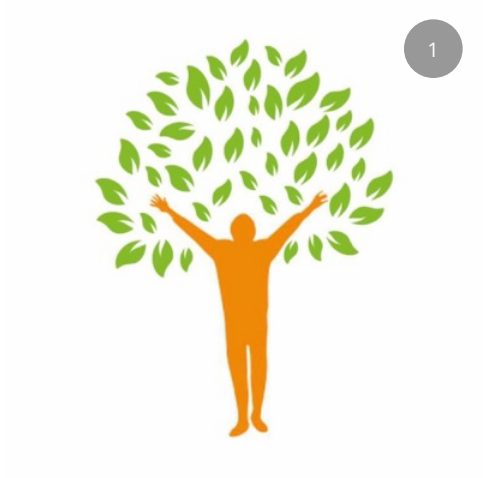
Full Inspection A/L

Survey excludes roof area.

Job Id: LBP/ASB-2025-040

EXTERIOR GENERAL VIEWS:

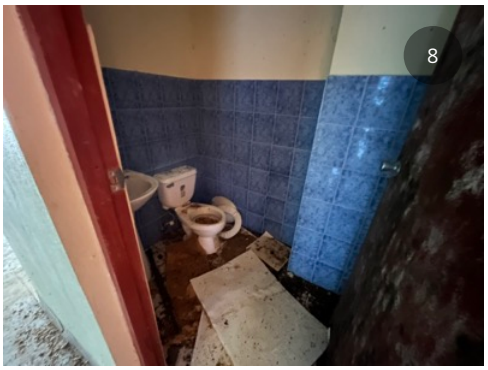


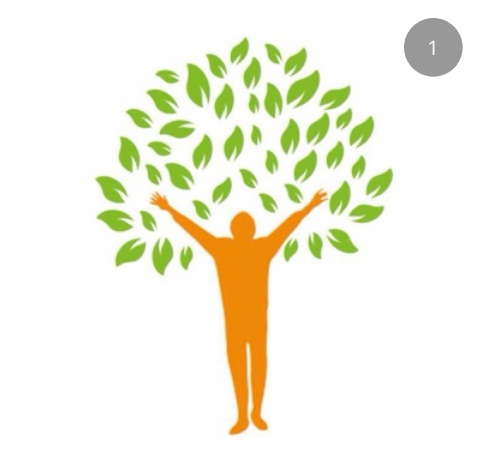


GENERAL VIEWS: ROOF

There was NO ACCESS to the roof.
Roof area was exclude of the survey.

INTERIOR GENERAL VIEWS:





IS THERE ANY AREA WITHOUT ACCESS?

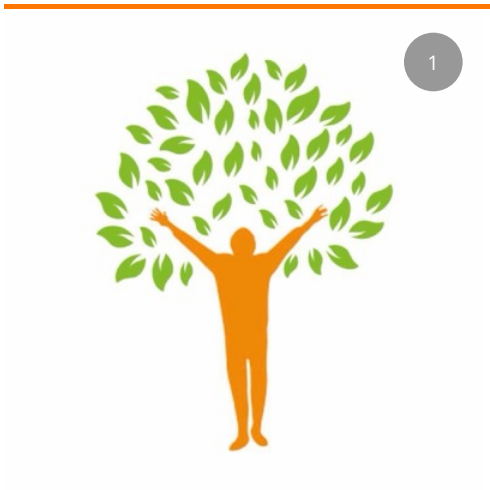
No.

IS THERE ANY VISIBLE INDICATION OF MOLD?

Yes, mold was found visible at the moment of the inspection.

ARE THERE SIGNS OF POOR HOUSEKEEPING ON SITE? (MOUNDS OF RUBBLE, GARBAGE, STORM DEBRIS, SOLID WASTE, PETROLEUM PRODUCTS, PAINT, PESTICIDES, CLEANING FLUIDS, VEHICLE BATTERIES, ABANDONED VEHICLES, PITS, POOLS, PONDS OF HAZARDOUS SUBSTANCES, ETC.)

Yes, mounds of rubble, bird excrement and material waste.



ARE ANY ADDITIONAL SITE HAZARDS OBSERVED?

Not found at the moment of the inspection.

WINDOW/DOOR CAULKING:

SACM caulking was not found visible at the moment of the inspection.

SACM VISIBLE? OPEN SPACE 1, 2 & 3, ROOM 1 & BATHROOM 4

5 SACM samples were taken from beige vinyl floor tiles. (Qty. 2,000 SF Approx.)

Condition: Damaged

CSSSC-HA1-SS-01, 02, 03, 04 & 05

SACM VISIBLE? ALL BUILDING

5 SACM samples were taken from white ceiling tiles. (Qty. 2,400 SF Approx.)

Condition: Damaged

CSSSC-HA2-SS-06, 07, 08, 09 & 10

Approved Signatory
Orestes Mendez

Dates of Analysis:
Asbestos PLM: 01-31-2025

Service SOPs: Asbestos PLM (EPA 40CFR App E to Sub E of Part 763 & EPA METHOD 600/R-93-116, SOP EM-AS-S-1267)
NVLAP Lab Code 200738-0

All samples were received in acceptable condition unless noted in the Report Comments portion in the body of the report. The results relate only to the samples as received and tested. The results include an inherent uncertainty of measurement associated with estimating percentages by polarized light microscopy. Measurement uncertainty data for sample results with >1% asbestos concentration can be provided when requested.

Eurofins Built Environment Testing East, LLC ("the Company"), a member of the Eurofins Built Environment Testing group of companies, shall have no liability to the client or the client's customer with respect to decisions or recommendations made, actions taken or courses of conduct implemented by either the client or the client's customer as a result of or based upon the Test Results. In no event shall the Company be liable to the client with respect to the Test Results except for the Company's own willful misconduct or gross negligence nor shall the Company be liable for incidental or consequential damages or lost profits or revenues to the fullest extent such liability may be disclaimed by law, even if the Company has been advised of the possibility of such damages, lost profits or lost revenues. In no event shall the Company's liability with respect to the Test Results exceed the amount paid to the Company by the client therefor.

Yellow Mastic	ND
Gray Leveling Compound	ND
Sample Composite Homogeneity:	Moderate

The test report shall not be reproduced except in full, without written approval of the laboratory. The report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the federal government. The Company reserves the right to dispose of all samples after a period of thirty (30) days, according to all state and federal guidelines, unless otherwise specified.

All components not quantified as asbestos content and non-asbestos content are considered to be non-fibrous matrix components. Matrix components may include, but are not limited to, gypsum, paint, silicate minerals, vinyl, binder, calcium carbonate, tar, and foam.

Inhomogeneous samples are separated into homogeneous subsamples and analyzed individually. ND means no fibers were detected. When detected, the minimum detection and reporting limit is less than 1% unless point counting is performed. Floor tile samples may contain large amounts of interference material and it is recommended that the sample be analyzed by gravimetric point count analysis to lower the detection limit and to aid in asbestos identification.
‡ A "Version" indicated by -"x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".

ATTACHMENT 10J
RADON INFEASIBILITY AND IMPRACTICABILITY OF RADON TESTING

Memorandum to File

Date: [08/06/2025]

From: Luis R Colon Morales, P.E., M.E
Senior Engineer
CDBG-DR Program
City Revitalization Program
Puerto Rico Department of Housing

Application Number: PR-CRP-000378
Project: Instalación del Centro Social Cultural, Centro Social de Arte y Música y Centro Social Deportivo

Re: Justification for the Infeasibility and Impracticability of Radon Testing

After reviewing Application Number PR-CRP-000378 under the City Revitalization Program, administered by the Puerto Rico Department of Housing (**PRDOH**), to complete the property's contamination analysis in accordance with 24 C.F.R. § 50.3(i) and 24 C.F.R. § 58.5(i), we have determined that testing the property's radon levels is infeasible and impracticable.

Per the U.S. Department of Housing and Urban Development's (**HUD**) CPD Notice 23-103, the recommended best practices and alternative options for radon testing are infeasible and impracticable in this case due to the following reason[s]:

- As required by the CPD Notice 23-103, the scientific data reviewed in lieu of testing must consist of a minimum of ten documented test results over the previous ten years. If there are less than ten documented results over this

period, it is understood that there is a lack of scientific data. The latest report for radon testing in Puerto Rico was prepared in 1995 by the U.S. Department of the Interior in Cooperation with the U.S. Environmental Protection Agency. No other completed studies and reports on radon testing are available in Puerto Rico.

- There is no available science-based or state-generated information for Puerto Rico for the last ten years that can be used to determine whether the project site is in a high-risk area. The Department of Health and Human Services, Centers for Disease Control and Prevention (**CDC**), National Environmental Public Health Tracking, and Radon Testing map do not include Puerto Rico data.

- There are only two (2) licensed professionals in Puerto Rico who can conduct radon testing using the American National Standards Institute/American Association of Radon Scientists and Technologists (**ANSI/AARST**) testing standards, which makes it difficult, time-consuming, and highly expensive to coordinate and secure a site visit for the contamination evaluation.

- Do-it-yourself (**DIY**) radon test kits are known to be unreliable in assuring and controlling the quality of the test results; they are not readily available in Puerto Rico, and the cost and time required for purchasing and sending them for analysis are unreasonable when weighed against the results' reliability and the need for prompt results.

- Local authorities in Puerto Rico do not have the specialized radon monitoring equipment or trained staff needed to conduct the radon testing analysis and ensure proper quality control and quality assurance practices are adhered to. We also do not have a radiation laboratory certified for radon testing.

As part of the evaluation for this determination, PRDOH sent information requests to six (6) local agencies at the state and federal levels. We received responses from the following agencies:

- United States Geological Survey;
- Centers for Disease Control and Prevention;
- Puerto Rico Department of Health; and
- United States Environmental Protection Agency.

The agencies mentioned above confirmed the lack of scientific data on Radon testing for Puerto Rico and the technical difficulties that we face to comply with HUD's Radon testing requirement. For the above-mentioned reasons, Radon testing is infeasible and impracticable for this property, and no further consideration of Radon is needed for the environmental review.

RE: Request for Information regarding available data on radon testing and levels within Puerto Rico

The Puerto Rico Department of Housing (PRDOH) kindly requests your assistance in gathering data, information, or reports related to radon testing in Puerto Rico, as this information is crucial for our compliance with the U.S. Department of Housing and Urban Development (HUD) Community Planning and Development (CPD) Notice CDP-23-103.

This Notice emphasizes the importance of radon testing and mitigation in ensuring safe living environments, particularly in HUD-assisted properties. PRDOH, as the grantee of the Community Development Block Grant for Disaster Recovery and Mitigation (CDBG-DR/MIT), is responsible for ensuring compliance with environmental requirements under CDBG-DR/MIT programs. To fulfill our obligations under this Notice, we must compile comprehensive and up-to-date information on radon levels, testing practices, and any mitigation efforts within the islands of Puerto Rico.

Specifically, we are seeking for possible availability of the following information:

Radon testing data – Results from radon testing conducted within your agency's purview, including details on location, testing methods, and recorded radon levels.

Reports and assessments – Any reports, studies, or assessments your agency has produced or commissioned that address radon testing or mitigation.

Policies and guidelines – Information or any policy, guideline, or protocol your agency follows concerning radon testing, exposure limits, or mitigation.

Historical data – if available, historical data or trends in radon levels within the regions you monitor that may impact HUD-assisted housing.

This information is vital to ensure that our radon management strategies are practical and compliant with federal requirements. If some of this information may be sensitive or confidential, we are prepared to discuss any necessary agreements or protocols for sharing this data securely.

Please let us know if you require additional details or have any questions regarding this request. We would greatly appreciate your response by September 15, 2024, so we can incorporate this data into our ongoing compliance efforts.

Thank you in advance for your cooperation and support. We look forward to working together on this critical initiative.

Sincerely,

William O. Rodríguez Rodríguez, Esq.
Secretary

Subject: RE: REHi: Puerto Rico Request for Information- Randon testing and levels

Good morning, Sandra and others,

In response to the request from Mr. William Rodriguez of the Department of Housing, Government of Puerto Rico, I have reviewed all the available data within the CDC National Environmental Public Health Tracking Network system for data related to radon in Puerto Rico. In addition to the tracking data available on the internet, I also reached out to Mr. Aaron Vinson of the NCEH Tracking Branch.

I was not able to find any data in the CDC systems and this was confirmed by Mr. Vinson. We also reached out the US Environmental Protection Agency who indicated they had no radon data in their systems. Please relay this information to Mr. Rodriguez in your response to his requests

If you have any additional questions, please contact me.

Thank you and best regards,

Subject: RE: Request for Information- Radon testing and levels

Dear Ms. Medina Smaine,

In the early 1990s the U.S. Geological Survey (USGS) conducted geologic assessments of radon potential for all 50 states and the territories of Guam and Puerto Rico, in collaboration with the U.S. EPA. I conducted the geologic radon potential assessment for Puerto Rico. The PDF file of the report is too large to attach to this message but it can be obtained at https://pubs.usgs.gov/of/1993/0292k/report.pdf. The USGS did not conduct indoor radon testing and we did not conduct field studies associated with this assessment; it was based on existing data. Mr. David Saldana of the Puerto Rico Department of Health kindly provided us with data for 610 homes that were tested for indoor radon by his agency between 1993 and 1995, which are summarized in the report. I am not aware of any other radon-related geologic studies conducted in the Commonwealth of Puerto Rico by the U.S. Geological Survey.

Subject: RE: [EXTERNAL]Request for Information- Randon testing and levels

Good afternoon. Ms. Medina

I regret to inform that we do not have any recent information on radon testing, since we do not have a certified radiation laboratory certified for radon testing. There are companies that sell test kits available online that can be done and mailed to a testing laboratory. There are also lists of radon contractors and these companies that process radon testing cartridges with instructions, on the Environmental Protection Agency Indoor air Quality web page. The last radon study in Puerto Rico done by the PR Department of Health was done on the year 1993.

RE: EPA Response to August 20, 2024 request for information of data on radon testing and levels in Puerto Rico

Dear Honorable Secretary Rodríguez Rodríguez:

This communication is in response to your letter of August 20, 2024 addressed to the Puerto Rico Department of Natural and Environmental Resources (DNER) and referred to the U.S. Environmental Protection Agency (EPA) regarding available data on radon testing and levels within Puerto Rico.

EPA's National Radon Action Plan 2021–2025 sets a goal for the nation to find, fix and prevent high indoor radon levels in 8 million buildings by 2025 and prevent 3,500 lung cancer deaths per year. Under this Plan, leaders from across multiple sectors are working together to plan, guide, and sustain nationwide action to prevent exposure to radon.

Due to the lack of data in Puerto Rico, EPA undertook an investigation in collaboration with the University of Puerto Rico-Mayaguez (UPRM) Campus, Departments of Civil Engineering and Surveying and Mechanical Engineering, to find out if radon presented a problem in Puerto Rico. Up until 2021, the only data we had for Puerto Rico was a 1993-1995 mail-in radon screening study referred to by the U.S. Geological Survey report (USGS, 1995) in which the USGS concluded that several areas of Puerto Rico have the geologic potential to generate indoor radon levels exceeding the EPA Action Level of 4 pCi/L (picocuries per liter), perhaps locally reaching very high levels above 50 pCi/L, if a house construction and ventilation allow for soil-gas radon to enter and concentrate within the structure.[1] According to the USGS report, most of these areas are located in the northwest part of the island. Please note that the actual 1993-1995 study documentation is not available to the EPA.

Typical radon testing technology used in mainland United States (charcoal canisters or electric-powered devices) are impractical in Puerto Rico because of high humidity and power outages. The recovery and rebuilding of communities following the aftermath of 2017 Hurricanes Irma and Maria presented an opportunity to develop radon prevention and mitigation strategies in 2019. Initially, EPA sampled indoor radon air in over 170 single-family residences in the municipalities of San Sebastian, Lares, Ciales, Arecibo, Morovis, Camuy, and Hatillo and later expanded the project to other municipalities such as Rincon, Aguada, Aguadilla, Isabela, Quebradillas, Barceloneta and Vega Baja. The quality assurance protocols were anchored in American National Standards Institute/American Association of Radon Scientists and Technologists (ANSI/AARST) standards of practice (ANSI/AARS, 2019). The sampling was designed in two stages: scoping and confirmatory sampling. The scoping sampling was conducted using Corentium Home (CH) electronic monitors and E-Perm systems. Locations measuring above the EPA Action Level of 4 pCi/L with CH were measured at the second stage of the sampling using RAD7 and Corentium Pro Continuous Radon Monitors (CRMs). Nationally certified radon sampling professionals led by one such professional from the UPRM conducted confirmatory sampling in the second stage. Also, during the study, the nationally certified radon mitigation professionals inspected several homes with elevated indoor radon levels.

Mapping radon in Puerto Rico proved to be a complicated endeavor given the COVID-19 pandemic in 2020. EPA and UPRM continue to work on the project, however, results have not been finalized, and no scientific report has been published yet. Unfortunately, EPA cannot share preliminary data at this time because it contains privileged information. Nevertheless, preliminary data from the study does show homes with levels over 4 pCi/L (EPA Action Level) that might need mitigation to protect the health of their inhabitants.

Although many states have developed laws and regulations governing radon disclosure, certification, and mitigation, Puerto Rico lacks legislation or mandatory radon testing provisions for new construction, remodeling, selling or buying homes. Given this loophole and aiming to answer your request, the EPA can provide information on Best Management Practices for sampling indoor radon in Puerto Rico.

Endangered Species Act Certification

The U.S. Fish and Wildlife Service, Caribbean Ecological Services Field Office developed a Blanket Clearance Letter in compliance with Endangered Species Act of 1973, as amended, and the Fish and Wildlife Coordination Act for federally funded projects.

The Service determined that projects in compliance with the following criteria are not likely to adversely affect federally-listed species.

The Puerto Rico Department of Housing (PRDOH) certifies that the following project **Instalación del Centro Social Cultural, Centro Social de Arte y Música y Centro Social Deportivo (PR-CRP-000378),** under the CDBG-DR City Revitalization Program, consisting of the rehabilitation of four vacant properties in neglected conditions and converting them into the following social centers: Cultural Social Center, Social Center of Art and Music, and Social Sports Center; located at 47, 48, 49, 51, and 53 Luis Muñoz Rivera Street, Pueblo Ward, Yabucoa, Puerto Rico, complies with:

Check	Project Criteria
☐	1. Activities related to the resurfacing existing streets or roads; maintenance of existing upland gabion or reinforced concrete retention walls; construction, reconstruction or repair of gutters and sidewalks along existing roads.
☒	2. Repair, replace, improve, reconstruct and/or rehabilitate facilities in already established public transportation systems (signs, sidewalks and ramps, bus stops and existing routes).
☐	3. Repair, replace, improve, reconstruct, rehabilitate and/or expanding existing public transportation facilities located in urban or developed areas.
☐	4. Construction of new facilities for public transportation systems (e.g. school bus stops, city buses, trolleybuses, public car stops, public car terminal) in urban or developed areas.
☐	5. Repair, replace, improve, reconstruct, or rehabilitate existing bridges or rip-rap. We recommend following FWS rip-rap guidance for design:

	https://www.fws.gov/media/guidance-repair-replacement-and-clean-structures-streams-and-waterways-puerto-rico-and-us
☒	6. Reconstruction, or emergency repairs, of existing structures, including but not limited to buildings, facilities and homes.
☐	7. Demolition of dilapidated single-family homes or buildings.
☐	8. Rebuilding of demolished single-family homes or buildings.
☒	9. Retrofitting existing buildings.
☐	10. Construction of residential and/or commercial facilities.
☐	11. Construction, repair, replace, improve, reconstruct, and/or rehabilitate recreational facilities.
☐	12. Addition of concrete pads to the existing footprint of a residential and/or commercial structure, provided that the resulting addition is less than 20% of the size of the existing structure.
☐	13. Improvement or renovations to existing structures (exterior and interior) renovations resulting in an exterior increase greater than 20%.
☒	14. Improvements or renovations to existing structures (exterior and interior renovations) resulting in an exterior increase of less than 20%.
☒	15. Acquisition of residential and/or commercial properties in urban or developed areas for the relocation of families and/or activities.
☐	16. Construction, reconstruction, rehabilitation and/or expansion of cemeteries.
☐	17. Installation/drilling of new water well and associated utility infrastructure, either above ground or underground.
☐	18. Establishment of power facilities, including but not limited to associated aboveground and/or underground infrastructure.
☐	19. Construction of electrical system infrastructure and associated components, including but not limited to associated aboveground and/or underground infrastructure.
☐	20. Construction of land based small electric generating facilities, including those fueled with wind, sun, or biomass, capable of producing no more than 10 MW.
☐	21. Activities within existing Right of Ways (ROWs) related to water and sanitary infrastructure; communication infrastructure; roads, bridges and highways without the removal of native vegetation and/or major earth movement.
☐	22. Construction of rooftop or urban telecommunications systems and associated components, including but not limited to associated aboveground and/or

	underground infrastructure.
☐	23. Establishment of temporary debris storage (TDS) facilities.
☐	24. Establishment and/or closure of solid waste management facilities. **But not new landfills.**
☐	25. Installation of water storage systems (cisterns) and associated infrastructure, either above ground or underground, including but not limited to installations on existing or new concrete pads, or existing or new roofs.
☐	26. Installation of solar panels, battery storage systems and/or associated utility infrastructure, either above ground or underground, on existing or new concrete pads, existing or new roofs, ground or pole mounted.
☐	27. Installation of generators on existing or new concrete slabs, and associated utility infrastructure, either above ground or underground.
☐	28. Repair of existing agricultural structures including but not limited to greenhouses, warehouses, canopies, fences, corrals, and shade structures with less than 20% expansion of footprint.
☐	29. New construction of agricultural structures in established farms including but not limited to greenhouses, warehouses, canopies, fences, corrals, and shade structures with or without underground and/or aboveground infrastructure utility connections.
☐	30. Construction of fences, cattle corrals, concrete slabs.
☐	31. Installation of storage containers on new concrete slab.
☐	32. New construction or work which expands the footprint of an existing structure and occurs entirely on disturbed, regularly maintained, upland property, including the staging of equipment.

1. **Explanatory Memorandum**

The Project consists of the rehabilitation of four vacant properties in neglected conditions and converting them into the following social centers: Cultural Social Center; Social Center of Art; and Music, and Social Sports Center. The properties are located along the Luis Muñoz Rivera Street (PR-991) within the Urban Center in the Municipality of Yabucoa. The Project will be located directly in the area in front of the Public Plaza.

The Cultural Social Center will be developed in an abandoned structure located on a lot covering an area of approximately 317.29 square meters (m^2), referred to as Plot A. The Cultural Social Center will be developed to convene community meetings with the purpose of conserving cultural heritage. The Cultural Social Center will serve as a space for cultural presentations, as well as community group meetings and intercommunity agreements. Likewise, the Social Cultural Center will open its doors to the José Facundo Cintrón, Ramón Quiñones Medina, Jaime C. Rodríguez, and Teodoro Aguilar Mora Schools to complement their language, art, and music courses through book presentations, artistic works, and oratories, among other activities. The Municipality of Yabucoa owns Plot A, which will include in the distribution of its spaces, a reception area, a conference room, a presentation area, two-bathroom facilities adapted for all types of functional diversity, a general storage area, and maintenance equipment.

The Social Center of Art and Music will be developed in two structures in disuse located on two contiguous lots covering in total an area of approximately 791.39 m^2, referred to as Plot B and C, respectively. The Municipality of Yabucoa owns the land but not the structures. Therefore, it requires property acquisition efforts. The Social Center of Art and Music will be developed with the purpose of involving communities in the creation and presentation of artistic works. The existing structures will include in the distribution of their spaces: a reception area, a musical rehearsal area, an area for artistic and dance rehearsals, an area for general artistic presentations, a meeting area, an office, two-bathroom facilities adapted for all types of functional diversity, a general storage area and a storage area for maintenance equipment. The Social Center of Art and Music will serve as a community center, rehearsal center, and artistic presentations for the Municipal Band of Yabucoa and the Yabucoa Marching Band.

The Social Sports Center will be developed in a disused structure that is located on a lot covering an area of approximately 634.55 m², referred to as Plot D. The Social Sports Center will be developed as a meeting space for all Yabucoa sports organizations and educational institutions in learning sports. This parcel will be acquired through an involuntary acquisition, according to the requirements of the Uniform Real Property Relocation and Acquisition Assistance Act (URA). The Social Sports Center will include in the distribution of its spaces: a reception area, a conference room, an area for passive sports activities, a Hall of Fame, two-bathroom facilities adapted for all types of functional diversity, a general storage area, and a storage area for maintenance equipment.

The impact that this project will cause through the proposed infrastructure improvements and development of social exchange centers open to the public will provide an attractive environment for our citizens and visitors, as well as meeting spaces for future emergency events. The new facilities will be operated and maintained through the municipal administration in collaborative agreements with community organizations related and related to the purposes of these Social Centers.

The proposed project is located at 47, 48, 49, 51, and 53 Luis Muñoz Rivera, within the Pueblo Ward of the Municipality of Yabucoa in Puerto Rico.

The proposed project is located within an urban and within the boundaries of a the Yabucoa town ("casco urbano"); includes the presence of existing buildings; is not located within (or adjacent to) drainages, rivers, streams, wetlands, aquatic systems, or coastal areas; and the lighting associated to the facilities is not visible directly or indirectly from the shoreline or beach area. Therefore, the proposed project meets the Blanket Clearance Letter (BCL) to expedite the consultation process criteria.

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

THE FOLLOWING SPECIES LIST IS NOT A SECTION 7 CONSULTATION. PLEASE CONTACT OUR OFFICE TO COMPLETE THE CONSULTATION PROCESS

The purpose of the Endangered Species Act (Act) is to provide a means whereby threatened, and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 et seq.), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect those species and/or their designated critical habitat.

Federal agencies are required to "request of the Secretary of Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action". The enclosed species list provides information to assist with the U.S. Fish and Wildlife Service (Service) consultation process under section 7 of the Act. However, **the enclosed species list does not complete the required consultation process.** The species list identifies threatened, endangered, proposed and candidate species, as well as proposed and designated critical habitats, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. A discussion between the Federal agency and the Service should include what types of listed species may occur in the proposed action area and what effect the proposed action may have on those species. This process initiates informal consultation.

Once a species list is obtained for the proposed project, an effect determination for endangered and threatened species should be made. The applicant could make an effect determination by using available keys on IPaC for specific species. For species with no determination keys, the applicant should request concurrence from the Service by sending a project package

to caribbean_es@fws.gov. To obtain guidance for completing this process and the minimum requirements for project packages, please visit:

https://www.fws.gov/sites/default/files/documents/consultation-under-section-7-of-the-endangered-species-act-with-the-caribbean-ecological%20Services-field-office-template-letter.pdf

When a federal agency, after discussions with the Service, determines that the proposed action is not likely to adversely affect any listed species, or adversely modify any designated critical habitat, and the Service concurs, the informal consultation is complete, and the proposed project moves ahead. If the proposed action is suspected to affect a listed species or modify designated critical habitat, the Federal agency may then prepare a Biological Assessment (B.A.) to assist in its determination of the project's effects on species and their habitat. However, a B.A. is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2) (c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a B.A. where the agency provides the Service with an evaluation on the likely effects of the action to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a B.A. are described at 50 CFR 402.12.

If a federal agency determines, based on its B.A. or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to further consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species, and proposed critical habitat be addressed within the consultation process. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species.

This list is provided pursuant to Section 7 of the Endangered Species Act and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action". Please use this list to determine whether your project requires consultation and to make your effects determination. For more guidance, use the Guideline for Consultation under Section 7 of the Endangered Species Act with the Caribbean Ecological Services Field Office by clicking here.

PROJECT SUMMARY

Project Code: 2025-0103841

Project Name: Instalación del Centro Social Cultural, Centro Social de Arte y Música y Centro Social Deportiv

Project Type: Government / Municipal (Non-Military) Construction

Project Description: The Project consists on the rehabilitation of four vacant properties in neglected conditions and convert them into the following social centers: Cultural Social Center; Social Center of Art; and Music, and Social Sports Center. The properties are located along the Luis Muñoz Rivera Street (PR-991) within the Urban Center in the Municipality of Yabucoa. The Project will be located directly in the area in front of the Public Plaza.

Project Location:

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@18.0508984,-65.87911131005936,14z

Counties: Yabucoa County, Puerto Rico

ENDANGERED SPECIES ACT SPECIES

There is a total of 1 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

---

1. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

REPTILES

NAME	STATUS
Puerto Rican Boa *Chilabothrus inornatus*	Endangered

No critical habitat has been designated for this species.

General project design guidelines:
https://ipac.ecosphere.fws.gov/project/URJQ22SYBVE5LOTSLJQ7V4DQ7M/documents/generated/7159.pdf

CRITICAL HABITATS

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

YOU ARE STILL REQUIRED TO DETERMINE IF YOUR PROJECT(S) MAY HAVE EFFECTS ON ALL ABOVE LISTED SPECIES.

USFWS NATIONAL WILDLIFE REFUGE LANDS AND FISH HATCHERIES

Any activity proposed on lands managed by the National Wildlife Refuge system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS OR FISH HATCHERIES WITHIN YOUR PROJECT AREA.

BALD & GOLDEN EAGLES

Bald and Golden Eagles are protected under the Bald and Golden Eagle Protection Act [2] and the Migratory Bird Treaty Act (MBTA) [1]. Any person or organization who plans or conducts activities that may result in impacts to Bald or Golden Eagles, or their habitats, should follow appropriate regulations and consider implementing appropriate avoidance and minimization measures, as described in the various links on this page.

---

1. The Bald and Golden Eagle Protection Act of 1940.
2. The Migratory Birds Treaty Act of 1918.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

BALD & GOLDEN EAGLES INFORMATION WAS NOT AVAILABLE WHEN THIS SPECIES LIST WAS GENERATED. PLEASE CONTACT THE FIELD OFFICE FOR FURTHER INFORMATION.

MIGRATORY BIRDS

The Migratory Bird Treaty Act (MBTA) [1] prohibits the take (including killing, capturing, selling, trading, and transport) of protected migratory bird species without prior authorization by the Department of Interior U.S. Fish and Wildlife Service (Service). The incidental take of migratory birds is the injury or death of birds that results from, but is not the purpose, of an activity. The Service interprets the MBTA to prohibit incidental take.

---

1. The Migratory Birds Treaty Act of 1918.
2. The Bald and Golden Eagle Protection Act of 1940.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

MIGRATORY BIRD INFORMATION WAS NOT AVAILABLE WHEN THIS SPECIES LIST WAS GENERATED. PLEASE CONTACT THE FIELD OFFICE FOR FURTHER INFORMATION.

WETLANDS

Impacts to NWI wetlands and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local U.S. Army Corps of Engineers District.

Please note that the NWI data being shown may be out of date. We are currently working to update our NWI data set. We recommend you verify these results with a site visit to determine the actual extent of wetlands on site.

THERE ARE NO WETLANDS WITHIN YOUR PROJECT AREA.

Mr. Efrain Maldonado
Field Office Director
U.S. Department of Housing and Urban Development
235 Federico Costa Street, Suite 200
San Juan, Puerto Rico 00918

Re: Blanket Clearance Letter for Federally sponsored projects, Housing and Urban Development

Dear Mr. Maldonado:

On January 14, 2013, the U.S. Fish and Wildlife Service (USFWS) in coordination with the U.S. Department of Housing and Urban Development (HUD), signed the Blanket Clearance Letter (BCL) to expedite the consultation process, for federally sponsored projects. On March 20, 2025, the USFWS and the Puerto Rico Department of Housing (PRDOH) acting as the responsible entity designated by HUD decided to review and update the BCL to ensure that new available information regarding the consultation process is included. This letter replaces the January 14, 2013, Blanket Clearance Letter for HUD sponsored projects.

The U.S. Fish and Wildlife Service (USFWS) is one of two lead Federal Agencies responsible for the protection and conservation of Federal Trust Resources, including threatened or endangered species listed under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) (ESA). In the U.S. Caribbean, the USFWS has jurisdiction over terrestrial plants and animals, the Antillean manatee and sea turtles when nesting. The National Marine Fisheries Service has jurisdiction over marine species, except for the manatee. The ESA directs all Federal agencies to participate in conserving these species. Section 7 of the ESA requires Federal agencies to consult with the USFWS to ensure that actions they fund authorize, permit, or otherwise carry out will not jeopardize the continued existence of any listed species or adversely modify designated critical habitat.

The USFWS issued regulations in 1986 detailing the consultation process. As part of this consultation process, the USFWS reviews development projects to assist Federal agencies on the compliance of the ESA. Since HUD typically allocate grant funds for rural and urban development projects, obligations under the ESA, as well as the National Environmental Policy Act (NEPA), require HUD to perform consultation and an environmental impact review prior to the project's

authorization. Primarily, these projects involve repair or reconstruction of existing facilities associated with developed land.

In order to expedite the consultation process, the Caribbean Ecological Services Field Office (CESFO) has developed this BCL to cover for activities and projects that typically result in no adverse effects to federally-listed species under our jurisdiction. The proposed project criteria discussed below are subject to the following conditions:

1. The project is located within an urban or developed area.

    - An urban or developed area is defined as an area that has one or more of the following characteristics:

        - Presence of existing buildings, residential areas, and commercial establishments.
        - Well-established infrastructure including roads, utilities, and urban facilities.
        - High population density.
        - Established neighborhood and urban amenities (“urbanizaciones”).
        - Developed landscape with paved surfaces, parking lots, and industrial areas.
        - Signs of human activity and urbanization, such as shopping centers and recreational facilities.
        - Location within the boundaries of a city or town ("casco urbano").
        - High concentration of built-up structures and limited open spaces.
        - Aerial imagery might be requested to the applicant[1].

2. If the project is located in a rural area, and the project is located within a disturbed area that does not require additional clearing of forested (trees) areas.

3. The project is not located within (or adjacent to) drainages, rivers, streams, wetlands, aquatic systems, or coastal areas.

4. If the project is located in a rural area, and the project is not located immediately adjacent to forested areas (e.g., rock walls and haystack hills (“mogotes”); wet montane forest; lowland wet forest; remnant coastal; mangrove forest; damp and dry limestone karst forests; pastureland with patches of exotic trees[2]).

5. The lighting associated to the facilities is not visible directly or indirectly from the shoreline or beach area.

Proposed projects that **do not** meet the above conditions **Do Not Qualify** for review under the Blanket Clearance Letter developed for compliance with Section 7 of the Endangered Species Act.

[1] This is the definition used by the USFWS in IPaC.
[1] *Ibid.*

Project Criteria:

1. Activities related to the resurfacing existing streets or roads; maintenance of existing upland gabion or reinforced concrete retention walls; construction, reconstruction or repair of gutters and sidewalks along existing roads.

2. Repair, replace, improve, reconstruct and/or rehabilitate facilities in already established public transportation systems (Signs, sidewalks and ramps, bus stops and existing routes).

3. Repair, replace, improve, reconstruct, rehabilitate and/or expanding existing public transportation facilities located in urban or developed areas.

4. Construction of new facilities for public transportation systems (e.g. School bus stops, city buses, trolleybuses, public car stops, Public car terminal) in urban or developed areas.

5. Repair, replace, improve, reconstruct, or rehabilitate existing bridges or rip-rap. (follow FWS rip-rap guidance for design).

6. Reconstruction, or emergency repairs, of existing structures, including but not limited to buildings, facilities and homes.

7. Demolition of dilapidated single-family homes or buildings.

8. Rebuilding of demolished single-family homes or buildings.

9. Retrofitting existing buildings.

10. Construction of residential and/or commercial facilities.

11. Construction, repair, replace, improve, reconstruct, and/or rehabilitate recreational facilities.

12. Addition of concrete pads to the existing footprint of a residential and/or commercial structure, provided that the resulting addition is less than 20% of the size of the existing structure.

13. Improvement or renovations to existing structures (exterior and interior) renovations resulting in an exterior increase greater than 20%.

14. Improvements or renovations to existing structures (exterior and interior renovations) resulting in an exterior increase of less than 20%.

15. Acquisition of residential and/or commercial properties in urban or developed areas for the relocation of families and/or activities.

16. Construction, reconstruction, rehabilitation and/or expansion of cemeteries.

17. Installation/drilling of new water well and associated utility infrastructure, either above ground or underground.

18. Establishment of power facilities, including but not limited to associated aboveground and/or underground infrastructure.

19. Construction of electrical system infrastructure and associated components, including but not limited to associated aboveground and/or underground infrastructure.

20. Construction of land based small electric generating facilities, including those fueled with wind, sun, or biomass, capable of producing no more than 10 MW. *

21. Activities within existing Right of Ways (ROWs) related to water and sanitary infrastructure; communication infrastructure; roads, bridges and highways without the removal of native vegetation and/or major earth movement.

22. Construction of rooftop or urban telecommunications systems and associated components, including but not limited to associated aboveground and/or underground infrastructure.

23. Establishment of temporary debris storage (TDS) facilities.

24. Establishment and/or closure of solid waste management facilities. But not new landfills.

25. Installation of water storage systems (cisterns) and associated infrastructure, either above ground or underground, including but not limited to installations on existing or new concrete pads, or existing or new roofs.

26. Installation of solar panels, battery storage systems and/or associated utility infrastructure, either above ground or underground, on existing or new concrete pads, existing or new roofs, ground or pole mounted.

27. Installation of generators on existing or new concrete slabs, and associated utility infrastructure, either above ground or underground.

28. Repair of existing agricultural structures including but not limited to greenhouses, warehouses, canopies, fences, corrals, and shade structures with less than 20% expansion of footprint.

29. New construction of agricultural structures in established farms including but not limited to greenhouses, warehouses, canopies, fences, corrals, and shade structures with or without underground and/or aboveground infrastructure utility connections.

30. Construction of fences, cattle corrals, concrete slabs.

31. Installation of storage containers on new concrete slab.

32. New construction or work which expands the footprint of an existing structure and occurs entirely on disturbed, regularly maintained, upland property, including the staging of equipment.

*Comply with USFWS wind energy guidelines if more than one wind turbine, consider painting one blade black to help birds see the blades. https://www.fws.gov/media/land-based-wind-energy-guidelines

Determination:

Based on the nature of the projects described above and habitat characteristics described on project criteria, we have determined that the actions and type of projects described above may be conducted within this BCL without adversely affecting federally-listed species under our jurisdiction. Thus, consultation under Section 7 of the Endangered Species Act is not required.

For all projects, HUD and its funded partners (municipalities) are expected to implement Best Management Practices to enhance the conservation of our trust resources (i.e.; listed species, wetlands, aquatic habitats, migratory birds and marine mammals) and avoid impacts from project development to aquatic habitat such as erosion and stream sedimentation. The Service provides the following recommendations that have proven to help achieve this effort.

Water Crossing Structures:

1. Use of bottomless culverts or single span bridges instead of traditional box or RCP culverts or any other water crossing structure that impacts the stream bottom, particularly in streams which support native fish. The use of bottomless culverts or a short span bridge would provide a more stable crossing and would not alter the stream habitat. However, if bottomless structures or bridges are not feasible due to cost or engineering constraints, we recommend the following criteria be used to maintain good habitat in the streams:

    a. The stream should not be widened to fit the bridge since this can lead to sedimentation during low flows and possible bank erosion during high flows. Rather, the bridge should be designed to fit the stream channel at the point of crossing. Culverts should be sized to carry natural bank full flow. Additional flow can be capture by culverts placed at a higher elevation so as not to impact bank full flows.

    b. Bridge abutments, wing walls or any other structures should not intrude into the active stream channel.

    c. All culvert footings must be countersunk into the stream channel at both the invert and outlet ends at a minimum of 10% of the culvert height. This will align the water crossing structure with the slope of the stream.

    d. Waterways must not be blocked as to impede the free movement of water and fish. Materials moved during construction, such as grubbing, earth fills, and earth cut

materials must not be piled where they can fall back into the stream and block the drainage courses.

e. Appropriate erosion and/or sedimentation controls measures are to be undertaken to protect water quality until riverbanks are re-vegetated. It has been our experience that appropriate erosion and/or sedimentation control measures are not implemented properly by project contractors. In order to function properly, silt fences need to be buried 6" (proper depth is marked by a line on the silt fence) and suppo1ted at regular intervals by wood stakes. For that reason we are recommending that the enclosed drawing of proper silt fence installation is included in all final project construction plans.

f. Upon completion of a water crossing construction, any temporary fill, must be removed from the construction area and disposed in a landfill.

For a detailed guide to water crossing structures, the Service developed a detailed guide to water crossing structures for regulatory review by permitting agencies, protect damaged structures, reduce future damages, and prevent or minimize damage to natural resources. The document is titled "Guidance for Repair, Replacement, and Clean-up Projects in Streams and Waterways of Puerto Rico and U.S. Virgin Islands" and is available at:

https://www.fws.gov/media/guidance-repair-replacement-and-clean-structures-streams-and-waterways-puerto-rico-and-us

Limitations:

Actions that do not meet the above project criteria, such as actions requiring placement of fill, disturbance, or modification to land outside of an existing access road or ROW; actions that occur on vacant property harboring a wetland and/or forest vegetation; actions requiring excavation, clearing of native vegetation, or alteration of storm water drainage patterns; or actions that require lighting which can be directly or indirectly seen from a beach, must be individually coordinated through the Caribbean Ecological Services Field Office and will be evaluated on a case by case basis.

The Service reserves the right to revoke or modify this BCL if:

1. New information reveals that the categories of work covered in this BCL may affect listed or designated critical habitat in a manner, or to an extent, not previously considered.
2. The categories of work included in this BCL are subsequently modified to include activities not considered in this review.
3. New species are listed, or designated critical habitat may be affected.
4. Lack of compliance with criteria in this BCL.

To obtain additional information on threatened and endangered species, you may visit our website https://www.fws.gov/office/caribbean-ecological-services where you will also find the Map of the Species by Municipality and the Map of Critical Habitat. These maps provide information on the species/habitat relations within a municipality and could provide the applicants an insight if the proposed action is covered under this BCL or may affect a species, thus requiring individual review

The USFWS has also developed a web based tool called the Information for Planning and Consultation (IPaC). Please visit https://ipac. ecosphere.fws.gov/ and familiarize yourself with the features we offer. We encourage you to begin your project planning process by requesting an Official Species List for your individual project that will include all species that may occur in the vicinity of the action area and includes a map of the action area. The site will also identify designated critical habitat, or other natural resources of concern that may be affected by your proposed project. Best management practices or conservation measures are available at the site for some species, but we expect the site to continue growing in its offering.

We appreciate your interest in protecting endangered species and their habitats. It is the Service's mission to work with others to conserve, protect and enhance fish, wildlife, and plants and their habitats for the continuing benefit of our people. It is our mission to work with others, to conserve, protect and enhance fish wildlife and plants and their habitats for the continuing benefit of our people. If you have any additional questions regarding this BCL, please do not hesitate to contact us at (786) 244-0081 or via email at caribbean_es@fws.gov.

Sincerely,

Lourdes Mena
Field Supervisor

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

THE FOLLOWING SPECIES LIST IS NOT A SECTION 7 CONSULTATION. PLEASE CONTACT OUR OFFICE TO COMPLETE THE CONSULTATION PROCESS

The purpose of the Endangered Species Act (Act) is to provide a means whereby threatened, and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 et seq.), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect those species and/or their designated critical habitat.

Federal agencies are required to "request of the Secretary of Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action". The enclosed species list provides information to assist with the U.S. Fish and Wildlife Service (Service) consultation process under section 7 of the Act. However, **the enclosed species list does not complete the required consultation process.** The species list identifies threatened, endangered, proposed and candidate species, as well as proposed and designated critical habitats, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. A discussion between the Federal agency and the Service should include what types of listed species may occur in the proposed action area and what effect the proposed action may have on those species. This process initiates informal consultation.

Once a species list is obtained for the proposed project, an effect determination for endangered and threatened species should be made. The applicant could make an effect determination by using available keys on IPaC for specific species. For species with no determination keys, the applicant should request concurrence from the Service by sending a project package

to caribbean_es@fws.gov. To obtain guidance for completing this process and the minimum requirements for project packages, please visit:

https://www.fws.gov/sites/default/files/documents/consultation-under-section-7-of-the-endangered-species-act-with-the-caribbean-ecological%20Services-field-office-template-letter.pdf

When a federal agency, after discussions with the Service, determines that the proposed action is not likely to adversely affect any listed species, or adversely modify any designated critical habitat, and the Service concurs, the informal consultation is complete, and the proposed project moves ahead. If the proposed action is suspected to affect a listed species or modify designated critical habitat, the Federal agency may then prepare a Biological Assessment (B.A.) to assist in its determination of the project's effects on species and their habitat. However, a B.A. is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2) (c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a B.A. where the agency provides the Service with an evaluation on the likely effects of the action to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a B.A. are described at 50 CFR 402.12.

If a federal agency determines, based on its B.A. or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to further consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species, and proposed critical habitat be addressed within the consultation process. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species.

This list is provided pursuant to Section 7 of the Endangered Species Act and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action". Please use this list to determine whether your project requires consultation and to make your effects determination. For more guidance, use the Guideline for Consultation under Section 7 of the Endangered Species Act with the Caribbean Ecological Services Field Office by clicking here.

PROJECT SUMMARY

Project Code: 2025-0103841

Project Name: Instalación del Centro Social Cultural, Centro Social de Arte y Música y Centro Social Deportiv

Project Type: Government / Municipal (Non-Military) Construction

Project Description: The Project consists on the rehabilitation of four vacant properties in neglected conditions and convert them into the following social centers: Cultural Social Center; Social Center of Art; and Music, and Social Sports Center. The properties are located along the Luis Muñoz Rivera Street (PR-991) within the Urban Center in the Municipality of Yabucoa. The Project will be located directly in the area in front of the Public Plaza.

Project Location:

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@18.0508984,-65.87911131005936,14z

Counties: Yabucoa County, Puerto Rico

ENDANGERED SPECIES ACT SPECIES

There is a total of 1 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

---

1. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

REPTILES

NAME	STATUS
Puerto Rican Boa *Chilabothrus inornatus*	Endangered

CRITICAL HABITATS

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

YOU ARE STILL REQUIRED TO DETERMINE IF YOUR PROJECT(S) MAY HAVE EFFECTS ON ALL ABOVE LISTED SPECIES.

USFWS NATIONAL WILDLIFE REFUGE LANDS AND FISH HATCHERIES

Any activity proposed on lands managed by the National Wildlife Refuge system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS OR FISH HATCHERIES WITHIN YOUR PROJECT AREA.

BALD & GOLDEN EAGLES

Bald and Golden Eagles are protected under the Bald and Golden Eagle Protection Act [2] and the Migratory Bird Treaty Act (MBTA) [1]. Any person or organization who plans or conducts activities that may result in impacts to Bald or Golden Eagles, or their habitats, should follow appropriate regulations and consider implementing appropriate avoidance and minimization measures, as described in the various links on this page.

---

1. The Bald and Golden Eagle Protection Act of 1940.
2. The Migratory Birds Treaty Act of 1918.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

BALD & GOLDEN EAGLES INFORMATION WAS NOT AVAILABLE WHEN THIS SPECIES LIST WAS GENERATED. PLEASE CONTACT THE FIELD OFFICE FOR FURTHER INFORMATION.

MIGRATORY BIRDS

The Migratory Bird Treaty Act (MBTA) [1] prohibits the take (including killing, capturing, selling, trading, and transport) of protected migratory bird species without prior authorization by the Department of Interior U.S. Fish and Wildlife Service (Service). The incidental take of migratory birds is the injury or death of birds that results from, but is not the purpose, of an activity. The Service interprets the MBTA to prohibit incidental take.

---

1. The Migratory Birds Treaty Act of 1918.
2. The Bald and Golden Eagle Protection Act of 1940.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

MIGRATORY BIRD INFORMATION WAS NOT AVAILABLE WHEN THIS SPECIES LIST WAS GENERATED. PLEASE CONTACT THE FIELD OFFICE FOR FURTHER INFORMATION.

WETLANDS

Impacts to NWI wetlands and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local U.S. Army Corps of Engineers District.

Please note that the NWI data being shown may be out of date. We are currently working to update our NWI data set. We recommend you verify these results with a site visit to determine the actual extent of wetlands on site.

THERE ARE NO WETLANDS WITHIN YOUR PROJECT AREA.

Background

- Aerial Photography

The soil surveys that comprise your AOI were mapped at 1:20,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Humacao Area, Puerto Rico Eastern Part
Survey Area Data: Version 16, Sep 10, 2024

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jan 23, 2022—Mar 1, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Farmland Classification

Map unit symbol	Map unit name	Rating	Acres in AOI	Percent of AOI
UI	Urban land	Not prime farmland	0.6	100.0%
Totals for Area of Interest			**0.6**	**100.0%**

Description

Farmland classification identifies map units as prime farmland, farmland of statewide importance, farmland of local importance, or unique farmland. It identifies the location and extent of the soils that are best suited to food, feed, fiber, forage, and oilseed crops. NRCS policy and procedures on prime and unique farmlands are published in the "Federal Register," Vol. 43, No. 21, January 31, 1978.

Dear Ms. Poche,
Our Office has received and reviewed the above referenced project in accordance with 54 U.S.C. 306108 (commonly known as Section 106 of the National Historic Preservation Act) and 36 CFR Part 800: Protection of Historic Properties.
Our records support your finding of "no historic properties affected" for this undertaking.
Please note that should you discover other historic properties at any point during project implementation, you should notify the SHPO immediately. If you have any questions regarding our comments, please do not hesitate to contact our Office.

Sincerely,

Carlos A. Rubio Cancela

Re: Authorization to Submit Documents for Consultation

Dear Arch. Rubio Cancela,

The U.S. Department of Housing (HUD) approved the allocations of Community Development Block Grant (CDBG-DR) funds on February 9, 2018. It also approved the allocation of Community Development Block Grant Mitigation (CDBG-MIT) funds on January 27, 2020. The purpose of these allocations is to address unsatisfied needs as a result of Hurricanes Irma and Maria in September 2017; and to carry out strategic and high-impact activities to mitigate disaster risks and reduce future losses.

To comply with the environmental requirements established by HUD, the Department of Housing of Puerto Rico (PRDOH) contracted Horne Federal LLC to provide environmental review services, among others, that will support the objectives of the agenda for both CDBG-DR and CDBG -MIT Programs.

To expedite the processes, Horne Federal LLC, is authorized to submit to the State Historic Preservation Officer, documentation of projects related to both the CDBG-DR and CDBG-MIT on behalf of PRDOH.

Cordially,

Aldo A. Rivera Vázquez, PE
Director
Division of Environmental Permitting and Compliance
Office of Disaster Recovery

Puerto Rico Disaster Recovery, CDBG-DR City Revitalization (City-Rev) Program

Section 106 NHPA Effect Determination Submittal for PR-CRP-000378, Instalación del Centro Social Cultural, Centro Social de Arte y Música y Centro Social Deportivo, Yabucoa, Puerto Rico – *No Historic Properties Affected*

Dear Architect Rubio Cancela,

On February 9, 2018, an allocation of Community Development Block Grant - Disaster Recovery (CDBG-DR) funds was approved by the United States Department of Housing and Urban Development (HUD) under the Federal Register Volume 83, No. 28, 83 FR 5844, to assist the Commonwealth of Puerto Rico in meeting unmet needs in the wake of Hurricanes Irma and Maria. On August 14, 2018, an additional $8.22 billion recovery allocation was allocated to Puerto Rico under the Federal Register Volume 83, No. 157, 83 FR 40314. With these funding allocations, the Puerto Rico Department of Housing (PRDOH) aims to lead a comprehensive and transparent recovery for the benefit of Puerto Rico residents. To faithfully comply with HUD's environmental requirements, PRDOH contracted Horne Federal, LLC (HORNE) to provide environmental records review services that will support their objectives for the CDBG-DR funds.

On behalf of PRDOH, HORNE is submitting documentation for the proposed Instalación del Centro Social Cultural, Centro Social de Arte y Música y Centro Social Deportivo Project, located within the Yabucoa Traditional Urban Center. The Municipality of Yabucoa proposes the rehabilitation and adaptive reuse of four vacant and deteriorated properties along Luis Muñoz Rivera Street. The proposed project seeks to transform these abandoned structures into three functional community-use facilities and will involve interior rehabilitation, selective demolition, and accessibility upgrades in line with current code requirements. The full scope of the project is described in the submitted documentation, which includes mapping, photographs, and the 30% design development plans.

Based on the documentation provided, the Program requests a concurrence with a determination that **no historic properties affected** is appropriate for this undertaking. If you have any questions or concerns, please contact me by email at kristin.sanders@horne.com or phone at 225-276-2109.

Kindest regards,

Kristin P. Sanders

Date Reviewed: May 27, 2025

In compliance with Section 106 of the National Historic Preservation Act (NHPA), the Program is responsible for identifying historic properties listed in the NRHP and any properties not listed that would be considered eligible for listing that are located within the geographic area of potential effects (APE) of the proposed project and assessing the potential effects of its undertakings on these historic properties. It has been determined by the SOI-qualified professionals that the project undertaking does not conform to Stipulation II.A (Project Review – Programmatic Allowances) of the Section 106 Programmatic Agreement (PA) among FEMA, SHPO, and COR3, as amended (May 3, 2023).

Project Description (Undertaking)

The Municipality of Yabucoa proposes the rehabilitation and adaptive reuse of four vacant and deteriorated properties along Luis Muñoz Rivera Street (State Road PR-9910), located within the Yabucoa Traditional Urban Center (TUC), directly across from the Santos Ángeles Custodios Public Plaza (Figure 1). The proposed project seeks to transform these abandoned structures into three functional community-use facilities: the Cultural Social Center, the Social Center of Art and Music, and the Social Sports Center. This initiative is intended to promote cultural preservation, civic engagement, and social development while revitalizing underutilized urban infrastructure. According to the 30% completed design plans submitted by Abacus Architecture, PSC (2025), the project will involve interior rehabilitation, selective demolition, and accessibility upgrades in line with current code requirements. Detailed photographs documenting current site conditions accompany this description.

The Cultural Social Center (Figure 2) will be established within an abandoned, one-story structure with a lower level situated on a parcel referred to as Plot A (Parcel ID: #376-040-013-05-001; Coordinates: 18.050720, -65.879421), measuring approximately 3,415 square feet (317.29 square meters). This plot is currently owned by the Municipality of Yabucoa. The existing building appears to date from early to mid-20th century, constructed primarily of reinforced concrete with a flat roof, and retaining its original structural form and Spanish Revival style aesthetics; though some exterior elements and interior partitions have been lost or modified over time. The rehabilitated structure will include a reception area, a conference room, a presentation space, two ADA-compliant bathrooms, a general storage area, and a room for maintenance equipment. The Cultural Social Center will serve as a gathering space for local community groups and schools, including José Facundo Cintrón Elementary School, Ramón Quiñones Medina High School, Jaime C. Rodríguez Montessori School, and

Teodoro Aguilar Mora High School, supporting their curricula through cultural programming such as book presentations, art exhibits, and public speaking activities.

The Social Center of Art and Music (Figures 3 and 4) will occupy two adjacent structures in disuse located on the same parcel with a combined area of approximately 8,520 square feet (791.39 square meters), referred to as Plot B (Parcel ID: #376-040-013-10-002; Coordinates: 18.050815, -65.879190) and Plot C (Parcel ID: #376-040-013-10-002; Coordinates: 18.050905, -65.879051). The parcel is owned by the Municipality of Yabucoa, though the buildings are privately owned and will require formal acquisition. The buildings appear to date from early to mid-20th century and are constructed of reinforced concrete. Despite showing signs of long-term abandonment, both have kept their original traits: Plot B with late colonial elements, such as moldings around the entrances and molded cornices, and Plot C with Neo-mudejar traits, such as the orientalizing arches above the entrances and the window display openings. The rehabilitation will involve retrofitting façade elements and interior spaces to include a reception area, music rehearsal rooms, dance and visual arts studios, general performance spaces, a meeting room, an office, two ADA-compliant restrooms, and two dedicated storage areas. This center will support the activities of the Yabucoa Municipal Band and the Yabucoa Marching Band, while also offering programming and space to artists and community members for creative collaboration and performance.

The Social Sports Center (Figure 5) will be developed in a disused, one-story building of brick, masonry, and concrete construction located on a parcel measuring approximately 6,830 square feet (634.55 square meters), referred to as Plot D (Parcel ID: #376-040-013-12-001; Coordinates: 18.050637, -65.879629). This commercial property was built in 1910, consistent with late 19th century characteristics with its five

door openings, and shows signs of significant neglect. This parcel will be acquired through involuntary acquisition under the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act (URA). Once rehabilitated, this center will include a reception area, a conference room, a Hall of Fame, an area for passive recreational activities, two ADA-compliant bathrooms, and both general and maintenance storage rooms. This facility will serve as a meeting and coordination space for Yabucoa's sports organizations and educational institutions, encouraging sports education and community participation.

Across all four buildings, interior demolition will focus on the selective removal of deteriorated materials, including damaged flooring, non-structural partitions made of wood, concrete blocks or gypsum boards, and outdated mechanical, electrical, and plumbing systems. Exterior demolition of building elements that are significant to its historical context is not planned; instead, each building will undergo targeted façade and interior rehabilitation to repurpose the existing architectural shell. Construction activities will include interior reconfiguration, accessibility upgrades in compliance with ADA standards, installation of new utility systems, and application of finishes appropriate to the proposed function of each facility. Ground-disturbing activities will be minimal and localized, occurring only as necessary to support new utility connections, structural enhancements, and site accessibility improvements. Estimated depth of ground disturbance will be approximately 24 to 48 inches (60 to 120 centimeters) for utility trenching, up to 36 inches (90 centimeters) for any required foundation reinforcement, and 12 to 18 inches (30 to 45 centimeters) for the installation of sidewalks, ramps, and related accessibility features. All ground-disturbing work will remain strictly within the existing property footprints.

Once completed, the four new social centers will be operated and maintained by the Municipality of Yabucoa through collaborative agreements with nonprofit and community-based organizations aligned with each center's mission. The project will create accessible, inclusive environments for community engagement, cultural expression, and social resilience. In addition to enhancing the urban landscape, these facilities will serve as vital public gathering spaces and may be utilized for emergency response coordination in the event of natural or civil disasters.

Puerto Rico 2017 Disaster Recovery, CDBG-DR Program **City Revitalization Program (City-Rev)** **Section 106 NHPA Effect Determination**	
Subrecipient: Municipality of Yabucoa	
Case ID: PR-CRP-000378	**City:** Yabucoa
Project Name: Instalación del Centro Social Cultural, Centro Social de Arte y Música y Centro Social Deportivo

Area of Potential Effects

As defined in 36 CFR §800.16(d), the area of potential effects (APE) is the geographic area or areas within which an undertaking may directly or indirectly cause changes in the character or use of historic properties if any such properties exist. Based on this definition and the nature and scope of the Undertaking, the Program has determined that the direct APE for this project consists of four abandoned structures distributed along three discontinuous parcels on Luis Muñoz Rivera Street (State Road PR-9910), north of Santos Ángeles Custodios Public Plaza, and within the boundaries of the Yabucoa Traditional Urban Center.

The Cultural Social Center will occupy a commercial, one-story, reinforced concrete structure with a lower level, dating to the mid-20th century. The property still retains Spanish Revival traits in its façade, such as decorative clay tiles on a roof segment facing the street and above a stepped parapet with white trimmings. Its floor plan and land plot comprise 3,415 square feet (317.29 square meters) and actual dimensions of 55 feet × 29 feet (16.76 meters × 8.84 meters), and will be located on Plot A (Parcel ID: #376-040-013-05-001). The Social Center of Art and Music will occupy two adjacent early to mid-20th century, reinforced concrete buildings that will be connected through interior oppenings. The west building, with an area of 2,576 square feet (239.32 square meters) and dimensions of 56 feet × 46 feet (17.07 meters × 14.02 meters) shows a late Spanish colonial style façade with four rectangular door oppenings featuring mouldings and short cornices; and the east building with its orientalizing arches above windows and door oppenings, decorative clay roof tiles and battlements, with an area of 5,250 square feet (487.74 square meters) and dimensions of 75 feet × 70 feet (22.86 meters × 21.34 meters), for a combined area of 8,520 square feet (791.39 square meters); both will be respectively located on Plots B and C (Parcel ID: #376-040-013-10-002). The Social Sports Center will occupy a one-story, brick, masonry and concrete

structure built in 1910, with a typical late 19th century façade featuring four door openings, cornice and parapet, with an area of 2,600 square feet (241.55 square meters) and dimensions of 52 feet × 50 feet (15.85 meters × 15.24 meters), and will be located on Plot D (Parcel ID: #376-040-013-12-001). All four buildings are situated on the north side of Luis Muñoz Rivera Street (State Road PR-9910).

In terms of the visual APE (Figure 6), the Yabucoa Traditional Urban Center does not contain a significant concentration of historic buildings erected before 1937. Most of its original wooden, brick, or masonry structures were replaced by modern concrete constructions for commercial or residential use due to hurricane damage, persistent humidity, or the passage of time. Only a handful of buildings meet the National Register of Historic Places (NRHP) criteria for eligibility, and those that do, such as the four contributing properties discussed, are largely in a dilapidated state. Notably, some eligible buildings like the former town hall built in 1928 (which replaced the original 19th century structure), the San Rafael Theater (circa 1935), and Café La Tahona (1937), are located along the same street as the proposed undertaking or directly across from the Santos Ángeles Custodios Public Plaza. In this context, the proposal to rehabilitate and restore these four buildings for community use, without compromising the architectural features that grant them historical eligibility, will reinforce the sense of place along one of Yabucoa's most important and central streets, second only to Cristóbal Colón Street.

Figure 6. The visual APE within the Yabucoa Traditional Urban Center, encompassing Santos Ángeles Custodios Public Plaza and the surrounding urban landscape (Source: Vega 2025).

Environmental Setting

The project area is located within the East Coastal Province of Puerto Rico, specifically at the eastern edge of the USGS Yabucoa Topographic Quadrangle, within the core of the Yabucoa Traditional Urban Center at Pueblo Ward. The direct APE sits on a low hill composed of Tonalite Facies of the Granodiorite of San Lorenzo (Klt), a geologic unit visually similar to the more widespread Granodiorite of San Lorenzo (Kl), as mapped by Roberts et al. (1979). The APE reaches an elevation of approximately 24 meters above sea level and is surrounded by Holocene and Pleistocene alluvium and fanglomerate deposits (Qaf), with four nearby swamp deposits (Qs). The hydrologic landscape includes the Caño de Santiago (historically Caño de Yabucoa), located to the north and east of the TUC, and further north by the Río Guayanés, Río Limones, and Río de Ingenio, along with their tributaries. The TUC is situated 2.99 miles west of the Port of Yabucoa, along the southeast coast of the island, which opens into Vieques Sound between Punta Guayanés and Punta Quebrada Honda. The setting is predominantly urban, with surrounding areas transitioning into rural and agricultural landscapes, especially toward the southwest where the terrain descends into Quebrada Aguas Largas and gradually rises again across Río Guayanés toward Cerro Pandura.

The geology and coastal geomorphology of Yabucoa and the wider east coast of Puerto Rico are notably complex. According to Roberts et al. (1979), several coastal areas within the municipality have experienced tectonic uplift, a factor that may have geoarchaeological implications. Such uplift may have displaced former coastal sites, now situated further inland due to changes in shoreline position over time. This dynamic landscape underscores the importance of considering long-term geomorphological processes when evaluating archaeological potential within the APE.

Historic Context

Pre-Contact Culture History of the APE

The Municipality of Yabucoa encompasses 55.25 square miles and has less than twenty reported pre-Columbian or pre-contact archaeological sites, including at least two areas of petroglyphs at the Río Guayanés, with the main area known as Corral de los Indios (YB0100007). At least ten sites with petroglyphs have been reported at the Guayanés River by archaeologist Carlos A. Pérez Merced (2012). The closest known pre-Columbian site is an unnamed ceramic deposit (YB010012), located 1.48 miles east of the Yabucoa TUC. At present, the largest pre-contact site is Aguacate (YB0100001), towards the north end of Yabucoa, with a long period of occupation, including Cuevas, Monserrate, Santa Elena, and Esperanza ceramic styles, nearly covering all periods of indigenous occupation. There are no pre-Columbian sites reported within the direct APE, or even within the Yabucoa TUC itself.

In his *Tesauro de datos históricos de Puerto Rico*, Adolfo de Hostos (1995, Tomo V:761) mentions a minor cacique called Yabucoa. In his *Boletín histórico y cronológico de Puerto Rico,* Cayetano Col y Toste (1979, Vol. 13:119) states that Yabucoa means "a place of manioc," which Agustín Stahl asociated with a *cacique* called Guaraca, as reported by de Hostos (1995 ibid). Informal sources on the Internet mention Yabucoa as "the place of water." In his extensive *Diccionario Taíno*, Sebastián Robiou Lamarche (2024) does not mention the name Yabucoa. This municipal name is is also missing in *Arqueología Lingüistica,* by Manuel Álvarez Nazario (1999), and *Los indigenismos en el Español de Puerto Rico,* by David Cruz de Jesús (2003).

As reported by Adolfo de Hostos (1995, Tomo V: 765), Río Guayanés in Yabucoa and Río Maunabo further south were the two rivers where Juan Ponce de León first found

gold in 1508. According to Agustín Stahl, as reported by de Hostos (ibid), Yabucoa was a giver of tribute to Guarionex or Agueybaná in the early 16th century. Although the etymology of Yabucoa is unclear, this region was inhabited for two thousand years or more, possibly the first region to be reached by so-called Saladoid or Igneri peoples from Venezuela, also playing a primary role in the contact period of Spanish colonization in the early 16th century. The frequent flooding and complex sedimentary processes makes the coast of Yabucoa a challenging place for archaeologists.

Historical Background of the APE

In his *Espejo de Navegantes*, written in the 1520s and published circa 1537, Alonso de Chaves does not mention Yabucoa in his listing of early Spanish ports in the Caribbean. The Port of Yabucoa is first mentioned by Juan López de Velazco in his 1571 *Descripción de la Isla de San Juan de Puerto Rico*, published in his 1574 *Descripción Universal de Las Indias*, as follows: "*Hay en la cabeza de la isla un puerto que se dice Santiago y dende a dos leguas otro que se dice Yabucoa"* (López de Velazco 1894:131). Yabucoa is mentioned by Juan de Melgarejo in his 1582 *Memoria y Descripción de la Isla de Puerto Rico Mandada a Hacer por S.M. el Rey Don Felipe II*. The port has a dangerous entrance with shallow reefs (Melgarejo 1582:91). The original document is in *Patronato*, at the *Archivo General de Indias* in Seville. A *croquis* or map of the town of Yabucoa was produced by Francisco Larrea y Liso in 1884 (Figure 7), reproduced by Sepúlveda Rivera (2004, Vol. 3:450). The Port of Yabucoa is also mentioned by Sánchez de Toca in 1890 (*Archivo General de Puerto Rico*).

The *municipio* of Yabucoa was founded in 1793 (Coll y Toste 1927, Vol. 13:170), after Íñigo Abbad y Lasierra wrote his *Historia Geográfica* (1776). The first historic settlers may have arrived as early as 1736 from Guayama and Las Piedras, occupying a low hill

about 2.9 miles (5.0 km) west of the mouth of the Guayanés River. The first registered formal petition to settle Yabucoa was signed in 1750, for an *hato* or ranch.

Subsequently, the *pueblo* was built in 1793 on land donated by Manuel Colón de Bonillas and his wife Catalina Morales Pacheco. Its first church, *Nuestra Señora de los Ángeles Custodios*, was built in 1794. French artist August Plée drew a sketch of the parish and plaza in 1821 (Figure 8), reproduced by Sepúlveda Rivera (2004, Vol. 1:170). In 1825, the entire town was destroyed by Hurricane Santa Ana, except for the church, where the townspeople sought refuge. It is the only municipality in Puerto Rico with guardian angels as their patron.

Rafael Ramírez de Arellano describes a masonry church, a stone house, 254 wooden houses, and 780 *bohíos* in 1854 (Sepúlveda Rivera 2004, Vol. 2:183). The decision not to build a waterfront town at Yabucoa Bay may be due to numerous reasons, including a bay entrance with shallow reefs that was dangerous for sailing ships, potential attacks fom Taíno and Carib Indians in the 16th century, fear of floods and hurricanes, fear of pirates from the 17th to the early 19th century, or less economic activity than at the ports of San Juan, Ponce, Mayagüez, Fajardo, Aguadilla, Guánica, Arecibo, Guayanilla, Arroyo, Naguabo, Humacao, and Salinas.

In 1824, Pedro Tomás de Córdova (1832) reported that the town of Yabucoa had 3,218 inhabitants, living in 46 houses and 25 *bohíos* or thatched houses. He also reported that the lowlands at the outlet of the Guayanés River were frequently flooded. The NOAA nautical chart for Yabucoa states "shoreline subject to frequent change," reflecting the influx of sediment from local rivers, and the direct exposure to storms and hurricanes. In 1971, an artificial bay was created for the new fuel port of Yabucoa

Sun-Oil, sold to Shell and then to Buckeye in 2010. The obsolete Sun Oil concrete chimney, built in 1971, was demolished in 2014.

By 1847, there was a masonry parish and cemetery, a wooden *Casa del Rey* with a clay tile roof, and a wooden butcher shop. The town was irregularly arranged in the rugged terrain with two main streets: Cristóbal Colón Street, running north-south, and Luis Muñoz Rivera Street, running east-west. These two streets are still the urban center's main axis. The irregular urban pattern reflects the rugged, rocky topography. Segundo González Prida Street was known as *Salsipuedes* or "get out if you can," as it led to the municipal cemetery, built just outside of the urban center, at the bottom of the hill. In contrast, the highest point was at the epicenter of the Yabucoa TUC, including the Catholic church (Figure 9), public plaza, *Casa del Rey* or city hall, and commercial buildings.

By the early 20th century, a new municipal cemetery was built in what is now known as Sector Varsovia and officially opened in 1909, as indicated by the date inscribed on its entrance portico, replacing the 19th century burial ground. The move was probably motivated by concerns over space and hygiene, reflecting broader public health reforms occurring across Puerto Rico during the early U.S. administration. Presumably, the old cemetery was formally decommissioned, with any existing burials either relocated or left behind, and eventually absorbed into the urban landscape.

Luis Muñoz Rivera Street was originally known as Comercio Street, where the town's original stores were located. In 1878, a fire at the Gutiérrez store destroyed eight streets within the Yabucoa TUC. Another fire at Comercio Street occurred in 1880, originating at the store of *Ochoa y Hermanos*, resulting in the destruction of thirteen properties. In

the 19th century, most homes were made of wood, while the best commercial edifices were built with brick.

Yabucoa was known in the 19th century as an agricultural region with intensive sugar production and cattle ranching. There were five sugar haciendas by 1895, which merged into one, Hacienda La Rosario, by 1900. Yabucoa's largest sugar producer was Hacienda Carmen, founded in 1870 by Ramón Aponte y Ortiz de la Renta, named after his wife María del Carmen Rodríguez. This *hacienda* was located on the south side of the Guayanés River. In 1878, Hacienda Carmen was sold to Cristóbal Vallecillo y Morales, who added a steam-powered mill and renamed it Hacienda Mercedita, after his wife.

Following the Spanish-American War of 1898, and extensive damage from Hurricane San Ciriaco in 1899 (Figure 10), Hacienda Mercedita was sold to Vallecillo y Beltrán Hnos., then to the Eastern Sugar Company in 1904, and to the Yabucoa Sugar Co. in 1909, led by Spanish businessman Rafael Fabián. In 1927, Hacienda Mercedita was purchased by Antonio Roig, who renamed it as Central Roig. Located 0.42 miles north of the Yabucoa TUC, Central Roig encompassed 7,000 cuerdas of sugarland, with its own railway and port facilities. Yabucoa's exports in the early 20th century included *Ron Competente*, *Anís Patria,* and *Ginebra Criolla* (Sepúlveda Rivera 2004, Vol. 3:452). In 1899, as reported in the first U.S. census, the Municipality of Yabucoa had 13,905 inhabitants, including 3,184 living at the urban center.

By 1910, Yabucoa's main industry was cheese production, with abundant pasture and cattle ranches spread across Yabucoa Valley, depicted by the impressionistic Puerto Rican painter Miguel Pou Becerra in 1953 (Figure 11). Since the early 20th century, six sugarcane colonies had been established in Yabucoa: Laura, La Pilar, El Negro, El Nuevo

Cerro, La Unión, and La Lucía. In 1947, the Planning Board had expanded the urban limits of the municipality, including the once rural neighborhoods of Calabazas and Juan Martín Wards. By 1969, a declining Central Roig was sold to the *Corporación Azucarera de Puerto Rico* in 1972, with sugar largely replaced by cattle ranching and dairies. By 1974, Yabucoa had five first-class dairies. The local economy shifted to industrial activities far from the urban center, prompting suburban sprawl.

The *Plaza de Mercado Modesto Lebrón* in Yabucoa was originally constructed and inaugurated around 1949 as part of a postwar initiative to modernize municipal infrastructure and centralize local commerce. Named in honor of Modesto Lebrón Burgos, a respected local figure, the market became a hub for agricultural and food trade in the town. Its establishment reflected broader efforts across Puerto Rico to improve sanitary conditions and support local economies through organized marketplaces. The original building served the community for over 70 years until it was demolished in 2022 due to structural deterioration. It recently began reconstruction in 2024.

Urban development and population growth were sustained until 1950, reaching its greatest extension towards the end of the decade. The Municipality of Yabucoa had grown along State Road PR-901 to the west, which intersects with State Road PR-3, and along State Road PR-182 to the south. New streets were laid out beyond the municipal limits, such as Rafael Velázquez and Eulalio Reverón, both perpendicular to State Road PR-182. The Dr. Víctor Berríos Public Housing Project was also built at the end of the decade (Figure 12), approximately 0.35 miles south of the Santos Ángeles Custodios Public Plaza.

From the mid-1970s onwards, modern residential projects remained peripheral to the urban center, such as *Jardines de Yabucoa* and *Santa Elena*, developed on former agricultural lands southeast of the urban center. The suburbanization of Yabucoa was the result of diverting the agricultural value of land to real estate opportunities, a process that took hold across all regions of the island. In 1986, then architectural student Nicolás Fonseca Medina illustrated this pattern of urban growth for his Master's thesis, *Yabucoa: Solar urbano* (Figures 13-15).

Overall, the composition of the urban center did not significantly change throughout the 20th century, with the exception of the controversial demolition of the early 20th century Santos Ángeles Custodios Catholic Parish in 1963 (Figure 16), at the behest of Father Julián Simón and against the wishes of archaeologist and folklorist Ricardo E. Alegría. It was redesigned in a Brutalist contemporary reindition by architects Jesús E. Amaral and Efrer Morales, officially inaugurating in 1968. This is the third or fourth church built at the geographic and cultural center of the Yabucoa TUC (Figure 17).

Historic aerial photographs from 1936 to 1992 (Figures 18-22) and USGS topographic maps from 1946 to the 1982 (Figures 23-26) illustrate the haphazard expansion of the Yabucoa TUC during the 20th century. In addition to ubiquitious suburban development, this was also in response to the rugged topography, including abrupt changes in elevation, rocky soil, and four swam deposits (Qs) around the urban center.

Identification of Historic Properties

Existing information on previously identified historic properties has been reviewed to determine if any such properties are located within the APE of this Undertaking. The review of this existing information by a Program contracted Historic Preservation Specialist meeting the Secretary of the Interior's Professional Qualification Standards (36 CFR Part 61) shows that there are no reported archaeological materials or significant cultural properties within or adjacent to the proposed project location. Within a quarter-mile radius, remnants of the old municipal cemetery, once located at the bottom of the hill near what is presently the intersection of Segundo González Prida and Baldorioty Streets, could be still be buried underneath the street pavement or private residences in the neighborhood.

There are several NRHP-eligible properties within the visual APE, such as Santos Ángeles Custodios Catholich Parish and Public Plaza, and the former Café La Tahona on the intersection of Luis Muñoz Rivera and Cristóbal Colón Streets, in addition to San Rafael Theater on Luis Muñoz Rivera Street, and Rivera Cafeteria & Store on Cristóbal Colón Street. One of the four structures within the direct APE, located in Plot D, is also considered NRHP-eligible. The project area is located within the Yabucoa TUC.

Historic Properties - Archaeological Resources

No significant archaeological materials have been detected within the Yabucoa TUC. Considering the total lack of reported pre-Columbian sites, no indigenous cultural resources are anticipated within the direct APE. Given the abrupt topography, rocky soil, and limited sedimentation at the Yabucoa TUC, indigenous horticulture would be highly unlikely, and any pre-Columbian activity would have resulted in shallow archaeological signatures, easily destroyed by historic construction activity.

The Municipality of Yabucoa contains fewer than twenty reported pre-Columbian archaeological sites. These include multiple petroglyph groups along the Río Guayanés, notably Corral de los Indios (YB0100007), a significant rock art complex located between Guayabota and Calabazas Wards. Other archaeological sites within the municipality but outside the quarter-mile radius of the direct APE include Aguacate (YB0100001), a large, multi-component site in Aguacate Ward with evidence of long-term occupation across several ceramic styles, and Punta Guayanés or King's Helmet (YB0100013) in Playa Ward.

Other pre-Columbian sites within the Municipality of Yabucoa include Escuela Eugenio María de Hostos (YB0100002) in Playa Ward, Navarro (YB0100004) in Tejas Ward, Punta Yeguas (YB0100012) in Camino Nuevo Ward, and two unnamed sites in Limones Ward (YB0100005 and YB0100006). At least ten petroglyph sites have been reported along the Guayanés River by archaeologist Carlos A. Pérez Merced (2012). The closest known site to the direct APE is an unidentified ceramic deposit (YB010012) located 1.48 miles east of the Yabucoa TUC.

Historically, hurricanes have frequently entered Puerto Rico through the southeast coast, where Yabucoa is located, exposing the area to some of the island's most destructive storms. The successive impacts of Hurricanes San Ciriaco (1899), San Felipe II (1928), and San Ciprián (1932) triggered repeated cycles of destruction and reconstruction in the Yabucoa TUC, often carried out without regard for preserving earlier structures. This process has created a stratified and archaeologically sensitive urban landscape, where buried architectural remains and displaced cultural materials could be unearthed by ground-disturbing activities. Additionally, the construction of the first church in 1794, followed by several iterations throughout the decades on the same lot as the existing Santos Ángeles Custodios Church, suggests

the possibilty of historic burials under this lot, possibly extending under Luis Muñoz Rivera Street and across the street, into one of the four structures within the direct APE. However, since the proposed undertaking does not include the demolition of any of the four structures, and there is a street in-between the direct APE and the historic church lot, the possibility of impacting buried human remains in excavations for utilities within the direct APE is extremely low.

Table 1. Below-ground archaeological sites within a quarter-mile radius of the APE

Site Name	SHPO ID	IPRC ID	Distance/Direction to the APE	Description	NRHP Status
Old Municipal Cemetery	None	None	0.11 mi SW [Plot A] 0.12 mi SW [Plot B] 0.13 mi SW [Plot C] 0.10 mi SW [Plot D]	Mid- to late 19th century, municipal cemetery once located at the bottom of the hill, near the intersection of Segundo González Prida (*Salsipuedes*) and Baldorioty Streets before it was likely relocated before or during the early 20th century.	Not Eligible

Previous Investigations

According to the State Historic Preservation Office (SHPO) database, two cultural resources studies conducted within the Yabucoa TUC, by Fernando Alvarado Muñoz (2007) and Aramis Font Negrón (1995), yielded negative results. Muñoz (2007) monitored improvements to three public streets, including Cristóbal Colón Street, immediately south of Plot D. This is the only cultural resource study within a quarter-mile radius of the direct APE. Within the vicinity of Pueblo Ward, such as Juan Martín

Ward, at least eight Phase 1A-1B archaeological studies have been conducted: González Colón (1992, 1997, 2003), Méndez Bonilla (1995), Daubón Vidal (1988), Vega (1992), Alemán Crespo (1987), and Rodriguez López (1990). All of these studies yielded negative results.

Carlos A. Pérez Merced (1996) conducted an archaeological salvage excavation at Aguacate (YB0100001), a multi-component indigenous settlement, under the auspices of the Institute of Puerto Rican Culture in coordination with the local *Casa de la Cultura*. The study revealed significant evidence of Saladoid (Hacienda Grande and Cuevas styles) and Ostionoid (Elenoid style) occupations. Finds included highly fragmented ceramics, large vessel fragments, anthropomorphic and zoomorphic clay faces, lithic tools, as well as ornaments made of jadeite, granodiorite, quartz, and shell. Faunal remains included fish bones, manatee, birds, and *jutías*, along with evidence of food preparation such as hearths and *burenes*. Three human burials were documented, consisting of two young adult females and one unidentified individual, all found in flexed positions. A partial dog burial with an associated ceramic vessel was also uncovered. Radiocarbon dating of charcoal samples placed the primary occupation of the site between 975-1250 AD.

Table 2. Cultural resource studies within a quarter-mile radius of the APE

Author	Phase/ Title	Year	SHPO/ICP Code	Results	Distance/Direction to the APE
Fernando Alvarado Muñoz	Phase 1A-1B, Nuevo Centro Urbano Calles Cristóbal Colón, Baldorioty y Ramón Quiñones	2007	CAT-YB-07-07-02	Negative	0.02 mi SW [Plot A] 0.03 mi SW [Plot B] 0.04 mi SW [Plot C] 0.01 mi S [Plot D]

Summary

No documented archaeological sites or significant cultural properties are present within or adjacent to the direct APE. Although the broader Municipality of Yabucoa contains fewer than twenty reported pre-Columbian sites, including notable rock art along the Río Guayanés and multi-component settlements like Aguacate (YB0100001), none are located within or near the direct APE. In fact, the closest known pre-Columbian site is an unnamed ceramic deposit (YB010012), located 1.48 miles east of the Yabucoa TUC.

Given the rocky terrain, limited sedimentation, and lack of indigenous site reports within the Yabucoa TUC, the archaeological potential for pre-Columbian materials in the direct APE is low. Historic impacts from repeated hurricane destruction and reconstruction have created a layered urban context where buried remains could exist; however, cultural resources studies in the vicinity of the direct APE, including those by Alvarado Muñoz (2007) and Font Negrón (1995), have all yielded negative results. The Santos Ángeles Custodios Catholic Parish, which occupies a historically significant lot within the public plaza and across the street from the direct APE, may contain historic burials beneath or near its footprint, but because the proposed scope of work will not involve demolition or deep excavation, the potential for disturbing archaeological or human remains is considered minimal.

Historic Properties - Architectural Resources

The Yabucoa TUC does not contain a significant concentration of buildings constructed before 1937, as most of the original wooden structures were replaced by concrete buildings in the aftermath of hurricanes that repeatedly impacted the area. Only a small number of properties meet the National Register of Historic Places (NRHP) Criteria C for architectural significance. Among the buildings considered eligible are

the former town hall, built in 1928 to replace the earlier 19th century structure; the San Rafael Theater, constructed circa 1935; the United Evangelical Church on San Cristóbal Street, founded in 1906 and extensively renovated in the 1940s; and the old Fire Station, built in the 1940s, similar to other stations constructed during the Second World War. All of these are located within a quarter-mile radius of the direct APE. The original Catholic parish church, erected in the early 19th century and renovated in the mid-19th century, was demolished in 1963 and replaced by a modern structure designed by Puerto Rican architect Jesús Amaral y Morales.

Only one building within this area is currently listed in the NRHP under Criterion A for its association with significant historical events: the Yabucoa Fire Station, built in 1944. Of the other buildings considered eligible under Criterion C (Architecture) or Criterion D (Information Potential), four are located within the direct APE on Luis Muñoz Rivera Street and are listed in Table 4. An additional twelve NRHP-eligible properties located within a quarter-mile radius of the direct APE are presented in Table 5.

Table 4. NRHP eligible/listed historic properties within the APE

Historic Property Name	SHPO/ICP ID	NRHP Status	Latitude/ Longitude	Category	Approx. Date	Distance/ Direction to the APE

Case ID: PR-CRP-000378	**City**: Yabucoa
Project Name: Instalación del Centro Social Cultural, Centro Social de Arte y Música y Centro Social Deportivo	

Summary

The proposal for the rehabilitation and restoration of these four buildings for community use, without losing the architectural characteristics that make them eligible under Criteria C (Distinctive Characteristics) and D (Information Potential), will strengthen the sense of place along one of the most important and central streets of the Yabucoa TUC, second only to Cristóbal Colón Street and directly connected to the Santos Ángeles Custodios Public Plaza, which is the defining landmark of all Puerto Rican traditional urban centers. Although each building represents a different moment in the history and social development of Yabucoa, they all contribute to its historical identity through their architectural language. They follow the same street setbacks, share similar heights and massing, and although their window openings vary, they remain harmonious with the place's identity. Elements such as trim details, gable projections, and overall composition reinforce a cohesive streetscape that supports a sense of continuity and cultural significance.

Determination

The following historic properties have been identified within the direct and indirect/visual APE:

- Direct APE:
    - Based on the results of historic property identification research efforts, including consulting NRHP listings at the Puerto Rico State Historic Preservation Office (PRSHPO/OECH) website and zoning maps from the Puerto Rico Planning Board (PRPB), no archaeological sites, historic or prehistoric, are reported within the direct APE. Surface inspection of the four properties in question did not detect any evidence of archaeological materials. The closest known pre-Columbian site is an unnamed ceramic deposit (YB010012), 1.48 miles east of the Yabucoa TUC. Considering the total lack of reported pre-Columbian sites within the TUC, no indigenous cultural resources are anticipated within the direct APE. Given the abrupt topography, rocky soil, and limited sedimentation, indigenous horticulture would be highly unlikely, and any pre-Columbian activity would have resulted in shallow archaeological signatures, easily destroyed by historic construction activity.

    - The closest potential archaeological materials are late 18th century Catholic burials that may exist under and around the Santos Ángeles Custodios Catholic Parish, where the first church was built in 1794. The church lot is separed from the direct APE by Luis Muñoz Rivera Street, originally known as Comercio Street. No historic buirials are anticipated across the street. Therefore, it is our determination that this undertaking

will result in No Historic Properties Affected to archaeological sites within the direct APE.

- Indirect/Visual APE:
    - The undertaking will not result in any adverse effects. On the contrary, it will significantly enhance the visual APE by sensibly renovating dilapidated buildings that are over 75 years old and that can contribute aesthetically to the public realm of the Yabucoa TUC. All four buildings within the direct APE are located directly in front of the Santos Ángeles Custodios Public Plaza and along Luis Muñoz Rivera Street, one of the oldest streets in the municipality. The proposed façade interventions, which focus on the least altered and most historically intact elements of each building, will be carried out in accordance with the Secretary of the Interior's Standards for the Treatment of Historic Properties. Planned activities include the removal of dissonant features such as modern glass-pane doors, which will be replaced with historically appropriate doors and windows, as well as the restoration of clay roof tiles, moldings, and trim. These actions fully comply with the Standards and support both the preservation and revitalization of the area's architectural heritage.

    - Regarding the interior, there will be no mayor transformations of structural original walls, columns or beams. Only added wood, gypsum or block walls will be torned down to be replaced by non structural partitions suitable to the new Yabucoa communities activities. None of those interior renovations will affect the public realm.

Based on the results of our identification efforts, the Program has determined that historic properties will not be adversely affected. Background research and an evaluation of existing conditions indicate that no archaeological sites are likely present within the direct APE. The proposed undertaking will be carried out in accordance with the Secretary of the Interior's Standards. As such, the undertaking is expected to have a beneficial impact on the architectural character of the Yabucoa TUC without disturbing any significant cultural resources. Therefore, no additional cultural resource studies are recommended at this time.

Puerto Rico 2017 Disaster Recovery, CDBG-DR Program **City Revitalization Program (City-Rev)** **Section 106 NHPA Effect Determination**	DEPARTMENT OF HOUSING GOVERNMENT OF PUERTO RICO

Recommendation

The Puerto Rico Department of Housing requests that the Puerto Rico SHPO concur that the following determination is appropriate for the Undertaking (Choose One):

☒ No Historic Properties Affected

☐ No Adverse Effect

Condition (if applicable):

☐ Adverse Effect

Proposed Resolution (if appliable):

This Section is to be Completed by SHPO Staff Only

The Puerto Rico State Historic Preservation Office has reviewed the above information and: ☐ **Concurs** with the information provided. ☐ **Does not concur** with the information provided.

TITLE SHEET & INDEX

SCALE: NO.
PROJECT NO.: T-1.0
DATE: SHEET NO.

GENERAL NOTES

1. THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS AND EXISTING FIELD CONDITIONS PRIOR TO CONSTRUCTION OR INSTALLATION. IN CASE OF ANY DISCREPANCY WITH THE CONSTRUCTION DOCUMENTS, OR DOUBTS AS TO THE INTERPRETATION OF SAID DOCUMENTS, THE ARCHITECT SHALL BE IMMEDIATELY NOTIFIED AND CONSULTED FOR CLARIFICATION PRIOR TO CONSTRUCTION OR INSTALLATION.
2. CONTRACTOR SHALL BE HELD RESPONSIBLE FOR ANY DAMAGES INFLICTED TO THE OWNER'S PROPERTY OR OTHER AREAS DURING THE EXECUTION OF THE WORK
3. THE CONTRACTOR SHALL SUBMIT TO THE ARCHITECT ALL SHOP DRAWINGS FOR REVIEW PRIOR TO COMMENCEMENT OF THE WORK.
4. ALL MATERIALS AND CONSTRUCTION METHODS USED MUST COMPLY WITH ALL GOVERNING REGULATIONS AS SET FORTH BY THE PUERTO RICO PLANNING BOARD, AND ALL OTHER CONCERNED REGULATORY AGENCIES.
5. NEW CONSTRUCTION INCLUDING CONCRETE, MASONRY, PLASTER, DOORS, FRAMES AND MISCELLANEOUS UNFINISHED METALS (OTHER THAN STAINLESS STEEL) SHALL BE PAINTED UNLESS OTHERWISE INDICATED
6. THE CONSTRUCTION SITE SHALL BE MAINTAINED REASONABLY NEAT AND FREE FROM EXCESSIVE ACCUMULATION OF TRASH AND DEBRIS. ALL TRASH, DEBRIS, RUBBISH, ETC SHALL BE PROMPTLY REMOVED FROM SITE AND DISPOSED OF IN A LEGAL MANNER.
7. ALL STEEL CONSTRUCTION ELEMENTS ARE TO BE PRIMED WITH GALVANIZED METAL PRIMER AND PAINTED WITH AT LEAST TWO COATS OF ACRYLIC URETHANE ENAMEL. COLORS WILL BE DETERMINED BY ARCHITECT PRIOR TO COMMENCEMENT OF THE WORK.
8. ALL INTERIOR WALLS TO RECEIVE VINYL ACRYLIC LATEX PAINT COLORS WILL BE DETERMINED BY ARCHITECT PRIOR TO COMMENCEMENT OF THE WORK
9. ALL EXTERIOR CONCRETE AND MASONRY TO RECEIVE ACRYLIC LATEX PAINT BY MANUFACTURER. COLORS WILL BE DETERMINED BY ARCHITECT PRIOR TO COMMENCEMENT OF THE WORK
10. BEFORE COMMENCING WORK, THE CONTRACTOR SHALL FILE ALL REQUIRED INSURANCE CERTIFICATES WITH THE DEPARTMENT OF BUILDINGS, AND OBTAIN ALL REQUIRED PERMITS
11. MINOR DETAILS NOT USUALLY SHOWN OR SPECIFIED, BUT REQUIRED FOR PROPER CONSTRUCTION OF ANY PART OF THE WORK SHALL BE INCLUDED IF THEY WERE INDICATED IN THE DRAWINGS
12. THE CONTRACTOR SHALL COORDINATE ALL WORK PROCEDURES WITH THE STIPULATIONS OF LOCAL AUTHORITIES, BUILDING MANAGEMENT OR BOARD OF DIRECTORS.
13. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROTECTION OF ALL CONDITIONS AND MATERIALS WITHIN THE PROPOSED CONSTRUCTION AREA. THE CONTRACTOR SHALL DESIGN AND INSTALL ADEQUATE SHORING AND BRACING FOR ALL STRUCTURAL OR REMOVAL TASKS. THE CONTRACTOR SHALL HAVE SOLE RESPONSIBILITY FOR ANY DAMAGE OR INJURIES CAUSE BY OR DURING THE EXECUTION OF THE WORK
14. THE CONTRACTOR SHALL LAY OUT HIS OWN WORK, AND SHALL PROVIDE ALL DIMENSIONS REQUIRED FOR OTHER TRADES, PLUMBING, ELECTRICAL, ETC.
15. PLUMBING WORK SHALL BE PERFORMED BY PERSONS LICENSED IN THEIR TRADES, WHO SHALL ARRANGE FOR AND OBTAIN THROUGH THE DEPARTMENT OF BUILDINGS ALL REQUIRED PERMITS, INSPECTIONS, AND REQUIRED SIGN OFFS
16. ELECTRICAL WORK SHALL BE PERFORMED BY PERSONS LICENSED IN THEIR TRADES, WHO SHALL ARRANGE FOR AND OBTAIN THROUGH THE BUREAU ELECTRICAL CONTROLS ALL REQUIRED PERMITS, INSPECTIONS AND REQUIRE DESIGN SIGN-OFFS.
17. THE CONTRACTOR SHALL DO ALL CUTTING, PATCHING, REPAIRING AS REQUIRED TO PERFORM ALL OF THE WORK INDICATED ON THE DRAWINGS, AND ALL OTHER WORK THAT MAY BE REQUIRED TO COMPLETE THE JOB.
